Proc. of the 9th Int. Conference on Digital Audio Effects (DAFx-06), Montreal, Canada, September 18-20, 2006

Conference Program

Day 1

Oral Session 1

- 1 Templates for One Author Alfred Alabama
- 7 Templates for One Author with Two Affiliations *Bob Boogie-Woogie*

Poster Session 1

13 Templates for Two Authors Alfred Alabama, Chris Christmas

Day 2

Oral Session 2

- 17 Templates for Three Authors
 Bob Boogie-Woogie, Chris Christmas, Don Didon
- 23 Templates fór Fòür Àuthors *Jøhn Jöe, Kéñt Kîng, Lòu Lóu, Mànfréd J. Môstěki*
- 31 Full Bibliography
- 33 Index of Authors

Proc. of the 9th Int. Conference on Digital Audio Effects (DAFx-06), Montreal, Canada, September 18-20, 2006

TEMPLATES FOR ONE AUTHOR

ABSTRACT

This is the template file for the proceedings of the 9^{th} International Conference on Digital Audio Effects (DAFx-06). This template has been generated from WASPAA'99 templates and aims at producing conference proceedings in electronic form. The format is essentially the one used for ICASSP conferences.

Please use either this LATEX or the accompanying Word formats when preparing your submission. The templates are available in electronic form at the website:

http://www.dafx.ca. Thanks!

1. INTRODUCTION

This template can be found on the conference website.

1.1. Figures

All figures should be centered on the column (or page, if the figure spans both columns). Figure captions (in italic) should follow each figure and have the format given in Figure 1. Figures must be

Figure 1: Sinusoid in time and frequency domain.

vectorial (no screen copy, no bitmap, etc). For example when using Matlab, export using either Postscript or PDF format. Also, in order to provide a better readibility, figure text font size should be at list identical to footnote font size. To do so using Matlab, use the subplot command before plotting.

1.2. Tables

As for figures, all tables should be centered on the column (or page, if the table spans both columns). Table captions should be in italic, follow each table and have the format given in Table 1.

angle (θ, rad)	$\sin \theta$
$\frac{\pi}{2}$	1
π	0
$\frac{3\pi}{2}$	-1
2π	0

Table 1: Basic trigonometric values.

1.3. Equations

Equations should be placed on separate lines and numbered:

$$X(e^{j\Omega}) = \sum_{n=0}^{N-1} x(n)e^{-j\Omega n}$$
(1)

where the sequence x(n) in equation (1) is a windowed frame:

$$x(n) = s(n) \cdot w(n) \tag{2}$$

with a window function w(n).

1.4. Page Numbers

Page numbers will be added to the document electronically, so *please leave the numbering as is*, that is, the first page will start at page DAFX-1 and the last page, at most, will have to be DAFX-6 for the submission of papers for an oral presentation or DAFX-4 in the case of a poster presentation.

1.5. References

The references will be numbered in order of appearance [1, 2, 3, 4]. Please avoid listing references that do not appear in the text.

1.5.1. Reference Format

The reference format is the standard IEEE one. We recommend to use BibTeX to create the reference list.

2. CONCLUSIONS

This template can be found on the conference website. If you wish to include two authors' affiliations please use the companion LaTeX template tmpl_la2_href. Please, submit full-length papers (max. 6 pages for oral presentation and max. 4 pages for posters).

Submission is fully electronic and automated through the Conference Web Submission System. DO NOT send us papers directly by e-mail.

3. ACKNOWLEDGEMENTS

Many thanks to the great number of anonymous reviewers!

4. MARGIN CHECK

This section shows the column margins for pages other than the first one.

ABSTRACT

This is the template file for the proceedings of the 9^{th} International Conference on Digital Audio Effects (DAFx-06). This template has been generated from WASPAA'99 templates and aims at producing conference proceedings in electronic form. The format is essentially the one used for ICASSP conferences.

Please use either this LaTeX or the accompanying Word formats when preparing your submission. The templates are available in electronic form on the following website: http://www.dafx.ca. Thanks!

1. INTRODUCTION

This template can be found on the conference website.

1.1. Figures

All figures should be centered on the column (or page, if the figure spans both columns). Figure captions (in italic) should follow each figure and have the format given in Figure 1. Figures must be

Figure 1: Sinusoid in time and frequency domain.

vectorial (no screen copy, no bitmap, etc). For example when using Matlab, export using either Postscript or PDF format. Also, in order to provide a better readibility, figure text font size should be at list identical to footnote font size. To do so using Matlab, use the subplot command before plotting.

1.2. Tables

As for figures, all tables should be centered on the column (or page, if the table spans both columns). Table captions should be in italic, follow each table and have the format given in Table 1.

1.3. Equations

Equations should be placed on separate lines and numbered:

$$X(e^{j\Omega}) = \sum_{n=0}^{N-1} x(n)e^{-j\Omega n}$$
(1)

where the sequence x(n) in equation (1) is a windowed frame:

$$x(n) = s(n) \cdot w(n) \tag{2}$$

with a window function w(n).

1.4. Page Numbers

Page numbers will be added to the document electronically, so *please leave the numbering as is*, that is, the first page will start at page DAFX-1 and the last page, at most, will have to be DAFX-6 for the submission of papers for an oral presentation or DAFX-4 in the case of a poster presentation.

1.5. References

The references will be numbered in order of appearance [1, 2, 3, 4, 5]. Please avoid listing references that do not appear in the text.

1.5.1. Reference Format

The reference format is the standard IEEE one. We recommend to use BibTeX to create the reference list.

2. CONCLUSIONS

This template can be found on the conference website. If you wish to include a single authors' affiliation please use the companion LaTeX template tmpl_la_href. Please, submit full-length papers (max. 6 pages for oral presentation and max. 4 pages for posters).

Submission is fully electronic and automated through the Conference Web Submission System. DO NOT send us papers directly by e-mail. Please, submit files in pdf format only.

3. ACKNOWLEDGEMENTS

Many thanks to the great number of anonymous reviewers!

4. MARGIN CHECK

This section shows the column margins for pages other than the first one.

ABSTRACT

This is the template file for the proceedings of the 9^{th} International Conference on Digital Audio Effects (DAFx-06). This template has been generated from WASPAA'99 templates and aims at producing conference proceedings in electronic form. The format is essentially the one used for ICASSP conferences.

Please use either this LaTeX or the accompanying Word formats when preparing your submission. The templates are available in electronic form at the website: http://www.dafx.ca. Thanks!

1. INTRODUCTION

This template can be found on the conference website.

1.1. Figures

All figures should be centered on the column (or page, if the figure spans both columns). Figure captions (in italic) should follow each figure and have the format given in Figure 1. Figures must be

Figure 1: Sinusoid in time and frequency domain.

vectorial (no screen copy, no bitmap, etc). For example when using Matlab, export using either Postscript or PDF format. Also, in order to provide a better readibility, figure text font size should be at list identical to footnote font size. To do so using Matlab, use the subplot command before plotting.

1.2. Tables

As for figures, all tables should be centered on the column (or page, if the table spans both columns). Table captions should be in italic, follow each table and have the format given in Table 1.

angle (θ, rad)	$\sin \theta$	
$\frac{\pi}{2}$	1	
$ \pi$	0	
$\frac{3\pi}{2}$	-1	
2π	0	

Table 1: Basic trigonometric values.

1.3. Equations

Equations should be placed on separate lines and numbered:

$$X(e^{j\Omega}) = \sum_{n=0}^{N-1} x(n)e^{-j\Omega n}$$
 (1)

where the sequence x(n) in equation (1) is a windowed frame:

$$x(n) = s(n) \cdot w(n) \tag{2}$$

with a window function w(n).

1.4. Page Numbers

Page numbers will be added to the document electronically, so *please leave the numbering as is*, that is, the first page will start at page DAFX-1 and the last page, at most, will have to be DAFX-6 for the submission of papers for an oral presentation or DAFX-4 in the case of a poster presentation.

1.5. References

The references will be numbered in order of appearance [1, 2, 3, 4]. Please avoid listing references that do not appear in the text.

1.5.1. Reference Format

The reference format is the standard IEEE one. We recommend to use BibTeX to create the reference list.

2. CONCLUSIONS

This template can be found on the conference website. If you wish to include a single authors' affiliation please use the companion LaTeX template tmpl_la_href. Please, submit full-length papers (max. 6 pages for oral presentation and max. 4 pages for posters).

Submission is fully electronic and automated through the Conference Web Submission System. DO NOT send us papers directly by e-mail.

3. ACKNOWLEDGEMENTS

Many thanks to the great number of anonymous reviewers!

ABSTRACT

This is the template file for the proceedings of the 9^{th} International Conference on Digital Audio Effects (DAFx-06). This template has been generated from WASPAA'99 templates and aims at producing conference proceedings in electronic form. The format is essentially the one used for ICASSP conferences.

Please use either this LaTeX or the accompanying Word formats when preparing your submission. The templates are available in electronic form on the following website: http://www.dafx.ca. Thanks!

1. INTRODUCTION

This template can be found on the conference website.

1.1. Figures

All figures should be centered on the column (or page, if the figure spans both columns). Figure captions (in italic) should follow each figure and have the format given in Figure 1. Figures must be

Figure 1: Sinusoid in time and frequency domain.

vectorial (no screen copy, no bitmap, etc). For example when using

Matlab, export using either Postscript or PDF format. Also, in order to provide a better readibility, figure text font size should be at list identical to footnote font size. To do so using Matlab, use the subplot command before plotting.

1.2. Tables

As for figures, all tables should be centered on the column (or page, if the table spans both columns). Table captions should be in italic, follow each table and have the format given in Table 1.

angle (θ, rad)	$\sin \theta$
$\frac{\pi}{2}$	1
$ \pi$	0
$\frac{3\pi}{2}$	-1
2π	0

Table 1: Basic trigonometric values.

1.3. Equations

Equations should be placed on separate lines and numbered:

$$X(e^{j\Omega}) = \sum_{n=0}^{N-1} x(n)e^{-j\Omega n}$$
(1)

where the sequence x(n) in equation (1) is a windowed frame:

$$x(n) = s(n) \cdot w(n) \tag{2}$$

with a window function w(n).

1.4. Page Numbers

Page numbers will be added to the document electronically, so *please leave the numbering as is*, that is, the first page will start at page DAFX-1 and the last page, at most, will have to be DAFX-6 for the submission of papers for an oral presentation or DAFX-4 in the case of a poster presentation.

^{*} This work was supported by the XYZ Foundation

[†] This guy is a very good fellow

[‡] She is a member of the Wheel Association

1.5. References

The references will be numbered in order of appearance [1, 2, 3, 4]. Please avoid listing references that do not appear in the text.

1.5.1. Reference Format

The reference format is the standard IEEE one. We recommend to use BibTeX to create the reference list.

2. CONCLUSIONS

This template can be found on the conference website. If you wish to include two authors' affiliations please use the companion LaTeX template tmpl_la2_href. Please, submit full-length papers (max. 6 pages for oral presentation and max. 4 pages for posters).

Submission is fully electronic and automated through the Conference Web Submission System. DO NOT send us papers directly by e-mail.

3. ACKNOWLEDGEMENTS

Many thanks to the great number of anonymous reviewers!

4. MARGIN CHECK

This section shows the column margins for pages other than the first one.

ABSTRACT

This is the template file for the proceedings of the 9^{th} International Conference on Digital Audio Effects (DAFx-06). This template has been generated from WASPAA'99 templates and aims at producing conference proceedings in electronic form. The format is essentially the one used for ICASSP conferences.

Please use either this LaTeX or the accompanying Word formats when preparing your submission. The templates are available in electronic form on the following website: http://www.dafx.ca. Thanks!

1. INTRODUCTION

This template can be found on the conference website.

1.1. Figures

All figures should be centered on the column (or page, if the figure spans both columns). Figure captions (in italic) should follow each figure and have the format given in Figure 1. Figures must be

Figure 1: Sinusoid in time and frequency domain.

vectorial (no screen copy, no bitmap, etc). For example when using

- * This work was supported by the XYZ Foundation
- † This guy is a very good fellow
- [‡] She is a member of the Wheel Association
- § Yes, senior

Kéñt Kîng,†

Reading Group, Dept. of Reading Sciences Univ. of Universe, Sun dafx06@dafx.ca

Mànfréd J. Môstĕkı,§

Unknown Group, Dept. of Volatile Sciences Univ. of Nowhere, Somewhere dafx06@dafx.ca

Matlab, export using either Postscript or PDF format. Also, in order to provide a better readibility, figure text font size should be at list identical to footnote font size. To do so using Matlab, use the subplot command before plotting.

1.2. Tables

As for figures, all tables should be centered on the column (or page, if the table spans both columns). Table captions should be in italic, follow each table and have the format given in Table 1.

angle (θ, rad)	$\sin \theta$
$\frac{\pi}{2}$	1
$ \pi$	0
$\frac{3\pi}{2}$	-1
2π	0

Table 1: Basic trigonometric values.

1.3. Equations

Equations should be placed on separate lines and numbered:

$$X(e^{j\Omega}) = \sum_{n=0}^{N-1} x(n)e^{-j\Omega n}$$
(1)

where the sequence x(n) in equation (1) is a windowed frame:

$$x(n) = s(n) \cdot w(n) \tag{2}$$

with a window function w(n).

1.4. Page Numbers

Page numbers will be added to the document electronically, so *please leave the numbering as is*, that is, the first page will start at page DAFX-1 and the last page, at most, will have to be DAFX-6 for the submission of papers for an oral presentation or DAFX-4 in the case of a poster presentation.

1.5. References

The references will be numbered in order of appearance [1, 2, 3]. Please avoid listing references that do not appear in the text.

1.5.1. Reference Format

The reference format is the standard IEEE one. We recommend to use BibTeX to create the reference list.

2. CONCLUSIONS

This template can be found on the conference website. If you wish to include two authors' affiliations please use the companion LaTeX template tmpl_la2_href. Please, submit full-length papers (max. 6 pages for oral presentation and max. 4 pages for posters).

Submission is fully electronic and automated through the Conference Web Submission System. DO NOT send us papers directly by e-mail.

3. ACKNOWLEDGEMENTS

Many thanks to the great number of anonymous reviewers!

4. MARGIN CHECK

This section shows the column margins for pages other than the first one.
