

# **READ-ME**

RICHARD KOCH

## 1. GHOSTSCRIPT-9.55-FULL

= Begin by putting copies of the following two files in Ghostscript-9.55-Full/CreateInstallPackage:

- Ghostscript-9.55-Start.pkg
- Ghostscript-9.55-libgs-Start.pkg

Then make sure the items in MyResources are up to date, and in Terminal change directory to CreateInstallPackage and

```
sudo sh productbuildscript.sh
sh signPackage.sh
cd NotarizePackage
sh sendnotarizerequest.sh
sh stapleresult.sh
```
