1. GHOSTSCRIPT-9.55-LIBGS

In Ghostscript-9.55/Binaries/Universal-Binaries there is a library named libgs.dylib.9.55. Make a copy of this library and put it in Ghostscript-9.55-libgs/Binaries. Then build the root file for this package by executing the following commands in Terminal:

```
sudo sh buildPackage.sh
sudo sh liposcriptsign.sh
```

Change directory to CreateInstallPackage and create the package using the following commands:

```
sudo sh pkgbuildscript.sh
sudo sh productbuildscript.sh
sh signPackage
cd NotarizePackage
sh sendnotarizerequest.sh
sh stapleresult.sh
```
