## 1 Overview

<b>aliascnt</b> (contents)	Alias counters	[ctan]
<b>alphalph</b> (contents)	Convert numbers to letters	[ctan]
<b>askinlude</b> (contents)	Interactive asking of included files	[ctan]
<b>atveryend</b> (contents)	Hooks at the very end of document	[ctan]
<b>auxhook</b> (contents)	Hooks for auxiliary files	[ctan]
<b>bignumcalc</b> (contents)	Expandable calculations on big integers	[ctan]
<b>bitset</b> (contents)	Handle bit-vector datatype	[ctan]
<b>bmpsize</b> (contents)	Extract size/resolution from bitmap files	[ctan]
<b>catchfile</b> (contents)	Catch the contents of a file	[ctan]
<b>centernot</b> (contents)	Centers the not symbol horizontally	[ctan]
<b>chemarr</b> (contents)	Arrows for chemical reactions	[ctan]

---

\*Please report any issues at <https://github.com/ho-tex/oberdiek/issues>

<a href="#"><b>classlist</b></a> (contents)	Record classes used in a document	[ctan]
<a href="#"><b>colonequals</b></a> (contents)	Colon equals symbols	[ctan]
<a href="#"><b>dvipscol</b></a> (contents)	Alter the usage of the dvips color stack	[ctan]
<a href="#"><b>engord</b></a> (contents)	Provides English ordinal numbers	[ctan]
<a href="#"><b>enparen</b></a> (contents)	Parentheses nesting	[ctan]
<a href="#"><b>eolgrab</b></a> (contents)	Catch arguments delimited by end of line	[ctan]
<a href="#"><b>etexcmds</b></a> (contents)	Avoid name clashes with $\varepsilon$ -T <sub>E</sub> X commands	[ctan]
<a href="#"><b>fibnum</b></a> (contents)	Fibonacci numbers	[ctan]
<a href="#"><b>flags</b></a> (contents)	Setting/clearing of flags in bit fields	[ctan]
<a href="#"><b>getttitlestring</b></a> (contents)	Cleanup title references	[ctan]
<a href="#"><b>holtxdoc</b></a> (contents)	Private additional ltxdoc support	[ctan]
<a href="#"><b>hopatch</b></a> (contents)	Wrapper for package hooks	[ctan]
<a href="#"><b>hycolor</b></a> (contents)	Color options for hyperref/bookmark	[ctan]
<a href="#"><b>hypbmsec</b></a> (contents)	Bookmarks in sectioning commands	[ctan]
<a href="#"><b>hypcap</b></a> (contents)	Adjusting the anchors of captions	[ctan]
<a href="#"><b>hypdestopt</b></a> (contents)	Hyperref destination optimizer	[ctan]
<a href="#"><b>hypdoc</b></a> (contents)	Hyper extensions for doc.sty	[ctan]
<a href="#"><b>hypgtoe</b></a> (contents)	Links to embedded files	[ctan]

<b>hyphsubst</b> (contents)	Substitute hyphenation patterns	[ctan]
<b>ifdraft</b> (contents)	Detect class options draft and final	[ctan]
<b>iflang</b> (contents)	Checks for the current language	[ctan]
<b>intcalc</b> (contents)	Expandable calculations with integers	[ctan]
<b>kvdefinekeys</b> (contents)	Define keys	[ctan]
<b>kvsetkeys</b> (contents)	Key value parser	[ctan]
<b>listingsutf8</b> (contents)	Allow UTF-8 in listings input	[ctan]
<b>ltcmds</b> (contents)	L <small>A</small> T <small>E</small> X kernel commands for general use	[ctan]
<b>pagegrid</b> (contents)	Print page grid in background	[ctan]
<b>pagesel</b> (contents)	Select pages of a document for output	[ctan]
<b>pdfcol</b> (contents)	Handle new color stacks for pdfT <small>E</small> X	[ctan]
<b>pdfcolfoot</b> (contents)	Color stack for footnotes with pdfT <small>E</small> X	[ctan]
<b>pdfcolparallel</b> (contents)	Color stacks support for parallel	[ctan]
<b>pdfcolparcolumns</b> (contents)	Color stacks for parcolumns	[ctan]
<b>pdfcrypt</b> (contents)	Allows the setting of PDF encryption	[ctan]
<b>pdfescape</b> (contents)	Implements pdfT <small>E</small> X's escape features	[ctan]
<b>pdfrender</b> (contents)	Access to some PDF graphics parameters	[ctan]
<b>picture</b> (contents)	Dimens for picture macros	[ctan]

<a href="#"><b>protecteddef</b></a> (contents)	Define protected commands	[ctan]
<a href="#"><b>refcount</b></a> (contents)	Data extraction from label references	[ctan]
<a href="#"><b>resizegather</b></a> (contents)	Resize overly large equations	[ctan]
<a href="#"><b>rotchiffre</b></a> (contents)	Perform simple rotation ciphers	[ctan]
<a href="#"><b>scrindex</b></a> (contents)	Package index with KOMA-Script classes	[ctan]
<a href="#"><b>selinput</b></a> (contents)	Semi-automatic input encoding detection	[ctan]
<a href="#"><b>setouterhbox</b></a> (contents)	Set hbox in outer horizontal mode	[ctan]
<a href="#"><b>settobox</b></a> (contents)	Assign box dimensions to length registers	[ctan]
<a href="#"><b>soulutf8</b></a> (contents)	Permit use of UTF-8 characters in soul	[ctan]
<a href="#"><b>stackrel</b></a> (contents)	Adding subscript option to stackrel	[ctan]
<a href="#"><b>stampinclude</b></a> (contents)	Include files based on time stamps	[ctan]
<a href="#"><b>tabularht</b></a> (contents)	Tabular with height specified	[ctan]
<a href="#"><b>tabularkv</b></a> (contents)	Tabular with key value interface	[ctan]
<a href="#"><b>telprint</b></a> (contents)	Format German phone numbers	[ctan]
<a href="#"><b>thepdfnumber</b></a> (contents)	Print PDF numbers with minimal digits	[ctan]
<a href="#"><b>twoopt</b></a> (contents)	Definitions with two optional arguments	[ctan]
<a href="#"><b>uniquecounter</b></a> (contents)	Provide unlimited unique counter	[ctan]

## 2 Packages

### The `aliascnt` package

#### Abstract

Package `aliascnt` introduces *alias counters* that share the same counter register and clear list.

<b>1 User interface</b>	<b>2</b>
1.1 Introduction . . . . .	2
1.2 Syntax . . . . .	2
<b>2 Implementation</b>	<b>2</b>
2.1 Identification . . . . .	2
2.2 Create new alias counter . . . . .	2

# The `alphalph` package

## Abstract

The package provides methods to represent numbers with a limited set of symbols. Both L<sup>A</sup>T<sub>E</sub>X and plain T<sub>E</sub>X are supported.

<b>1 Documentation</b>	<b>2</b>
1.1 Introduction . . . . .	2
1.2 Use cases . . . . .	3
1.2.1 Number system based on symbols . . . . .	3

# The **bmpsize** package

## Abstract

Package **bmpsize** analyzes bitmap images to extract size and resolution data. It adds this feature to the graphics package that now do not need separate bounding box files for bitmap images. Additionally the implementation for the inclusion of bitmap images in some drivers of package **graphicx** are rewritten to support options **viewport**, **trim** and **clip**.

# The `centernot` package

## Abstract

This package provides `\centernot` that prints the symbol `\not` on the following argument. Unlike `\not` the symbol is horizontally centered.

# The `chemarr` package

## Abstract

Very often chemists need a longer version of reaction arrows (`\rightleftharpoons`) with the possibility to put text above and below. Analogous to `amsmath`'s `\xrightarrow` and `\xleftarrow` this package provides the macro `\xrightleftharpoons`.

# The `etexcmds` package

## Abstract

New primitive commands are introduced in  $\varepsilon$ -T<sub>E</sub>X. Sometimes the names collide with existing macros. This package solves this name clashes by adding a prefix to  $\varepsilon$ -T<sub>E</sub>X's commands. For example,  $\varepsilon$ -T<sub>E</sub>X's `\unexpanded` is provided as `\etex@unexpanded`.

# The `hypcap` package

## Abstract

This package tries a solution of the problem with hyperref, that links to floats points below the caption and not at the beginning of the float. Therefore this package divides the task into two part, the link setting with \capstart or automatically at the beginning of a float and the rest in the \caption command.

<b>1 Usage</b>	<b>2</b>

# The `hypdestopt` package

## Abstract

Package `hypdestopt` supports `hyperref`'s `pdftex` driver. It removes unnecessary destinations and shortens the destination names or uses numbered destinations to get smaller PDF files.

# The `hyphsubst` package

## Abstract

A TeX format file may include alternative hyphenation patterns for a language with a different name. If the naming convention follows babel's rules, then the hyphenation patterns for a language can be replaced by the alternative hyphenation patterns, provided in the format file.

# The `kvsetkeys` package

## Abstract

Package `kvsetkeys` provides `\kvsetkeys`, a variant of package `keyval`'s `\setkeys`. It allows to specify a handler that deals with unknown options. Active commas and equal signs may be used (e.g. see `babel`'s shorthands) and only one level of curly braces is removed from the values.

<b>1 Documentation</b>	<b>2</b>

# The `listingsutf8` package

## Abstract

Package `listings` does not support files with multi-byte encodings such as UTF-8. In case of `\lstinputlisting` a simple workaround is possible if an one-byte encoding exists that the file can be converted to. Also  $\varepsilon$ -`TEX` and `pdfTEX` regardless of its mode are required.

# The **pdfcol** package

## Abstract

Since version 1.40 pdfTeX supports color stacks. The driver file `pdftex.def` for package `color` defines and uses a main color stack since version v0.04b. Package `pdfcol` is intended for package writers. It defines macros for setting and maintaining new color stacks.

# The `protecteddef` package

## Abstract

This packages provides `\ProtectedDef` for defining robust macros for both plain `TEX` and `LATEX`. First  $\varepsilon$ -`TEX`'s `\protected` is tried, then `LATEX`'s `\DeclareRobustCommand` is used. Otherwise the macro is not made robust.

<b>1 Documentation</b>	<b>1</b>

# The `refcount` package

## Abstract

References are not numbers, however they often store numerical data such as section or page numbers. `\ref` or `\pageref` cannot be used for counter assignments or calculations because they are not expandable, generate warnings, or can even be links. The package provides expandable macros to extract the data from references. Packages `hyperref`, `nameref`, `titleref`, and `babel` are supported.

# The `selinput` package

## Abstract

This package selects the input encoding by specifying between input characters and their glyph names.

# The `setouterbox` package

## Abstract

If math stuff is set in an `\hbox`, then TeX performs some optimization and omits the implicit penalties `\binoppenalty` and `\relpenalty`. This package tries to put stuff into an `\hbox` without getting lost of those penalties.

# The `stampinclude` package

## Abstract

The package replaces `\includeonly` and selects the files for `\include` by inspecting the time stamp of the `.aux` file. The file is selected for inclusion if the `.aux` file does not yet exist or is older than the corresponding `.tex` file.
