

C/WEB programs in “T_EX Live 2021”

Introduction

Welcome to “All Things WEB” in “T_EX Live.”

Here you find the documented source code of all major WEB and CWEB programs in readable format. The “named” entries represent the unmodified base sources, the attached “chg” links point to “only the changed sections (or modules),” so you may want to study these pairs in parallel. Care has been taken to keep the section numbers for the main parts intact.

Although not all the programs here are written or maintained by Donald Knuth, it is more convenient for everything to be collected in one place for reading and searching. And they all stem from the system that Knuth created.

Note that all WEB programs are mogrified from Pascal code to C code before compilation, so further modifications and amendments will occur “for the real thing,” i.e., the production of the executable WEB programs. (The CWEB programs do not require these extra modifications, they get linked directly to the external runtime environment.)

If you believe to have found anything that remains technically, historically, typographically, or politically incorrect, please feel free to [report bugs in T_EX and friends](#).

Canonical Knuthian WEB programs

- etc/ [[VFtoVP](#) chg | [VPtoVF](#) chg]
- mf/ [[Metafont](#) chg | [TRAPMAN](#)]
- mfware/ [[GFtype](#) chg | [GFtoPK](#) chg | [GFtoDVI](#) chg | [MFT](#) chg]
- tex/ [[GLUE](#) | [TeX](#) chg | [TRIPMAN](#)]
- texware/ [[POOLtype](#) chg | [TFtoPL](#) chg | [PLtoTF](#) chg | [DVIttype](#) chg]
- web/ [[WEBMAN](#) | [WEAVE](#) chg | [TANGLE](#) chg]

Complementary WEB programs

- other/ [[DVICopy](#) chg | [PatGen](#) chg | [PKtoGF](#) chg | [PKtype](#) chg]
- bibtex/ [[BibTeX](#) chg]
- pdftex/ [[pdfTeX](#) chg]
- xetex/ [[XeTeX](#) chg]

CWEB programs

- cweb/ [[CWEBMAN](#) | [COMMON](#) chg | [CTANGLE](#) chg | [CWEAVE](#) chg | [CTWILL](#) | [REFSORT](#) chg | [TWINX](#) chg]
- ctie/ [[CTIE](#) chg]
- tie/ [[TIE](#) chg]

Errata for “Computers & Typesetting”
