

```

1 \ProvidesFile{mdoccorr.cfg}[2011/09/13
2     local typographical corrections
3     with makedoc.sty]

... also demonstrates niceverb.sty—see the typeset documentation of the present
file in makedoc.pdf.
\SetPatternCodes{<commands>} redefines \PatternCodes to be used in
parsing and replacing (some “sanitizing”).

4 \SetPatternCodes{\MakeOther\\MakeOther\ }

\StartPrependingChain initializes setup of a replacement chain:

5 \StartPrependingChain

\PrependExpandableAllReplacer{<id>}{<find>}{<subst>}:

6 \PrependExpandableAllReplacer{etc}{etc. }{etc.\ }

... you can keep inter-sentence space after etc. by a code line break.

7 \PrependExpandableAllReplacer{Cf}{Cf. }{Cf.\ } %% 2011/01/12
8 \PrependExpandableAllReplacer{cf}{cf. }{cf.\ } %% corr. 2010/03/23

... but think of cf.~. Don’t leave cf. at code line end!

9 \PrependExpandableAllReplacer{rarr}{->}{$\to$} %% 2010/11/06
10 \PrependExpandableAllReplacer{larr}{<-}{$\gets$} %% 2010/11/06
11 % \PrependExpandableAllReplacer{dots}{...}{$\dots$}

... 2010/11/24 “symmetric” variant of \textellipsis: allow extra space at
line end.

12 \providecommand*{\PXAR}{\PrependExpandableAllReplacer}

← provide to allow more runs in dialogues 2011/09/13

13 \PXAR{dots}{...}{.\kern\fontdimen3\font.\kern\fontdimen3\font.}
14 \PXAR{dots }{... }{.\kern\fontdimen3\font.\kern\fontdimen3\font.\ }
15 \PXAR{TODO}{TODO}{\textcolor{blue}{TODO}} %% 2011/01/27

... chain starts here, and here \MakeDocCorrectHook (silently) enters through
a default variant \SetCorrectHookJobLast of \SetCorrectHookJob{<id>}:

16 \SetCorrectHookJobLast

\ResetPatternCodes resets \PatternCodes to their default value (which is
\fdPatternCodes):

17 \ResetPatternCodes

... restores fifinddo default.

18 \endinput
