---

The titlepage reproduces an engraving of Maurits Cornelis Escher, titled *Plane Filling with Birds* (the picture is obtained from <http://www.mcescher.com/>).

## ABSTRACT

The package changes some typographical aspects of the ClassicThesis style, by André Miede. It allows to reproduce the look of the guide *The art of writing with L<sup>A</sup>T<sub>E</sub>X* (in Italian) [Pantieri and Gordini, 2011]. The hint for the original modification of ClassicThesis was gave to me by Daniel Gottschlag. The package was written for the Italian T<sub>E</sub>X and L<sup>A</sup>T<sub>E</sub>X User Group (G<sub>U</sub>IT, <http://www.guit.sssup.it/>).

## SOMMARIO

Il pacchetto modifica alcuni aspetti tipografici dello stile ClassicThesis, di André Miede. Permette di riprodurre la veste grafica della guida *L'arte di scrivere con L<sup>A</sup>T<sub>E</sub>X* [Pantieri e Gordini, 2011]. Lo spunto per l'originale rielaborazione di ClassicThesis mi è stato offerto da Daniel Gottschlag. Il pacchetto è stato scritto per il Gruppo Utilizzatori Italiani di T<sub>E</sub>X e L<sup>A</sup>T<sub>E</sub>X (G<sub>U</sub>IT, <http://www.guit.sssup.it/>).

## ACKNOWLEDGEMENTS

I wish first of all to thank the members of the Staff of the Italian T<sub>E</sub>X and L<sup>A</sup>T<sub>E</sub>X User Group (G<sub>U</sub>IT, <http://www.guit.sssup.it/>), in particular Prof. Enrico Gregorio and Andrea Tonelli, for their invaluable aid during the writing of this work, the detailed explanations, the patience and the precision in the suggestions, the supplied solutions, the competence and the kindness. Thanks also to all the people who have discussed with me on the forum of the G<sub>U</sub>IT, prodigal of precious observations and good advices.

Finally, thanks to André Miede, for his wonderful ClassicThesis style, and to Daniel Gottschlag, who has given to me the hint for this original reworking.

---

This chapter introduces the (truly simple) basic notions of ArsClassica and presents its fundamental ideas and peculiarities.

## 1.1 INTRODUCTION

The ArsClassica package changes some typographical aspects of the ClassicThesis style, by André Miede [Miede, 2011; Pantieri, 2011]. It allows to reproduce the layout of my guide *The art of writing in LaTeX* [Pantieri and Gordini, 2011] (in Italian) and of this document. The hint for this original reworking of ClassicThesis was gave to me by Daniel Gottschlag.

*The art of writing  
with L<sup>A</sup>T<sub>E</sub>X*

## 1.2 USE OF THE PACKAGE

The package is shaped for being executed on a *complete* installation of MiK<sub>T</sub>E<sub>X</sub> or T<sub>E</sub>X Live, and uses font freely available.

The installation of ArsClassica is very simple. You can download the arsclassica.zip file from CTAN (<http://www.ctan.org/tex-archive/macros/latex/contrib/arsclassica/>); then you will decompress it and install arsclassica.sty in the usual way.

The package works with the KOMA-Script classes (scrreprt, scrbook and scrartcl) and requires the classicthesis package, *updated to the last version available (the 3.0)*; it must be loaded *after* these last one. It can be loaded simply by

*ArsClassica requires  
the 3.0 version of  
ClassicThesis*

---

```
\documentclass[...]{scrreprt} % or scrbook or scrartcl  
  
\usepackage[...]{classicthesis}  
\usepackage{arsclassica}  
  
\begin{document}
```

---

```
...
\end{document}
```

---

For example, this document has been obtained with the following code:

---

```
\documentclass[10pt,a4paper,twoside,openright,titlepage,fleqn,%
              headinclude,,footinclude,BCOR5mm,%
              numbers=noenddot,cleardoublepage=empty,%
              tablecaptionabove]{scrreprt}

\usepackage{...}
\usepackage[eulerchapternumbers,subfig,beramono,%
            eulermath,pdfspacing]{classicthesis}
\usepackage{arsclassica}

\begin{document}
...
\end{document}
```

---

It is recommended, but not compulsory, to use the options `beramono`, `eulerchapternumbers` and `eulermath` together with `ArsClassica`.

### 1.3 THE STYLE

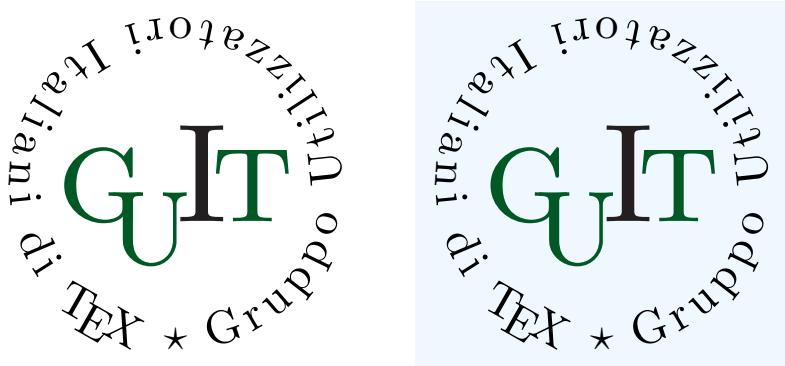

*The difference between ArsClassica and ClassicThesis*

The typographical style obtained with `ArsClassica` differs from `ClassicThesis` for the following aspects:

- use of Iwona font, by Janusz M. Nowacki, for the titles of the sectioning units of the document (chapters, sections, subsections, sub-subsections, paragraphs and subparagraphs), for the labels of description lists, for the headlines and the label of the captions (`ClassicThesis` does not use any font sans serif);
- customized chapter numbers;
- semi-transparent headlines; the headlines are separated from the page number by a small rule;
- captions with labels in boldface (`ClassicThesis` does not use bold-face fonts);
- itemize lists with semi-transparent labels;
- “double square” text body, for documents written in A4 format using Palatino font.

*It is recommended to keep the settings of ArsClassica unchanged.*

The `ArsClassica` package is conceived to provide to the user a ready-to-use typographical style: therefore it has no loading option and it is *not* configurable or customizable in any way. If you change the previous settings, you will risk to destroy the equilibrium of the style, so it is *highly recommended* to keep them unchanged.

(a) Image without background.

(b) Image with background.

Figure 1: Graphics with coloured background.

One of the principles of L<sup>A</sup>T<sub>E</sub>X is that it allows the author to take no interest in the typographical questions, permitting him to focus only the structure and the contents of the document. This fact should always be taken in consideration: using a style written from others, the user accepts all the typographical settings chosen for him from the author of the style, and he is not forced to study typography to fix the layout of his publications. This is the case of ArsClassica too: if you change its settings, you will contradict this philosophy and, consequently, you must study (a lot of) typography to obtain acceptable results.

The style obtained with ArsClassica is *not* therefore configurable or customizable. The typographical style is something of very personal: if you like the package and find attractive the idea to take no interest in the problem of the style definition, then you will use ArsClassica with satisfaction; otherwise, if you have different needs or you are not satisfied with the layout of the package, then you should try other classes or packages, even building your own style.

## 1.4 NEW COMMANDS

### 1.4.1 Particular logos

The package offers the \ctLaTeX, \ctLaTeXe and \ctTeX commands, which allow to reproduce respectively the L<sup>A</sup>T<sub>E</sub>X, L<sup>A</sup>T<sub>E</sub>X<sub>2</sub><sub>E</sub> and T<sub>E</sub>X logos correctly written in Iwona.

The \ctLaTeX,  
\ctLaTeXe and  
\ctTeX commands

### 1.4.2 Graphics with coloured background

The \arsincludegraphics command is defined, which allows to include graphics with “Alice Blue” coloured background, like in Figure 1b; it works as \includegraphics. This works, of course, only with graphics with a transparent background, such us PDF or some PNG files.

The  
\arsincludegraphics  
command

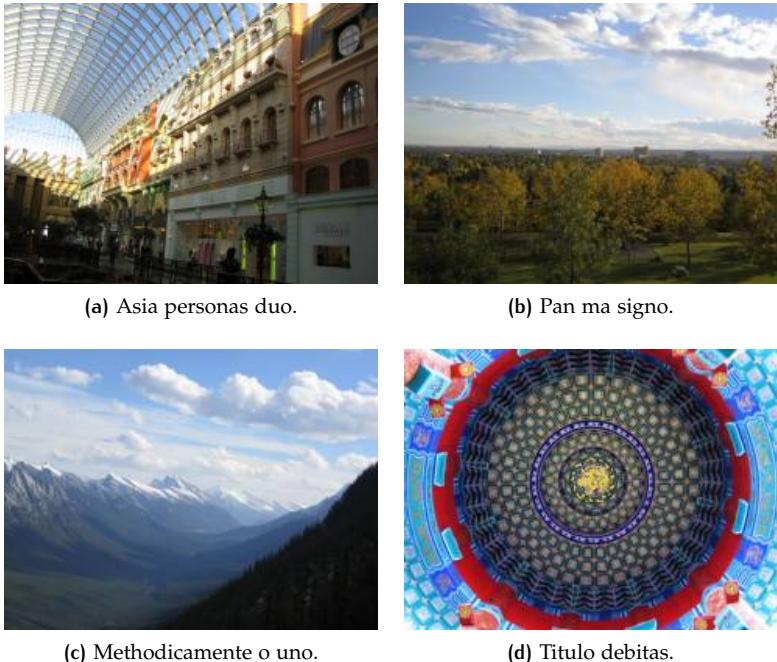

Figure 2: Tu duo titulo debitas latente.

## 1.5 EXAMPLES

*Note: The content of this chapter is just some dummy text. It is not a real language.*

Lorem ipsum dolor sit amet, consectetuer adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetuer id, vulputate a, magna. Donec vehicula augue eu neque.
