

L^AT_EX Class for the Association for Computing Machinery^{}*

Boris Veytsman[†]

2020/11/15, v1.75

Abstract

This package provides a class for typesetting publications of the Association for Computing Machinery.

1 Introduction

The Association for Computing Machinery¹ is the world’s largest educational and scientific computing society, which delivers resources that advance computing as a science and a profession. It was one of the early adopters of \TeX for its typesetting.

It provided several different classes for a number of journals and conference proceedings. Unfortunately during the years since these classes were written, the code was patched many times, and supporting different versions of the classes became difficult.

This package provides the uniform interface for all ACM publications. It is intended to replace all the different classes and packages and provide an up-to-date \LaTeX package.

This package uses only free \TeX packages and fonts included in $\text{\TeX}Live$, Mik \TeX and other popular \TeX distributions. It is intended to be published in these distributions itself, which minimizes users’ efforts in the installation and support of this package.

I am grateful to Michael D. Adams, Leif Andersen, Lawrence Christopher Angrave, Dirk Beyer, Andrew Black, Joachim Breitner, Benjamin Byholm, John Collins, Nils Anders Danielsson, Michael Ekstrand, Matthew Fluet, Paolo G. Giarrusso, Ben Greenman, Enrico Gregorio, Jamie Davis, Jason Hemann, Peter Kemp, Luis Leiva, Ben Liblit, Rholais Lii, LianTze Lim, Kuldeep S. Meel, Kai Mindermann, Frank Mittelbach, Serguei Mokhov, Ross Moore, John Owens, Joel Nider, Scott Pakin, Tobias Pape, Henning Pohl, Philip Quinn, Mathias Rav, Andreas Reichinger, Matteo Riondato, Craig Rodkin, Bernard Rous, Feras Saad, Kerry A. Seitz, Jr., David Shamma, Gabriel Scherer, Kartik Singhal, Stephen Spencer, Shin Hwei Tan, Daniel Thomas, Shari Trewin, Zack Weinberg, John Wickerson and many others for their invaluable help.

The development version of the package is available at <https://github.com/borisveytsman/acmart>.

2 User’s guide

This class uses many commands and customizaton options, so it might appear intimidating for a casual user. Do not panic! Many of these commands and options can be safely left with their default values or the values recommended by your conference or journal editors. If you have problems or questions, do not hesitate to ask me directly or the community at <https://github.com/borisveytsman/acmart>, <https://tex.stackexchange.com> or the closest \TeX Users Group. The world-wide \TeX Users Group is at <https://tug.org/>; please consider joining us if you use \TeX regularly.

2.1 Installation

Most probably, you already have this package installed in your favorite \TeX distribution; if not, you may want to upgrade. You may need to upgrade it anyway since this package uses a number of relatively recent packages, especially the ones related to fonts.

The latest released version of this package can be found on CTAN: <https://www.ctan.org/pkg/acmart>. The development version can be found on GitHub: <https://github.com/borisveytsman/acmart>.

¹<http://www.acm.org/>

github.com/borisveytsman/acmart. At this address you can file a bug report—or even contribute your own enhancement by making a pull request.

Please note that the version on Github is a development (or experimental) version: please download it for testing new features. The production version is the one on CTAN and ACM sites.

Most users should not attempt to install this package themselves but should rather rely on their \TeX distributions to provide it. If you decide to install the package yourself, follow the standard rules:

1. Run `latex acmart.ins`. This will produce the file `acmart.cls`
2. Put the files `acmart.cls` and `ACM-Reference-Format.bst` in places where \LaTeX can find them (see [1] or the documentation for your \TeX system).
3. Update the database of file names. Again, see [1] or the documentation for your \TeX system for the system-specific details.
4. The file `acmart.pdf` provides the documentation for the package. (This is probably the file you are reading now.)

As an alternative to items 2 and 3 you can just put the files in the working directory where your `.tex` file is.

This class uses a number of other packages. They are included in all major \TeX distributions ($\text{\TeX}Live$, Mac \TeX , Mik \TeX) of 2015 and later, so you probably have them installed. Just in case here is the list of these packages:

- *amscls*, <http://www.ctan.org/pkg/amscls>
- *amsfonts*, <http://www.ctan.org/pkg/amsfonts>
- *amsmath*, <http://www.ctan.org/pkg/amsmath>
- *binhex*, <http://www.ctan.org/pkg/binhex>
- *balance*, <http://www.ctan.org/pkg/balance>
- *booktabs*, <http://www.ctan.org/pkg/booktabs>
- *caption*, <http://www.ctan.org/pkg/caption>
- *comment*, <http://www.ctan.org/pkg/comment>
- *cm-super*, <http://www.ctan.org/pkg/cm-super>
- *cmap*, <http://www.ctan.org/pkg/cmap>
- *draftwatermark*, <http://www.ctan.org/pkg/draftwatermark>
- *environ*, <http://www.ctan.org/pkg/environ>
- *etoolbox*, <http://www.ctan.org/pkg/etoolbox>

- *fancyhdr*, <http://www.ctan.org/pkg/fancyhdr>
- *float*, <http://www.ctan.org/pkg/float>
- *fontaxes*, <http://www.ctan.org/pkg/fontaxes>
- *geometry*, <http://www.ctan.org/pkg/geometry>
- *graphics*, <http://www.ctan.org/pkg/graphics>
- *hyperref*, <http://www.ctan.org/pkg/hyperref>
- *hyperxmp*, <http://www.ctan.org/pkg/hyperxmp>
- *iftex*, <http://www.ctan.org/pkg/iftex>
- *inconsolata*, <http://www.ctan.org/pkg/inconsolata>
- *libertine*, <http://www.ctan.org/pkg/libertine>
- *manyfoot*, <http://www.ctan.org/pkg/manyfoot>
- *microtype*, <http://www.ctan.org/pkg/microtype>
- *mmap*, <http://www.ctan.org/pkg/mmap>
- *ms*, <http://www.ctan.org/pkg/ms>
- *mweights*, <http://www.ctan.org/pkg/mweights>
- *natbib*, <http://www.ctan.org/pkg/natbib>
- *nccfoots*, <http://www.ctan.org/pkg/nccfoots>
- *newtx*, <http://www.ctan.org/pkg/newtx>
- *oberdiek*, <http://www.ctan.org/pkg/oberdiek>
- *pdftex-def*, <http://www.ctan.org/pkg/pdftex-def>
- *refcount*, <http://www.ctan.org/pkg/refcount>
- *setspace*, <http://www.ctan.org/pkg/setspace>
- *textcase*, <http://www.ctan.org/pkg/textcase>
- *totpages*, <http://www.ctan.org/pkg/totpages>
- *trimspaces*, <http://www.ctan.org/pkg/trimspaces>
- *upquote*, <http://www.ctan.org/pkg/upquote>
- *url*, <http://www.ctan.org/pkg/url>
- *xcolor*, <http://www.ctan.org/pkg/xcolor>
- *xkeyval*, <http://www.ctan.org/pkg/xkeyval>
- *xstring*, <http://www.ctan.org/pkg/xstring>

2.2 Invocation and options

To use this class, put in the preamble of your document

```
\documentclass[<options>]{acmart}
```

There are several options corresponding to the type of the document and its general appearance. They are described below. Generally speaking, the options have key=value forms, for example,

```
\documentclass[format=acmsmall, screen=true, review=false]{acmart}
```

The option `format` describes the format of the output. There are several possible values for this option, for example,

```
\documentclass[format=acmtog]{acmart}
```

Actually the words `format=` can be omitted, e.g.,

```
\documentclass[acmtog, review=false]{acmart}
```

The possible formats are listed in Table 1. Note that formats starting with `acm` are intended for journals and transactions, while formats starting with `sig` are intended for proceedings published as books.

Note that sometimes conference proceedings are published as a special issue (or issues) of an ACM journal. In this case, you should use the journal format for a conference paper. Please contact your conference committee if in doubt.

Starting in 2020, ACM retired formats `sigchi` and `sigchi-a`. SIGCHI conferences now use `sigconf` format for their publications. If a file uses `sigchi` format, a warning is issued, and the format is automatically switched to `sigconf`. Format `sigchi-a` can be used for non-ACM documents only (see Section 2.17).

There are several Boolean options that can take `true` or `false` values. They are listed in Table 2. The words `=true` can be omitted when setting a Boolean option, so instead of `screen=true` one can write just `screen`, for example,

```
\documentclass[acmsmall, screen, review]{acmart}
```

The option `review` is useful when combined with the `manuscript` format option. It provides a version suitable for reviewers and copy editors.

Two samples in the `samples` directory, `manuscript` and `acmsmall-submission`, show manuscripts formatted for submission to ACM.

The default for the option `screen` depends on the publication. At present it is `false` for all publications *but* PACM, since PACM is now electronic-only. Thus PACM titles (see Table 5) set this option to `true`. In the future this option may involve additional features suitable for on-screen versions of articles.

The option `natbib` is used when the corresponding `BIBTEX` style is based on `natbib`. In most cases you do not need to set it. See Section 2.11.

Table 1: The possible values for the `format` option

| Value | Meaning |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <code>manuscript</code> | A manuscript. This is the default. |
| <code>acmsmall</code> | Small single-column format. Used for CIE, CSUR, JACM, JDIQ, JEA, JERIC, JETC, PACMCGIT, PACMHCI, PACMPL, TAAS, TACCESS, TACO, TALG, TALLIP (formerly TALIP), TCPS, TDS, TEAC, TECS, TELO, THRI, TIIS, TIOT, TISSEC, TIST, TKDD, TMIS, TOCE, TOCHI, TOCL, TOCS, TOCT, TODAES, TODS, TOIS, TOIT, TOMACS, TOMM (formerly TOMCCAP), TOMPECS, TOMS, TOPC, TOPLAS, TOPS, TOS, TOSEM, TOSN, TQC, TRETS, TSAS, TSC, TSLP and TWEB, including special issues. |
| <code>acmlarge</code> | Large single-column format. Used for DTRAP, HEALTH, IMWUT, JOCCCH, POMACS and TAP, including special issues. |
| <code>acmtog</code> | Large double-column format. Used for TOG, including annual conference Technical Papers. |
| <code>sigconf</code> | Proceedings format for most ACM conferences (with the exceptions listed below) and all ICPS volumes. |
| <code>sigplan</code> | Proceedings format for SIGPLAN conferences. |

The option `anonymous` is used for anonymous review processes and causes all author information to be obscured.

The option `timestamp` is used to include a time stamp in the footer of each page. When preparing a document, this can help avoid confusing different revisions. The footer also includes the page range of the document. This helps detect missing pages in hard copies.

The option `authordraft` is intended for author's drafts that are not intended for distribution. It typesets a copyright block to give the author an idea of its size and the overall size of the paper but overprints it with the phrase "Unpublished working draft. Not for distribution.", which is also used as a watermark. This option sets `timestamp` and `review` to `true`, but these can be overridden by setting these options to `false` *after* setting `authordraft` to `true`.

The option `balance` determines whether the last page in the two column mode has balanced columns. By default it is `true`; however, it may lead to problems for some documents. Set it to `false` if you encounter compilation errors. Note that for one page documents `\balance` command might cause problems.

The option `urlbreakonhyphens` determines whether URLs can be split between lines after hyphens. By default it is `true`. Set it to `false` to disallow these breaks.

2.3 Top matter

A number of commands set up *top matter* or (in computer science jargon) *metadata* for an article. They establish the publication name, article title, authors, DOI and other data. Some of these commands, like `\title` and `\author`, should be put by the authors.

Table 2: Boolean options

| Option | Default | Meaning |
|-------------------|----------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| review | false | A review version: lines are numbered and hyperlinks are colored |
| screen | see text | A screen version: hyperlinks are colored |
| natbib | true | Whether to use the natbib package (see Section 2.11) |
| anonymous | false | Whether to make author(s) anonymous |
| authorversion | false | Whether to generate a special version for the authors' personal use or posting (see Section 2.3) |
| nonacm | false | Use the class typesetting options for a non-ACM document, which will not include the conference/journal header and footers or permission statements |
| timestamp | false | Whether to put a time stamp in the footer of each page |
| authordraft | false | Whether author's-draft mode is enabled |
| acmthm | true | Whether to define theorem-like environments, see Section 2.7 |
| balance | true | Whether to balance the last page in two column mode |
| urlbreakonhyphens | true | Whether to break urls on hyphens |

Others, like \acmVolume and \acmDOI—by the editors. Below we describe these commands and mention who should issue them. These macros should be used *before* the \maketitle command. Note that in previous versions of ACM classes some of these commands should be used before \maketitle, and some after it. Now they all must be used before \maketitle.

This class internally loads the amsart class, so many top-matter commands are inherited from amsart [2].

\acmJournal The macro \acmJournal{<shortName>} sets the name of the journal or transaction for journals and transactions. The argument is the short name of the publication *in uppercase*, for example,

```
\acmJournal{TOMS}
```

The currently recognized journals are listed in Table 5. Note that conference proceedings published in *book* form do not set this macro.

\acmConference The macro \acmConference[<short name>]{<name>}{<date>}{<venue>} is used for conference proceedings published in the book form. The arguments are the following:

short name: the abbreviated name of the conference (optional).

name: the name of the conference.

date: the date(s) of the conference.

venue: the place of the conference.

Examples:

```
\acmConference[TD'15]{Technical Data Conference}{November  
12--16}{Dallas, TX, USA}  
\acmConference{SA'15 Art Papers}{November 02--06, 2015}{Kobe, Japan}
```

\acmBooktitle By default we assume that conference proceedings are published in the book named *Proceedings of CONFERENCE*, where CONFERENCE is the name of the conference inferred from the command \acmConference above. However, sometimes the book title is different. The command \acmBooktitle can be used to set this title, for example,

```
\acmBooktitle{Companion to the first International Conference on the  
Art, Science and Engineering of Programming (Programming '17)}
```

An ACM paper should have either \acmJournal or \acmConference command. If it has both (or more) commands, the last one takes precedence. Note that if you have the command \acmConference in a journal format like acmsmall, the class will use conference format for bibstrip and reference citation formatting. In the samples directory there is a file sample-acmsmall-conf.tex with the example of this usage.

\editor In most cases, conference proceedings are edited. You can use the command

`\editor{<editor>}` to set the editor of the volume. This command can be repeated, for example,

```
\editor{Jennifer B. Sartor}
\editor{Theo D'Hondt}
\editor{Wolfgang De Meuter}
```

`\title` The command `\title`, as in the `amsart` class, has two arguments: one optional, and one mandatory:

```
\title[<ShortTitle>]{<FullTitle>}
```

The mandatory argument is the full title of the article. The optional argument, if present, defines the shorter version of the title for running heads. If the optional argument is absent, the full title is used instead.

It is expected that this command is inserted by the author of the manuscript.

`\subtitle` Besides title, ACM classes allow a subtitle, set with the `\subtitle{<subtitle>}` macro.

The commands for specifying authors are highly structured. The reason is they serve double duty: the authors' information is typeset in the manuscript *and* is used by the metadata extraction tools for indexing and cataloguing. Therefore it is very important to follow the guidelines exactly.

`\author` The basic commands are `\author`, `\orcid` (for the researchers registered with ORCID, <http://www.orcid.org/>), `\affiliation` and `\email`. In the simplest case, you enter them in this order:
`\orcid`
`\affiliation`
`\email`

```
\author{...}
\orcid{...}
\affiliation{...}
\email{...}
```

Do *not* use the L^AT_EX `\and` macro or commas, or `\backslash` between the authors! Each author deserves his or her own `\author` command. An attempt to list several authors or their e-mails in one command leads to a warning or an error. This is not a bug, but the expected behavior.

Note that some formats do not typeset e-mails or ORCID identifiers. Do not worry: the metadata tools will get them.

Sometimes an author has several affiliations. In this case, the `\affiliation` command should be repeated:

```
\author{...}
\orcid{...}
\affiliation{...}
\affiliation{...}
\email{...}
```

Similarly you can repeat the `\email` command.

You may have several authors with the same affiliation, different affiliations, or overlapping affiliations (author A_1 is affiliated with institutions I_1 and I_2 , while author A_2 is affiliated with I_2 only, author A_3 is affiliated with I_1 and I_3 , etc.). The recommended solution is to put the \affiliation commands after each author, possibly repeating them:

```
\author{...}
\orcid{...}
\affiliation{...}
\affiliation{...}
\email{...}
\author{...}
\orcid{...}
\affiliation{...}
\email{...}
\author{...}
\orcid{...}
\affiliation{...}
\affiliation{...}
\email{...}
```

In some cases, when several authors share the same affiliation, you can try to save space using the format

```
\author{...}
\email{...}
\author{...}
\email{...}
\affiliation{...}
```

However, this format is not generally recommended.

\additionalaffiliation
In some cases, too many affiliations can take too much space. The command \additionalaffiliation{\langle affiliation\rangle} creates a footnote after an author's name with the words "Also with {\langle affiliation\rangle}". You should use this command only as a last resort. An example of usage is:

```
\author{G. Tobin}
\author{Ben Trovato}
\additionalaffiliation{%
    \institution{The Th{\o}rv{\\"a}ld Group}
    \streetaddress{1 Th{\o}rv{\\"a}ld Circle}
    \city{Hekla}
    \country{Iceland}}
\affiliation{%
    \institution{Institute for Clarity in Documentation}
    \streetaddress{P.O. Box 1212}
    \city{Dublin}
    \state{Ohio}}
```

```
\postcode{43017-6221}}
```

Here Trovato and Tobin share their affiliation with the Institute for Clarity in Documentation, but only Ben Trovato is affiliated with The Thørváld Group.

```
\position  
\institution  
\department  
\streetaddress  
    \city  
    \state  
\postcode  
\country
```

The `\affiliation` and `\additionalaffiliation` commands are further structured to interact with the metadata extraction tools. Inside these commands you should use the `\position`, `\institution`, `\department`, `\city`, `\streetaddress`, `\state`, `\postcode` and `\country` macros to indicate the corresponding parts of the affiliation. Note that in some cases (for example, journals) these parts are not printed in the resulting copy, but they *are* necessary since they are used by the XML metadata extraction programs. Do *not* put commas or `\,` between the elements of `\affiliation`. They will be provided automatically.

The fields `\institution`, `\city` and `\country` are mandatory. If they are not provided, an error or a warning is issued. Currently the absence of `\country` produces an error; ACM may change this in the future.

An example of the author block:

```
\author{A. U. Thor}  
\orcid{1234-4564-1234-4565}  
\affiliation{  
    \institution{University of New South Wales}  
    \department{School of Biomedical Engineering}  
    \streetaddress{Samuels Building (F25), Kensington Campus}  
    \city{Sidney}  
    \state{NSW}  
    \postcode{2052}  
    \country{Australia}}}  
\email{author@nsw.au.edu}  
\author{A. N. Other}  
\affiliation{  
    \institution{University of New South Wales}  
    \city{Sidney}  
    \state{NSW}  
    \country{Australia}}}  
\author{C. O. Respondent}  
\orcid{1234-4565-4564-1234}  
\affiliation{  
    \institution{University of Pennsylvania}  
    \city{Philadelphia}  
    \state{PA}  
    \country{USA}}}  
\affiliation{  
    \institution{University of New South Wales}  
    \city{Sidney}  
    \state{NSW}  
    \country{Australia}}}
```

Note that the old ACM conference formats did not allow more than six authors and

required some effort from authors to achieve alignment. The new format is much better in this.

Sometimes an author works in several departments within the same institution. There could be two situations: the departments are independent, or one department is within another. In the first case, just repeat the command `\department` several times. To handle the second case the command has an optional numerical parameter. The departments with higher numbers are higher in the organizational chart. Compare

```
\affiliation{%
  \department[0]{Department of Lunar Studies} % 0 is the default
  \department[1]{John Doe Institute} % higher than 0
  \institution{University of San Serriffe}
  \country{San Serriffe}}
```

and

```
\affiliation{%
  \department{Department of Lunar Studies} % Not in the John Doe Institute!
  \department{John Doe Institute}
  \institution{University of San Serriffe}
  \country{San Serriffe}}
```

The command `\affiliation` formats its output according to American conventions. This might be wrong for some cases. Consider, for example, a German address. In Germany, the postcode is put before the city and is not separated by a comma. We can handle this order using

```
\affiliation{%
  \institution{Fluginstitut}
  \streetaddress{Sonnenallee 17}
  \postcode{123456}
  \city{Helm}
  \country{Germany}}
```

However, the comma after the postcode is unfortunate: the address will be typeset (in some formats) as

```
Fluginstitut
Sonenallee 17
123456, Helm, Germany
```

To overcome this problem, the command `\affiliation` has an optional parameter `obeypunctuation`, which can be `false` (the default) or `true`. If this parameter is `true`, `\affiliation` obeys the author's command. Thus

```
\affiliation[obeypunctuation=true]{%
  \institution{Fluginstitut}}\%
```

```
\streetaddress{Sonnenallee 17}\\\ 
\postcode{123456}\\\ 
\city{Helm},\\\ 
\country{Germany}}
```

will be typeset as

```
Fluginstitut
Sonnenallee 17
123456 Helm, Germany
```

Note that you should *not* use this option for journals.

It is expected that these commands are inserted by the author of the manuscript.

`\thanks`

Like `amsart` (and unlike standard L^AT_EX), we allow `\thanks` only *outside* of the commands `\title` and `\author`. This command is obsolete and should *not* be used in most cases. Do not list your acknowledgments or grant sponsors here. Put this information in the `acks` environment (see Section 2.10).

`\authorsaddresses`

In some formats, addresses are printed as a footnote on the first page. By default L^AT_EX typesets them itself using the information you give it. However, you can override its choice using the command `\authorsaddresses{<contact addresses>}`, for example,

```
\authorsaddresses{%
Authors' addresses: G.~Zhou, Computer Science Department, College of
William and Mary, 104 Jameson Rd, Williamsburg, PA 23185, US;
V.~B\'eranger, Inria Paris-Rocquencourt, Rocquencourt, France;
A.~Patel, Rajiv Gandhi University, Rono-Hills, Doimukh, Arunachal
Pradesh, India; H.~Chan, Tsinghua University, 30 Shuangqing Rd,
Haidian Qu, Beijing Shi, China; T.~Yan, Eaton Innovation Center,
Prague, Czech Republic; T.~He, C.~Huang, J.~A.~Stankovic University
of Virginia, School of Engineering Charlottesville, VA 22903, USA;
T. F. Abdelzaher, (Current address) NASA Ames Research Center,
Moffett Field, California 94035.}
```

You can *suppress* printing authors' addresses by setting them to an empty string: `\authorsaddresses{}`. Please note that authors' addresses are mandatory for journal articles.

`\titlenote`
`\subtitlenote`
`\authornote`

While the command `\thanks` generates a note without a footnote mark, sometimes the authors might need notes more tightly connected to the title, subtitle or author. The commands `\titlenote`, `\subtitlenote` and `\authornote` that follow the corresponding commands (`\title`, `\subtitle` and `\author`) generate such notes. For example,

```
\title{This is a title}
\titlenote{This is a titlenote}
\author{A. U. Thor}
\authornote{This is an authornote}
```

\authornotemark

Please never use a \footnote inside an \author or \title command since this confuses the metadata extraction software. (Actually these commands now produce errors.)

Sometimes one may need to have the same footnote connected to several authors. The command \authornotemark[<number>] adds just the footnote mark, for example,

```
\author{A. U. Thor}
\authornote{Both authors contributed equally to the paper}
...
\author{A. N. Other}
\authornotemark[1]
```

The correct numbering of these marks is the responsibility of the user.

\acmVolume
\acmNumber
\acmArticle
 \acmYear
 \acmMonth

The macros \acmVolume, \acmNumber, \acmArticle, \acmYear and \acmMonth are inserted by the editor and set the journal volume, issue, article number, year and month correspondingly. The arguments of all these commands, including \acmMonth, is numerical. For example,

```
\acmVolume{9}
\acmNumber{4}
\acmArticle{39}
\acmYear{2010}
\acmMonth{3}
```

Note that \acmArticle is used not only for journals but also for some conference proceedings.

\acmArticleSeq

The articles in the same issue of a journal have a *sequence number*. It is used to vertically position the black blob on the first page of some formats. By default it is the same as the article number, but the command \acmArticleSeq{<n>} can be used to change it:

```
\acmArticle{39} % The sequence number will be 39 by default
\acmArticleSeq{5} % We redefine it to 5
```

Setting this number to zero suppresses the blob.

\acmSubmissionID

If your paper got a Submission ID from the Conference Management System, put it here:

```
\acmSubmissionID{123-A56-BU3}
```

\acmPrice

The macro \acmPrice{<price>} sets the price for the article, for example,

```
\acmPrice{25.00}
```

Note that you do not need to put the dollar sign here, just the amount. By default the price is \$15.00, unless the copyright is set to usgov, rightsretained, iw3c2w3, or iw3c2w3g, when it is suppressed. Note that to override the defaults you need to set the

price *after* the `\setcopyright` command. Also, the command `\acmPrice{}` suppresses the printing of the price.

`\acmISBN` Book-like volumes have ISBN numbers attached to them. The macro `\acmISBN{<ISBN>}` sets it. Normally it is set by the typesetter, for example,

```
\acmISBN{978-1-4503-3916-2}
```

Setting it to the empty string, as `\acmISBN{}`, suppresses printing the ISBN.

`\acmDOI` The macro `\acmDOI{<DOI>}` sets the DOI of the article, for example,

```
\acmDOI{10.1145/9999997.9999999}
```

It is normally set by the typesetter. Setting it to the empty string, as `\acmDOI{}`, suppresses the DOI.

`\acmBadgeR` Some conference articles get special distinctions, for example, the artifact evaluation for PPoPP 2016 (see <http://ctuning.org/ae/ppopp2016.html>). These articles display special badges supplied by the conference organizers. This class provides commands to add these badges: `\acmBadgeR[<url>]{<graphics>}` and `\acmBadgeL[<url>]{<graphics>}`. The first command puts the badge to the right of the title, and the second one—to the left. The arguments have the following meaning: `[<url>]`, if provided, sets the link to the badge authority in the screen version, while `{<graphics>}` sets the graphics file with the badge image. The file must be a cropped square, which is scaled to a standard size in the output. For example, if the badge image is `ae-logo.pdf`, the command is

```
\acmBadgeR[http://ctuning.org/ae/ppopp2016.html]{ae-logo}
```

`\startPage` The macro `\startPage{<page>}` sets the first page of the article in a journal or book. It is used by the typesetter.

`\terms` The command `\keywords{<keyword, keyword,...>}` sets keywords for the article.

`\keywords` They must be separated by commas, for example,

```
\keywords{wireless sensor networks, media access control,  
multi-channel, radio interference, time synchronization}
```

`\ccsdesc` ACM publications are classified according to the ACM Computing Classification Scheme (CCS). CCS codes are used both in the typeset version of the publications *and* in the metadata in various databases. Therefore you need to provide both TeX commands and XML metadata with the paper.

The tool at <http://dl.acm.org/ccs.cfm> can be used to generate CCS codes. After you select the topics, click on “Generate CCS codes” to get results like the following:

```
\begin{CCSXML}  
<ccs2012>  
<concept>  
<concept_id>10010520.10010553.10010562</concept_id>  
<concept_desc>Computer systems organization~Embedded systems</concept_desc>
```

```

<concept_significance>500</concept_significance>
</concept>
<concept>
<concept_id>10010520.10010575.10010755</concept_id>
<concept_desc>Computer systems organization~Redundancy</concept_desc>
<concept_significance>300</concept_significance>
</concept>
<concept>
<concept_id>10010520.10010553.10010554</concept_id>
<concept_desc>Computer systems organization~Robotics</concept_desc>
<concept_significance>100</concept_significance>
</concept>
<concept>
<concept_id>10003033.10003083.10003095</concept_id>
<concept_desc>Networks~Network reliability</concept_desc>
<concept_significance>100</concept_significance>
</concept>
</ccs2012>
\end{CCSXML}

\ccsdesc[500]{Computer systems organization~Embedded systems}
\ccsdesc[300]{Computer systems organization~Redundancy}
\ccsdesc{Computer systems organization~Robotics}
\ccsdesc[100]{Networks~Network reliability}

```

You just need to copy this code and paste it in your paper anywhere before \maketitle.

CCS Concepts and user-defined keywords are required for all articles over two pages in length, and are optional for one- and two-page articles (or abstracts).

\setcopyright

There are several possibilities for the copyright of the papers published by the ACM: the authors may transfer the rights to the ACM, license them to the ACM, some or all authors might be employees of the US or Canadian governments, etc. Accordingly the command \setcopyright{...} is introduced. Its argument is the copyright status of the paper, for example, \setcopyright{acmcopyright}. The possible values for this command are listed in Table 3. This command must be placed in the preamble, before \begin{document}.

\copyrightyear

The ACM submission software should generate the right command for you to paste into your file.

Each copyright statement must have the year of copyright. By default it is the same as \acmYear, but you can override this using the macro \copyrightyear, e.g.,

```

\acmYear{2016}
\copyrightyear{2015}

```

There is a special case for a personal copy that the authors may be allowed to generate for their use or a posting on a personal site (check the instructions for the specific journal or conference for the details). The document option authorversion=true produces

Table 3: Parameters for the \setcopyright command

| Parameter | Meaning |
|--------------------|--------------------------------------------------------------------------------------------------------------------|
| none | The copyright and permission information is not typeset. (This is the option for some ACM conferences.) |
| acmcopyright | The authors transfer the copyright to the ACM (the “traditional” choice). |
| acmlicensed | The authors retain the copyright but license the publication rights to ACM. |
| rightsretained | The authors retain the copyright and publication rights to themselves or somebody else. |
| usgov | All the authors are employees of the US government. |
| usgovmixed | Some authors are employees of the US government. |
| cagov | All the authors are employees of the Canadian government. |
| cagovmixed | Some authors are employees of the Canadian government. |
| licensedusgovmixed | Some authors are employees of the US government, and the publication rights are licensed to ACM. |
| licensedcagov | All the authors are employees of the Canadian government, and the publication rights are licensed to ACM. |
| licensedcagovmixed | Some authors are employees of the Canadian government, and the publication rights are licensed to ACM. |
| othergov | Authors are employees of a government other than the US or Canada. |
| licensedothergov | Authors are employees of a government other than the US or Canada, and the publication rights are licensed to ACM. |
| iw3c2w3 | Special statement for conferences organized by IW3C2. |
| iw3c2w3g | Special statement for conferences organized by IW3C2, when some authors are approved Google employees. |

a special form of the copyright statement for this case. Note that you still need the `\setcopyright` command and (optionally) `\copyrightyear` command to tell \TeX about the copyright owner and year. Also, you should be aware that due to the different sizes of the permission blocks for the printed version and authors' version, the page breaks might be different between them.

`abstract`

The environment `abstract` must *precede* the `\maketitle` command. Again, this is different from the standard \TeX . Putting `abstract` after `\maketitle` will trigger an error.

`teaserfigure`

A special kind of figure is used for many two-column conference proceedings. This figure is placed just after the authors but before the main text. The environment `teaserfigure` is used for these figures. This environment must be used *before* `\maketitle`, for example,

```
\begin{teaserfigure}
  \includegraphics[width=\textwidth]{sampleteaser}
  \caption{This is a teaser}
  \label{fig:teaser}
\end{teaserfigure}
```

`\settopmatter`

Some information in the top matter is printed for certain journals or proceedings and suppressed for others. You can override these defaults using the command `\settopmatter{\{settings\}}`. The settings and their meanings are listed in Table 4. For example,

```
\settopmatter{printacmref=false, printccs=true, printfolios=true}
```

The parameter `authorsperrow` requires some explanation. In conference proceedings authors' information is typeset in boxes, several boxes per row (see `sample-sigconf.pdf`, `sample-sigplan.pdf`, etc.). The number of boxes per row is determined automatically. If you want to override this, you can do it using this parameter, for example,

```
\settopmatter{authorsperrow=4}
```

However, in most cases you should *not* do this and should use the default settings. Setting `authorsperrow` to 0 will revert it to the default settings.

The parameter `printacmref` specifies whether to print the ACM bibliographic entry (default), or not. Note that this entry is required for all articles over one page in length, and is optional for one-page articles (abstracts).

`\received`

The command `\received[\{stage\}]\{\{date\}\}` sets the history of the publication. The `[\{stage\}]` argument is optional; the default is Received for the first date and revised for the subsequent ones. For example,

```
\received{February 2007}
\received[revised]{March 2009}
\received[accepted]{June 2009}
```

Table 4: Settings for the \settopmatter command

| Parameter | Values | Meaning |
|---------------|------------|--------------------------------------------------------------------------------|
| printccs | true/false | Whether to print CCS categories |
| printacmref | true/false | Whether to print the ACM bibliographic entry |
| printfolios | true/false | Whether to print page numbers (folios) |
| authorsperrow | numeric | Number of authors per row for the title page in conference proceedings formats |

\maketitle
\shortauthors

The macro \maketitle must be the last command in the top-matter group. That is it must follow the commands defined in this section.

After the command \maketitle, the macro \shortauthors stores the names of the authors for the running head. You can redefine it if the list of author's name is too long, e.g.,

```
\maketitle
\renewcommand{\shortauthors}{Zhou et al.}
```

2.4 Algorithms

There are now several good packages for typesetting algorithms [3, 4, 5], and the authors are free to choose their favorite one.

2.5 Figures and tables

The new ACM styles use the standard L^AT_EX interface for figures and tables. There are some important items to be aware of, however.

1. The captions for figures must be entered *after* the figure bodies and for tables *before* the table bodies.
2. The ACM uses the standard types for figures and tables and adds several new ones. In total there are the following types:

figure, table: a standard figure or table taking a full text width in one-column formats and one column width in two-column formats.

figure*, table* in two-column formats, a special figure or table taking a full text width.

teaserfigure: a special figure before \maketitle.

3. Accordingly, when scaling images, one should use the following sizes:
 - (a) For teaserfigure, figure in one-column mode or figure* in two-column mode, use \textwidth. In one-column mode, you can also use \columnwidth, which coincides with \textwidth in this case.

(b) For figure in two-column mode, use `\columnwidth`.

It is strongly recommended to use the package `booktabs` [6] and follow its main principles of typography with respect to tables:

1. Never, ever use vertical rules.
2. Never use double rules.

It is also a good idea not to overuse horizontal rules.

For table *footnotes* you have several options described in the TeX FAQ [1]. The simplest one is to use a `\minipage` environment:

```
\begin{table}
\caption{Simulation Configuration}
\label{tab:conf}
\begin{minipage}{\columnwidth}
\begin{center}
\begin{tabular}{ll}
\toprule
TERRAIN\footnote{This is a table footnote. This is a table footnote. This is a table footnote.} & \\
(200\,,m$\times$200\,,m) Square\\
Node Number & 289\\
Node Placement & Uniform\\
Application & Many-to-Many/Gossip CBR Streams\\
Payload Size & 32 bytes\\
Routing Layer & GF\\
MAC Layer & CSMA/MMSN\\
Radio Layer & RADIO-ACCNOISE\\
Radio Bandwidth & 250Kbps\\
Radio Range & 20m--45m\\
\bottomrule
\end{tabular}
\end{center}
\bigskip
\footnotesize\emph{Source:} This is a table
sourcenote. This is a table sourcenote. This is a table
sourcenote.

\emph{Note:} This is a table footnote.
\end{minipage}
\end{table}
```

Tables and figures are by default centered. However, in some cases (for example, when you use several subimages per figure) you may need to override this. A good way to do so is to put the contents into a `\minipage` of the width `\columnwidth`.

2.6 Descriptions of images

\Description Some readers of ACM publications might be visually challenged. These readers might use a voice-over software to read aloud the papers. It is important to provide them a description of each image used in the paper.

The command `\Description[<short description>]{<long description>}` should be placed inside every `figure`, `teaserfigure` or `marginfigure` environment to provide a description of the image(s) used in the figure. Unlike `\caption`, which is used alongside the image, `\Description` is intended to be used instead of the image, for example,

```
\begin{figure}
    \centering
    \includegraphics{voltage}
    \Description{A bell-like histogram centered at $0.5\$^V$ with most
    measurements between $0.2\$^V$ and $0.8\$^V$}
    \caption{Histogram of the measurements of voltage}
    \label{fig:voltage}
\end{figure}
```

At present the lack of descriptions generates a warning at compilation.

2.7 Theorems

The ACM classes define two theorem styles and several pre-defined theorem environments:

acmplain: this is the style used for `theorem`, `conjecture`, `proposition`, `lemma` and `corollary`, and

acmdefinition: this is the style used for `example` and `definition`.

These environments are defined by default. In the unusual circumstance that a user does not wish to have these environments defined, the option `acmthm=false` in the preamble will suppress them.

2.8 Online-only and offline-only material

`printonly` Some supplementary material in ACM publications is put online but not in the printed version. The text inside the environment `screenonly` will be typeset only when the option `screen` (see Section 2.2) is set to `true`. Conversely, the text inside the environment `printonly` is typeset only when this option is set to `false`. For example,

```
\section{Supplementary materials}

\begin{printonly}
    Supplementary materials are available in the online version of this paper.
\end{printonly}

\begin{screenonly}
```

```
(The actual supplementary materials.)
\end{screenonly}
```

We use the `comment` package for typesetting this code, so `\begin` and `\end` should start on a line of their own with no leading or trailing spaces.

2.9 Note about anonymous mode

`anonsuppress` When the option `anonymous` is selected, TeX suppresses author information (including the number of authors) for a blind review. However, sometimes the information identifying the authors may be present in the body of the paper. For example,

```
\begin{anonsuppress}
This is the continuation of the previous work by the author
\cite{prev1, prev2}.
\end{anonsuppress}
```

As for the `printonly` and `screenonly` environments, `\begin{anonsuppress}` and `\end{anonsuppress}` should start on a line of their own with no leading or trailing spaces.

2.10 Acknowledgments

The traditional “Acknowledgments” section is conventionally used to thank persons and granting agencies for their help and support. However, there are several important considerations about this section.

First, in anonymous mode this section must be omitted: it gives too much information to reviewers. Second, data about grants is extracted and stored separately by the postprocessing software. ACM classes provide facilities for both these tasks.

The environment `acks` starts an unnumbered section “Acknowledgments” unless the anonymous mode is chosen. Put all thanks inside this environment.

As for the `printonly` and `screenonly` environments, `\begin{acks}` and `\end{acks}` should start on a line of their own with no leading or trailing spaces.

All financial support *must* be listed using the commands `\grantsponsor` and `\grantnum`. These commands tell the postprocessing software about the granting organization and grant. The format of these commands is the following:

```
\grantsponsor{\langle sponsorID \rangle}{\langle name \rangle}{\langle url \rangle}
\grantnum[\langle url \rangle]{\langle sponsorID \rangle}{\langle number \rangle}.
```

Here `\langle sponsorID \rangle` is the unique ID used to match grants to sponsors, `\langle name \rangle` is the name of the sponsor, `\langle url \rangle` is its URL, and `\langle number \rangle` is the grant number. The `\langle sponsorID \rangle` of the `\grantnum` command must correspond to the `\langle sponsorID \rangle` of a `\grantsponsor` command. Some awards have their own web pages, which you can include using the optional argument of the `\grantnum` command.

At present {*sponsorID*} is chosen by the authors and can be an arbitrary key in the same way the label of a \cite is arbitrarily chosen. There might be a change to this policy if the ACM decides to create a global database of sponsoring organizations.

Example:

```
\begin{acks}
The authors would like to thank Dr. Yuhua Li for providing the
matlab code of the \textit{BEPs} method.

The authors would also like to thank the anonymous referees for
their valuable comments and helpful suggestions. This work is
supported by the \grantsponsor{GS501100001809}{National Natural
Science Foundation of
China}{\url{https://doi.org/10.13039/501100001809}} under Grant
No.: \grantnum{GS501100001809}{61273304}
and \grantnum[\url{http://www.nnsf.cn/youngscientists}]{GS501100001809}{Young
Scientists' Support Program}.
\end{acks}
```

2.11 Bibliography

The ACM uses the natbib package for formatting references and the BibTeX style file ACM-Reference-Format.bst for BibTeX processing. You can disable loading of natbib using the option natbib=false in \documentclass. However, it is not recommended, as well as the use of BibTeX styles other than ACM-Reference-Format.bst, and may delay the processing of the manuscript.

\citetyle If you use natbib, you can select one of two predefined citation styles using the command \citetyle: the author-year format acmauthoryear or the numeric format acmnumeric. For example,

```
\citetyle{acmauthoryear}
```

Note that numeric citations are the default mode for most formats.

\setcitetyle You can further customize natbib using the \setcitetyle command, for example,

```
\setcitetyle{numbers,sort&compress}
```

One of the more common versions is

```
\setcitetyle{nosort}
```

It is useful if you do not like the way natbib sorts citation lists.

If you use natbib, then commands like \citetep and \citeauthor are automatically supported. The command \shortcite is the same as \cite in numerical mode and cites the year in author-date mode.

Note that before version 1.48 the command `\citeyear` put the year in parentheses. In version 1.48 and later it produces just the year; the command `\citeyearpar` can be used to emulate its old behavior.

There are several customized BibTeX entry types and fields in the ACM style file `ACM-Reference-Format.bst` that you may want to be aware of.

The style supports the fields `doi` and `url`, for example,

```
doi = "10.1145/1188913.1188915",
url = "http://ccrma.stanford.edu/~jos/bayes/bayes.pdf",
```

The style supports the arXiv-recommended fields `eprint` and (optionally) `primaryclass`, for example,

```
eprint = "960935712",
primaryclass = "cs",
```

See the examples at <http://arxiv.org/hypertex/bibstyles/>.

There are several special entry types. Types `online` and `game` are used for Web pages and games, for example,

```
@online{Thornburg01,
author = "Harry Thornburg",
year = "2001",
title = "Introduction to Bayesian Statistics",
url = "http://ccrma.stanford.edu/~jos/bayes/bayes.html",
month = mar,
lastaccessed = "March 2, 2005",
}
```

Entry types `artifactsoftware`, `artifactdataset` (with synonyms `software` and `dataset`) can be used to cite software artifacts and datasets, for example,

```
@ArtifactSoftware{R,
title = {R: A Language and Environment for Statistical Computing},
author = {{R Core Team}},
organization = {R Foundation for Statistical Computing},
address = {Vienna, Austria},
year = {2019},
url = {https://www.R-project.org/},
}
@ArtifactDataset{UMassCitations,
author = {Sam Anzaroot and Andrew McCallum},
title = {{UMass} Citation Field Extraction Dataset},
year = 2013,
url =
{http://www.iesl.cs.umass.edu/data/data-umasscitationfield},
lastaccessed = {May 27, 2019}
}
```

For these entry types you can use the `lastaccessed` field to add the access date for the URL.

There are two ways to enter video or audio sources in the bibliography corresponding to two different possibilities. For standalone sources available online, you can use an `online` entry and set its `howpublished` field. For example,

```
@online{Obama08,
    author = "Barack Obama",
    year = "2008",
    title = "A more perfect union",
    howpublished = "Video",
    day = "5",
    url = "http://video.google.com/videoplay?docid=6528042696351994555",
    month = mar,
    lastaccessed = "March 21, 2008",
}
```

For sources available as attachments to conference proceedings and similar documents, you can use the usual `inproceedings` entry type and set its `howpublished` field:

```
@Inproceedings{Novak03,
    author = "Dave Novak",
    title = "Solder man",
    booktitle = "ACM SIGGRAPH 2003 Video Review on Animation theater Program",
    year = "2003",
    publisher = "ACM Press",
    address = "New York, NY",
    pages = "4",
    month = "March 21, 2008",
    doi = "10.9999/woot07-S422",
    howpublished = "Video",
}
```

Sometimes you need to cite a complete issue of a journal. The `periodical` entry type is intended for this:

```
@periodical{JCohen96,
    key = "Cohen",
    editor = "Jacques Cohen",
    title = "Special issue: Digital Libraries",
    journal = "Communications of the {ACM}",
    volume = "39",
    number = "11",
    month = nov,
    year = "1996",
}
```

If you do not know the year of publication, the style will add “[n. d.]” (for “no date”) to the entry.

If you do not know the author (this is often the case for online entries), use the key field to add a key for sorting and citations, for example,

```
@online{TUGInstmem,  
key = {TUG},  
year = 2017,  
title = "Institutional members of the {\TeX} Users Group",  
url = "http://www.tug.org/instmem.html",  
lastaccessed = "May 27, 2017",  
}
```

A note about sorting. The current ACM bibliography styles always sort the entries according to authors names and publication year. There is a controversy about sorting names with “von” or “van” part: should Ludwig van Beethoven be sorted under “V” or under “B”? The American practice is to use “van” in sorting, i.e. to file van Beethoven under “V”. However, some authorities recommend to sort Dutch persons according to their last names (see e.g. https://www.ifla.org/files/assets/cataloguing/pubs/names-of-persons_1996.pdf). While I do not want to take a part in this dispute, I would like to point to the old “noopsort” trick by Oren Patashnik. Add to the .bib file the line

```
@PREAMBLE{ "\providecommand{\noopsort}[1]{}" }
```

and then encode the author as

```
author = {Ludwig {\noopsort{Beethoven}}van Beethoven},
```

This will make the author to be sorted as “Beethoven” rather than “van Beethoven”.

2.12 Colors

While printed ACM publications are usually black and white, screen mode allows the use of colors. The ACM classes pre-define several colors according to [7]: ACMBlue, ACMYellow, ACMOrange, ACMRed, ACMLightBlue, ACMGreen, ACMPurple and ACMDarkBlue. You can use them in color assignments.

The ACM provides the following recommendation on color use.

The most accessible approach would be to ensure that your article is still readable when printed in greyscale. The most notable reasons for this are:

1. The most common type of inherited Color Vision Deficiency (CVD) is red-green (in which similar-brightness colors that differ only in their amounts of red or green are often confused), and it affects up to 8% of males and 0.5% of females of Northern European descent.
2. The most common type of acquired Color Vision Deficiency (CVD) is blue-yellow (including mild cases for many older adults).

3. Most printing is in black and white.
4. Situational impairments (e.g., bright sunlight shining on a mobile screen) tend to reduce the entire color gamut, reducing color discriminability.

Note: It is *not* safe to encode information using only variations in color (i.e., only differences in hue and/or saturation) as there is bound to be someone affected!

To ensure that you are using the most accessible colors, the ACM recommends that you choose sets of colors to help ensure suitable variations in when printed in greyscale by using either of the following tools:

1. ColourBrewer: <http://colorbrewer2.org/>
2. ACE: The Accessible Colour Evaluator: <http://daprlab.com/ace/> for designing WCAG 2.0 compliant palettes.

2.13 Other notable packages and typographic remarks

Several other packages are recommended for specialized tasks.

The package `subcaption` [8] is recommended for complex figures with several subplots or subfigures that require separate subcaptioning. The packages `nomenc1` [9] and `glossaries` [10] can be used for the automatic creation of the lists of symbols and concepts used.

By default `acmart` prevents all widows and orphans (i.e., lonely lines at the beginning or end of the page) and hyphenation at the end of the page. This is done by the rather strict settings

```
\widowpenalty=10000
\clubpenalty=10000
\brokepenalty=10000
```

However, this may lead to frustrating results when the authors must obey a page limit. Setting these penalties to smaller values may help if you absolutely need to.

Another problem might be the too strict line breaking rules. Again, a strategically placed `\sloppy` command or putting the problematic paragraph inside `sloppypar` environment might help—but beware, the results might be, well, sloppy.

Note that the uppercasing in section titles is done using the `textcase` package [11], so the command `\NoCaseChange` inside the title may help to prevent extraneous uppercasing.

2.14 Disabled or forbidden commands

The goal of `acmart` package is to provide a uniform look and feel for ACM publications. Accordingly, a number of commands is forbidden or disabled in `acmart`.

You may *not* put several authors or several e-mails into a `\author` or `\email` command. This may lead to errors or warning.

You cannot change `\baselinestretch` in your document: this produces an error.

You should not abuse the command `\vspace`: this command may disturb the typesetting of ACM papers.

You should not load `amssymb` package since the package `acmart` defines the corresponding symbols itself.

2.15 Notes for wizards

Sometimes you need to change the behavior of `acmart`. The usual way to do this is to redefine commands in the preamble. However, these definitions are executed *after* `acmart` is loaded and certain decisions are made. This presents a number of problems.

For example, one may want to use the `titletoc` package with `acmart`. This package should be loaded before `hyperref`. However, since `acmart` loads `hyperref` itself, the line `\usepackage{titletoc}` in the preamble will lead to grief (see <http://tex.stackexchange.com/questions/357265/using-titletoc-with-acm-acmart-style>).

Another example is passing options to a package. Suppose you want to use the `dvipsnames` option of the `xcolor` package. Normally you cannot do this because `acmart` loads this package itself without options.

The file `acmart-preload-hook.tex` can be used to solve these problems. If this file exists, it will be processed before any other package. You can use this file to load packages or pass options to them. For example, if you put in this file

```
\let\LoadClassOrig\LoadClass
\renewcommand\LoadClass[2][]{{\LoadClassOrig[#1]{#2}}%
\usepackage{titletoc}}
```

then `titletoc` will be loaded before `hyperref`. If you put in this file

```
\PassOptionsToPackage{dvipsnames}{xcolor}
```

you will pass `dvipsnames` to `xcolor`.

Important note. This hook makes it too easy to create a manuscript that is not acceptable by the ACM. It is even easier to create a file that cannot be compiled. So please do not use it *unless you know what you are doing*. And if you use it, *do not ask for support*. If you decide to use this hook, you are on your own.

Another hook is `\AtBeginMaketitle`. The commands in this hook are executed before `\maketitle`, for example,

```
\AtBeginMaketitle{\acmPrice{125.00}}
```

2.16 Currently supported publications

Table 5: ACM publications and arguments of the \acmJournal command

| Abbreviation | Publication |
|--------------|----------------------------------------------------------------------------|
| CIE | ACM Computers in Entertainment |
| CSUR | ACM Computing Surveys |

| TSC | ACM Transactions on Social Computing |
| TSLP | ACM Transactions on Speech and Language Processing |
| TWEB | ACM Transactions on the Web |

Besides the publications listed in Table 5, there is a special “publication” type FACMP, a forthcoming ACM publication, reserved for new journals which are not assigned an ISSN yet.

2.17 A note about sigchi-a format

Starting in Spring 2020 ACM retired SIGCHI Extended Abstract format (sigchi-a). ACM will not, under any circumstances, accept documents in this format for publication and will not offer technical support to the authors who use this template.

You may use this format in the nonacm mode only, as in

```
\documentclass[sigchi-a, nonacm]{acmart}
```

`sidebar` This format has large margin uses for special figures and tables. This package provides three environments for this with optional captions:
`marginfigure`
`margintable`

sidebar: textual information in the margin,

marginfigure: a figure in the margin,

margitable: a table in the margin.

The environments `figure` and `table` produce figures and tables with the width of the text column. The environments `figure*` and `table*` produce “wide” figures and tables, which take a large part of the margin.

The horizontal sizes of figures are:

1. `figure`: `\columnwidth`,
2. `marginfigure`: `\marginparwidth`,
3. `figure*`: `\fulltextwidth`.

3 Implementation

3.1 Identification

We start with a declaration of who we are. Most .dtx files put driver code in a separate .drv driver file. We roll this code into the main file and use the pseudo-guard <gobble> for it.

```
1 \class{NeedsTeXFormat}{LaTeX2e}
2 {*gobble}
3 \ProvidesFile{acmart.dtx}
4 {/gobble}
5 \class{ProvidesClass}{acmart}
6 [2020/11/15 v1.75 Typesetting articles for the Association for Computing Machinery]
```

And the driver code:

```
7 {*gobble}
8 \documentclass{ltxdoc}
9 \usepackage{array,booktabs,amsmath,graphicx,fancyvrb,tabularx, longtable}
10 \usepackage[tt=false, type1=true]{libertine}
11 \usepackage[varqu]{zi4}
12 \usepackage[libertine]{newtxmath}
13 \usepackage[tableposition=top]{caption}
14 \usepackage{hypdoc}
15 \PageIndex
16 \CodelineIndex
17 \RecordChanges
18 \EnableCrossrefs
19 \begin{document}
20   \DocInput{acmart.dtx}
21 \end{document}
22 {/gobble}
23 {*class}
24 \def\@classname{acmart}
```

3.2 Preload hook

We preload acmart-preload-hook:

```
25 \InputIfFileExists{acmart-preload-hook.tex}{%
26   \ClassWarning{\@classname}{%
27     I am loading acmart-preload-hook.tex. You are fully responsible
28     for any problems from now on.}}{}
```

3.3 Options

We need xkeyval since some of our options may have values:

```
29 \RequirePackage{xkeyval}
We use xstring to check whether user input is valid
30 \RequirePackage{xstring}
```

We need iftex to check the engine

31 \RequirePackage{iftex}

format The possible formats

```
32 \define@choicekey*+{acmart.cls}{format}[\ACM@format\ACM@format@nr]{%
33   manuscript, acmsmall, acmlarge, acmtog, sigconf, siggraph,
34   sigplan, sigchi, sigchi-a}[manuscript]{}{%

3.4 Setting switches

| | |
|------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|
| \if@ACM@manuscript | Whether we use manuscript mode |
| 149 \newif\if@ACM@manuscript | |
| \if@ACM@journal | There are two kinds of publications: journals and books |
| 150 \newif\if@ACM@journal | |
| \if@ACM@journal@bibstrip | Sometimes ACM wants a journal-like publication to have conference information in the bibstrip and vice versa, so we have an additional switch. |
| 151 \newif\if@ACM@journal@bibstrip | |
| \if@ACM@sigchiamode | The formatting of SIGCHI extended abstracts is quite unusual. We have a special switch for them. |
| 152 \newif\if@ACM@sigchiamode | |

Setting up switches

```
153 \ifnum\ACM@format@nr=5\relax % siggraph
154 \ClassWarning{@classname}{%
155   The format siggraph is now obsolete.\MessageBreak
156   I am switching to sigconf.}
157   \setkeys{acmart.cls}{format=sigconf}
158 \fi
159 \ifnum\ACM@format@nr=7\relax % sigchi
160 \ClassWarning{@classname}{%
161   The format sigchi is now obsolete.\MessageBreak
162   I am switching to sigconf.}
163   \setkeys{acmart.cls}{format=sigconf}
164 \fi
165 \ifnum\ACM@format@nr=8\relax % sigchi
166 \ClassWarning{@classname}{%
167   ACM SIGCHI has retired the SIGCHI-A template\MessageBreak
168   effective immediately. ACM is keeping this template\MessageBreak
169   option available to authors who are working on legacy\MessageBreak
170   documents only. ACM will not, under any circumstances,\MessageBreak
171   accept documents in this format for publication and\MessageBreak
172   will not offer technical support to the authors who use\MessageBreak
173   this template.\MessageBreak
174   ACM SIGCHI is directing Conference leaders and\MessageBreak
175   authors to publish their articles using the SIGCONF\MessageBreak
176   template call.}
177 \fi
178 \ifnum\ACM@format@nr=0\relax
179   \@ACM@manuscripttrue
180 \else
181   \@ACM@manuscriptfalse
182 \fi
183 \@ACM@sigchiamodefalse
184 \ifcase\ACM@format@nr
```

```

185 \relax % manuscript
186   \@ACM@journaltrue
187 \or % acmsmall
188   \@ACM@journaltrue
189 \or % acmlarge
190   \@ACM@journaltrue
191 \or % acmtog
192   \@ACM@journaltrue
193 \or % sigconf
194   \@ACM@journalfalse
195 \or % siggraph
196   \@ACM@journalfalse
197 \or % sigplan
198   \@ACM@journalfalse
199 \or % sigchi
200   \@ACM@journalfalse
201 \or % sigchi-a
202   \@ACM@journalfalse
203   \@ACM@sigchiamodetru
204 \fi
205 \if@ACM@journal
206   \@ACM@journal@bibstriptrue
207 \else
208   \@ACM@journal@bibstripfalse
209 \fi

```

3.5 Loading the base class and package

At this point we either have `\ACM@fontsize` or use defaults

```

210 \ifx\ACM@fontsize\empty
211   \ifcase\ACM@format@nr
212     \relax % manuscript
213     \def\ACM@fontsize{9pt}%
214   \or % acmsmall
215     \def\ACM@fontsize{10pt}%
216   \or % acmlarge
217     \def\ACM@fontsize{10pt}%
218   \or % acmtog
219     \def\ACM@fontsize{9pt}%
220   \or % sigconf
221     \def\ACM@fontsize{9pt}%
222   \or % siggraph
223     \def\ACM@fontsize{9pt}%
224   \or % sigplan
225     \def\ACM@fontsize{10pt}%
226   \or % sigchi
227     \def\ACM@fontsize{9pt}%
228   \or % sigchi-a
229     \def\ACM@fontsize{10pt}%

```

```

230 \fi
231 \fi
232 \ClassInfo{@classname}{Using fontsize \ACM@fontsize}
233 \LoadClass[\ACM@fontsize, reqno]{amsart}
234 \RequirePackage{microtype}

    We need etoolbox for delayed code

235 \RequirePackage{etoolbox}

644 \fi

```

\normalparindent The *amsart* package defines the `\normalparindent` length and initializes it to 12pt (the value of `\parindent` in *amsart*). It is later used to set the `\listparindent` length in the quotation environment and the `\parindent` length in the `\@footnotetext` command. We set `\normalparindent` to the value of `\parindent` as selected by *acmart* for consistent paragraph indents.

```
645 \setlength\normalparindent{\parindent}
```

Footnotes require some consideration. We have several layers of footnotes: front-matter footnotes, “regular” footnotes and the special insert for the bibstrip. In the old ACM classes, the bibstrip was a `\@float`. The problem with floats is that they tend to, well, float—and we want the guarantee they stay.

We use `manyfoot` for layered footnotes instead.

\copyrightpermissionfootnoterule This is the footnote rule that separates the bibstrip from the rest of the paper. It is a full width rule.

```

646 \def\copyrightpermissionfootnoterule{\kern-3\p@
647   \hrule \@width \columnwidth \kern 2.6\p@}

648 \RequirePackage{manyfoot}
649 \SelectFootnoteRule[2]{copyrightpermission}
650 \DeclareNewFootnote{authorsaddresses}
651 \SelectFootnoteRule[2]{copyrightpermission}
652 \DeclareNewFootnote{copyrightpermission}

```

\footnoterule Tschichold's rules:

```

653 \def\footnoterule{\kern-3\p@
654   \hrule \@width 4pc \kern 2.6\p@}

```

\endminipage We do not use footnote rules in minipages

```

The AMS uses generous margins for lists. Note that `amsart` defines `\leftmargin` values for list levels at the beginning of the document, so we must redefine them in the same manner. Also, note that `amsart` redefines the `enumerate` and `itemize` environments with a `\makelabel` command that uses `\llap`, so the `\labelwidth` value is (effectively) irrelevant; nonetheless, we follow `amsart` and set `\labelwidth` to `\leftmargin` minus `\labelsep`.

```

```

3.15 Maketitle hook

The current L^AT_EX provides a nice lthooks mechanism. However, since it is relatively new, we will use oldfashioned approach—at least for now.

```

{@beginmaketitlehook The hook
1764 \ifx\@beginmaketitlehook\@undefined
1765   \let\@beginmaketitlehook\@empty
1766 \fi

\AtBeginMaketitle Adding to the hook
1767 \def\AtBeginMaketitle{\g@addto@macro\@beginmaketitlehook}

```

3.16 Typesetting top matter

\mkttitle@bx Some of our formats use a two-column design. Some use a one-column design. In all cases we use a wide title. Thus we typeset the top matter in a special box to be used in the construction \atwocolumn[<box>].

```
1768 \newbox\mkttitle@bx
```

\maketitle The (in)famous \maketitle. Note that in sigchi-a mode, authors are *not* in the title box.

Another note: there is a subtle difference between author notes, title notes and thanks. The latter two refer to the paper itself and therefore belong to the copyright/permission block. By the way, this was the default behavior of the old ACM classes.

```

3.18 Sectioning

\ACM@NRadjust Ross Moore's macro.

Initially \ACM@sect@format@ just passes through its #1 argument unchanged. When a sectioning macro such as \section occurs, the \ACM@NRadjust redefines \ACM@sect@format@ to expand into the styling commands; e.g., \@secfont. Then \Sectionformat is temporarily redefined to produce \realSectionformat{\ACM@sect@format{#1}}{#2}, which ultimately becomes \Sectionformat{\@secfont{#1}}{#2}. This is done to allow \Sectionformat to be variable, as may be needed in particular circumstances. Its current expansion is saved as \realSectionformat which is used with the modified 1st argument, then \Sectionformat is reverted to its former expansion.

To style the section-number, the line #1{} is used at the end of \ACM@NRadjust. This imposes style-changing commands for fonts and sizes, but any \MakeUppercase acts on just the {}. It's a bit hacky, by essentially assuming that only numbers occur here, not letters to be case-changed. (This should be acceptable in a class-file, as it ought to be possible to change the case elsewhere, if that was ever desired.) Also, it can result in \@adddotafter being called too soon, so a slight adjustment is made, via \ACM@adddotafter, which now tests whether its argument is empty. But the coding has to allow for other packages to have also patched \@adddotafter.

```

```

3.19 TOC lists

\@dotsep Related to the \tableofcontents are all the horizontal fillers. Base L^AT_EX defines \@dottedtocline, which we should not disable. Yet, this command expects \@dotsep to be defined but leaves this to the class implementation. Since amsart does not provide this, we copy the standard variant from article here.

2805 \providecommand*\@dotsep{4.5}

3.20 Theorems

\@acmplainbodyfont The font to typeset the body of the acmplain theorem style.
2806 \def\@acmplainbodyfont{\itshape}

\@acmplainindent The amount to indent the acmplain theorem style.
2807 \def\@acmplainindent{\parindent}

\@acmplainheadfont The font to typeset the head of the acmplain theorem style.
2808 \def\@acmplainheadfont{\scshape}

\@acmplainnotefont The font to typeset the note of the acmplain theorem style.
2809 \def\@acmplainnotefont{\emptyset}

Customization of the acmplain theorem style:

2810 \ifcase\ACM@format@nr

Make acmplain the default theorem style.
2866 \theoremstyle{acmplain}

```

Delay defining the theorem environments until after other packages have been loaded. In particular, the `cleveref` package must be loaded before the theorem environments are defined in order to show the correct environment name (see <https://github.com/borisveytsman/acmart/issues/138>). The `acmthm` option is used to suppress the definition of any theorem environments. Also, to avoid obscure errors arising from these environment definitions conflicting with environments defined by the user or by user-loaded packages, we only define environments that have not yet been defined.

```

```

3.21 Balancing columns

We need balancing only if the user did not disable it, and we use a two column format

```

2919 \AtEndPreamble{%
2920   \if@ACM@balance
2921     \ifcase\ACM@format@nr
2922       \relax % manuscript
2923         \global\@ACM@balancefalse
2924       \or % acmsmall
2925         \global\@ACM@balancefalse
2926       \or % acmlarge
2927         \global\@ACM@balancefalse
2928       \or % acmtog
2929         \RequirePackage{balance}%
2930       \or % sigconf
2931         \RequirePackage{balance}%
2932       \or % siggraph
2933         \RequirePackage{balance}%
2934       \or % sigplan
2935         \RequirePackage{balance}%
2936       \or % sigchi
2937         \RequirePackage{balance}%
2938       \or % sigchi-a
2939         \global\@ACM@balancefalse
2940     \fi
2941   \fi
2942 }
2943 \AtEndDocument{%
2944   \if@ACM@balance

```

```

2945 \if@twocolumn
2946 \balance
2947 \fi\fi}

```

3.22 Acknowledgments

```

\acksname
2948 \newcommand\acksname{Acknowledgments}

\acks This is a comment-like structure
2949 \specialcomment\acks{%
2950 \begingroup
2951 \section*\{\acksname\}
2952 \phantomsection\addcontentsline{toc}{section}{\acksname}
2953 }%
2954 \endgroup
2955 }

\grantsponsor We just typeset the name of the sponsor
2956 \def\grantsponsor#1#2#3{#2}

\grantnum
2957 \newcommand\grantnum[3][]{{#3}%
2958 \def\@tempa{#1}\ifx\@tempa\empty\else\space(\url{#1})\fi}

```

3.23 Conditional typesetting

We use the comment package for conditional typesetting:

```

2959 \AtEndPreamble{%
2960 \if@ACM@screen
2961 \includecomment{screenonly}
2962 \excludecomment{printonly}
2963 \else
2964 \excludecomment{screenonly}
2965 \includecomment{printonly}
2966 \fi
2967 \if@ACM@anonymous
2968 \excludecomment{anonsuppress}
2969 \excludecomment{acks}
2970 \else
2971 \includecomment{anonsuppress}
2972 \fi}

```

3.24 Additional bibliography commands

\showeprint The command \showeprint has two arguments: the (optional) prefix and the eprint number. Right now the only prefix we understand is the (lowercase) word ‘arxiv’.

```
2973 \newcommand\showeprint[2][arxiv]{%
```

```

2974 \def \@tempa{#1}%
2975 \ifx \@tempa\empty\def \@tempa{arxiv}\fi
2976 \def \@tempb{arxiv}%
2977 \ifx \@tempa@\tempb
2978     arXiv:\href{https://arxiv.org/abs/#2}{#2}\else arXiv:#2%
2979 \fi}

```

3.25 End of Class

\vspace We do not disable \vspace, but add warning to it

```

2980 \let \@vspace@orig=\vspace
2981 \let \@vspacer@orig=\vspace
2982 \apptocmd{\vspace}{\ClassWarning{@classname}{\string\vspace space should
2983     only be used to provide space above/below surrounding
2984     objects}}{}{}}
2985 \apptocmd{\vspace}{\ClassWarning{@classname}{\string\vspace space should
2986     only be used to provide space above/below surrounding
2987     objects}}{}{}}
2988 \let \@vspace@acm=\vspace
2989 \let \@vspacer@acm=\vspace

```

\ACM@origbaselinestretch We produce an error if the user tries to change \baselinestretch

```

2990 \let \ACM@origbaselinestretch\baselinestretch
2991 \AtEndDocument{\ifx \baselinestretch\ACM@origbaselinestretch\else
2992     \ClassError{@classname}{An attempt to redefine
2993         \string\baselinestretch\space detected. Please do not do this for
2994         ACM submissions!}\fi}

```

```

2995 \normalsize\normalfont\frenchspacing
2996 </class>

```

Change History

| | | |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 1.48 | \if@ACM@printacmref: Added warning for longer papers | 69 |
| | \keywords: Added warning for missing keywords | 68 |
| | General: ACM reference format is now mandatory for papers over one page; CCS concepts and keywords are now mandatory for papers over two pages | 33 |
| 1.49 | General: New journal: DTRAP | 33 |
| 1.53 | General: New journals: PACMCGIT, TIOT, TDSCI | 33 |
| | Rearranged docs | 33 |
| 1.54 | General: Moved footnote stuff before hyperref call (Ross Moore) | 33 |
| 1.56 | General: Documented \Description | 33 |
| 1.57 | General: Booktabs package is now the default | 33 |
| 1.58 | General: Changes in samples (Enrico Gregorio) | 33 |
| | New journal: HEALTH. TDS is renamed to TDSCI | 33 |
| 1.60 | \if@ACM@urlbreakonhyphens: introduced macro | 34 |
| | General: New option: urlbreakonhyphens | 33 |
| 1.62 | General: New journal: TELO | 33 |
| 1.63 | General: New journal: FACMP | 33 |
| | New journal: TQUANT | 33 |
| 1.63a | General: Move: TQUANT to TQC | 33 |
| 1.64 | General: Putting abstract after \maketitle now causes an error | 33 |
| 1.65 | General: New journal: DGOV | 33 |
| 1.66 | \@mkauthorsaddresses: Added warning for missing addresses | 91 |
| | \ccsdesc@parse: Added warning for missing concepts | 71 |
| | \if@ACM@printacmref: Added warning for longer papers | 69 |
| | \keywords: Added warning for missing keywords | 68 |
| | General: ACM reference format is now mandatory for papers over one page; CCS concepts and keywords are now mandatory for papers over two pages | 33 |
| | Authors' addresses are mandatory for journal articles | 33 |
| 1.69 | \vspace: Added the changed command to avoid grouping | 107 |
| 1.70 | General: Name change for TDS | 56 |
| 1.71 | General: Bibliography change: volume for @inproceedings is now in brackets together with series | 33 |
| | LuaTeX now uses the OTF versions of fonts | 33 |
| | Retired sigchi and sigchi-a | 33 |
| 1.75 | General: Documentation update | 33 |
| | v1.00 | |
| | General: First released version | 33 |
| | v1.01 | |
| | General: Changed hyperref colors in screen mode (closes https://github.com/borisveytsman/acmart/issues/1) | 33 |
| | Defined ACM colors | 33 |
| | Explicitly put draft option (closes https://github.com/borisveytsman/acmart/issues/4) | 36 |
| | Set headheight to 1pc for all formats (closes https://github.com/borisveytsman/acmart/issues/5) | 33 |
| | v1.02 | |
| | General: Added TOPS and TSC (closes https://github.com/borisveytsman/acmart/issues/12) | 33 |

| | | | |
|------------------------------------------------------------------------------------------------------|----|-------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Documentation changes (closes <code>https://github.com/borisveytsman/acmart/issues/13)</code> | 33 | \acmBadgeL: Added macro | 68 |
| v1.03 | | \acmBadgeR: Added macro | 68 |
| \@formatdoi: Added macro | 73 | \if@ACM@badge: Added macro | 67 |
| \if@ACM@authorversion: Added macro | 35 | v1.07 | |
| \maketitle: Corrected a bug with abstract footnotes | 77 | \maketitle: Added special case of authorversion | 77 |
| General: Added anonsuppress environment | 33 | Corrected a bug with permssion and footnotes order | 77 |
| Added authorversion option (closes <code>https://github.com/borisveytsman/acmart/issues/9)</code> | 33 | v1.08 | |
| v1.04 | | General: SIGPLAN reformatting by Matthew Fluet | 33 |
| \acmArticleSeq: Name change by Matthew Fluet | 67 | Typos corrected (Tobias Pape) . . . | 33 |
| \acmDOI: Name change by Matthew Fluet | 67 | v1.09 | |
| \acmISBN: Name change by Matthew Fluet | 67 | General: Revert SIGPLAN caption rules | 33 |
| General: Updated bibliography for siggraph | 33 | v1.10 | |
| v1.05 | | \maketitle: Corrected a bug with doi in manuscript and author vertsns, <code>https://github.com/borisveytsman/acmart/issues/36</code> | 77 |
| General: Changes of ‘licensedothergov’ wording | 71 | General: Changes of standardpagestyle: Reversed folios location | 95 |
| v1.06 | | v1.11 | |
| \@ACM@badge@skip: Added macro . . | 68 | General: Customization of ACM theorem styles and proof environment by Matthew Fluet . . | 33 |
| \@ACM@badge@width: Added macro . . | 67 | v1.12 | |
| \@ACM@title@width: Added macro . . | 67 | \@marginfigure: Now centering by default | 53 |
| \@mktitle@i: Added processing badges | 82 | \@marginfigure: Now centering by default | 53 |
| Made generic | 82 | \@parfont: Moved to \section@raggedright | 101 |
| \@mktitle@ii: Now this macro is obsolete | 83 | \copyrightpermissionfootnoterule: Added macro | 49 |
| \@mktitle@iii: Added processing badges | 83 | \descriptionlabel: Redefined | 55 |
| Made more generic | 83 | \footnoterule: Made shorter | 49 |
| \@mktitle@iv: Made more generic . | 84 | \if@ACM@natbib@override: Added macro | 35 |
| \@printtopmatter: Added processing badges | 80 | \if@ACM@newfonts: Added macro . . | 50 |
| \@subtitlefont: Added macro . . . | 82 | \maketitle: Moved thankses to copyrightpermission box | 77 |
| \@titlefont: Added macro | 81 | \section@raggedright: Introduced macro | 101 |
| | | General: Added graceful behavior when libertine fonts are absent . . | 50 |
| | | Documentation updates | 33 |

| | | | | |
|-------|------------------------------------------------------------------------------------------|-----|---------------------------------------------------------------------------|-----|
| v1.13 | \@mpfootnotetext: Made minipage footnotes centered | 44 | \position: Added macro | 84 |
| | \bibliographystyle: Redefined macro | 46 | \postcode: Added macro | 84 |
| | \bibstyle@acmauthoryear: Added macro | 41 | \state: Added macro | 84 |
| | \bibstyle@acmnumeric: Added macro | 41 | \streetaddress: Added macro . . . | 84 |
| | \if@ACM@printfolios: Added macro | 69 | standardpagestyle: Better handling of anonymous mode | 95 |
| | General: Font adjustments for acmsmall | 85 | v1.16 | |
| | Increased font size for ACM Large | 38 | \@headfootfont: Added macro . . . | 95 |
| | Print bibliographic information by default for the proceedings | 69 | General: Formatting header/footer (Matthew Fluet) | 33 |
| | standardpagestyle: Added headers for sigs | 95 | standardpagestyle: Customize header/footer text font | 95 |
| | Expanded headers for sigchi-a . . | 95 | v1.17 | |
| | Suppressed folios if sig | 95 | \@makefnmark: Redefined | 44 |
| v1.14 | \bibstyle@acmauthoryear: Moved def of \bibstyle@acmauthoryear before use | 41 | \@mkauthors: TOG now uses the same authors block as other journals . . | 85 |
| | \bibstyle@acmnumeric: Moved def of \bibstyle@numeric before use . . | 41 | \@mkauthors@ii: Deleted | 88 |
| | General: \citestyle updates (Matthew Fluet) | 33 | \@mkbibcitation: Added \nobreak Changed format for sigs | 92 |
| | Patched \citestyle | 39 | \acmArticle: The default is now numerical | 67 |
| v1.15 | \@ACM@addtoaddress: Added macro | 84 | \acmMonth: The default must be numerical. Closes #50. | 67 |
| | \@mkauthors@iii: New authors system | 88 | \acmNumber: The default is now numerical | 66 |
| | \@shortauthors: Introduced macro | 95 | \acmVolume: The default is now numerical | 66 |
| | \@typeset@author@bx: Moved to separate macro | 88 | \acmYear: The default is now numerical | 67 |
| | \acks: Added macro | 106 | \description: Decreased indent . . | 55 |
| | \affiliation: Added code for author groups | 64 | \grantnum: Added url | 106 |
| | \author: Added code for author groups | 64 | \grantsponsor: Renamed | 106 |
| | \city: Added macro | 84 | \if@ACM@printacmref: Renamed from \if@ACM@printbib | 69 |
| | \country: Added macro | 84 | General: Slightly decreased margins for sigs | 47 |
| | \department: Added macro | 84 | standardpagestyle: Added paper title to sigs | 95 |
| | \grantnum: Added macro | 106 | v1.18 | |
| | \grantsponsor: Added macro | 106 | \@mkauthors@i: Now we andify affiliations | 87 |
| | \if@insideauthorgroup: Introduced macro | 63 | \@typeset@author@line: Added macro | 86 |
| | \institution: Added macro | 84 | General: Natbib is now the default for all formats | 33 |
| | \num@authorgroups: Renamed . . . | 63 | v1.19 | |
| | \orcid: Introduced macro | 65 | \@mkabstract: Include 'Abstract' in PDF bookmarks (Matthew Fluet) . | 91 |
| | | | \acks: Include 'Acknowledgements' in PDF bookmarks (Matthew Fluet) | 106 |

| | | | | |
|---------------------------------------------------------------------------------------------------------------------------------------------------|-----|--------------------------------------------------------------------------------|-------------------------------------------------------------------------------|----|
| General: Include 'Abstract', 'Acknowledgements', and 'References' in PDF bookmarks (Matthew Fluet) | 33 | v1.31 | Switched to T1: looks like libertine has problems with \l in OT1 | 50 |
| Include 'References' in PDF bookmarks (Matthew Fluet) | 39 | | Updated IMWUT and PACMPL | 56 |
| v1.20 | | | | |
| \@mkabstract: Deleted spurious space | 91 | \@additionalaffiliation: Added macro | 65 | |
| General: Bug fixes for bst | 33 | \@mkbibcitation: Disabled linebreak | 92 | |
| v1.21 | | \@startsection: Added \tochangmeasure | 41 | |
| \showeprint: Added macro | 106 | Redefined macro | 43 | |
| v1.22 | | \@textbottom: Redefined | 49 | |
| General: More bibliography changes for Aptara | 33 | \acmMonth: The default now is the current month (Matteo Riondato) | 67 | |
| v1.23 | | \acmYear: The default now is the current year (Matteo Riondato) | 67 | |
| General: Add PACMPL journal option | 33 | \additionalaffiliation: Added macro | 65 | |
| v1.24 | | \l@subsection: Redefined macro | 44 | |
| General: Add IMWUT journal option | 56 | \l@subsubsection: Redefined macro | 44 | |
| v1.25 | | General: Documentation changes | 33 | |
| General: Updated PACMPL | 56 | v1.32 | | |
| v1.26 | | \formatdoi: New doi format | 73 | |
| General: Corrected \shortcite bug . | 33 | General: Added POMACS journal option | 33 | |
| Documentation typos fixed (thanks to Stephen Spencer) | 33 | Format siggraph is now obsolete | 33 | |
| v1.27 | | v1.33 | | |
| \if@ACM@printccs: Typo corrected . | 69 | \@ACM@addtoaddress: Added obeypunctuation code | 84 | |
| v1.28 | | \@mkauthors@i: Added obeypunctuation code | 87 | |
| \ccsdesc@parse: Change from \to to \rightarrow (Matteo Riondato) | 70 | \@mkauthors@iii: Added obeypunctuation code | 88 | |
| General: Corrected option natbib behavior | 41 | \@mkauthors@iv: Added obeypunctuation code | 89 | |
| Got rid of warnings in pdf keywords | 44 | \subtitlefont: Added \normalsize | 82 | |
| v1.29 | | \ACM@linecountL: Renamed macro | 93 | |
| \@mkabstract: Removed spurious indentation (John Wickerson) | 91 | \ACM@linecountR: Added macro | 94 | |
| \ccsdesc@parse: Add spacing after bullet and around rightarrow; semicolon separators no longer in bold/italic (John Wickerson) | 70 | \ACM@timestamp: Added current page number | 94 | |
| General: Increased head to 13pt | 47 | Added macro (Michael D. Adams) | 94 | |
| standardpagestyle: Corrected printfolios (Matthew Fluet) | 95 | Added submission id | 94 | |
| v1.30 | | \acmSubmissionID: Added macro | 67 | |
| \department: Added optional parameter | 84 | \city: Added obeypunctuation code | 84 | |
| General: Added \frenchspacing | 107 | \country: Added obeypunctuation code | 84 | |
| Bibtex style now recognizes https:// in doi | 33 | \department: Added obeypunctuation code | 84 | |
| | | \if@ACM@affiliation@obeypunctuation: Added macro | 65 | |

| | | | |
|-----------------------------------------------------------------------------------------------------------|----|------------------------------------------------------------------------------------------------------|--------|
| \if@ACM@authordraft: Added macro | 36 | Rearranged bibstrip | 77 |
| \if@ACM@natbib@override: Deleted macro | 35 | The \terms command is now obsolete | 77 |
| \if@ACM@timestamp: Added macro (Michael D. Adams) | 36 | \terms: The \terms command now just produces a warning | 68 |
| \institution: Added obeypunctuation code | 84 | v1.35 | |
| \maketitle: Fixed the bug with figures on top and bottom of the title page, thanks to David Epstein | 77 | \bibstyle@acmauthoryear: Square brackets for author-year style . . . | 41 |
| \position: Added obeypunctuation code | 84 | General: BibTeX bug fixed: et al. | 33 |
| \postcode: Added obeypunctuation code | 84 | If the copyright is set to usgov or rightsretained, the price is suppressed | 71 |
| \state: Added obeypunctuation code | 84 | v1.36 | |
| \streetaddress: Added obeypunctuation code | 84 | \@ACM@authorsperrow: Added macro | 69 |
| General: Added acmart-preload-hook | 33 | \@mkauthors@iii: Added authorsperrow override | 88 |
| Added cmap and glyptounicode . | 50 | \@mkauthors@iv: Added authorsperrow override | 89 |
| BibTeX comma before articleno bug corrected | 33 | \if@ACM@authordraft: Corrected typo, thanks to bargteil | 36 |
| BibTeX crossref bug corrected . | 33 | General: Added PACMHCI journal options | 56 |
| BibTeX numpages bug corrected . | 33 | Added the possibility to adjust number of author boxes per row in conference formats | 33 |
| Documentation updates | 33 | v1.37 | |
| Moved \citename definition for non-natbib bibliography, so a package may redefine it | 45 | \description: Reduce list indentation (Matthew Fluet) | 55 |
| Switched to Type 1 fonts for libertine even if OTF-capable engine is used (Kai Mindermann) | 50 | \descriptionlabel: Reduce list indentation (Matthew Fluet) | 55 |
| \firstpagestyle: Added right linecount for two-column formats | 98 | \normalparindent: Set \normalparindent (Matthew Fluet) | 48 |
| Added timestamp (Michael D. Adams) | 98 | General: Reduce list indentation (Matthew Fluet) | 55 |
| \standardpagestyle: Added right linecount for two-column formats | 95 | Set \normalparindent; Reduce list indentation (Matthew Fluet) | 33 |
| Added timestamp (Michael D. Adams) | 95 | v1.38 | |
| v1.34 | | General: Increase default font size for SIGPLAN | 33, 38 |
| \@mkbibtex: Deleted DOI from doi numbers | 92 | v1.39 | |
| \ACM@linecount@bx: Rulers now are continuous | 93 | \@authornotemark: Added macro . | 91 |
| \ACM@linecountL: Rulers now are continuous | 93 | \authornotemark: Added macro . . . | 66 |
| \ACM@linecountR: Rulers now are continuous | 94 | v1.40 | |
| \maketitle: Added date to the bibstrip in conf proceedings . . . | 77 | \copyrightowner: Added new copyright version: licensedcagov . | 73 |
| Deleted 'DOI' from doi numbers . | 77 | \copyrightpermission: Added new copyright version: licensedcagov . | 73 |
| | | \@mkauthors@i: Switched to MakeTextUppercase | 87 |

| | |
|-----------------------------------------|-----|
| \@parfont: Switched to | |
| MakeTextUppercase | 101 |
| \ACM@linecount@bx: Work around a | |
| bug in xcolor: looks like cmyk | |
| colors in boxes do not work | 93 |
| \ccdesc@parse@finish: Added | |
| macro | 71 |
| \city: We now do not print this even | |
| in SIG | 84 |
| \country: Fixed bugs with extra | |
| spaces | 84 |
| \l@subsection: Redefined macro .. | 43 |
| \postcode: We now do not print this | |
| even in SIG | 84 |
| \state: We now do not print this even | |
| in SIG | 84 |
| \streetaddress: We now do not | |
| print this even in SIG | 84 |
| General: Added ‘textcase’ package .. | 39 |
| Added heightrounded to geometry .. | 47 |
| Added new copyright version: | |
| licensedcagov | 33 |
| Added package cleveref | 33 |
| Added Ross Moore code for | |
| glyptounicode | 50 |
| Bibliography changes | 33 |
| v1.41 | |
| General: Added new badges | 33 |
| v1.42 | |
| General: Deleted ACM badges | 33 |
| v1.43 | |
| \@startsection: Added | |
| \makeatletter | 43 |
| \country: Added comma before | |
| country for journals | 84 |
| v1.44 | |
| \@acmBooktitle: Added macro | 63 |
| \@acmEditors: Added macro | 63 |
| \@editorsAbbrev: Added macro | 63 |
| \f@folioblob: Suppress the blob if | |
| acmArticleSeq is empty | 97 |
| \@mkbibcitation: If the paper has | |
| just one page, use ‘page’ instead of | |
| ‘pages’ | 92 |
| \ACM@restore@pagestyle: Added | |
| macro | 93 |
| \acmArticle: The default is now | |
| empty | 67 |

| \b@feseries\sffamily to | |
| \sffamily\b@feseries | 81 |
| \@mkauthorsaddresses: Introduced | |
| macro | 90 |
| \@mkbibcitation: Added subtitle .. | 92 |
| \@printendtopmatter: Made it | |
| \par\bigskip uniformly | 92 |
| \@printtopmatter: Deleted rule .. | 80 |
| \@setauthorsaddresses: Introduced | |
| macro | 93 |
| \ACM@linecount@bx: Rearranged the | |
| code to get rid of spurious | |
| underfull messages (Benjamin | |
| Byholm) | 93 |
| \author: Started counting authors .. | 64 |
| \authorsaddresses: Introduced | |
| macro | 65 |
| \country: Corrected spacing for | |
| institution | 84 |
| \if@ACM@acmthm: Modified | |
| description | 34 |
| \linenums: Workaround for | |
| compatibility with fontspec | 51 |
| \maketitle: Added authors’ addresses | |
| Thankses go before authors’ | |
| addresses | 77 |
| \num@authors: Introduced macro .. | 63 |
| General: Added etoolbox | 33 |
| Bst file bug fixes: label width is | |
| calculated correctly | 33 |
| Delayed hypersetup since journal | |
| options may change screen mode .. | 44 |
| PACM now set screen to true .. | 56 |

| | | | | |
|-------|-----------------------------------------------------------------------------------------------|----|------------------------------------------------------------------------------------------------|-----|
| | Restore theorem defs to class file | 33 | v1.53 | |
| v1.47 | General: New journal: THRI | 33 | General: Added PACMCGIT, TIOT, TDSCI | 56 |
| v1.48 | \@headfootfont: Deleted unnecessary switch (Michael D. Adams) | 95 | \@mkbibcitation: Bug corrected (Ross Moore) | 92 |
| | \@mkabstract: Removed spurious indentation if abstract is followed by an empty line | 91 | \@shortauthors: Added submission id in anonymous mode | 95 |
| | \ACM@timestamp: Fromatting change (Michael D. Adams) | 94 | \ACM@NR@adjustedSectionformat: Added macro | 100 |
| | \if@ACM@review: Review mode now switches on folios | 35 | \ACM@NR@adjust: Added macro | 99 |
| | \maketitle: Added acmart and version info to pdfcreator tag | 77 | \ACM@adddotafter: Added macro | 100 |
| | Added language and doctitle attributes to PDF (Andreas Reichinger) | 77 | \author: Added submission id in anonymous mode | 64 |
| | Suppressed empty DOI (Serguei Mokhov) | 77 | \if@ACM@nonacm: Added macro | 35 |
| | General: \citeyear no longer behaves like \citeyearpar | 45 | General: Added Ross's patch for sectioning | 100 |
| | Code prettying (Michael D. Adams) | 33 | Deleted indent for subsubsection | 100 |
| | Initial support for Biblatex (Daniel Thomas) | 33 | XeTeX now uses T1 encoding | 50 |
| | Misc entries in the bibliography no longer produce a separate date | 33 | v1.55 | |
| | Typos fixed (Jamie Davis) | 33 | \@mkbibcitation: Bug corrected | 92 |
| v1.50 | \@copyrightpermission: New copyright statements for iw3c2w3[g] | 73 | \maketitle: Fixes topnum | 77 |
| v1.51 | General: Corrected the bug with price suppression | 71 | General: Now we use purple color for links | 44 |
| | Suppress price if the copyright is set to iw3c2w3 or iw3c2w3g | 71 | Table captions for SIGCHI now use the same font size as figure captions (Luis Leiva) | 52 |
| | XeTeX now uses OTF fonts (Joachim Breitner) | 50 | Typo corrected (Zack Weinberg) | 39 |
| | firstpagestyle: We now use journal abbreviation for footers | 98 | v1.56 | |
| | standardpagestyle: We now use journal abbreviation for footers | 95 | \@margininfigure: Added checking for description | 53 |
| v1.52 | \@copyrightowner: Rewording of licenses | 73 | \@mkteasers: Added check for description | 91 |
| | \@copyrightpermission: Another rewording of copyright statements for iw3c2w3[g] | 73 | \Description: Added macro | 51 |
| | | | \acksname: Added macro (Philip Quinn) | 106 |
| | | | \ccsdesc@parse: End the concepts list with a period (Philip Quinn) | 70 |
| | | | \if@Description@present: Added macro | 51 |
| | | | \if@undescribed@images: Added macro | 51 |
| | | | General: Looks like XeTeX requires explicit monotype font declaration | 50 |
| | | | Make two-column layouts flush (Philip Quinn) | 47 |
| | | | v1.57 | |
| | | | \ACM@origbaselinestretch: Added check whether the user changed \baselinestretch | 107 |

| | | | | |
|----------------------------------------------------------------------------------|-----|-------|--------------------------------------------------------------------------------------------|-----|
| \author: Added warning if \author has comma | 64 | v1.61 | \@typeset@author@bx: Added \normalbaselines | 88 |
| \email: Added warning if \author has comma | 65 | v1.64 | \ACM@linecount@bx: Bug fix: made the spacing on the left and the right size equal | 93 |
| \if@ACM@balance: Added macro | 35 | | \if@ACM@maketitle@typeset: Introduced macro | 56 |
| \vspace: Added warning | 107 | | \maketitle: Added a switch setting to show that \maketitle is typeset | 77 |
| v1.58 | | v1.65 | \@mkauthorsaddresses: Deleted cs@addpunct | 90 |
| \@dblfloat: Deleted spurious \vspace warning | 54 | v1.66 | \@specialsection: Suppress warnings about \vspace | 80 |
| \@marginfigure: Deleted spurious \vspace warning | 53 | | General: Patching algorithm and algorithm* to prevent spurious space warnings | 51 |
| \@marginable: Deleted spurious \vspace warning | 53 | v1.67 | \@parfont: Deleted redefinitions of sections | 101 |
| \@mkbibcitation: Deleted spurious \vspace warning | 92 | | \@specialsection: Paragraph inside group does not print its argument. Added a bugfix | 80 |
| \@printendtopmatter: Deleted spurious \vspace warning | 92 | | General: Patching lstlisting and lstlisting* to prevent spurious space warnings | 51 |
| \@sidebar: Deleted spurious \vspace warning | 53 | v1.68 | \@specialsection: Deleted grouping altogether | 80 |
| \maketitle: Original \vspace inside \maketitle | 77 | | General: New command for unindent paras | 100 |
| \vspace: Preserved old versions as \vspace@orig and \vspace@orig | 107 | v1.69 | \@printendtopmatter: Deleted grouping | 92 |
| General: Added HEALTH. TDSCI is renamed to TDS | 56 | | \@specialsection: Changed dot to colon for sigplan | 80 |
| Suppressed \addtocounter in pdf subject | 44 | | \ACM@linecountR: Do not increase numbers in one column format .. | 94 |
| v1.59 | | | \ccsdesc@parse: Use math right arrow in text | 70 |
| \acmConference: Setting \ACM@journal@bibstrip | 62 | | General: No dots for unindented paragraphs | 100 |
| \acmJournal: Setting \ACM@journal@bibstrip | 62 | v1.71 | \@subsubsection: Bug fixed (thanks to Andrew Black) | 44 |
| \if@ACM@journal@bibstrip: Introduced macro | 37 | | | |
| \firstpagestyle: Added logic for conference papers using journal format | 98 | | | |
| Moved page styles to \AtBeginDocument | 98 | | | |
| \standardpagestyle: Added logic for conference papers using journal format | 95 | | | |
| Moved page styles to \AtBeginDocument | 95 | | | |
| v1.60 | | | | |
| \headfootfont: Moved to footnotesize | 95 | | | |

| | | | | | |
|-------|-------------------------------------------------------------------------------------------|----|-----------------------------------------------------------------------------------------|---------------------------------------------------------------------|----|
| v1.72 | \author: Added \detokenize (Kuldeep S. Meel) | 64 | \if@ACM@countrypresent: Added macro | 86 | |
| | \maketitle: Do not andify authors for pdf metadata (Scott Pakin) | 77 | \if@ACM@insttpresent: Added macro | 86 | |
| | General: Added hyperxmp | 45 | \institution: Check the presence in affil | 84 | |
| v1.73 | \@ACM@checkaffil: Added macro | 87 | \maketitle: Do not check again the presence of address fields | 77 | |
| | \@ACM@resetaffil: Added macro | 86 | General: Patching minted and minted* to prevent spurious space warnings | 51 | |
| | \@mkauthors@i: Check the presence of required elements for affiliations | 87 | v1.74 | General: Changed the order of font loading | 50 |
| | \@mkauthors@iii: Check the presence of required elements for affiliations | 88 | v1.75 | \@ACM@checkaffil: Changed warning to error for country | 87 |
| | \@mkauthors@iv: Check the presence of required elements for affiliations | 89 | | \begin{maketitlehook}: Introduced macro | 77 |
| | \city: Check the presence in affil | 84 | | \AtBeginMaketitle: Introduced macro | 77 |
| | \country: Check the presence in affil | 84 | | \maketitle: Added \begin{maketitlehook} | 77 |
| | \if@ACM@citypresent: Added macro | 86 | | | |

Index

Numbers written in italic refer to the page where the corresponding entry is described; numbers underlined refer to the code line of the definition; numbers in roman refer to the code lines where the entry is used.
