

The `uantwerpendocs` classes^{*}[†]

Walter Daems (`walter.daems@uantwerpen.be`)

2021/03/23

1 Introduction

This package implements the house style of Universiteit Antwerpen (version 2021) for letters, course texts, master/PhD theses and slides (beamer). It also implements a class to format exams (which is for efficiency reasons and ease of copying not fully UAntwerpen house style compliant). Using these class files will make it easy for you to make and keep your course texts and theses compliant to this version and future versions of the UAntwerpen house style.

Unfortunately, this version is a transitional package, because the house style renewal is introduced gradually. This means that the letter class and slide theme have been renewed, while the course texts and theses have not. Why are the latter not ready? Because the house style makeover team has not yet come up with a specification. This puts the message of the next paragraph against the correct background.

If you think (1) there's an error in compliancy w.r.t. the house style, (2) there's a feature missing in this class or theme file, or (3) there's a bug in this package, please, contact me through e-mail (`walter.daems@uantwerpen.be`) about the issue. I'll provide you with an answer and if (and as soon as) possible with a solution to the problem you spotted.

Do you like these class files? You're welcome to send us beer, wine, or just kind words.

2 Synopsis

The `coursetext`, `bamathesis` and `phdthesis` classes¹ are an extension of the standard L^AT_EX book class. They are intended to be used for writing course texts and master's or PhD theses. They provides a title page that is compliant to the UAntwerpen house style, and they also typeset the rest of your document appropriately.

^{*}This document corresponds to `uantwerpendocs` 3.2, dated 2021/03/23.

[†]Thanks to Paul Levrie for testing and proofreading.

¹For readability the class names have been abbreviated by omitting the `uantwerpen` prefix

The `letter` class is derived from the standard L^AT_EX `letter` class. It is intended to be used for writing business letters. It is compliant to the house style and allows for using windowed envelopes of the DL format, with right-aligned window.

The `exam` class is derived from the standard L^AT_EX `article` class and is for efficiency reasons not fully UAntwerpen house style compliant.

The slides come under the form of a custom beamer theme.

The documentation of the class files for letters, course texts theses, and exams can be found in this document.

The documentation for the beamer theme is embedded in the demo/user-guide presentation `beamertHEMEuantwerpenuserguide.pdf`.

Template files for all of the formats can be found below in section 4.1.

Using this package, requires the following packages:

- the `adjustbox` package
- the `atbegshi` package
- the `auto-pst-pdf` package
- the `babel` package
- the `background` package
- the `color` package
- the `environ` package
- the `eso-pic` package
- the `etoblox` package
- the `fancyhdr` package
- the `geometry` package
- the `graphicx` package
- the `hyperref` package
- the `iftex` package
- the `ifthen` package
- the `pst-barcode` package
- the `tikz` package
- the `ulem` package

and optionally

- the `varioref` package.

So make sure these packages are available to your L^AT_EX compiler.

3 Portability

This class file should be ready to use with all common L^AT_EX compilers (PDFL^AT_EX, L^AT_EX, X_EL^AT_EX, LuaL^AT_EX, ...) from the major T_EX-distributions (TeTeX, TexLive, MikTeX). If you experience problems, please inform the author.

4 Usage

4.1 Basic Usage

Use the templates provided below. Remember to L^AT_EX your source file twice in order to have the title and final page correctly aligned.

Especially in the beamer theme some features require to run L^AT_EX twice in order to get the position of some elements correct.

4.1.1 `uantwerpencoursestext` class

Use the following harness for your L^AT_EX course text:

```
\documentclass[a4paper]{uantwerpencoursestext}

\usepackage{<include any packages you require here>}

4.2 The class options explained

The classes have several options. They are listed below. After every option, it has been indicated to which class the option applies (between square brackets, without prefix `uantwerpen`).

`copyright` [coursetext]

This option forces printing a watermark on every page. For the paper version of your document, this is inappropriate, but for any e-copy you make available, this may be appropriate;

`examiner` [exam]

This option allows to set the exam class in examiner mode, mentioning the examiner mode on every page (as regular text in the header and also in a watermark) to make sure you never hand out that copy to students and suppressing the fillout pages.

`filled` [letter / coursetext / bamathesis / phdthesis]

This option causes the text to be filled (simultaneous left and right alignment). Though this setting is not recommended, it is provided because the default `\raggedright` cannot be undone. The `filled` option prevents the `\raggedright` from being issued. However, if you care about the typographic readability of your text, you shouldn't use this option.

`titlepagenoartwork` [coursetext / bamathesis / phdthesis]

This option forces the title pages to be typeset without circle graphics and logo. This allows for printing on a pre-printed color sheet that already contains circle graphics and logo;

`titlepagetableonly` [coursetext / bamathesis / phdthesis]

This option forces the title-page data to be printed in table form as first page. Some publishers require the manuscript to be delivered in this form. They perform the entire typesetting of the title page.

`qr` [coursetext]

This option allows you to generate a QR code containing the details of the course on the title page or the table-only title page. For this option to work, the package `pstricks` is loaded. It will not work with `pdflATEX` unless you enable shell escape. Read your `pdflATEX`-package documentation on how to do that.

Common sets of options depend on the purpose:

- to make a text ready for electronic distribution: `a4paper`, `copyright`.
- to make a camera-ready text (for printing) in case the cover is printed on a pre-printed color artwork cover sheet is: `a4paper`, `qr`, `titlepagenoartwork`.

- to make a camera-ready text (for printing) in case the cover is typeset based on table data: `a4paper`, `qr`, `titlepagetableonly`.
- to make a letter: no options (filling a letter is discouraged)
- to make an exam: no options (filling an exam is discouraged)
- to make a PhD text: `b5paper`, `twoside`, `openright` and `filled`

4.3 The macros explained

4.3.1 Common macros

After every macro, it has been indicated to which class the macro applies (between square brackets), and whether it is mandatory or not.

`\facultyacronym` [coursetext / bamathesis / phdthesis / exam] (mandatory)
 This macro sets the acronym of the faculty. This macro also sets the faculty name according to the specified acronym. If you're missing a faculty or institute, please ask the author to complete the list.

The available acronyms are:

| Acronym | Faculty name |
|---------|--|
| ASoE | Antwerp School of Education |
| CPG | Centrum Pieter Gillis |
| FBD | Faculteit Farmaceutische, Biomedische en Diergeneeskundige Wetenschappen |
| GGW | Faculteit Geneeskunde en Gezondheidswetenschappen |
| IOB | Instituut voor Ontwikkelingsbeleid- en beheer |
| LW | Faculteit Letteren en Wijsbegeerte |
| OW | Faculteit Ontwerp-wetenschappen |
| SW | Faculteit Sociale Wetenschappen |
| RE | Faculteit Rechten |
| BE | Faculteit Bedrijfswetenschappen en Economie |
| TI | Faculteit Toegepaste Ingenieurswetenschappen |
| WE | Faculteit Wetenschappen |

4.3.2 Macros for the coursetext, bamathesis, phdthesis classes

`\academicyear` [coursetext / bamathesis] (mandatory)
 Use this macro to specify the academic year in full, i.e. in the form XXXX–YYYY.

`\author` [coursetext / bamathesis / phdthesis] (mandatory)
 This macro sets the author of the document. It also sets the `pdfauthor` tag of the `hyperref` package, so that the PDF-document meta-information is correct.

`\copyrightnotices` [coursetext] (optional)
 Use this macro to specify additional copyright notice messages to appear in the copyright notice on the bottom of page 2 of your course text.

\course [coursetext] (mandatory)
 Code (first argument) and name (second argument) of the curriculum course this coursematerial or exam belongs to. The code should be of the form:
 TNNNNFFFAAA, with:

| Code | Explanation |
|------|--|
| T | a number indicating the type of programme (1 for Bachelor courses, 2 for Master courses , 5 for specific courses of preparatory programmes) |
| NNN | a number assigned by the Faculty's administration |
| FFF | the acronym of your Faculty, e.g., FTI |
| AAA | an alphanumeric code assigned by the Faculty's administration |

An example of such a code: 1001FTIWIS, for the first-semester mathematics course of the Faculty of Applied Engineering.

For courses of the Faculty of Applied Engineering, the name should be of the form x-YYYYYYYYYY with x the number of the semester and YYYYYYYY the official name of the course.

In case the course's name contains accented characters, one should also provide a qr version, containing utf8-characters only. The macro for this purpose takes only one argument, i.e. the course's name! This is to avoid inconsistencies in the course codes.

\courseversion [coursetext] (optional)

This macro indicates which version of the course this is.

\defensedate [bamathesis / phdthesis] (mandatory)

Date of the bamathesis defense in Dutch, in the form 'month year', e.g. "juni 2012". In case of a PhD thesis, only the year should be mentioned.

\defenselocation [bamathesis / phdthesis] (optional)

Location of the defense. Defaults to "Antwerpen".

\diploma [bamathesis] (mandatory)

This must be the official title, in Dutch. To avoid errors, we chose to use specific codes, that will expand to the correct description. These codes are specific for the Faculty of Applied Engineering. If you want the author of the package to add codes for your faculty, just ask!

| Code | Description (in Dutch!) |
|--|---|
| Faculteit Toegepaste Ingenieurswetenschappen | |
| BA-IW-BK | Bachelor of Science in de industriële wetenschappen: bouwkunde |

\lecturer [coursetext] (mandatory)

This is the name of the person that actually teaches the course (in Dutch: titularis). If there are multiple persons, please, use the macros \lectureri, \lecturerii, \lectureriii, \lectureriv.

| | |
|------------------------------|--|
| <code>\phddegree</code> | [phdthesis] (mandatory) |
| | This is the official degree name (in the appropriate language, possibly mixed “dutch (english)”). |
| <code>\programme</code> | [coursetext] (mandatory) |
| | This macro takes three arguments (for the time being, only applicable to the faculty of applied engineering): |
| | <ul style="list-style-type: none"> • the type of the programme: BA, SP, VP or MA • the domain of the programme: IW • the qualifier of the programme: BK, CH, BCH, EM, EI |
| | If you need more programme classes or qualifiers, ask the author to complete the available codes. Correct usage of the macro will result in error-free descriptions on your title page. You can overrule the standard descriptions, by specifying ‘FREE’ as first argument and a free text description as second, leaving the third one empty. However, we strongly advise against taking this route. Instead, ask the author to complete the available codes. |
| <code>\publisher</code> | [coursetext] (mandatory) |
| | This macro sets the publisher information of the document. It is printed on the front page. It defaults to the reprographic service of campus Groenenborger, one of the standard printing services of Universiteit Antwerpen. |
| <code>\publishercode</code> | [coursetext] (mandatory) |
| | This macro sets the publisher code of the document. It is printed on the front page. This is code that the publisher uses for its internal administration. It may be a proprietary code, or an ISBN number. |
| <code>\subtitle</code> | [coursetext / phdthesis] (optional) |
| | This macro sets the title of the document. You may use this |
| | <ul style="list-style-type: none"> • to further clarify the title • to indicate the nature of this document |
| | The latter is to be considered when you want to provide multiple documents as parts of the full course text (e.g., Course Notes, Formula Collection, Exercise Book, Solution Book). This macro also sets the <code>subject</code> tag of the hyperref package, so that the PDF-document meta-information is correct. |
| <code>\supervisor</code> | [bamathesis / phdthesis] (mandatory) |
| | This is the name of the person that promotes/supervises the thesis. Please, use the macros <code>\supervisorI</code> , <code>\supervisorII</code> , <code>\supervisorIII</code> , <code>\supervisorIV</code> . |
| <code>\title</code> | [coursetext / bamathesis / phdthesis] (mandatory) |
| | This macro sets the title of the document. It also sets the <code>pdftitle</code> tag of the hyperref package, so that the PDF-document meta-information is correct. |
| <code>\titlepageimage</code> | [phdthesis] (optional) |
| | This sets the central image on the title page to appear clipped within the curves. |

\versionyear [coursetext] (mandatory)
This is to be the year in which you published the current version of the course in the form YYYY.

4.3.3 Macros for the letter class

\address [letter] (mandatory)
Address of the sending unit (or faculty). This can be different from the return address. Newlines are allowed and encouraged.

\carboncopy [letter] (optional)
List of persons receiving a copy of this letter. Format at will.

\closing [letter] (mandatory)
Closing clause of the letter. E.g. 'Best regards,'

\date [letter] (optional)
Date of the letter. If not specified today's date (at the time of running L^AT_EX) will be used.

\email [letter] (optional)
E-mail address of the sending person, or the administrative person tracking the letter. This must definitely be someone that can answer questions related to this letter.

- first argument: user name
- second argument: domain name

\enclosed [letter] (optional)
List of enclosed documents. Format at will.

\fax [letter] (optional)
Probably facsimile is not used anymore, but anyway: fax number of the sending person. See also \email.

\logo [letter] (optional)
file name of an alternative logo to use. The file name must be the name of a file in the search path of type PDF. If this macro is not used, The default logo of the university or your faculty/institute will be used.

\mobile [letter] (optional)
Mobile phone number of the sending person. See also \email.

\opening [letter] (mandatory)
Opening address of the letter. E.g. 'Dear X,'

\phone [letter] (optional)
Phone number of the sending person. See also \email.

\returnaddress [letter] (mandatory)
This is a short return address (listed in small font on top of the destination address (such that it is visible in a windowed envelope (European format)). It should fit on a single line. Typically we list an acronym for the unit, a room number, a

campus name and address. The goal is to get the undelivered letter back to the person that can take action accordingly.

\sender [letter] (mandatory)
Description of the person writing the letter.

- first argument: name of the person writing the letter
- second argument: title / role of the person

Newlines are not allowed in the arguments.

\signature [letter] (optional)
Add a signature (in between the closing statement of the letter and the sender's name. This might be a text message or a picture of your signature.

\subject [letter] (mandatory)
Short descriptive subject that describes the contents of the letter.

\to [letter] (mandatory)
Name of the addressee. Newlines are allowed. Preferably name and role are split over two lines.

\toaddress [letter] (mandatory)
Address of the addressee. Newlines are allowed. The address should fit on max. 3 lines.

\toorganization [letter] (optional)
Name of the organization that employs the addressee.

\unit [letter] (optional)
Name of the unit to which the person belongs. This can be a research group, a laboratory, an administrative division, etc. Newlines are allowed.

4.3.4 Macros for the exam class

\author [exam] (mandatory)
The author of the exam (may be multiple authors, separated by commas). On the title page, these will be labeled as 'Professor(s) - Titularis(sen)'.

\academicyear [exam] (mandatory)
Use this macro to specify the academic year in full, i.e. in the form XXXX-YYYY.

\course [exam] (mandatory)
see description of \course macro on page 9.

\examdate specifies the date of the exam. We recommend the YYYY-MM-DD format, but you are free to chose your own coding scheme for dates. We advize against using UNIX epoch time, to avoid problems in the first semester exams in 2038.

\examgroupnumber [exam]
mentions the group number (may be empty)

\examlength specifies the length of the exam in a unit of time, e.g. '4h'

\exampart [exam] (mandatory)

Description of the part of the course the exam covers. Often the evaluation of a course consists of multiple evaluation elements (e.g. a written exam, a portfolio defense and lab reports). Using this macro you can indicate the part this exam covers. E.g. it could be 'Written Exam' (to distinguish from the other parts 'portfolio defense' and 'lab reports').

- \extrainfo** specifies the extra information that appears on the back of the title page, regarding the materials that can be used during the examination and cautioning the students not to commit fraude. You can specify an optional first argument 'firstpage', such that your extra info starts on the first page, below the title block. In that case the extra info will also not be terminated with a clearpage (as we assume you want to conserve space).
- \programme** [exam] (mandatory)
see description of \programme macro on page 11.
- \rooms** specifies the rooms in which the exam will take place. This is useless info for the student, but may be of convenience for you as author or supervisor of the exam. Use UAntwerpen standard room designators, e.g. 'G.U.025' for room number 025, on the Groenenborgercampus in the U-building.
- \studentnr** specifies the exam copy number. This will appear on every page of the exam, easing the reassembly of pages that do not contain any name. Moreover, it allows for blind correction as the student only writes his name at the front page.
- \tend** specifies the end time of the exam in a format identical to the one chosen for \tstart.
- \tstart** specifies the start time of the exam, preferable in the format 'HHhMM', e.g. '08h30'.

\subject{Congratulations for online video lectures}

\begin{document}
\maketitle

\opening{Dear Prof. Bonette,}

I'd like to congratulate you and the other professors of your
university on the very instructive video lectures
provided by your University. They are valued very
highly.

You inspired many a professor at our university to provide more
technical content beyond classical paper courses.
Based on your inspiring lectures, some students desire to candidate
themselves for taking an internship at your university. You can find
their details enclosed.

Below, you can find a few more paragraphs to illustrate that this
class can generate multipage letters.

\lipsum[1-3]

\closing{Kind regards,}
% you might want to insert a signature picture or text:
% \signature{\includegraphics{signature.jpg}}
\carboncopy{Prof. S. Mariotte, Mumford University}
\enclosed{
    \begin{enumerate}
        \item list of course numbers that are most frequently viewed at
            our university (1pp)
        \item a list of students desiring to take an internship at
            Mumford University (2pp)
    \end{enumerate}
}
\end{document}
</le-example>

```

Example with configuration file

Probably, one has to write many letters. The sender details will be most certainly valid for many an occasion. Therefore, you might want to consider putting this

default setup in a configuration file, e.g. `uantwerpenletter.cfg`:

```
<*le-cfg>
% configuration file for uantwerpenletter class
\iftutex
\usepackage{fontspec}
\setmainfont{Calibri}
\else
\usepackage{cmbright}
\fi

\sender{Prof. Walter Daems}{Senior Lecturer}
\facultyacronym{TI} TEMP
\unit{CoSys-Lab}
\address{
    Campus Groenenborger\\
    Groenenborgerlaan 171\\
    B-2020 Antwerpen\\
    BELGIUM}
\email{walter.daems}{uantwerpen.be}
\phone{+32 3 265 98 43}
\mobile{+32 499 355 115}
\returnaddress{FTI - U.301 -- Groenenborgerlaan 171, 2020 Antwerpen, BELGIUM}
</le-cfg>
```

The file can then be loaded in the preamble of your letter:

```
\input{uantwerpenletter.cfg}
```

After loading this configuration file, you may override some elements if this is appropriate.

You may also consider using multiple configuration files in case you have multiple roles in the university. Just make sure they are on your L^AT_EX search path.

4.4.5 `uantwerpenexam`

Below you can find two examples:

- A single column layout (single language) exam
- A double column layout (English-Dutch) exam

If you require more language combinations, ask the author to implement this.

5 Implementation of the classes

5.1 Class inheritance

For convenience, we'll derive from the standard L^AT_EX `book`, `letter` and `article` class.

Before loading the class, we provide the extra options.

```

1 <*ct>
2 \newif\if@copyright
3 \DeclareOption{copyright}{\@copyrighttrue}
4 \newif\if@qr
5 \DeclareOption{qr}{\@qrtrue}
6 </ct>

7 <*ct | bmt | pt>
8 \newif\if@titlepagenoartwork
9 \DeclareOption{titlepagenoartwork}{\@titlepagenoartworktrue}
10 \newif\if@titlepagetableonly
11 \DeclareOption{titlepagetableonly}{\@titlepagetableonlytrue}
12 </ct | bmt | pt>
13 <*ct | bmt | pt | le>
14 \newif\if@filled
15 \DeclareOption{filled}{\@filledtrue}
16 </ct | bmt | pt | le>
17 <*ex>
18 \newif\if@examiner
19 \DeclareOption{examiner}{\@examinertrue}
20 </ex>

```

We execute some standard options: We load the `book` class for course texts and master theses.

```

21 <*ct | bmt | pt>
22 \ExecuteOptions{a4paper,11pt,final,oneside,openright}
23 \ProcessOptions\relax
24 \LoadClassWithOptions{book}
25 </ct | bmt | pt>
26 % We load the |letter| class for letters

```

```

27 <*le>
28 \ExecuteOptions{a4paper,10pt,final,oneside,openright}
29 \ProcessOptions
30 \LoadClassWithOptions{letter}
31 \newcommand\tat{\makeatletter @\makeatother}
32 </le>
33 % We load the |article| class for exams
34 <*ex>
35 \ExecuteOptions{a4paper,twoside,10pt}
36 \ProcessOptions
37 \LoadClassWithOptions{article}
38 </ex>

```

5.2 Modern typesetting

Let's force some modern typesetting without paragraph indentation and with a decent paragraph spacing.

```

39 <*ct | bmt | pt | le | ex>
40 \setlength{\parindent}{0pt}
41 \addtolength{\parskip}{0.75\baselineskip}
42 \setcounter{secnumdepth}{3}
43 </ct | bmt | pt | le | ex>

```

5.3 Auxiliary packages

Reinventing the wheel is a waste of time, let's preload some appropriate auxiliary packages that have proven their value.

5.3.1 Geometry

Let's reduce the margins to 1 inch each.

```

44 <*ct | bmt | pt | ex>
45 \RequirePackage[top=1in, bottom=1in, left=1in, right=1in]{geometry}
46 </ct | bmt | pt | ex>
47 <*le>
48 \RequirePackage[top=1in, bottom=1in, left=1.34in, right=1in]{geometry}
49 \RequirePackage[normalalem]{ulem}
50 \RequirePackage{atbegshi}
51 </le>

```

5.3.2 Font packages

Note that the use of *cmbright* is no longer imposed (as of v1.3). Using a good font is now up to the user. The packages '*newpxtext*/*newpxmath*' and '*cmbright*' are highly recommended. For writing letters, '*Calibri*' is the official font of the University of Antwerp.

```

52 ⟨*ct | bmt | pt | le⟩
53 % no more font code
54 ⟨/ct | bmt | pt | le⟩

```

5.3.3 Boilerplate packages

Some boilerplate packages and an empty macro to test against (using \ifx)

```

55 ⟨*ct | bmt | pt | le | ex⟩
56 \RequirePackage{iftex}
57 \RequirePackage{xstring}
58 \RequirePackage{etoolbox}
59 \RequirePackage{ifthen}
60 \IfFileExists{shellesc.sty}{\RequirePackage{shellesc}}{}
61 \newcommand{\@emptymacro}{}%
62 ⟨/ct | bmt | pt | le | ex⟩

```

5.3.4 Graphics packages

Graphics packages that are required for the title page, but may come in handy for regular use as well.

Some packages for coursetext and bamathesis:

```

63 ⟨*ct | bmt | pt | le | ex⟩
64 \RequirePackage{graphicx}
65 \RequirePackage{color}
66 \RequirePackage{tikz}
67 \usetikzlibrary{positioning}
68 \RequirePackage{eso-pic}
69 ⟨/ct | bmt | pt | le | ex⟩
70 ⟨*ct⟩
71 \if@copyright
72 \RequirePackage[firstpage=false,contents={Copyright University of
73 Antwerp, All Rights Reserved},color=lightgray,scale=3]{background}
74 \fi
75 ⟨/ct⟩
76 ⟨*pt⟩
77 \usepackage{ean13isbn}
78 ⟨/pt⟩

```

In uantwerpencoursetext we also want to generate a qr code. Therefore we load the `pst-barcode` and `auto-pst-pdf` package. In this case you must enable 'write18' or 'shell-escape' for your L^AT_EX compiler. Check your documentation on how to do so!

```

79 ⟨*ct⟩
80 \if@qr
81 \RequirePackage{auto-pst-pdf}
82 \RequirePackage{pst-barcode}
83 \fi
84 ⟨/ct⟩

```

5.3.5 Header/Footer

The de-facto standard for headers and footers:

```
85 <*ct | bmt | pt | le | ex>
86 \RequirePackage{fancyhdr}
87 </ct | bmt | pt | le | ex>
```

5.4 Colors

```
88 <*ct | bmt | pt | le | ex>
89 \definecolor{uacorpborder}{cmyk} {0.00,1.00,0.60,0.37}
90 \definecolor{uacorpblue}{cmyk} {1.00,0.25,0.00,0.50}

5.5 Babel provisions

5.10 Title page for the masterthesis and coursetext classes

The title page is generated using the `\maketitle` command. As the book class from which we inherit already defines this command, we need to renew it.

The UAntwerpen house style works with large-radius circles. We need some math in order to calculate center points and radiiuses

Header circle: the blue header-circle on top of the page. We calculate the center point and the radius based on:

- the fact that the center point is above the page's left edge;
- the distance of the intersection points at the left and right edge of the page with respect to the top of the page, X and Y respectively;
- the width of the page W .

Some simple trigonometry leads to the elevation of the center point above the top of the page Q and the radius R :

$$R = \frac{W^2 + (X - Y)^2}{2(X - Y)} \quad (1)$$

$$Q = R - X \quad (2)$$

We labeled the variables in the code below with a prefix `ua@` and a suffix `h` (from 'header'). We also took the paperheight into account (the page's coordinate system origins at the left bottom).

Therefore:

```

935 <*ct | bmt>
936 \pgfmathsetmacro{\ua@Wh}{\paperwidth}
937 \pgfmathsetmacro{\ua@Xh}{0.2\paperheight}
938 \pgfmathsetmacro{\ua@Yh}{0.125\paperheight}
939 \pgfmathsetmacro{\ua@XMyh}{\ua@Xh-\ua@Yh}
940 \pgfmathsetmacro{\ua@Rh}{0.5*\ua@Wh/\ua@XMyh*\ua@Wh+0.5*\ua@XMyh}
941 \pgfmathsetmacro{\ua@Qh}{\ua@Rh-\ua@Xh+\paperheight}
942 </ct | bmt>
```

Bottom circle A: the bottom circle with the largest radius. We calculate the center point and the radius based on:

- the fact that the center point is at a distance of $3/5$ page width from the right page edge. We denote that distance by W ;
- the fact that the horizontal bottom tangent line of the circle is at a specific height above the bottom page edge, labeled S ;
- the distance of the intersection points at the right edge of the page with respect to the horizontal bottom tangent line of the circle, denoted as $X - Y$.

Given these definitions, almost the same equations as for the header circle hold:

$$R = \frac{W^2 + (X - Y)^2}{2(X - Y)} \quad (3)$$

$$Q = R + S \quad (4)$$

with R the circle's radius, and Q the elevation of the center point above the page's bottom.

We labeled the variables in the code below with a prefix `ua@` and a suffix `ba` (from 'bottom a'). Therefore:

```

943 <*ct | bmt>
944 \pgfmathsetmacro{\ua@Wba}{0.4*\paperwidth}
945 \pgfmathsetmacro{\ua@Sba}{0.125*\paperheight}
946 \pgfmathsetmacro{\ua@XMyba}{0.02\paperheight}
947 \pgfmathsetmacro{\ua@Rba}{0.5*\ua@Wba/\ua@XMyba*\ua@Wba+0.5*\ua@XMyba}

5.11 Title page for the phdthesis classes

The title page is generated using the `\maketitle` command. As the book class from which we inherit already defines this command, we need to renew it.

The UAntwerpen house style works with large-radius circles. We need some math in order to calculate center points and radiiuses

The width and height of the page are labeled X and Y in the house style. The radius of the circles equals 6 times X. Therefore:

```

1215 <*pt>
1216 \pgfmathsetmacro{\ua@X}{\paperwidth}
1217 \pgfmathsetmacro{\ua@Y}{\paperheight}
1218 \pgfmathsetmacro{\ua@R}{6*\paperwidth}
1219 \pgfmathsetmacro{\ua@B}{(\ua@X+\ua@Y)/15}
1220 \pgfmathsetmacro{\ua@L}{0.25*\ua@X}
1221 \pgfmathsetmacro{\ua@Z}{0.1*\ua@L}
1222 \pgfmathsetmacro{\ua@H}{0.3*\ua@L}
1223 \pgfmathsetmacro{\ua@h}{0.5*(\ua@B-\ua@H)}
1224 </pt>

```

\begin{frame}
  {Using our beamer theme}

```

The `\texttt{uantwerpen}` beamer theme is distributed by CTAN. It should be installed with your `\TeX{}` distribution by default.

You can load the package in your preamble as:

```
\begin{codesnippet}
\command{\documentclass}[aspectratio=1610]\{beamer\} \\
\command{\usetheme}[theme-options-go-here]\{uantwerpen\} \\
\command{\usepackage}[english]\{babel\}
```

```

\end{codesnippet}

\heading{Remarks}
\begin{itemize}
\item The theme behaves well for all supported beamer aspect ratios.
\item $16\times 10$ is currently your best option to maximize your slide size given a modern LCD-projector!
\item Only \texttt{dutch} and \texttt{english} are supported.  
The correct logoware is selected using the babel language option!
\end{itemize}
\end{frame}

\begin{l3qframe}[t,rqgraphic= {

{Theme options{}}

The following theme options may come in handy:
\begin{description}
\item[\tt X] to invoke your own faculty's colors and logos,  

    with X one of the options in the table on the right\\
    (I assume you know your faculty abbreviation)
\item[\tt nofonts] disables font loading, so you can load your own fonts
\item[\tt rgb] to select RGB color encoding (best for projecting, default)
\item[\tt cmyk] to select CMYK color encoding (best for printing)
\item[\tt neutralcolors] to disable your faculty colors and use the standard UAntwerpen colors
\end{description}
\medskip

The defaults of the theme are:
\begin{itemize}
\item no faculty option ($\Rightarrow$ standard UAntwerpen logos)
\item \texttt{rgb}
\end{itemize}

```

```

\end{itemize}

\end{t3qframe}

\begin{frame}[t]
{A note on the compiler you are using}
{Fonts galore}

Depending on the type of compiler you use, a different font scheme
is loaded:
\begin{description}
\item[\LaTeX] --- ancient compiler - no support\\
Don't use!
\item[pdf\LaTeX] --- very old school compiler - no OTF/TTF support\\
Computer Modern Sans Serif is used as font
\item[\XeTeX] --- old school compiler - the first to have OTF/TTF
support\\
Calibri is used as font (with cmbright math fonts)
\item[\LuaTeX] --- current compiler - your best option\\
Calibri is used as font (with cmbright math fonts)

{Title slides}
\heading{Contents} ---
The contents of the title slide can be set in your preamble
using the classical \LaTeX{} commands:
\begin{itemize}
\item \command{title}{}
\item \command{subtitle}{}
\item \command{author}{}
\item \command{date}{}
\end{itemize}
We don't specify an institute, as the logos do so.

\heading{Code} --- The titleslide is easily typeset as:\\
\begin{codesnippet}
\bframe[] [option]\\
\ind\command{maketitle}\\
\fframe
\end{codesnippet}

with no option, or one of: \texttt{normal}, \texttt{negative},
\texttt{negativemode}.

  {And subtitles}
  \heading{How to specify them!} \\
  Titles are specified using \command{frametitle}\{\} or
  \command{framesubtitle}\{\} or even easier as first and second argument
  to the \texttt{frame} environment (or their derived versions).

\begin{codesnippet}
  \bframe[] [options go here, comma separated] \\
  \ind\{first argument\} \\
  \ind\{second argument\} \\
  \ind frame contents \\
  \eframe
\end{codesnippet}
\bigskip

\heading{Don't need them?} \\
If you need a slide without titles: just don't specify them!

\heading{Want to get rid of the footer as well?} \\
Specify the \texttt{plain} option to the frame.

\end{frame}

\begin{frame}[t]
  {The canvas}

\heading{Flavors} --- The canvas of the slide has four flavors:
\begin{description}
\item[normal]
  the ordinary white background slide
\item[negativefill]
  a reverse video slide on a background (in maincolor) without white
  margins
\item[negative]
  a reverse video slide on a background (in maincolor) with white
  margins
\item[graphicfill]
  a graphic canvas without white margins (graphic can be photo,
  graph, \ldots)
\item[graphic]
  a graphic canvas with white margins (graphic can be

```

```

        anything)
\end{description}
They are specified as options to the frame environment (or its
derivatives).

\heading{Remarks}
\begin{itemize}
\item You don't need to specify the normal canvas, it is the
      default.
\item In handout mode the negative and negativefill canvas will be
      typeset as normal canvas (to allow for easy printing).
\item The graphic option has many variants that we will discuss later.
\end{itemize}
\end{frame}

\begin{frame}[negativefill]
{A negativefill slide}
{with a subtle subtitle}
\lipsum[1]
\end{frame}

\begin{frame}[negative,t]
{A negative slide}
{with a subtle subtitle}
Don't do this! Don't use a title and subtitle, nor straight text
but put material on this slide that does not touch or cross the
edges of the background!\\
E.g., the graph on the bottom right
\place[anchor=south east] at (0.9,0.1) {
\begin{tikzpicture}[white]
\begin{axis}
[width=4cm,height=5cm,grid=both,font=\footnotesize]
\addplot[white] {x^2};
\end{axis}
\end{tikzpicture}
}
The best advice is not to reserve this canvas for title frames and
intermission slides.
\end{frame}

\begin{frame}[t]
{Vertical alignment}

You can easily specify the vertical alignment of your frame
contents, using the options
\begin{description}
\item[\texttt{t}] for top
\item[\texttt{c}] for center
\item[\texttt{b}] for bottom
\end{description}

Example:\\[1ex]
\begin{codesnippet}
\bframe[] [t]\\

```

```

\ind\{Title\} \\
\ind\{Subtitle\} \\
\ind frame contents \\
\begin{frame}
\end{codesnippet}

{Colors}
{What a wonderful world}

\heading{Standard colors} \\
You can select the theme colors using:\\
\textcolor{maincolor}{Main color}:\\
can be specified as \LaTeX-color \emph{maincolor}\\
\textcolor{sidecolor}{Side color}:\\
can be specified as \LaTeX-color \emph{sidecolor}\\
\textcolor{basecolor}{Base color}:\\
can be specified as \LaTeX-color \\
\emph{basecolor}

\heading{Advice} \\
\begin{itemize}
\item Stick to the standard colors or use grayscale tints!
\item Only use color when functional (e.g. in graphs)
\end{itemize}

\heading{Alert}
You can use \alert{\command{alert{}}} to grab the attention of the user. It will typeset your content in \alert{red}.

\heading{Not taking any advice?} \\
You can fiddle with the colors, but do so in smart way. Use \command{setbeamercolor}. You can see how it is used in the \texttt{beamercolorthemewantwerpen.sty} file.

\end{frame}

\begin{frame}[t]
{Logo demo}

The logo's can be used as follows (but you should not need them):
\begin{itemize}
\item \command{includegraphics[width=3cm]\{\command{logopos}\}} \\
\begin{center}
\begin{tikzpicture}
\draw[fill,white] (0,0) rectangle node {\includegraphics[width=3cm]\{\logopos\}} (4,1.25);
\end{tikzpicture}
\end{center}
\item \command{includegraphics[width=3cm]\{\command{logoneg}\}} \\
\begin{center}
\begin{tikzpicture}
\draw[fill] (0,0) rectangle node

```

```

    {\includegraphics[width=3cm]{\logoneg}} (4,1.25);
\end{tikzpicture}
\end{center}
\item \command{\includegraphics[width=3cm]{\command{\logomonowhite}}}\}\\\
\begin{center}
\begin{tikzpicture}
\draw[fill] (0,0) rectangle node
{\includegraphics[width=3cm]{\logomonowhite}} (4,1.25);

You can select any of the canvas templates: negative, negativefill,
graphic, graphicfill and normal, and combine it with:
\begin{description}
\item[\command{sectionpage}]
\item[\command{subsectionpage}]
\end{description}

Example:\\[1ex]

\ind \command{subsectionpage}\\

\end{codesnippet}\\[1ex]
(this how the previous two slide were generated)
\end{frame}

```

```

\subsection{Custom intermission slides}

\begin{frame}[negative]
  \subsectionpage
\end{frame}

\begin{frame}[t]
  {Basic idea}

  If you are a fan of graphic material in slideware, you can use a
  \texttt{graphic} or \texttt{graphicfill} canvas in combination with
  small snippets you put on the slide using\\
  \texttt{\place[options] at (x,y) \{<material>\}}\\
  with
  \begin{itemize}
    \item $(x,y)=(0,0)$ the bottom left of the slide and $(1,1)$ the top
      right of the slide
    \item \texttt{node options} any options you want to hand over to the
      tikz node that is used to position the material.
  \end{itemize}
\end{frame}

\medskip

E.g., the next slide was created using:\\
\begin{codesnippet}[0.8\textwidth]
\bframe[] [graphic,t]\\
\ind\command{\place} at (0.5,0.5) {\command{\uantwerpenicon[scale=0.8]}}\\
\fframe
\end{codesnippet}
\medskip

You will have to run \LaTeX{} twice in order for the position to be correct!
\end{frame}

\begin{frame}[graphic,t]
  \place at (0.5,0.5) {\uantwerpenicon[scale=0.8]}
\end{frame}

\begin{frame}[t]
  {Shading photographs}

  Often you need make a photograph a little bit more opaque in order
  for the (white) text to readable.

  To this end you can use the following command\\
  \texttt{\darken[s]\{<material>\}}\\
  with $s$ a value between 0 and 1 to specify the level of darkening.

  E.g., the next slide was created using:
\begin{codesnippet}[0.9\textwidth]
\bframe[] [graphicfill=\command{\darken}{%
  [0.25]\command{\includegraphics}{%
    [scale=0.1,min width=\command{paperwidth},min height=\command{paperheight}]}%\\
  \{Images/uantwerpen-09.jpg\}},t]\\
\command{\place} [anchor=north east] at (0.95,0.5) \f
\end{codesnippet}

```

```

\ind\command{uantwerpencallout}{3}{2.5}\\\

\ind\ind\command{bfseries} You cannot be serious!\textbackslash\textbackslash[1ex] \\
\ind\ind John McEnroe\\
}\\\
\eframe
\end{codesnippet}
\end{frame}

\begin{frame}[graphicfill={\darken[0.25]}%
{\includegraphics[scale=0.1,min width=\paperwidth,min height=\paperheight]%
{Images/uantwerpen-09.jpg}},t]
\place [anchor=north east] at (0.95,0.5) {
\uantwerpencallout[3]{2.5}{%
\bfseries You cannot be serious!\\[1ex]
John McEnroe}
}
\end{frame}

\begin{frame}[t]
{Shading photographs locally}

You can also choose to shade the local backdrop of the material you put on the side. If you like the \command{uantwerpencallout} command of the previous slide, you can give it an optional argument to set the fill opacity of the backdrop behind the text.

E.g., the next slide was created using:

\begin{codesnippet}[0.9\textwidth]
\bfframe[] [graphic,t]\\
\ind\command{place} [anchor=north west] at (0.1,0.9) \\\
\ind\ind\command{uantwerpencallout}[fill opacity=0.5]{4.5}{2.5}\\\\
\ind\ind\command{bfseries} I'll be back!\textbackslash\textbackslash[1ex] \\
\ind\ind\ind Arnold Schwarzenegger\\\
}\\
\eframe
\end{codesnippet}
\medskip

The \command{uantwerpencallout} command has the following syntax:\\[1ex]
\quad\quad\quad\command{uantwerpencallout}[options]{width}{height}{contents}\\
\medskip

Remember to run \LaTeX{} twice in order for the position of the callout to be correct!

\end{frame}

\begin{frame}[graphic,t]
\place [anchor=north west] at (0.1,0.9) {
\uantwerpencallout[fill opacity=0.5]{4.5}{2.5}{%
\bfseries I'll be back!\\[1ex]
Arnold Schwarzenegger}
}
\end{frame}

{Customizing the template}

If you want to override logos/colors to create a template for your
own research group or department:
renew the commands below. The redefinitions must be put just after
the \command{\begin\{document\}} statement.\\
The construction below allows you to put the stuff in a style file
that you must load after (!) the \command{\usetheme} command.\\
\begin{codesnippet}[0.95\textwidth]
\command{AtBeginDocument}{}\\
\ind\command{renewcommand}\command{logopos\{your-pos-logo-filename-here\}}\\
\ind\command{renewcommand}\command{logoneg\{your-negative-logo-filename-
here\}}\\
\ind\command{renewcommand}\command{logomonowhite\{your-mono-logo-filename-
here\}}\\
\ind\command{renewcommand}\command{iconfile\{your-icon-filename-here\}}\\
\ind\command{colorlet\{maincolor\}\{your-favorite-color\}}\\
\ind\command{colorlet\{sidecolor\}\{your-secondfavorite-color\}}\\
\ind\command{colorlet\{basecolor\}\{some-solid-color\}}\\
}

  {Some genuine advice}
  \small

  Dear user,

  Candy slides are nice for PR, but bad for conveying a message.

  Beamer is a tool to typeset technical presentations. Need more
  animation and eye candy? Use other tools. They are much easier in
  ruining your audiences' day.

  Effective slides are simple slides.\\
  Go by cognitive consonance, flirt with cognitive dissonance, but
  stay away from cognitive cacophony.
  This presentation is i.m.ho. a bad one, as it shows the
  cacophony of possibilities. But hey, you were the one asking for it.

  A lot of effort has gone into this template. I hope you like it.
  If you have good suggestions, e-mail me. If you have questions, I
  might even help you.

  Cheers!

  Walter Daems\\
