## 1. MINIMAL T<sub>E</sub>X

Minimal T<sub>E</sub>X is constructed exactly like BasicT<sub>E</sub>X. The only difference is that it is based on the “minimal” scheme rather than the “simple” scheme. Minimal T<sub>E</sub>X is not distributed through CTAN or TUG. Instead I make it available on my web site. It was requested by Vafa Khalighi, and he may be the only user.

Here are instructions for installing T<sub>E</sub>X Live for it, from an earlier document:

Select the ‘‘minimal’’ scheme

Change TEXDIR to /usr/local/texlive/2021minimal

Change TEXMFVAR to \\${HOME}/Library/texlive/2021minimal/texmf-var

Change TEXMFCONFIG to \\${HOME}/Library/texlive/2021minimal/texmf-config

In Options, check ‘‘use letter size’’ and uncheck everything else

Then install.
