

The csquotes package

Option key	Possible values
strict	true, false
babel	true, false, try, once, tryonce

4.2 Quoting text in a foreign language

These commands combine \MakeAutoQuote

Alias	Backend style or alias	Alias	Backend style or alias
american	english/american	naustrian	austrian
australian	english/british	newzealand	english/british

`\ExecuteQuoteOptions{ key=value, ... }`

This command permits presetting package options in the configuration file. It may

obviously not include any global assignments. This solution should be considered
