NAME

　　　　t1lint − check a PostScript Type 1 font for correctness

SYNOPSIS

　　　　t1lint *font* [*font*...]

DESCRIPTION

　　　　T1lint checks PostScript Type 1 font programs for correctness. Any errors or variances from the specification are reported to standard error. If there are no errors, the command prints nothing. It exits with status 0 if all fonts were OK, and status 1 otherwise. If no input files are supplied, t1lint reads a font from the standard input.

OPTIONS

　　　　−q, **−−quiet**

　　　　　　　Do not generate any error messages. The only output will be the exit status.

　　　　−h, **−−help**

　　　　　　　Print usage information and exit.

　　　　−v, **−−version**

　　　　　　　Print the version number and some short non-warranty information and exit.
