

Sectioning commands with critical notes in parallel pages

June 21, 2015

This file provides examples for using the sectioning command with `eledpar`. The section titles are in the line numbering, and have critical notes.

The left and right sides are put in parallel pages. Following the standard behavior of `eledpar`, only the left titles are put to the table of contents.

We use the `\eledxxx` commands, each of them in their own `\pstart...\pend` group.

Page breaks are manually added before chapter with `\beforeeledchapter`.

Contents

1	Left chapter	6
1.1	Left section	6
1.1.1	Left subsection	6
1.2	Left section	6
1.3	Left section	8
1.3.1	Left subsection	8
1.4	Left section	8
2	Left chapter	10
