

# The `uantwerpendocs` classes<sup>\*</sup><sup>†</sup>

Walter Daems (`walter.daems@uantwerpen.be`)

2022/08/22

## 1 Introduction

This package implements the house style of Universiteit Antwerpen (version 2021) for letters, course texts, master/PhD theses, reports and slides (beamer). It also implements a class to format exams. Using these class files will make it easy for you to make and keep your course texts and theses compliant to this version and future versions of the UAntwerpen house style.

If you think (1) there's an error in compliancy w.r.t. the house style, (2) there's a feature missing in this class or theme file, or (3) there's a bug in this package, please, contact me through e-mail (`walter.daems@uantwerpen.be`) about the issue. I'll provide you with an answer and if (and as soon as) possible with a solution to the problem you spotted.

Do you like these class files? You're welcome to send us beer, wine, or just kind words.

## 2 Synopsis

The `coursetext`, `bamathesis` and `phdthesis` classes<sup>1</sup> are an extension of the standard L<sup>A</sup>T<sub>E</sub>X `book` class. They are intended to be used for writing course texts and master's or PhD theses. They provides a title page that is compliant to the UAntwerpen house style, and they also typeset the rest of your document appropriately.

The `report` class is derived from the standard L<sup>A</sup>T<sub>E</sub>X `report` class. It is intended for writing generic (e.g. research or educational) reports. The `letter` class is derived from the standard L<sup>A</sup>T<sub>E</sub>X `letter` class. It is intended to be used for writing business letters. It is compliant to the house style and allows for using windowed envelopes of the DL format, with right-aligned window.

The `exam` class is derived from the standard L<sup>A</sup>T<sub>E</sub>X `article` class.

<sup>\*</sup>This document corresponds to `uantwerpendocs` 4.4, dated 2022/08/22.

<sup>†</sup>Thanks to Paul Levrie for testing and proofreading.

<sup>1</sup>For readability the class names have been abbreviated by omitting the `uantwerpen` prefix

The slides come under the form of a custom beamer theme.

The documentation of the class files for letters, course texts theses, and exams can be found in this document.  
The documentation for the beamer theme is embedded in the demo/user-guide presentation `beamertHEMEuantwerpenuserguide.pdf`.  
Template files for all of the formats can be found below in section 5.1.

Using this package, requires the following packages:

- the `adjustbox` package
- the `babel` package
- the `background` package
- the `color` package
- the `environ` package
- the `eso-pic` package
- the `etoblox` package
- the `expl3` package
- the `fancyhdr` package
- the `geometry` package
- the `graphicx` package
- the `iftex` package
- the `ifthen` package
- the `tikz` package
- the `ulem` package
- the `xparse` package

So make sure these packages are available to your L<sup>A</sup>T<sub>E</sub>X compiler.

You will notice that as of version 4.0 `expl3` and `xparse` are part of the game. Indeed, the `uantwerpendocs` package will be slowly refactored to L<sup>A</sup>T<sub>E</sub>X3 to prepare for a package that is easier to maintain. However, the L<sup>A</sup>T<sub>E</sub>X3 constructs are never exposed to the user of the classes. So: don't worry about it!

### 3 A note on fonts

The house style of the University of Antwerp recommends using

- Prenton RP Pro for the logos and sublogos; all the logoware is included in this package, so nothing to worry about.
- ITC Officina Sans for posters, titlepages, cards a.s.o.  
This font is not a part of the L<sup>A</sup>T<sub>E</sub>X standard fonts. It is also not provided with this package. I cannot do this without incurring legal problems (the font is not free). However, if you have a valid license, for this font, I can help you to set it up, such that you can typeset proper title pages for course texts, PhD theses and the like. Just send me an e-mail.
- Calibri for office-like documents. Just load the \fontspec package and issue a \setmainfont{Calibri} and you're all set.

Adhering to these fonts is recommended, but not enforced. Personally, I always use a Palatine serif font for my courses. I did not find any better (free) font yet. My second favorite is still the original computer modern font by Donald E. Knuth. You are reading it right now.

### 4 Portability

These class files should be ready to use with all common modern L<sup>A</sup>T<sub>E</sub>X compilers (PDFL<sup>A</sup>T<sub>E</sub>X, XeL<sup>A</sup>T<sub>E</sub>X, LuaL<sup>A</sup>T<sub>E</sub>X, ...) from the major T<sub>E</sub>X-distributions (TeTeX, TexLive, MikTeX). However, using an old L<sup>A</sup>T<sub>E</sub>X + dvips setup is likely to get you into font problems. Advice: ditch the route via dvi. If you experience other problems, please inform the author.

## 5 Usage

### 5.1 Basic Usage

Use the templates provided below. Remember to L<sup>A</sup>T<sub>E</sub>X your source file twice.

Especially in the beamer theme some features require to run L<sup>A</sup>T<sub>E</sub>X twice in order to get the position of some elements correct.

#### 5.1.1 uantwerpcoursestext class

Use the following harness for your L<sup>A</sup>T<sub>E</sub>X course text:

```
\documentclass[ti,a4paper]{uantwerpcoursestext}
\usepackage{<include any packages you require here>}
```

```

\title{<put your title here>}
\subtitle{<put your subtitle here>}
\author{<put your name here>}

\courseversion{<put a version identifier here>}
\versionyear{<the publication date of the course here>}

\lecturer{<person teaching the course>}
\degree{<official degree title>}
\course{<course code>}{<name of the course>}

\academicyear{<XXXX-YYYY>}

\begin{document}

\maketitle

% put your LaTeX code here

\finalpage

\end{document}

```

As of version 4.0:

- the faculty is specified as an option to the `\documentclass` construct. You can find the available options in section 5.2.
- you are responsible yourself to provide the correct degree description! Maintaining the a correct list of UAntwerpen bachelor and master programs with all their specializations is beyond my ambition.

### 5.1.2 `uantwerpenbamathesis` class

Use the following harness for your L<sup>A</sup>T<sub>E</sub>X bachelor or master's thesis:

```

\documentclass[ti,a4paper]{uantwerpenbamathesis}

\usepackage{<include any packages you require here>}

\title{<put your title here>}
\author{<put your name here>}

% you can specify, no, one or multiple names in the categories
% supervisor (= promotor), cosupervisor (= copromotor),
% extsupervisor (= externe promotor)
\supervisor{<put supervisor's name(s) here>}{<affiliation goes here>}
\supervisor{<put supervisor's name(s) here>}{<affiliation goes here>}
\cosupervisor{<put supervisor's name(s) here>}{<affiliation goes here>}
\cosupervisor{<put supervisor's name(s) here>}{<affiliation goes here>}

```

```

\extsupervisor{<put supervisor's name(s) here>}{<affiliation goes here>}
\extsupervisor{<put supervisor's name(s) here>}{<affiliation goes here>}

% classmarker
\academicyear{<XXXX-YYYY>}

\begin{document}

\maketitle

% put your LaTeX code here

\finalpage

\end{document}

```

The available faculty options are listed in a table on page 8.

### 5.1.3 uantwerpenletter class

Use the following harness for your L<sup>A</sup>T<sub>E</sub>X letter:

```

\documentclass[a4paper,ti]{uantwerpenletter}

% setup fonts according to your specific TeX compiler setup

\usepackage{<include any packages you require here>}

% \logo{} only specify if you want to use your unit's logo

\sender{<put your name here>}{<put your title/role here>}
\unit{<put your unit here>}
\address{<put your multi-line address here>}
\email{<user name>}{<domain name>}
\phone{<put your phone number here, start with +32>}
\fax{<put your fax number here, start with +32>}
\mobile{<put your mobile number here, start with +32>}
\returnaddress{<put your single-line return address here>}

\to{<name of the addressee goes here>}
\toorganization{<name of the organization goes here>}
\toaddress{<multi-line address of the addressee goes here>}

\date{<specify date - otherwise today>}
\subject{<specify subject>}

\begin{document}

\maketitle % generates top of the letter

\opening{Dear <name>}

```

```

<write your letter here>

\closing{Kind regards,}

\carboncopy{<put CC people here>}
\enclosed{<put reference to enclosed documents here>}

\end{document}

```

The available faculty options are listed in a table on page 8. You may use lists in the \carboncopy and \enclosed commands. The spacing will be compact.

#### 5.1.4 uantwerpenphdthesis class

```

\documentclass[ti,10pt,twoside,openright,filled]{uantwerpenphdthesis}

You may want to use common fonts
\usepackage{<include any additional packages you require here>}

\title{<put your title here>}
\author{<put your name here>}
\affiliation{<put your affiliation here>}
\department{<put department here, if there is an official department>}
\address{<put your contact details here>}

\supervisor{<put supervisor's name here>}{<affiliation goes here>}
\supervisor{<put supervisor's name here>}{<affiliation goes here>}

\jurychairman{<put chairman's name here>}{<affiliation goes here>}

\jurymember{<put member's name here>}{<affiliation goes here>}
\jurymember{<put member's name here>}{<affiliation goes here>}
\jurymember{<put member's name here>}{<affiliation goes here>}

\degree{<put official degree name here>}
\defenselocation{<put location of defense here>}
\defensedate{<put defense year here>}
\titlepageimage{<set file name of title page image here>}

\isbn{<put ISBN13 number here>}
\depot{<put Depot number here>}

\begin{document}

\maketitle
\frontmatter
\tableofcontents
\mainmatter

% write your PhD text here

\appendix

```

```
% write appendix material here

\makefinalpage

\end{document}
```

The available faculty options are listed in a table on page 8.

### 5.1.5 uantwerpenreport class

```
\documentclass[ti,10pt,twoside,openright,filled]{uantwerpenreport}

You may want to use common fonts
\usepackage{<include any additional packages you require here>}

\title{<put your title here>}
\author{<put your name here>}
\affiliation{<put your affiliation here>}
\address{<put your contact details here>}

\titlepageimage{<set file name of title page image here>}

\begin{document}

\maketitle
\frontmatter
\tableofcontents
\mainmatter

% write your PhD text here

\appendix

% write appendix material here

\makefinalpage

\end{document}
```

The available faculty options are listed in a table on page 8.

### 5.1.6 uantwerpenbeamer theme

```
\documentclass[aspectratio=1610]{beamer}
% options that select the proper faculty in the beamertheme:
% be, fbd, ggw, lw, ow, re, sw, ti, we, iob (no option = mother
% theme)
\usetheme[ti]{uantwerpen}
```

```

\usepackage[dutch]{babel}

\title{This is your title}
\subtitle{This is your subtitle - omit if you don't need this}
\date{This is the date - will be today if omitted}
\author{This is your name - omit if you don't need this}

## 5.2 The class options explained

The classes have several options. They are listed below. After every option, it has been indicated to which class the option applies (between square brackets, without prefix `uantwerpen`).

`xx(x)` [letter / coursetext / bamathesis / phdthesis / report / beamertheme]

Option	Faculty
<b>be</b>	Faculty of Business and Economics Faculteit Bedrijfswetenschappen en Economie
<b>fbd</b>	Faculty of Pharmaceutical, Biomedical and Veterinary Sciences Faculteit Farmaceutische, Biomedische en Diergeneeskundige Wetenschappen
<b>ggw</b>	Faculty of Medicine and Health Sciences Faculteit Geneeskunde en Gezondheidswetenschappen
<b>lw</b>	Faculty of Arts Faculteit Letteren en Wijsbegeerte
<b>ow</b>	Faculty of Design Sciences Faculteit Ontwerp-wetenschappen
<b>re</b>	Faculty of Law Faculteit Rechten
<b>sw</b>	Faculty of Social Sciences Faculteit Sociale Wetenschappen
<b>ti</b>	Faculty of Applied Engineering Faculteit Toegepaste Ingenieurswetenschappen
<b>we</b>	Faculty of Science Faculteit Wetenschappen
<b>iob</b>	Institute of Development Policy Instituut voor Ontwikkelingsbeleid- en beheer

- cameraready** [phdthesis/coursetext]  
For the **phdthesis** class, this option forces the book format to be printed on A4 with bleed space. This accommodates what your printshop requires you to provide as a camera-ready copy.
- For the **coursetext** class, this options removes the colored areas and the logo from the titlepage (and removes the finalpage altogether) to allow for universitas to print the text of your titlepage on a standard sheet that contains these colored areas and the logo (pre-printed).
- bare** [phdthesis]  
For the **phdthesis** class, this option removes the title page and the back page from the file, such that you can give a 'bare' version to your printshop.
- copyright** [coursetext]  
This option forces printing a watermark on every page. For the paper version of your document, this is inappropriate, but for any e-copy you make available, this may be appropriate;
- examiner** [exam]  
This option allows to set the exam class in examiner mode, mentioning the examiner mode on every page (as regular text in the header and also in a watermark) to make sure you never hand out that copy to students and suppressing the fillout pages.
- filled** [letter / coursetext / bamathesis / phdthesis / report]  
This option causes the text to be filled (simultaneous left and right alignment). Though this setting is not recommended, it is provided because the default \raggedright cannot be undone. The **filled** option prevents the \raggedright from being issued. However, if you care about the typographic readability of your

text, you shouldn't use this option.

**\nofoldline** [letter]

This option suppresses the fold line on a letter.

Common sets of options depend on the purpose:

- to make a text ready for electronic distribution: **a4paper, copyright**.
- to make a camera-ready text (for printing): **a4paper**
- to make a camera-ready coursetext (for printing at universitas): **a4paper, cameraready**
- to make a letter: no options (filling a letter is discouraged)
- to make an exam: no options (filling an exam is discouraged)
- to make a PhD text: **twoside, openright** and (optionally) **filled**
- to make a camera-ready PhD text: **twoside, openright, cameraready** and (optionally) **filled**
- to make a bare version of your PhD text for the Nieuwe Mediadienst: **twoside, openright, bare** and (optionally) **filled**
- to make a report: **twoside, openright** and (optionally) **filled**

### 5.3 The macros explained

#### 5.3.1 Macros for the coursetext, bamathesis, phdthesis classes

**\academicyear** [coursetext / bamathesis] (mandatory)

Use this macro to specify the academic year in full, i.e. in the form XXXX–YYYY.

**\author** [coursetext / bamathesis / phdthesis / report ] (mandatory)

This macro sets the author of the document. It also sets the **pdfauthor** tag of the **hyperref** package (if it is loaded), so that the PDF-document meta-information is correct.

**\copyrightnotices** [coursetext / report] (optional)

Use this macro to specify additional copyright notice messages to appear in the copyright notice on the bottom of page 2 of your course text.

**\course** [coursetext] (mandatory)

Code (first argument) and name (second argument) of the curriculum course this coursematerial or exam belongs to. The code should be of the form:  
TNNNFFFAAA, with:

Code	Explanation
T	a number indicating the type of programme (1 for Bachelor courses, 2 for Master courses , 5 for specific courses of preparatory programmes)
NNN	a number assigned by the Faculty's administration
FFF	the acronym of your Faculty, e.g., FTI
AAA	an alphanumeric code assigned by the Faculty's administration

An example of such a code: 1001FTIWIS, for the first-semester mathematics course of the Faculty of Applied Engineering.

<code>\courseversion</code>	[coursetext] (optional) This macro indicates which version of the course this is.
<code>\defensedate</code>	[phdthesis] (mandatory) Only the year should be mentioned.
<code>\defenselocation</code>	[phdthesis] (optional) Location of the defense. Defaults to “Antwerpen”.
<code>\diploma</code>	[bamathesis] (discontinued) This macro is no longer used. Use <code>\degree{}</code> instead.
<code>\lecturer</code>	[coursetext] (mandatory) You can add one or more lecturers to the course notes (in Dutch: titularis). If there are multiple persons, please, use the macro multiple times.
<code>\phddegree</code>	[phdthesis] (discontinued) This macro is no longer used. Use <code>\degree{}</code> instead.
<code>\degree</code>	[bamathesis,phdthesis,coursetext] (mandatory) This is the official degree name (in the appropriate language, possibly mixed “dutch (english)”). Specify the official title of your diploma. This must be the official title. For bachelor and master programmes in Dutch, it must be the Dutch title. For programmes in English it may be the English title. For PhD degrees, language constraints are less strict. Consult <a href="https://www.hogeronderwijsregister.be">https://www.hogeronderwijsregister.be</a> for correct bachelor and master degree titles. Consult the Doctoral bylaws of the university for correct PhD degree titles. Students of FTI and FWET, can use the <code>\bamadegree</code> command instead.
<code>\bamadoctype</code>	[bamadocument] (mandatory) This allows to set the nature of the thesis. The proper values of the argument are listed below. Don’t use this macro when you are using the <code>\bamadegree</code> macro (see below), unless you want to change the document type to ‘project’.

This data comes from uantwerpendocs-doctype.data

#### \programme

[coursetext] (discontinued)

#### \publisher

This macro is no longer used. Use \degree{} instead. [coursetext] (mandatory)  
This macro sets the publisher information of the document. It is printed on the front page. It defaults to the repographic service of campus Groenenborger, one of the standard printing services of Universiteit Antwerpen. Separate the different fields (name, adres, a.s.o) using a pipe symbol.

<code>\publishercode</code>	[course{text}] (mandatory)
	This macro sets the publisher code of the document. It is printed on the front page. This is code that the publisher uses for its internal administration. It may be a proprietary code, or an ISBN number.
<code>\subtitle</code>	[course{text} / phdthesis / report] (optional)
	This macro sets the title of the document. You may use this
	<ul style="list-style-type: none"> <li>• to further clarify the title</li> <li>• to indicate the nature of this document</li> </ul>
	The latter is to be considered when you want to provide multiple documents as parts of the full course text (e.g., Course Notes, Formula Collection, Exercise Book, Solution Book). This macro also sets the <code>subject</code> tag of the <code>hyperref</code> package (if it is loaded), so that the PDF-document meta-information is correct.
<code>\supervisor</code>	[bamathesis / phdthesis] (mandatory)
	Specifies the person(s) that promote(s)/supervise(s) the thesis. Please, use the macro multiple times if needed.
<code>\title</code>	[course{text} / bamathesis / phdthesis / report] (mandatory)
	This macro sets the title of the document. It also sets the <code>pdftitle</code> tag of the <code>hyperref</code> package (if it is loaded), so that the PDF-document meta-information is correct.
<code>\titlepageimage</code>	[phdthesis / report] (optional)
	This sets the filename of the central image on the title page to appear clipped within the curves. For PhD theses this is highly advized. For course texts, this is optional. If the image is not set, a flat colored area will appear. This is part of the house style.
<code>\versionyear</code>	[course{text} / report] (mandatory)
	This is to be the year in which you published the current version of the course in the form YYYY.

### 5.3.2 Macros for the letter class

<code>\address</code>	[letter] (mandatory)
	Address of the sending unit (or faculty). This can be different from the return address. Newlines are allowed and encouraged.
<code>\carboncopy</code>	[letter] (optional)
	List of persons receiving a copy of this letter. Format at will.
<code>\closing</code>	[letter] (mandatory)
	Closing clause of the letter. E.g. 'Best regards,'
<code>\date</code>	[letter] (optional)
	Date of the letter. If not specified today's date (at the time of running L <sup>A</sup> T <sub>E</sub> X) will be used.
<code>\email</code>	[letter] (optional)
	E-mail address of the sending person, or the administrative person tracking the

letter. This must definitely be someone that can answer questions related to this letter.

- first argument: user name
- second argument: domain name

You can specify multiple email addresses by using the command multiple times.

<b>\enclosed</b>	[letter] (optional) List of enclosed documents. Format at will.
<b>\fax</b>	[letter] (optional) Probably facsimile is not used anymore, but anyway: fax number of the sending person. See also <b>\email</b> . You can specify multiple fax addresses by using the command multiple times.
<b>\logo</b>	[letter] (optional) file name of an alternative logo to use. The file name must be the name of a file in the search path of type PDF. If this macro is not used, The default logo of the university or your faculty/institute will be used.
<b>\mobile</b>	[letter] (optional) Mobile phone number of the sending person. See also <b>\email</b> . You can specify multiple mobile phone numbers by using the command multiple times.
<b>\opening</b>	[letter] (mandatory) Opening address of the letter. E.g. 'Dear X,'.
<b>\phone</b>	[letter] (optional) Phone number of the sending person. See also <b>\email</b> . You can specify multiple phone numbers by using the command multiple times.
<b>\returnaddress</b>	[letter] (mandatory) This is a short return address (listed in small font on top of the destination address (such that it is visible in a windowed envelope (European format)). It should fit on a single line. Typically we list an acronym for the unit, a room number, a campus name and address. The goal is to get the undelivered letter back to the person that can take action accordingly.
<b>\sender</b>	[letter] (mandatory) Description of the person writing the letter. <ul style="list-style-type: none"><li>• first argument: name of the person writing the letter</li><li>• second argument: title / role of the person</li></ul>
	Newlines are not allowed in the arguments.
<b>\signature</b>	[letter] (optional) Add a signature (in between the closing statement of the letter and the sender's name. This might be a text message or a picture of your signature.
<b>\subject</b>	[letter] (mandatory) Short descriptive subject that describes the contents of the letter.

\to	[letter] (mandatory)
	Name of the addressee. Newlines are allowed. Preferably name and role are split over two lines.
\toaddress	[letter] (optional)
	Address of the addressee. Newlines are allowed. The address should fit on max. 3 lines.
\toorganization	[letter] (optional)
	Name of the organization that employs the addressee.
\unit	[letter] (optional)
	Name of the unit to which the person belongs. This can be a research group, a laboratory, an administrative division, etc. Newlines are allowed.

### 5.3.3 Macros for the exam class

\author	[exam] (mandatory)
	The author of the exam (may be multiple authors, separated by commas). On the title page, these will be labeled as 'Professor(s) - Titularis(en)'.
\academicyear	[exam] (mandatory)
	Use this macro to specify the academic year in full, i.e. in the form XXXX-YYYY.
\course	[exam] (mandatory)
	see description of \course macro on page 10.
\degree	[exam] (mandatory)
	This is the official degree name (in the appropriate language, possibly mixed "dutch (english)"). Specify the official title of your diploma. This must be the official title. For bachelor and master programmes in Dutch, it must be the Dutch title. For programmes in English it may be the English title. For PhD degrees, language constraints are less strict. Consult <a href="https://www.hogeronderwijsregister.be">https://www.hogeronderwijsregister.be</a> for correct bachelor and master degree titles. Consult the Doctoral bylaws of the university for correct PhD degree titles.
\examdate	specifies the date of the exam. We recommend the YYYY-MM-DD format, but you are free to chose your own coding scheme for dates. We advize against using UNIX epoch time, to avoid problems in the first semester exams in 2038.
\examgroupnumber	[exam] mentions the group number (may be empty)
\examlength	specifies the length of the exam in a unit of time, e.g. '4h'
\exampart	[exam] (mandatory) Description of the part of the course the exam covers. Often the evaluation of a course consists of multiple evaluation elements (e.g. a written exam, a portfolio defense and lab reports). Using this macro you can indicate the part this exam covers. E.g. it could be 'Written Exam' (to distinguish from the other parts 'portfolio defense' and 'lab reports').
\extrainfo	specifies the extra information that appears on the back of the title page, regarding

the materials that can be used during the examination and cautioning the students not to commit fraude. You can specify an optional first argument 'firstpage', such that your extra info starts on the first page, below the title block. In that case the extra info will also not be terminated with a clearpage (as we assume you want to conserve space).

- \lecturer [exam] (mandatory)  
You can add one or more lecturers to the course notes (in Dutch: titularis). If there are multiple persons, please, use the macro multiple times.
- \programme [exam] (discontinued)  
This macro is no longer used. Use \degree{} instead.
- \room specifies the rooms in which the exam will take place. This is useless info for the student, but may be of convenience for you as author or supervisor of the exam. Use UAntwerpen standard room designators, e.g. 'G.U.025' for room number 025, on the Groenenborgercampus in the U-building. If your exam is taken in multiple rooms, just specify multiple \room{} commands.
- \studentnr specifies the exam copy number. This will appear on every page of the exam, easing the reassembly of pages that do not contain any name. Moreover, it allows for blind correction as the student only writes his name at the front page.
- \tend specifies the end time of the exam in a format identical to the one chosen for \tstart.
- \tstart specifies the start time of the exam, preferable in the format 'HHhMM', e.g. '08h30'.

\subject{Congratulations for online video lectures}

\begin{document}
\maketitle

\opening{Dear prof. Bonette,}

I'd like to congratulate you and the other professors of your
university on the very instructive video lectures
provided by your University. They are valued very
highly.

You inspired many a professor at our university to provide more
technical content beyond classical paper courses.
Based on your inspiring lectures, some students desire to candidate
themselves for taking an internship at your university. You can find
their details enclosed.

Below, you can find a few more paragraphs to illustrate that this
class can generate multipage letters.

```

```

\kant[1-3]

\closing{Kind regards,}
% you might want to insert a signature picture or text:
% \signature{\includegraphics{signature.jpg}}
\carboncopy{prof. S. Mariotte, Mumford University}
\enclosed{
    \begin{enumerate}
        \item list of course numbers that are most frequently viewed at
              our university (1pp)
        \item a list of students desiring to take an internship at
              Mumford University (2pp)
    \end{enumerate}
}
\end{document}
</le-example>

```

### Example with configuration file

Probably, one has to write many letters. The sender details will be most certainly valid for many an occasion. Therefore, you might want to consider putting this default setup in a configuration file, e.g. `uantwerpenletter.cfg`:

```

<*le-cfg>
% configuration file for uantwerpenletter class
\iftutex
\usepackage{fontspec}
\setmainfont{Calibri}
\else
\usepackage{cmbright}
\fi

\sender{prof. Walter Daems}{Senior Lecturer}
\unit{Cosys-Lab}
\address{
    Campus Groenenborger \\
    Groenenborgerlaan 171 \\
    B-2020 Antwerpen \\
    BELGIUM}
\email{walter.daems}{uantwerpen.be}
\phone{+32 3 265 98 43}
\mobile{+32 499 355 115}
\returnaddress{FTI - U.301 -- Groenenborgerlaan 171, 2020 Antwerpen, BELGIUM}
</le-cfg>

```

The file can then be loaded in the preamble of your letter:

```
\input{uantwerpenletter.cfg}
```

After loading this configuration file, you may override some elements if this is appropriate.

You may also consider using multiple configuration files in case you have multiple roles in the university. Just make sure they are on your L<sup>A</sup>T<sub>E</sub>X search path.

### 6.3 Class inheritance

For convenience, we'll derive from the standard L<sup>A</sup>T<sub>E</sub>X `book`, `letter` and `article` class.

Before loading the class, we provide the extra options.

```

192 <*ct>
193 \newif\if@modern
194 \if@modernfalse
195 \DeclareOption{modern}{\@moderntrue}
196 </ct>

199 \DeclareOption{copyright}{\@copyrighttrue}
200 </ct | rp>
201 %
202 <*ct | bmt | pt | rp | le>
203 \newif\if@filled
204 \DeclareOption{filled}{\@filledtrue}
205 </ct | bmt | pt | rp | le>

```

```

206 %
207 <*ex>
208 \newif\if@examiner
209 \DeclareOption{examiner}{\@examinertrue}
210 </ex>
211 <*ct | pt>
212 \newif\if@cameraready
213 \DeclareOption{cameraready}{\@camerareadytrue}
214 </ct | pt>
215 <*pt>
216 \newif\if@bare

219 <*le>
220 \newif\if@nofoldline
221 \DeclareOption{nofoldline}{\@nofoldlinetrue}
222 </le>

```

We execute some standard options: We load the `book` class for course texts, reports and PhD theses, and the `scrbook` class for bachelor and master theses.

```

223 <*ct | bmt | pt | rp>
224 \input{uantwerpencommonoptions.clo}

242 \ProcessOptions
243 \LoadClassWithOptions{article}
244 </ex>

```

## 6.4 Modern typesetting

Let's force some modern typesetting without paragraph indentation and with a decent paragraph spacing.

```

245 <*ct | bmt | pt | rp | le | ex>
246 \setlength{\parindent}{0pt}
247 \addtolength{\parskip}{0.75\baselineskip}
248 \setcounter{secnumdepth}{3}

```

```
249 </ct | bmt | pt | rp | le | ex>
```

## 6.5 Auxiliary packages

Reinventing the wheel is a waste of time, let's preload some appropriate auxiliary packages that have proven their value.

### 6.5.1 Geometry

Let's reduce the margins to 1 inch each for the documents that are unlikely to be glue bound:

```
250 <*ct | rp | ex>
251 \RequirePackage[top=2.5cm, bottom=2.5cm, left=2.5cm, right=2.5cm]{geometry}
252 </ct | rp | ex>
253 % Let's follow the instructions by ADS for the (marginal(!) glue provision):
254 (*pt)
255 \RequirePackage[paperwidth=180mm,paperheight=260mm,
256             top=2.5cm,bottom=2.5cm,left=2.6cm,right=1.8cm,twoside]
257             {geometry}
258 </pt>
259 % Also, let's follow the office templates for the bachelor's and
260 % master's theses:
261 (*bmt)
262 \RequirePackage[top=2.6cm, bottom=2.5cm, left=3.5cm, right=1.6cm]{geometry}
263 </bmt>
264 % Letters are a little bit different:
265 (*le)
266 \RequirePackage[top=1in, bottom=1in, left=1.34in, right=1in]{geometry}
267 \RequirePackage[normalem]{ulem}
268 </le>
```

### 6.5.2 Preparing for L<sup>A</sup>T<sub>E</sub>X3

Let's make things a bit easier for me.

```
269 <*ct | bmt | pt | rp | le | ex>
270 \RequirePackage{expl3}
271 \% \RequirePackage[check-declarations]{expl3} % I use this during debug phase
272 \RequirePackage{xparse}
273 </ct | bmt | pt | rp | le | ex>
```

### 6.5.3 Font packages

Note that the use of `cmbright` is no longer imposed (as of v1.3). Using a good font is now up to the user. The packages '`newpxtext`/`newpxmath`' and '`cmbright`' are highly recommended. For writing letters, '`Calibri`' is the official font of the University of Antwerp.

```

274 <*ct | bmt | pt | rp | le>
275 % no more font code
276 </ct | bmt | pt | rp | le>
```

#### 6.5.4 Boilerplate packages

Some boilerplate packages and an empty macro to test against (using \ifx)

```

277 <*ct | bmt | pt | rp | le | ex>
278 \RequirePackage{iftex}
279 \RequirePackage{xstring}
280 \RequirePackage{etoolbox}
281 \RequirePackage{ifthen}
282 \IfFileExists{shellesc.sty}{\RequirePackage{shellesc}}{}
283 </ct | bmt | pt | rp | le | ex>
```

#### 6.5.5 Graphics packages

Graphics packages that are required for the title page, but may come in handy for regular use as well.

Some packages for coursetext and bamathesis:

```

284 <*ct | bmt | pt | rp | le | ex>
285 \RequirePackage{graphicx}
286 \RequirePackage{soul}
287 \RequirePackage[export]{adjustbox}
288 \RequirePackage{color}
289 \RequirePackage{tikz}
290 \usetikzlibrary{positioning,calc}
291 \RequirePackage{eso-pic}
292 </ct | bmt | pt | rp | le | ex>
293 <*ct | rp>
294 \if@copyright
295 \RequirePackage[contents={},color=lightgray,scale=3]{background}
296 \fi
297 </ct | rp>
298 <*pt>
299 \usepackage{ean13isbn}
300 </pt>
```

#### 6.5.6 UAntwerpen color and logo scheme

```

301 <*ct | bmt | pt | rp | le | ex>
302 \RequirePackage{uantwerpencolorlogoscheme}
303 </ct | bmt | pt | rp | le | ex>
```

#### 6.5.7 Header/Footer

The de-facto standard for headers and footers:

```
304 <*ct | bmt | pt | rp | le | ex>
```

```

305 \RequirePackage{fancyhdr}
306 </ct | bmt | pt | rp | le | ex>

```

## 6.6 Colors

```

307 <*ct | bmt | pt | rp | le | ex>
308 \definecolor{lightgray}{cmyk} {0.00,0.00,0.00,0.05}
309 \definecolor{darkgray}{cmyk} {0.00,0.00,0.00,0.80}
310 \definecolor{watermark}{cmyk} {0.00,0.00,0.00,0.05}
311 </ct | bmt | pt | rp | le | ex>

```

## 6.7 Fancy highlighting

Though I'm not keen on highlighting, the style gurus have decided to put highlighting in the titles of the bachelor's and master's theses. The macro `\blow` highlights a token sequence using white text on the main color.

```

312 <*bmt>
313 \newcommand\@quantwerpendocshl[1]{\begin{lrbox}{\@tempboxa}\#1\end{lrbox}\@quantwerpendocshlbox{%
314 \newcommand{\@quantwerpendocshlbox}[1]{%
315   \tikz{%
316     \pgfpathrectangle{\pgfpoint{1pt}{0pt}}{\pgfpoint{\wd #1}{\ht #1}}%
317     \pgfusepath{use as bounding box}%
318     \node[anchor=base%
319       west,align=center,fill=maincolor,text=white,outer sep=0pt,inner%
320       xsep=5pt, inner ysep=0pt,minimum height=\ht\strutbox+1pt]{\raisebox{1pt}{\strut}\strut\usebox{%
321     }%
322   }%
323 </bmt>

```

## 6.8 Fancy inset texts and quotes

```

324 <*bmt | pt | ct | rp>
325 \newcommand\insettext[1]{%
326   \textcolor{basecolor}{%
327     \begin{tabular}{@{\hskip3ex}textcolor{maincolor}{\vrule width 2.5pt}\hskip3ex\large\bfseries}

331 }
332 \newcommand\insetquote[1]{%

## 6.9 Camera-ready version

For the course texts, this means printing no artwork (as universitas prints your front page on a pre-printed color page) This is taken care of by the titlepage and finalpage environments, so no extra code is needed here.

For PhD texts, this means providing bleed space. We implemented this using the very fine `crop` package.

```

350 <*pt>
351 \if@cameraready
352 \RequirePackage[cam,center,width=21truecm,height=29.7truecm]{crop}
353 \fi
354 </pt>

```

## 6.10 Data dictionary and parser

Let's start by defining our dictionary:

```

355 <*ct | bmt | pt | rp | le | ex>
356 \ExplSyntaxOn
357 \prop_new:N \g_@@_data_prop
358 </ct | bmt | pt | rp | le | ex>%

```

The dictionary can be accessed using the following document command:

```

359 <*ct | bmt | pt | rp | le | ex>
360 \NewDocumentCommand{\uantwerpendocsprop}{m}{
361   \prop_item:Nn \g_@@_data_prop{#1}
362 }
363 \NewDocumentCommand{\uantwerpendocsPROP}{m}{
364   \str_uppercase:f { \prop_item:Nn \g_@@_data_prop{#1} }
365 }
366 </ct | bmt | pt | rp | le | ex>%

```

To this end, we use the following parsing infrastructure:

```

367 <*ct | bmt | pt | rp | le | ex>
368 \NewDocumentCommand{\uantwerpendocspropread}{m}{
369   \@@_datareader:n { #1 }
370 }
371 \cs_generate_variant:Nn \prop_gput:Nnn{ Nxx }
372 \cs_new_nopar:Npn \@@_dataparser:w #1 = #2!! {
373   \tl_set:Nn \l_tmpa_tl {#1}
374   \tl_set:Nn \l_tmpb_tl {#2}
375   \tl_trim_spaces:N \l_tmpa_tl

```

```

376   \tl_trim_spaces:N \l_tmpb_tl
377   \prop_gput:Nxx \g_@@_data_prop { \l_tmpa_tl} { \l_tmpb_tl }
378 }
379 ⟨/ct | bmt | pt | rp | le | ex⟩

```

invoked by the following data file reader:

```

380 ⟨*ct | bmt | pt | rp | le | ex⟩
381 \ior_new:N \l_@@_data_ior
382 \cs_new_nopar:Nn \@@_datareader:n {
383   \ior_open:Nn \l_@@_data_ior { uantwerpendocs-#1.data }
384   \ior_str_map_inline:Nn \l_@@_data_ior {
385     \regex_match:nnTF {=} {##1} {
386       \@@_dataparser:w ##1!!
387     }
388   }
389 }
390 \ior_close:N \l_@@_data_ior
391 }
392 ⟨/ct | bmt | pt | rp | le | ex⟩

```

By default, we load the generic (not yet!) and the english data file:

```

393 ⟨*ct | bmt | pt | rp | le | ex⟩
394 \clist_map_inline:nn {en} {
395   \@@_datareader:n { #1 }
396 }
397 \% \prop_show:N \g_@@_data_prop
398 \ExplSyntaxOff
399 ⟨/ct | bmt | pt | rp | le | ex⟩

```

## 6.11 Babel provisions

We will fill the dictionary from the generic data file (for elements that should not be translated, currently empty) and the language specific data files (for elements that can be translated).

```

\begin{frame}
    {Using our beamer theme}

```

The `\texttt{uantwerpen}` beamer theme is distributed by CTAN. It should be installed with your `\TeX{}` distribution by default.

You can load the package in your preamble as:

```

\begin{codesnippet}
\command{documentclass}[aspectratio=1610]\{beamer\} \\
\command{usetheme}[theme-options-go-here]\{uantwerpen\} \\
\command{usepackage}[english]\{babel\}
\end{codesnippet}

\heading{Remarks}
\begin{itemize}
\item The theme behaves well for all supported beamer aspect ratios.
\item $16\times 10$ is currently your best option to maximize your slide size given a modern LCD-projector!
\item Only \texttt{dutch} and \texttt{english} are supported. The correct logoware is selected using the babel language option!
\end{itemize}
\end{frame}

\begin{tcolorbox}[t,rqgraphic= {
\begin{minipage}{0.35\textwidth}

\end{tabular}
\end{center}
\end{minipage}
}]
{Theme options{}}

The following theme options may come in handy:
\begin{description}
\item[\tt X] to invoke your own faculty's colors and logos, with X one of the options in the table on the right\\
(I assume you know your faculty abbreviation)
\item[\tt nofonts] disables font loading, so you can load your own fonts
\item[\tt rgb] to select RGB color encoding (best for projecting, default)
\item[\tt cmyk] to select CMYK color encoding (best for printing)
\item[\tt neutralcolors] to disable your faculty colors and use the standard UAntwerpen colors
\end{description}
\medskip

```

```

The defaults of the theme are:
\begin{itemize}
\item no faculty option ($\Rightarrow$ standard UAntwerpen logos)
\item \texttt{rgb}
\end{itemize}

\end{t3qframe}

\begin{frame}[t]
{A note on the compiler you are using}
{Fonts galore}

Depending on the type of compiler you use, a different font scheme
is loaded:
\begin{description}
\item[\LaTeX] --- ancient compiler - no support\\
  Don't use!
\item[pdf\LaTeX] --- very old school compiler - no OTF/TTF support\\
  Computer Modern Sans Serif is used as font
\item[Xe\LaTeX] --- old school compiler - the first to have OTF/TTF
  support\\
  Calibri is used as font (with cmbright math fonts)
\item[Lua\LaTeX] --- current compiler - your best option\\
  Calibri is used as font (with cmbright math fonts)
\end{description}

{Title slides}
\heading{Contents} ---
The contents of the title slide can be set in your preamble
using the classical \LaTeX{} commands:
\begin{itemize}
\item \command{title}{}
\item \command{subtitle}{}
\item \command{author}{}
\item \command{date}{}
\end{itemize}
We don't specify an institute, as the logos do so.

\heading{Code} --- The titleslide is easily typeset as:\\
\begin{codesnippet}
\bframe[] [option]\\
\ind\command{maketitle}\\
\eframe
\end{codesnippet}

```

```

with no option, or one of: \texttt{normal}, \texttt{negative},
\texttt{negativefill}.

\{Frame titles\}
\{And subtitles\}
\heading{How to specify them!}\\
Titles are specified using \command{frametitle}\{\} or
\command{framesubtitle}\{\} or even easier as first and second argument
to the \texttt{frame} environment (or their derived versions).

\begin{codesnippet}
\bframe[] [options go here, comma separated]\\
\ind\{first argument\}\\
\ind\{second argument\}\\
\ind frame contents \\
\eframe
\end{codesnippet}
\bigskip

\heading{Don't need them!}\\
If you need a slide without titles: just don't specify them!

\heading{Want to get rid of the footer as well?}\\
Specify the \texttt{plain} option to the frame.

\end{frame}

\begin{frame}[t]
\{The canvas\}

\heading{Flavors} --- The canvas of the slide has four flavors:
\begin{description}
\item[normal]
the ordinary white background slide
\item[negativefill]
a reverse video slide on a background (in maincolor) without white
margins
\item[negative]
a reverse video slide on a bakcground (in maincolor) with white

```

```

    margins
\item[graphicfill]
  a graphic canvas without white margins (graphic can be photo,
  graph, \ldots)
\item[graphic] a graphic canvas with white margins (graphic can be
  anything)
\end{description}
They are specified as options to the frame environment (or its
derivatives).

\heading{Remarks}
\begin{itemize}
\item You don't need to specify the normal canvas, it is the
  default.
\item In handout mode the negative and negativefill canvas will be
  typeset as normal canvas (to allow for easy printing).
\item The graphic option has many variants that we will discuss later.
\end{itemize}
\end{frame}

\begin{frame}[negativefill]
{A negativefill slide}
{with a subtle subtitle}
\kant[1]
\end{frame}

\begin{frame}[negative,t]
{A negative slide}
{with a subtle subtitle}
Don't do this! Don't use a title and subtitle, nor straight text
but put material on this slide that does not touch or cross the
edges of the background!\\
E.g., the graph on the bottom right
\place[anchor=south east] at (0.9,0.1) {
\begin{tikzpicture}[white]
\begin{axis}
[width=4cm,height=5cm,grid=both,font=\footnotesize]
\addplot[white] {x^2};
\end{axis}
\end{tikzpicture}
}
The best advice is not to reserve this canvas for title frames and
intermission slides.
\end{frame}

\begin{frame}[t]
{Vertical alignment}

You can easily specify the vertical alignment of your frame
contents, using the options
\begin{description}
\item[\texttt{t}] for top
\item[\texttt{c}] for center
\item[\texttt{b}] for bottom

```

```

\end{description}

Example:\\[1ex]
\begin{codesnippet}
\begin{bframe}[] [t]\\
\ind{\Title}\\
\ind{\Subtitle}\\
\ind frame contents\\
\eframe
\end{codesnippet}

\end{frame}

\begin{frame}[t]
{Colors}
{What a wonderful world}

\heading{Standard colors}\\
You can select the theme colors using:\\
\textcolor{maincolor}{Main color}:\\
can be specified as \LaTeX-color \emph{maincolor}\\
\textcolor{sidecolor}{Side color}:\\
can be specified as \LaTeX-color \emph{sidecolor}\\
\textcolor{basecolor}{Base color}:\\
can be specified as \LaTeX-color
\emph{basecolor}

\heading{Advice}\\
\begin{itemize}
\item Stick to the standard colors or use grayscale tints!
\item Only use color when functional (e.g. in graphs)
\end{itemize}

\heading{Alert}
You can use \alert{\command{alert{}}} to grab the attention of the
user. It will typeset your content in \alert{red}.

\heading{Not taking any advice?}\\
You can fiddle with the colors, but do so in smart way.
Use \command{setbeamercolor}. You can see how it is used in the
\ttt{beamercolorthemewerpen.sty} file.

\end{frame}

\begin{frame}[t]
{Logo demo}

The logo's can be used as follows (but you should not need them):
\begin{itemize}
\item \command{includegraphics[width=3cm]{\command{logopos}}}\\
\begin{center}
\begin{tikzpicture}
\draw[fill,white] (0,0) rectangle node {\includegraphics[width=3cm]{\logopos}} (4,1.25);
\end{tikzpicture}
\end{center}
\end{itemize}

```

```

\end{center}

\begin{center}
\begin{tikzpicture}
\draw[fill] (0,0) rectangle node {\includegraphics[width=3cm]{\logoneg}} (4,1.25);
\end{tikzpicture}
\end{center}
\item \command{includegraphics[width=3cm]\{\command{logomonowhite}\}}\\
\begin{center}
\begin{tikzpicture}

You can select any of the canvas templates: negative, negativefill,
graphic, graphicfill and normal, and combine it with:
\begin{description}
\item[\command{sectionpage}]
\item[\command{subsectionpage}]
\end{description}

Example:\\[1ex]

(this how the previous two slide were generated)
\end{frame}

\subsection{Custom intermission slides}

\begin{frame}[negative]
\subsectionpage
\end{frame}

\begin{frame}[t]
{Basic idea}

If you are a fan of graphic material in slideware, you can use a
\textrtt{graphic} or \textrtt{graphicfill} canvas in combination with
small snippets you put on the slide using\\\[1ex]
\qqquad\command{place[node options] at (x,y) \{<material>\}}\\\[1ex]
with
\begin{itemize}
\item $(x,y)=(0,0)$ the bottom left of the slide and $(1,1)$ the top
right of the slide
\item \textrtt{node options} any options you want to hand over to the
tikz node that is used to position the material.
\end{itemize}
\end{itemize}
\medskip

E.g., the next slide was created using:\\\[1ex]
\begin{codesnippet}[0.8\textwidth]
\begin{bframe}[] [graphic,t]\\
\ind\command{place} at (0.5,0.5) \{\command{uantwerpenicon[scale=0.8]}\}\\\
\eframe
\end{codesnippet}
\medskip

You will have to run \LaTeX{} twice in order for the position to be correct!
\end{frame}

\begin{frame}[graphic,t]
\place at (0.5,0.5) {\uantwerpenicon[scale=0.8]}
\end{frame}

\begin{frame}[t]
{Shading photographs}

Often you need make a photograph a little bit more opaque in order
for the (white) text to readable.

To this end you can use the following command\\\[1ex]
\qqquad\command{darken[s]\{<material>\}}\\\[1ex]
with $s$ a value between 0 and 1 to specify the level of darkening.

E.g., the next slide was created using:
\begin{codesnippet}[0.9\textwidth]

```

```

\bframe[] [graphicfill=\{\command{darken}%
[0.25]\{\command{includegraphics}%
[scale=0.1,min width=\command{paperwidth},min height=\command{paperheight}]\}%
\{Images/uantwerpen-09.jpg\}\},t]\\"
\ind\command{uantwerpencallout}\{3\}\{2.5\}\{\\"
\ind\ind\command{bfseries} You cannot be serious!\textbackslash\textbackslash[1ex]\\"
\ind\ind John McEnroe\}\\"
\}\\"
\eframe
\end{codesnippet}
\end{frame}

\begin{frame}[graphicfill=\darker[0.25]%
{\includegraphics[scale=0.1,min width=\paperwidth,min height=\paperheight]%
{Images/uantwerpen-09.jpg}}],t]
\place [anchor=north east] at (0.95,0.5) {
\uantwerpencallout{3}{2.5}%
\bfseries You cannot be serious!\\"[1ex]
John McEnroe}
}
\end{frame}

\begin{frame}[t]
{Shading photographs locally}

```

You can also choose to shade the local backdrop of the material you put on the side. If you like the `\command{uantwerpencallout}` command of the previous slide, you can give it an optional argument to set the fill opacity of the backdrop behind the text.

E.g., the next slide was created using:

```

\begin{codesnippet}[0.9\textwidth]
\bframe[] [graphic,t]\\"
\ind\command{place} [anchor=north west] at (0.1,0.9) \{\\"
\ind\ind\command{uantwerpencallout}[fill opacity=0.5]\{4.5\}\{2.5\}\{\\"
\ind\ind\ind\command{bfseries} I'll be back!\textbackslash\textbackslash[1ex]\\"
\ind\ind\ind Arnold Schwarzenegger\}\\"
\}
\eframe
\end{codesnippet}
\medskip

```

The `\command{uantwerpencallout}` command has the following syntax:\\"[1ex]  
`\qqquad\command{uantwerpencallout}[options]\{width\}\{height\}\{contents\}`  
`\medskip`

Remember to run `\LaTeX{}` twice in order for the position of the callout to be correct!

```

\end{frame}

\begin{frame}[graphic,t]
\place [anchor=north west] at (0.1,0.9) {
\uantwerpencallout[fill opacity=0.5]{4.5}{2.5}{
```

```

\bfseries I'll be back!\\[1ex]

  {Some genuine advice}
  \small

    Dear user,

    Candy slides are nice for PR, but bad for conveying a message.

    Beamer is a tool to typeset technical presentations. Need more
    animation and eye candy? Use other tools. They are much easier in
    ruining your audiences' day.

    Effective slides are simple slides.\\
    Go by cognitive consonance, flirt with cognitive dissonance, but
    stay away from cognitive cacophony.
    This presentation is i.m.ho. a bad one, as it shows the
    cacophony of possibilities. But hey, you were the one asking for it.

    A lot of effort has gone into this template. I hope you like it.
    If you have good suggestions, e-mail me. If you have questions, I
    might even help you.

    Cheers!

    Walter Daems\\
