

The ctanbib package

Michal Hoftich
michal.h21@gmail.com

2021-06-26, version 0.2

1 Introduction

This package provides script named ctanbib which can be used for retrieving of the bibliographic information for packages hosted on CTAN.

2 Usage

It can be used in the following way:

```
ctanbib [options] <packagename1> ... <packagenameX> > filename.bib
```

The curl utility needs to be installed on the user's system in order to support the package info download.

3 Available options

-c,--ctan use the CTAN package entry as package URL instead of URL provided by the package.

-e,--entrypoint explicitly set the BibTeX entry type.

-h,--help print the help message.

-v,--version print the version info.

4 Examples

```
ctanbib latex
```

This invocation will print data in the BibTeX format to the standard output:

```
@manual{latex,  
  title = {The Latex package},  
  subtitle = {A TeX macro package that defines LaTeX},
```

```
author = {{The LaTeX Team} and Lamport, Leslie},
url = {http://www.latex-project.org/},
urldate = {2021-06-26},
date = {},
version = {2021-06-01},
}
```

The `--ctan` option:

```
ctanbib -c latex
```

This produces a bib record that uses the CTAN package entry for the URL, instead of the original package URL.

```
@manual{latex,
title = {The Latex package},
...
url = {https://ctan.org/pkg/latex},
...
}
```

The `--entrytype` option:

```
ctanbib -e ctan latex
```

It selects different entry type for the record:

```
@ctan{latex,
...
}
```

5 License

Permission is granted to copy, distribute and/or modify this software under the terms of the LaTeX Project Public License, version 1.3.

6 Acknowledgements

This package was created thanks to TeX.sx user Daniel¹. Lukas C. Bossert had useful comments which led to update of the original script and it's eventual release on CTAN. Herbert Voss added the `--CTAN` option.

7 Changelog

2021-06-26 Version 0.2 released
2021-06-26 Removed the `--CTAN` option, entry type can be set using `--entrytype` and CTAN URL is requested using `--ctan`
2021-06-26 Added `--entrytype` option for explicit specification of the BibTeX entry type
2021-06-26 Fixed package name verification
2021-06-26 Added support for multiple package names
2021-06-26 Print `https://www.ctan.org/pkg/<pkgname>` with the `-c` option
2021-06-20 Version 0.1e released
2021-06-20 Added `--CTAN` option, thanks to Herbert Voss
2019-12-23 Don't return non-zero exit codes for non-error runs
2019-12-23 Test for the packagename with the `-c` option
2019-09-21 Try to find the author in full CTAN author list if the author cannot be found in the package info
2019-09-16 Use the CTAN API 2.0 to fetch the package info
2019-05-04 Version 0.1c released
2019-05-04 Use the `curl` command to download the package info
2019-05-04 Added information about the need to have the `curl` command installed
2019-03-11 Version 0.1b released
2018-09-10 Added support for institutional names
2018-09-10 Escape TeX commands in the title and subtitle
2018-08-29 Added man page
2018-08-27 Added `-ctan` option
2018-08-23 Version 0.1 released.
2018-08-23 Created documentation.
2018-08-21 Rewrote the script to use the DOM api provided by LuaXML. This provides greater flexibility in the XML processing.
2018-08-20 Fixed the script for the current XML format provided by CTAN.
2014-09-12 Initial version of the script have been released in answer on TeX.sx².
