

# Lemma's disambiguation

## Abstract

This file provides an example of lemma's disambiguation.

All word which can potentially be twice (or more) in a same line is marked by an `\sameword`. *Eledmac* print the word rank only if the word is effectively printed twice (or more) time in the same line.

1       Leo aut ursus aut oryx aut ricinus aut equus aut lupus aut canis aut felix aut asinus  
2   aut burricus.
