Lemma's disambiguation

Abstract

This file provides an example of lemma's disambuigation. All word which can potentially be twice (or more) in a same line is marked by an \sameword. *Eledmac* print the word rank only if the word is effectively printed twice (or more) time in the same line.

Leo aut ursus aut oryx aut ricinus aut equus aut lupus aut canis aut felix aut asinus

2 aut burricus.

1 aut⁶] et 2 aut] et
