Sectioning commands with critical notes in parallel colums

June 2, 2015

This file provides examples of using sectioning commands with eledpar. The section titles are in the line numbering, and have critical notes.

The left and right sides are put in columns. We use `\eledsectnotoc{L}` to say we want the right titles be added to the table of contents, and not the left titles. We also use `\eledsectmark{R}` to use the right side to add LaTeX marks for headers.

We use the `\eledxxx` commands, each of them in their own `\pstart`...`\pend` group.

Page clearings are manually added before chapter with `\beforeeledchapter`.

Contents

Chapter 1

Left chapter

2   I use git to manage some pack-
3 ages. I would like to add a pre-commit
4 hook, to check if I have forgotten For
5 now, I have a minimal pre-commit,
6 which tests only the blank spaces at
7 ends of lines, but not the forgotten..
