

Documented Code For glossaries v3.05

Nicola L.C. Talbot

Dickimaw Books

<http://www.dickimaw-books.com/>

2013-04-21

This is the documented code for the glossaries package. This bundle comes with the following documentation:

[glossariesbegin.pdf](#) If you are a complete beginner, start with “The glossaries package: a guide for beginners”.

[glossary2glossaries.pdf](#) If you are moving over from the obsolete glossary package, read “Upgrading from the glossary package to the glossaries package”.

[glossaries-user.pdf](#) For the main user guide, read “glossaries.sty v3.05: L^AT_EX2e Package to Assist Generating Glossaries”.

[mfirstuc-manual.pdf](#) The commands provided by the mfirstuc package are briefly described in “mfirstuc.sty: uppercasing first letter”.

[glossaries.pdf](#) This document is for advanced users wishing to know more about the inner workings of the glossaries package.

INSTALL Installation instructions.

CHANGES Change log.

README Package summary.

Contents

1 Main Package Code	3
1.1 Package Definition	3
1.2 Package Options	5
1.3 Default values	20
1.4 Xindy	28
1.5 Loops and conditionals	38
1.6 Defining new glossaries	40
1.7 Defining new entries	43
1.8 Resetting and unsetting entry flags	55
1.9 Loading files containing glossary entries	56
1.10 Using glossary entries in the text	57
1.10.1 Links to glossary entries	58
1.10.2 Displaying entry details without adding information to the glossary	109
1.11 Adding an entry to the glossary without generating text	116
1.12 Creating associated files	117
1.13 Writing information to associated files	126
1.14 Glossary Entry Cross-References	131
1.15 Displaying the glossary	132
1.16 Acronyms	146
1.17 Predefined acronym styles	150
1.18 Predefined Glossary Styles	165
1.19 Debugging Commands	165
1.20 Compatibility with version 2.07 and below	170
2 Mfirstuc Documented Code	170
3 Glossary Styles	172
3.1 Glossary hyper-navigation definitions (glossary-hypernav package)	172
3.2 In-line Style (glossary-inline.sty)	175
3.3 List Style (glossary-list.sty)	177
3.4 Glossary Styles using longtable (the glossary-long package)	180
3.5 Glossary Styles using longtable (the glossary-longragged package)	185
3.6 Glossary Styles using multicol (glossary-mcols.sty)	191
3.7 Glossary Styles using supertabular environment (glossary-super package)	194
3.8 Glossary Styles using supertabular environment (glossary-superragged package)	201
3.9 Tree Styles (glossary-tree.sty)	206
4 glossaries-compatible-207	214

5 Accessibility Support (glossaries-accsupp Code)	221
5.1 Defining Replacement Text	221
5.2 Accessing Replacement Text	224
5.3 Displaying the Glossary	237
5.4 Acronyms	237
5.5 Debugging Commands	241
6 Multi-Lingual Support	242

1 Main Package Code

1.1 Package Definition

This package requires $\LaTeX 2_{\epsilon}$.

```
1 \NeedsTeXFormat{LaTeX2e}
2 \ProvidesPackage{glossaries}[2013/04/21 v3.05 (NLCT)]
```

Required packages:

```
3 \RequirePackage{ifthen}
4 \RequirePackage{xkeyval}[2006/11/18]
5 \RequirePackage{mfirstuc}
6 \RequirePackage{xfor}

7 \RequirePackage{datatool-base}
```

Need to use `\new@ifnextchar` instead of `\@ifnextchar` in commands that have a final optional argument (such as `\gls`) so require. Thanks to Morten Høgholm for suggesting this. (This has replaced using the `xspace` package.)

```
8 \RequirePackage{amsgen}
```

As from v3.0, now loading `etoolbox`:

```
9 \RequirePackage{etoolbox}
```

Check if doc has been loaded.

```
\if@gls@docloaded
```

```
10 \newif\if@gls@docloaded
11 \@ifpackageloaded{doc}%
12 {%
13   \@gls@docloadedtrue
14 }%
15 {%
16   \@ifclassloaded{nlctdoc}{\@gls@docloadedtrue}{\@gls@docloadedfalse}%
17 }
```

```
18 \if@gls@docloaded
```

It has been loaded, so some modifications need to be made to ensure both packages can work together.

```
\glsorg@glossary First, save the original behaviour of \glossary
```

```
19 \newcommand{\glsorg@glossary}{%
20   \@bsphack
21   \begingroup
22     \@sanitize \glsorg@wrglossary
23 }
```

```
\glsorg@wrglossary
```

```
24 \newcommand{\glsorg@wrglossary}[1]{%
25   \protected@write\@glossaryfile{}{%
26     \string \glossaryentry{#1}{\thepage}}%
27   \endgroup
28   \@esphack
29 }
```

```
\changes Now we need to redefine \changes so that it uses the original definition of \glossary.
```

```
30 \let\glsorg@changes\changes
31 \renewcommand{\changes}[3]{%
32   \begingroup
33     \let\glossary\glsorg@glossary
34     \glsorg@changes{#1}{#2}{#3}%
35   \endgroup
36 }
```

`\PrintChanges` needs to use doc's version of theglossary, so save that.

`\glsorg@theglossary`

```
37 \let\glsorg@theglossary\theglossary
```

`sorg@endtheglossary`

```
38 \let\glsorg@endtheglossary\endtheglossary
```

`\PrintChanges` Now redefine `\PrintChanges` so that it uses the original `theglossary` environment.

```
39 \let\glsorg@PrintChanges\PrintChanges
40 \renewcommand{\PrintChanges}{%
41   \begingroup
42     \let\theglossary\glsorg@theglossary
43     \let\endtheglossary\glsorg@endtheglossary
44     \glsorg@PrintChanges
45   \endgroup
46 }
```

End of doc stuff.

```
47 \fi
```

1.2 Package Options

`toc` The `toc` package option will add the glossaries to the table of contents. This is a boolean key, if the value is omitted it is taken to be true.

```
48 \define@boolkey{glossaries.sty}[gls]{toc}[true]{}
```

`numberline` The `numberline` package option adds `\numberline` to `\addcontentsline`. Note that this option only has an effect if used in with `toc=true`.

```
49 \define@boolkey{glossaries.sty}[gls]{numberline}[true]{}
```

`\@@glossarysec` The sectional unit used to start the glossary is stored in `\@@glossarysec`. If chapters are defined, this is initialised to `chapter`, otherwise it is initialised to `section`.

```
50 \ifcsundef{chapter}%
51   {\newcommand*\@@glossarysec{section}}%
52   {\newcommand*\@@glossarysec{chapter}}
```

`section` The `section` key can be used to set the sectional unit. If no unit is specified, use `section` as the default. The starred form of the named sectional unit will be used. If you want some other way to start the glossary section (e.g. a numbered section) you will have to redefined `\glossarysection`.

```
53 \define@choicekey{glossaries.sty}{section}{part,chapter,section,%
54 subsection,subsubsection,paragraph,subparagraph}[section]{%
55   \renewcommand*\@@glossarysec{#1}}
```

Determine whether or not to use numbered sections.

```

\@glossarysecstar
56 \newcommand*\@glossarysecstar}{*}

\@glossaryseclabel
57 \newcommand*\@glossaryseclabel}{

\glsautoprefix Prefix to add before label if automatically generated:
58 \newcommand*\glsautoprefix}{

numberedsection
59 \define@choicekey{glossaries.sty}{numberedsection}[\val\nr]{%
60 false,nolabel,autolabel}[nolabel]{%
61   \ifcase\nr\relax
62     \renewcommand*\@glossarysecstar}{*}%
63     \renewcommand*\@glossaryseclabel}{}%
64   \or
65     \renewcommand*\@glossarysecstar}{}%
66     \renewcommand*\@glossaryseclabel}{}%
67   \or
68     \renewcommand*\@glossarysecstar}{}%
69     \renewcommand*\@glossaryseclabel}{%
70     \label{\glsautoprefix@glo@type}}%
71   \fi
72 }

```

The default glossary style is stored in `\@glossary@default@style`. This is initialised to `list`. (The `list` style is defined in the accompanying package described in [subsection 1.18](#).)

```

\@glossary@default@style
73 \newcommand*\@glossary@default@style}{list}

```

`style` The default glossary style can be changed using the `style` package option. The value can be the name of any defined glossary style. The glossary style is set at the beginning of the document, so you can still use the `style` key to set a style that is defined in another package. This package comes with some predefined styles that are defined in [subsection 1.18](#).

```

74 \define@key{glossaries.sty}{style}{%
75 \renewcommand*\@glossary@default@style}{#1}}

```

Each entry within a given glossary will have an associated number list. By default, this refers to the page numbers on which that entry has been used, but it can also refer to any counter used in the document (such as the section or equation counters). The default number list format displays the number list “as is”:

```

\glossaryentrynumbers
76 \newcommand*\glossaryentrynumbers[1]{#1\gls@save@numberlist{#1}}

```

`nonumberlist` Note that the entire number list for a given entry will be passed to `\glossaryentrynumbers` so any font changes will also be applied to the delimiters. The `nonumberlist` package option suppresses the number lists (this simply redefines `\glossaryentrynumbers` to ignore its argument).

```
77 \DeclareOptionX{nonumberlist}{%
78   \renewcommand*\glossaryentrynumbers}[1]{\gls@save@numberlist{#1}}%
79 }
```

`savenumberlist` Provide means to store the number list for entries.

```
80 \define@boolkey{glossaries.sty}[gls]{savenumberlist}[true]{}
81 \glssavenumberlistfalse
```

`@seeautonumberlist`

```
82 \newcommand*\glo@seeautonumberlist{}
```

`seeautonumberlist` Automatically activates number list for entries containing the see key.

```
83 \DeclareOptionX{seeautonumberlist}{%
84   \renewcommand*\glo@seeautonumberlist}{%
85     \def\glo@prefix{\glsnextpages}%
86   }%
87 }
```

`\gls@loadlong`

```
88 \newcommand*\gls@loadlong{\RequirePackage{glossary-long}}
```

`nolong` This option prevents from being loaded. This means that the glossary styles that use the `longtable` environment will not be available. This option is provided to reduce overhead caused by loading unrequired packages.

```
89 \DeclareOptionX{nolong}{\renewcommand*\gls@loadlong{}}
```

`\gls@loadsuper` The package isn't loaded if isn't installed.

```
90 \IfFileExists{supertabular.sty}{%
91   \newcommand*\gls@loadsuper{\RequirePackage{glossary-super}}}%
92   \newcommand*\gls@loadsuper{}}
```

`nosuper` This option prevents from being loaded. This means that the glossary styles that use the `supertabular` environment will not be available. This option is provided to reduce overhead caused by loading unrequired packages.

```
93 \DeclareOptionX{nosuper}{\renewcommand*\gls@loadsuper{}}
```

`\gls@loadlist`

```
94 \newcommand*\gls@loadlist{\RequirePackage{glossary-list}}
```

`nolist` This option prevents from being loaded (to reduce overheads if required). Naturally, the styles defined in will not be available if this option is used.

```
95 \DeclareOptionX{nolist}{\renewcommand*\gls@loadlist{}}
```

`\@gls@loadtree`

```
96 \newcommand*\@gls@loadtree{\RequirePackage{glossary-tree}}
```

`notree` This option prevents from being loaded (to reduce overheads if required). Naturally, the styles defined in will not be available if this option is used.

```
97 \DeclareOptionX{notree}{\renewcommand*\@gls@loadtree{}}
```

`nostyles` Provide an option to suppress all the predefined styles (in the event that the user has custom styles that are not dependent on the predefined styles).

```
98 \DeclareOptionX{nostyles}{%
99   \renewcommand*\@gls@loadlong}{}%
100  \renewcommand*\@gls@loadsuper}{}%
101  \renewcommand*\@gls@loadlist}{}%
102  \renewcommand*\@gls@loadtree}{}%
103  \let\@glossary@default@style\relax
104 }
```

`\glspostdescription` The description terminator is given by `\glspostdescription` (except for the 3 and 4 column styles). This is a full stop by default:

```
105 \newcommand*\glspostdescription{\ifglsnopostdot\else.\fi}
```

`nopostdot` Boolean option to suppress post description dot

```
106 \define@boolkey{glossaries.sty}[gls]{nopostdot}[true]{}
107 \glsnopostdotfalse
```

`nogroupskip` Boolean option to suppress vertical space between groups in the pre-defined styles.

```
108 \define@boolkey{glossaries.sty}[gls]{nogroupskip}[true]{}
109 \glsnogroupskipfalse
```

`ucmark` Boolean option to determine whether or not to use `\MakeUppercase` in definition of `\glossarymark`

```
110 \define@boolkey{glossaries.sty}[gls]{ucmark}[true]{}
111 \glsucmarkfalse
```

`entrycounter` Defines a counter that can be used in the standard glossary styles to number each (main) entry. If true, this will define a counter called `glossaryentry`.

```
112 \define@boolkey{glossaries.sty}[gls]{entrycounter}[true]{}
113 \glsentrycounterfalse
```

`entrycounterwithin` This option can be used to set a parent counter for `glossaryentry`. This option automatically sets `entrycounter=true`.

```
114 \define@key{glossaries.sty}{counterwithin}{%
115   \renewcommand*\@gls@counterwithin{#1}%
116   \glsentrycountertrue
117 }
```

`\@gls@counterwithin` The default value is no parent counter:
118 `\newcommand*\@gls@counterwithin{}`

`subentrycounter` Define a counter that can be used in the standard glossary styles to number each level 1 entry. If true, this will define a counter called `glossarysubentry`.
119 `\define@boolkey{glossaries.sty}[gls]{subentrycounter}[true]{}`
120 `\glssubentrycounterfalse`

`sort` Define the sort method: `sort=standard` (default), `sort=def` (order of definition) or `sort=use` (order of use).
121 `\define@choicekey{glossaries.sty}{sort}{standard,def,use}{%`
122 `\csname @gls@setupsort@#1\endcsname`
123 `}`

`@setupsort@standard` Set up the macros for default sorting.
124 `\newcommand*\@gls@setupsort@standard{%`
Store entry information when it's defined.
125 `\def\do@glo@storeentry{\@glo@storeentry}%`
No count register required for standard sort.
126 `\def\@gls@defsortcount##1{}`
Sort according to sort key (`\@glo@sort`) if provided otherwise sort according to the entry's name (`\@glo@name`).
127 `\def\@gls@defsort##1##2{%`
128 `\ifx\@glo@sort\@glsdefaultsort`
129 `\let\@glo@sort\@glo@name`
130 `\fi`
131 `\@gls@sanitizesort`
132 `\expandafter\protected@xdef\csname glo@##2@sort\endcsname{\@glo@sort}%`
133 `}`
Don't need to do anything when the entry is used.
134 `\def\@gls@setsort##1{}`
135 `}`
Set standard sort as the default:
136 `\@gls@setupsort@standard`

`\glssortnumberfmt` Format the number used as the sort key by `sort=def` and `sort=use`. Defaults to six digit numbering.
137 `\newcommand*\glssortnumberfmt[1]{%`
138 `\ifnum#1<100000 0\fi`
139 `\ifnum#1<10000 0\fi`
140 `\ifnum#1<1000 0\fi`
141 `\ifnum#1<100 0\fi`
142 `\ifnum#1<10 0\fi`
143 `\number#1%`
144 `}`

```

\@gls@setupsort@def  Set up the macros for order of definition sorting.
145 \newcommand*{\@gls@setupsort@def}{%
    Store entry information when it's defined.
146   \def\do@glo@storeentry{\@glo@storeentry}%
    Defined count register associated with the glossary.
147   \def\@gls@defsortcount##1{%
148     \expandafter\global
149     \expandafter\newcount\csname glossary@##1@sortcount\endcsname
150   }%
    Increment count register associated with the glossary and use as the sort key.
151   \def\@gls@defsort##1##2{%
152     \expandafter\global\expandafter
153     \advance\csname glossary@##1@sortcount\endcsname by 1\relax
154     \expandafter\protected\def\csname glo@##2@sort\endcsname{%
155       \expandafter\glssortnumberfmt
156       {\csname glossary@##1@sortcount\endcsname}}%
157   }%
    Don't need to do anything when the entry is used.
158   \def\@gls@setsort##1{%
159 }

\@gls@setupsort@use  Set up the macros for order of use sorting.
160 \newcommand*{\@gls@setupsort@use}{%
    Don't store entry information when it's defined.
161   \let\do@glo@storeentry\@gobble
    Defined count register associated with the glossary.
162   \def\@gls@defsortcount##1{%
163     \expandafter\global
164     \expandafter\newcount\csname glossary@##1@sortcount\endcsname
165   }%
    Initialise the sort key to empty.
166   \def\@gls@defsort##1##2{%
167     \expandafter\gdef\csname glo@##2@sort\endcsname{}%
168   }%
    If the sort key hasn't been set, increment the counter associated with the glossary and set the sort key.
169   \def\@gls@setsort##1{%
    Get the parent, if one exists
170     \edef\@glo@parent{\csname glo@##1@parent\endcsname}%
    Set the information for the parent entry if not already done.
171     \ifx\@glo@parent\@empty
172     \else
173       \expandafter\@gls@setsort\expandafter{\@glo@parent}%
174     \fi

```

Set index information for this entry

```
175 \edef\@glo@type{\csname glo###1@type\endcsname}%
176 \edef\@gls@tmp{\csname glo###1@sort\endcsname}%
177 \ifx\@gls@tmp\@empty
178   \expandafter\global\expandafter
179   \advance\csname glossary@\@glo@type @sortcount\endcsname by 1\relax
180   \expandafter\protected@xdef\csname glo###1@sort\endcsname{%
181     \expandafter\glssortnumberfmt
182     {\csname glossary@\@glo@type @sortcount\endcsname}}%
183   \@glo@storeentry{##1}%
184 \fi
185 }%
186 }
```

`\glsdefmain` Define the main glossary. This will be the first glossary to be displayed when using `\printglossaries`. The default extensions conflict if used with `doc`, so provide different extensions if `doc` loaded. (If these extensions are inappropriate, use `nomain` and manually define the main glossary with the desired extensions.)

```
187 \newcommand*\glsdefmain}{%
188   \if@gls@docloaded
189     \newglossary[glg2]{main}{gls2}{glo2}{\glossaryname}%
190   \else
191     \newglossary{main}{gls}{glo}{\glossaryname}%
192   \fi
193 }
```

Keep track of the default glossary. This is initialised to the main glossary, but can be changed if for some reason you want to make a secondary glossary the main glossary. This affects any commands that can optionally take a glossary name as an argument (or as the value of the type key in a key-value list). This was mainly done so that `\loadglsentries` can temporarily change `\glsdefaulttype` while it loads a file containing new glossary entries (see [subsection 1.9](#)).

`\glsdefaulttype`

```
194 \newcommand*\glsdefaulttype}{main}
```

Keep track of which glossary the acronyms are in. This is initialised to `\glsdefaulttype`, but is changed by the acronym package option.

`\acronymtype`

```
195 \newcommand*\acronymtype}{\glsdefaulttype}
```

The `nomain` option suppress the creation of the main glossary.

```
196 \DeclareOptionX{nomain}{%
197   \let\glsdefaulttype\relax
198   \renewcommand*\glsdefmain}{}%
199 }
```

acronym The acronym option sets an associated conditional which is used in [subsection 1.16](#) to determine whether or not to define a separate glossary for acronyms.

```
200 \define@boolkey{glossaries.sty}[gls]{acronym}[true]{%
201   \DeclareAcronymList{acronym}%
202 }
```

\@glsacronymlists Comma-separated list of glossary labels indicating which glossaries contain acronyms. Note that \SetAcronymStyle must be used after adding labels to this macro.

```
203 \newcommand*{\@glsacronymlists}{}
```

\@addtoacronymlists

```
204 \newcommand*{\@addtoacronymlists}[1]{%
205   \ifx\@glsacronymlists\@empty
206     \protected@xdef\@glsacronymlists{#1}%
207   \else
208     \protected@xdef\@glsacronymlists{\@glsacronymlists,#1}%
209   \fi
210 }
```

\DeclareAcronymList Identifies the named glossary as a list of acronyms and adds to the list. (Doesn't check if the glossary exists, but checks if label already in list. Use \SetAcronymStyle after identifying all the acronym lists.)

```
211 \newcommand*{\DeclareAcronymList}[1]{%
212   \glsIfListOfAcronyms{#1}{}\@addtoacronymlists{#1}}%
213 }
```

\glsIfListOfAcronyms \glsIfListOfAcronyms{<label>}{<true part>}{<>false part>}

Determines if the glossary with the given label has been identified as being a list of acronyms.

```
214 \newcommand{\glsIfListOfAcronyms}[1]{%
215   \edef\@do@glis@islistofacronyms{%
216     \noexpand\@glis@islistofacronyms{#1}{\@glsacronymlists}}%
217   \@do@glis@islistofacronyms
218 }
```

Internal command requires label and list to be expanded:

```
219 \newcommand{\@glis@islistofacronyms}[4]{%
220   \def\@glis@islistofacronyms##1,#1,##2\end@glis@islistofacronyms{%
221     \def\@before{##1}\def\@after{##2}}%
222   \gls@islistofacronyms,#2,#1,\@nil\end@glis@islistofacronyms
223   \ifx\@after\@nnil
```

Not found

```
224   #4%
225   \else
```

Found

```
226 #3%
227 \fi
228 }
```

`\if@glsisacronymlist` Convenient boolean.

```
229 \newif\if@glsisacronymlist
```

`@checkisacronymlist` Sets the above boolean if argument is a label representing a list of acronyms.

```
230 \newcommand*\glsc@checkisacronymlist[1]{%
231   \glslIfListOfAcronyms{#1}%
232   {\@glsisacronymlisttrue}{\@glsisacronymlistfalse}%
233 }
```

`\SetAcronymLists` Sets the “list of acronyms” list. Argument must be a comma-separated list of glossary labels. (Doesn’t check at this point if the glossaries exists.)

```
234 \newcommand*\SetAcronymLists[1]{%
235   \renewcommand*\@glsacronymlists{#1}%
236 }
```

acronymlists

```
237 \define@key{glossaries.sty}{acronymlists}{%
238   \@addtoacronymlists{#1}%
239 }
```

The default counter associated with the numbers in the glossary is stored in `\glscounter`. This is initialised to the page counter. This is used as the default counter when a new glossary is defined, unless a different counter is specified in the optional argument to `\newglossary` (see [subsection 1.6](#)).

`\glscounter`

```
240 \newcommand{\glscounter}{page}
```

`counter` The counter option changes the default counter. (This just redefines `\glscounter`.)

```
241 \define@key{glossaries.sty}{counter}{%
242   \renewcommand*\glscounter{#1}%
243 }
```

`\@gls@nohyperlist`

```
244 \newcommand*\@gls@nohyperlist{}
```

`\DeclareNoHyperList`

```
245 \newcommand*\GlsDeclareNoHyperList[1]{%
246   \ifdefempty\@gls@nohyperlist
247   {%
248     \renewcommand*\@gls@nohyperlist{#1}%
249   }%
250   {%
```

```

251 \appto\@gls@nohyperlist{,#1}%
252 }%
253 }

```

nohypertypes

```

254 \define@key{glossaries.sty}{nohypertypes}{%
255 \GlsDeclareNoHyperList{#1}%
256 }

```

The glossary keys whose values are written to another file (i.e. sort, name, description and symbol) need to be sanitized, otherwise fragile commands would not be able to be used in `\newglossaryentry`. However, strange results will occur if you then use those fields in the document. As these fields are not normally used in the document, but are by default only used in the glossary, the default is to sanitize them. If however you want to use these values in the document (either by redefining commands like `\glsdisplay` or by using commands like `\glsentrydesc`) you will have to switch off the sanitization using the `sanitize` package option, but you will then have to use `\protect` to protect fragile commands when defining new glossary entries. The `sanitize` option takes a key-value list as its value, which can be used to switch individual values on and off. For example:

```
\usepackage[sanitize={description,name,symbol=false}]{glossaries}
```

will switch off the sanitization for the `symbol` key, but switch it on for the `description` and `name` keys. This would mean that you can use fragile commands in the `description` and `name` when defining a new glossary entry, but not for the `symbol`.

The default values are defined as:

`\@gls@sanitizedesc`

```
257 \newcommand*{\@gls@sanitizedesc}{\@onelevel@sanitize\@glo@desc}
```

`\@gls@sanitizename`

```
258 \newcommand*{\@gls@sanitizename}{\@onelevel@sanitize\@glo@name}
```

`\@gls@sanitizesymbol`

```
259 \newcommand*{\@gls@sanitizesymbol}{\@onelevel@sanitize\@glo@symbol}
```

`\@gls@sanitizesort`

```
260 \newcommand*{\@gls@sanitizesort}{\@onelevel@sanitize\@glo@sort}
```

Before defining the `sanitize` package option, The key-value list for the `sanitize` value needs to be defined. These are all boolean keys. If they are not given a value, assume true.

Firstly the `description`. If set, it will redefine `\@gls@sanitizedesc` to use `\@onelevel@sanitize`, otherwise `\@gls@sanitizedesc` will do nothing.

```

261 \define@boolkey [gls] {sanitize}{description} [true] {%
262 \ifgls@sanitize@description
263   \renewcommand*{\@gls@sanitizedesc}{\@onelevel@sanitize\@glo@desc}%
264 \else
265   \renewcommand*{\@gls@sanitizedesc}{}%
266 \fi
267 }

```

Similarly for the name key:

```

268 \define@boolkey [gls] {sanitize}{name} [true] {%
269 \ifgls@sanitize@name
270   \renewcommand*{\@gls@sanitizename}{\@onelevel@sanitize\@glo@name}%
271 \else
272   \renewcommand*{\@gls@sanitizename}{}%
273 \fi}

```

and for the symbol key:

```

274 \define@boolkey [gls] {sanitize}{symbol} [true] {%
275 \ifgls@sanitize@symbol
276   \renewcommand*{\@gls@sanitizesymbol}{%
277 \@onelevel@sanitize\@glo@symbol}%
278 \else
279   \renewcommand*{\@gls@sanitizesymbol}{}%
280 \fi}

```

and for the sort key:

```

281 \define@boolkey [gls] {sanitize}{sort} [true] {%
282 \ifgls@sanitize@sort
283   \renewcommand*{\@gls@sanitizesort}{%
284 \@onelevel@sanitize\@glo@sort}%
285 \else
286   \renewcommand*{\@gls@sanitizesort}{}%
287 \fi}

```

sanitize Now define the sanitize option. It can either take a key-val list as its value, or it can take the keyword none, which is equivalent to description=false, symbol=false, name=false:

```

288 \define@key{glossaries.sty}{sanitize}[description=true,symbol=true,
289 name=true]{%
290 \ifthenelse{\equal{#1}{none}}{%
291 {%
292   \renewcommand*{\@gls@sanitizedesc}{}%
293   \renewcommand*{\@gls@sanitizename}{}%
294   \renewcommand*{\@gls@sanitizesymbol}{}%
295 }%
296 {%
297   \setkeys [gls] {sanitize}{#1}}%
298 }

```

translate Define translate option. If false don't set up multi-lingual support.

```

299 \define@boolkey{glossaries.sty}[gls]{translate} [true] {}

```

Set the default value:

```
300 \glstranslatefalse
301 \ifpackage{translator}%
302   {\glstranslatetrue}%
303   {%
304     \ifpackage{polyglossia}%
305       {\glstranslatetrue}%
306       {%
307         \ifpackage{babel}{\glstranslatetrue}{}}%
308         }%
309 }
```

`indexonlyfirst` Set whether to only index on first use.

```
310 \define@boolkey{glossaries.sty}[gls]{indexonlyfirst}[true]{}
311 \glindexonlyfirstfalse
```

`hyperfirst` Set whether or not terms should have a hyperlink on first use.

```
312 \define@boolkey{glossaries.sty}[gls]{hyperfirst}[true]{}
313 \glshyperfirsttrue
```

`footnote` Set the long form of the acronym in footnote on first use.

```
314 \define@boolkey{glossaries.sty}[glsacr]{footnote}[true]{}
315 \ifthenelse{\boolean{glsacrdescription}}{}{}%
316 {\renewcommand*{\@gls@sanitizedesc}{}}%
317 }
```

`description` Allow acronyms to have a description (needs to be set using the description key in the optional argument of `\newacronym`).

```
318 \define@boolkey{glossaries.sty}[glsacr]{description}[true]{}
319 \renewcommand*{\@gls@sanitizesymbol}{}%
320 }
```

`smallcaps` Define `\newacronym` to set the short form in small capitals.

```
321 \define@boolkey{glossaries.sty}[glsacr]{smallcaps}[true]{}
322 \renewcommand*{\@gls@sanitizesymbol}{}%
323 }
```

`smaller` Define `\newacronym` to set the short form using `\smaller` which obviously needs to be defined by loading the appropriate package.

```
324 \define@boolkey{glossaries.sty}[glsacr]{smaller}[true]{}
325 \renewcommand*{\@gls@sanitizesymbol}{}%
326 }
```

`dua` Define `\newacronym` to always use the long forms (i.e. don't use acronyms)

```
327 \define@boolkey{glossaries.sty}[glsacr]{dua}[true]{}
328 \renewcommand*{\@gls@sanitizesymbol}{}%
329 }
```

`shortcuts` Define acronym shortcuts.
330 `\define@boolkey{glossaries.sty}[glsacr]{shortcuts}[true]{}`

`\glsorder` Stores the glossary ordering. This may either be “word” or “letter”. This passes the relevant information to `makeglossaries`. The default is word ordering.
331 `\newcommand*{\glsorder}{word}`

`\@glsorder` The ordering information is written to the auxiliary file for `makeglossaries`, so ignore the auxiliary information.
332 `\newcommand*{\@glsorder}[1]{}`

`order`
333 `\define@choicekey{glossaries.sty}{order}{word,letter}{%`
334 `\def\glsorder{#1}}`

`\ifglxindy` Provide boolean to determine whether `xindy` or `makeindex` will be used to sort the glossaries.
335 `\newif\ifglxindy`

The default is `makeindex`:
336 `\glxindyfalse`

Define package option to specify that `makeindex` will be used to sort the glossaries:
337 `\DeclareOptionX{makeindex}{\glxindyfalse}`

The `xindy` package option may have a value which in turn can be a key=value list. First define the keys for this sub-list. The boolean `glsnumbers` determines whether to automatically add the `glsnumbers` letter group.
338 `\define@boolkey[gls]{xindy}{glsnumbers}[true]{}`
339 `\gls@xindy@glsnumberstrue`

`\@xdy@main@language` Define what language to use for each glossary type (if a language is not defined for a particular glossary type the language specified for the main glossary is used.)
340 `\def\@xdy@main@language{\rootlanguagename}%`

Define key to set the language
341 `\define@key[gls]{xindy}{language}{\def\@xdy@main@language{#1}}`

`\gls@codepage` Define the code page. If `\inputencodingname` is defined use that, otherwise have initialise with no codepage.
342 `\ifcsundef{inputencodingname}{%`
343 `\def\gls@codepage{}}{%`
344 `\def\gls@codepage{\inputencodingname}`
345 `}`

Define a key to set the code page.

```
346 \define@key[glS]{xindy}{codepage}{\def\glS@codepage{#1}}
```

Define package option to specify that xindy will be used to sort the glossaries:

```
347 \define@key{glossaries.sty}{xindy}[]{%
348   \glSxindytrue
349   \setkeys[glS]{xindy}{#1}%
350 }
```

`savewrites` The `savewrites` package option is provided to save on the number of write registers.

```
351 \define@boolkey{glossaries.sty}[glS]{savewrites}[true]{} 
```

Set default:

```
352 \glSsavewritesfalse
```

`\GlossariesWarning` Prints a warning message.

```
353 \newcommand*\GlossariesWarning}[1]{%
354   \PackageWarning{glossaries}{#1}%
355 }
```

`sariesWarningNoLine` Prints a warning message without the line number.

```
356 \newcommand*\GlossariesWarningNoLine}[1]{%
357   \PackageWarningNoLine{glossaries}{#1}%
358 }
```

Define package option to suppress warnings

```
359 \DeclareOptionX{nowarn}{%
360   \renewcommand*\GlossariesWarning}[1]{}%
361   \renewcommand*\GlossariesWarningNoLine}[1]{}%
362 }
```

`compatible-2.07`

```
363 \define@boolkey{glossaries.sty}[glS]{compatible-2.07}[true]{}
364 \csname glScompatible-2.07false\endcsname
```

Process package options:

```
365 \ProcessOptionsX
```

If package is loaded, check to see if it is installed, but only if translation is required.

```
366 \ifglStranslate
367   \@ifpackageloaded{polyglossia}%
368   {%
```

polyglossia fakes babel so need to check for polyglossia first.

```

369 }%
370 {%
371   \@ifpackageloaded{babel}%
372   {%
373     \IfFileExists{translator.sty}%
374     {%
375       \RequirePackage{translator}%
376     }%
377   }%
378 }%
379 {}
380 }
381 \fi

```

If chapters are defined and the user has requested the section counter as a package option, `\@chapter` will be modified so that it adds a `section.<n>.0` target, otherwise entries placed before the first section of a chapter will have undefined links.

The same problem will also occur if a lower sectional unit is used, but this is less likely to happen. If it does, or if you change `\glscounter` to `section` later, you will have to specify a different counter for the entries that give rise to a name `{<section-level>.<n>.0}` non-existent warning (e.g. `\gls[counter=chapter]{label}`).

```

382 \ifthenelse{\equal{\glscounter}{section}}%
383 {%
384   \ifcsundef{chapter}{}%
385   {%
386     \let\@gls@old@chapter\@chapter
387     \def\@chapter[#1]#2{\@gls@old@chapter[#1]{#2}%
388     \ifcsundef{hyperdef}{\hyperdef{section}{\thesection}}}%
389   }%
390 }%
391 {}

```

`\@gls@onlypremakeg` Some commands only have an effect when used before `\makeglossaries`. So define a list of commands that should be disabled after `\makeglossaries`

```

392 \newcommand*{\@gls@onlypremakeg}{}

```

`\@onlypremakeg` Adds the specified control sequence to the list of commands that must be disabled after `\makeglossaries`.

```

393 \newcommand*{\@onlypremakeg}[1]{}
394 \ifx\@gls@onlypremakeg\@empty
395   \def\@gls@onlypremakeg{#1}%
396 \else
397   \expandafter\toks@\expandafter{\@gls@onlypremakeg}%
398   \edef\@gls@onlypremakeg{\the\toks@,\noexpand#1}%
399 \fi}

```

`\disable@onlypremakeg` Disable all commands listed in `\@gls@onlypremakeg`

```

400 \newcommand*{\@disable@onlypremakeg}{%
401 \@for\@thiscs:=\@gls@onlypremakeg\do{%
402   \expandafter\@disable@premakecs\@thiscs%
403 }}

```

`\@disable@premakecs` Disables the given command.

```

404 \newcommand*{\@disable@premakecs}[1]{%
405   \def#1{\PackageError{glossaries}{\string#1\space may only be
406     used before \string\makeglossaries}{You can't use
407     \string#1\space after \string\makeglossaries}}%
408 }

```

1.3 Default values

This section sets up default values that are used by this package. Some of the names may already be defined (e.g. by) so `\providecommand` is used.

Main glossary title:

`\glossaryname`

```

409 \providecommand*{\glossaryname}{Glossary}

```

The title for the acronym glossary type (which is defined if acronym package option is used) is given by `\acronymname`. If the acronym package option is not used, `\acronymname` won't be used.

`\acronymname`

```

410 \providecommand*{\acronymname}{Acronyms}

```

`\glssettoctitle` Sets the TOC title for the given glossary.

```

411 \newcommand*{\glssettoctitle}[1]{%
412 \def\glossarytoctitle{\csname @glotype@#1@title\endcsname}}

```

The following commands provide text for the headers used by some of the tabular-like glossary styles. Whether or not they get used in the glossary depends on the glossary style.

`\entryname`

```

413 \providecommand*{\entryname}{Notation}

```

`\descriptionname`

```

414 \providecommand*{\descriptionname}{Description}

```

`\symbolname`

```

415 \providecommand*{\symbolname}{Symbol}

```

`\pagelistname`

```

416 \providecommand*{\pagelistname}{Page List}

```

Labels for makeindex's symbol and number groups:

glsymbolsgroupname

```
417 \providecommand*{\glsymbolsgroupname}{Symbols}
```

glsnumbersgroupname

```
418 \providecommand*{\glsnumbersgroupname}{Numbers}
```

`\glspluralsuffix` The default plural is formed by appending `\glspluralsuffix` to the singular form.

```
419 \newcommand*{\glspluralsuffix}{s}
```

`\seename`

```
420 \providecommand*{\seename}{see}
```

`\andname`

```
421 \providecommand*{\andname}{\&}
```

Add multi-lingual support. Thanks to everyone who contributed to the translations from both `comp.text.tex` and via email.

`\addglossarytocaptions` If using `\glossaryname` should be defined in terms of `\translate`, but if `babel` is also loaded, it will redefine `\glossaryname` whenever the language is set, so override it. (Don't use `\addto` as doesn't define it.)

```
422 \newcommand*{\addglossarytocaptions}[1]{%
423   \ifcsundef{captions#1}{}%
424   {%
425     \expandafter\let\expandafter\@gls@tmp\csname captions#1\endcsname
426     \expandafter\toks@\expandafter{\@gls@tmp
427       \renewcommand*{\glossaryname}{\translate{Glossary}}}%
428   }%
429   \expandafter\edef\csname captions#1\endcsname{\the\toks@}%
430 }%
431 }
```

```
432 \ifglstranslate
```

If is not install, used standard captions, otherwise load dictionary.

```
433 \@ifpackageloaded{translator}{%
434   \usedictionary{glossaries-dictionary}%
435   \addglossarytocaptions{portuges}%
436   \addglossarytocaptions{portuguese}%
437   \addglossarytocaptions{brazil}%
438   \addglossarytocaptions{brazilian}%
439   \addglossarytocaptions{danish}%
440   \addglossarytocaptions{dutch}%
441   \addglossarytocaptions{afrikaans}%

479 \translate{Page List (glossaries)}}%
480 \renewcommand*{\glssymbolsgroupname}{%
481 \translate{Symbols (glossaries)}}%
482 \renewcommand*{\glsnumbersgroupname}{%
483 \translate{Numbers (glossaries)}}%
484 }{%

485 \@ifpackageloaded{polyglossia}%
486 {\RequirePackage{glossaries-polyglossia}}%
487 {%
488 \@ifpackageloaded{babel}{%
489 \RequirePackage{glossaries-babel}}}%
490 }}
491 \fi

```

`\nopostdesc` Provide a means to suppress description terminator for a given entry. (Useful for entries with no description.) Has no effect outside the glossaries.

```
492 \DeclareRobustCommand*\nopostdesc{}
```

`\@nopostdesc` Suppress next description terminator.

```
493 \newcommand*\@nopostdesc{%
494   \let\org@glspostdescription\glspostdescription
495   \def\glspostdescription{%
496     \let\glspostdescription\org@glspostdescription}%
497 }
```

`\glspar` Provide means of having a paragraph break in glossary entries

```
498 \newcommand{\glspar}{\par}
```

`\setStyleFile` Sets the style file. The relevant extension is appended.

```
499 \ifglsxindy
500   \newcommand{\setStyleFile}[1]{%
501     \renewcommand{\istfilename}{#1.xdy}}
502 \else
503   \newcommand{\setStyleFile}[1]{%
504     \renewcommand{\istfilename}{#1.ist}}
505 \fi
```

This command only has an effect prior to using `\makeglossaries`.

```
506 \@onlypremakeg\setStyleFile
```

The name of the `makeindex` or `xindy` style file is given by `\istfilename`. This file is created by `\writeist` (which is used by `\makeglossaries`) so redefining this command will only have an effect if it is done *before* `\makeglossaries`. As from v1.17, use `\setStyleFile` instead of directly redefining `\istfilename`.

`\istfilename`

```
507 \ifglsxindy
508   \def\istfilename{\jobname.xdy}
509 \else
510   \def\istfilename{\jobname.ist}
511 \fi
```

The `makeglossaries` Perl script picks up this name from the auxiliary file. If the name ends with `.xdy` it calls `xindy` otherwise it calls `makeindex`. Since its not required by \LaTeX , `\@istfilename` ignores its argument.

`\@istfilename`

```
512 \newcommand*\@istfilename[1]{}
```

This command is the value of the `page_compositor` `makeindex` key. Again, any redefinition of this command must take place *before* `\writeist` otherwise it will have no effect. As from 1.17, use `\glsSetCompositor` instead of directly redefining `\glscompositor`.

`\glscompositor`

```
513 \newcommand*\glscompositor}{.}
```

`\glsSetCompositor` Sets the compositor.

```
514 \newcommand*\glsSetCompositor[1]{%
515   \renewcommand*\glscompositor}{#1}}
```

Only use before `\makeglossaries`

```
516 \@onlypremakeg\glsSetCompositor
```

(The page compositor is usually defined as a dash when using `makeindex`, but most of the standard counters used by \TeX use a full stop as the compositor, which is why I have used it as the default.) If `xindy` is used `\glscompositor` only affects the `arabic-page-numbers` location class.

`@glsAlphacompositor` This is only used by `xindy`. It specifies the compositor to use when location numbers are in the form $\langle letter \rangle \langle compositor \rangle \langle number \rangle$. For example, if `\@glsAlphacompositor` is set to `."` then it allows locations such as A.1 whereas if `\@glsAlphacompositor` is set to `-` then it allows locations such as A-1.

```
517 \newcommand*\@glsAlphacompositor{\glscompositor}
```

`sSetAlphaCompositor` Sets the alpha compositor.

```
518 \ifglxindy
519   \newcommand*\glsSetAlphaCompositor[1]{%
520     \renewcommand*\@glsAlphacompositor{#1}}
521 \else
522   \newcommand*\glsSetAlphaCompositor[1]{%
523     \glsnoxindywarning\glsSetAlphaCompositor}
524 \fi
```

Can only be used before `\makeglossaries`

```
525 \@onlypremakeg\glsSetAlphaCompositor
```

`\gls@suffiX` Suffix to use for a two page list. This overrides the separator and the closing page number if set to something other than an empty macro.

```
526 \newcommand*\gls@suffiX}{}
```

`\glsSetSuffiX` Sets the suffix to use for a two page list.

```
527 \newcommand*\glsSetSuffiX[1]{%
528   \renewcommand*\gls@suffiX}{#1}}
```

Only has an effect when used before `\makeglossaries`

```
529 \@onlypremakeg\glsSetSuffiX
```

`\gls@suffiFF` Suffix to use for a three page list. This overrides the separator and the closing page number if set to something other than an empty macro.

```
530 \newcommand*\gls@suffiFF}{}
```

`\glsSetSuffixFF` Sets the suffix to use for a three page list.

```
531 \newcommand*\glsSetSuffixFF[1]{%
532   \renewcommand*\gls@sufffixFF{#1}%
533 }
```

`\glsnumberformat` The command `\glsnumberformat` indicates the default format for the page numbers in the glossary. (Note that this is not the same as `\glossaryentrynumbers`, but applies to individual numbers or groups of numbers within an entry's associated number list.) If hyperlinks are defined, it will use `\glsnumberformat`, otherwise it will simply display its argument "as is".

```
534 \ifcsundef{hyperlink}%
535 {%
536   \newcommand*\glsnumberformat[1]{#1}%
537 }%
538 {%
539   \newcommand*\glsnumberformat[1]{\glsnumberformat{#1}}%
540 }
```

Individual numbers in an entry's associated number list are delimited using `\delimN` (which corresponds to the `delim_n` `makeindex` keyword). The default value is a comma followed by a space.

```
\delimN
541 \newcommand{\delimN}{, }
```

A range of numbers within an entry's associated number list is delimited using `\delimR` (which corresponds to the `delim_r` `makeindex` keyword). The default is an en-dash.

```
\delimR
542 \newcommand{\delimR}{--}
```

The glossary preamble is given by `\glossarypreamble`. This will appear after the glossary sectioning command, and before the `theglossary` environment. It is designed to allow the user to add information pertaining to the glossary (e.g. "page numbers in italic indicate the primary definition") therefore `\glossarypreamble` shouldn't be affected by the glossary style. (So if you define your own glossary style, don't have it change `\glossarypreamble`.) The preamble is empty by default. If you have multiple glossaries, and you want a different preamble for each glossary, you will need to use `\printglossary` for each glossary type, instead of `\printglossaries`, and redefine `\glossarypreamble` before each `\printglossary`.

```
\glossarypreamble
543 \newcommand*\glossarypreamble{}
```

The glossary postamble is given by `\glossarypostamble`. This is provided to allow the user to add something after the end of the `theglossary` environment

(again, this shouldn't be affected by the glossary style). It is, of course, possible to simply add the text after `\printglossary`, but if you only want the postamble to appear after the first glossary, but not after subsequent glossaries, you can do something like:

```
\renewcommand{\glossarypostamble}{For a complete list of terms
see \cite{blah}\gdef\glossary preamble{}}
```

`\glossarypostamble`

```
544 \newcommand*{\glossarypostamble}{}
```

`\glossarysection`

The sectioning command that starts a glossary is given by `\glossarysection`. (This does not form part of the glossary style, and so should not be changed by a glossary style.) If `\phantomsection` is defined, it uses `\p@glossarysection`, otherwise it uses `\@glossarysection`.

```
545 \newcommand*{\glossarysection}[2][\@gls@title]{%
546   \def\@gls@title{#2}%
547   \ifcsundef{phantomsection}%
548     {%
549       \@glossarysection{#1}{#2}%
550     }%
551     {%
552       \p@glossarysection{#1}{#2}%
553     }%
554   \glossarymark{\glossarytoctitle}%
555 }
```

`\glossarymark`

Sets the header mark for the glossary. Takes the glossary short (TOC) title as the argument.

```
556 \ifcsundef{glossarymark}%
557 {%
558   \ifglsucmark
559     \newcommand{\glossarymark}[1]{%
560       \@mkboth{\MakeUppercase{#1}}{\MakeUppercase{#1}}%
561     }
562   \else
563     \newcommand{\glossarymark}[1]{\@mkboth{#1}{#1}}
564   \fi
565 }%
566 {%
567   \GlossariesWarning{overriding \string\glossarymark}%
568   \@ifclassloaded{memoir}%
569   {
570     \ifglsucmark
571       \renewcommand{\glossarymark}[1]{%
572         \@mkboth{\MakeUppercase{#1}}{\MakeUppercase{#1}}%
573       }
574     \else
```

```

575     \renewcommand{\glossarymark}[1]{%
576       \markboth{\memUHead{#1}}{\memUHead{#1}}%
577     }
578     \fi
579   }
580   {
581     \ifglsucmark
582       \renewcommand{\glossarymark}[1]{%
583         \mkboth{\MakeUppercase{#1}}{\MakeUppercase{#1}}%
584       }
585     \else
586       \renewcommand{\glossarymark}[1]{\@mkboth{#1}{#1}}
587     \fi
588   }
589 }

```

The required sectional unit is given by `\@glossarysec` which was defined by the section package option. The starred form of the command is chosen. If you don't want any sectional command, you will need to redefine `\glossarysection`. The sectional unit can be changed, if different sectional units are required.

`\setglossarysection`

```

590 \newcommand*\setglossarysection[1]{%
591 \setkeys{glossaries.sty}{section=#1}}

```

The command `\@glossarysection` indicates how to start the glossary section if `\phantomsection` is not defined.

`\@glossarysection`

```

592 \newcommand*\@glossarysection[2]{%
593 \ifx\@glossarysecstar\@empty
594   \csname\@glossarysec\endcsname{#2}%
595 \else
596   \csname\@glossarysec\endcsname*{#2}%
597   \@gls@toc{#1}{\@glossarysec}%
598 \fi
599 \@glossaryseclabel}

```

As `\@glossarysection`, but put in `\phantomsection`, and swap where `\@gls@toc` goes. If using chapters do a `\clearpage`. This ensures that the hyper link from the table of contents leads to the line above the heading, rather than the line below it.

`\@pglossarysection`

```

600 \newcommand*\@pglossarysection[2]{%
601 \glsclearpage
602 \phantomsection
603 \ifx\@glossarysecstar\@empty

```

```

604 \csname\@glossarysec\endcsname{#2}%
605 \else
606 \@gls@toc{#1}{\@glossarysec}%
607 \csname\@glossarysec\endcsname*{#2}%
608 \fi
609 \@glossaryseclabel}

```

`\gls@doclearpage` The `\gls@doclearpage` command is used to issue a `\clearpage` (or `\cleardoublepage`) depending on whether the glossary sectional unit is a chapter. If the sectional unit is something else, do nothing.

```

610 \newcommand*\gls@doclearpage{%
611 \ifthenelse{\equal{\@glossarysec}{chapter}}%
612 {%
613 \ifcsundef{cleardoublepage}{\clearpage}{\cleardoublepage}%
614 }%
615 {}%
616 }

```

`\glsclearpage` This just calls `\gls@doclearpage`, but it makes it easier to have a user command so that the user can override it.

```

617 \newcommand*\glsclearpage{\gls@doclearpage}

```

The glossary is added to the table of contents if `glstoc` flag set. If it is set, `\@gls@toc` will add a line to the `.toc` file, otherwise it will do nothing. (The first argument to `\@gls@toc` is the title for the table of contents, the second argument is the sectioning type.)

`\@gls@toc`

```

618 \newcommand*\@gls@toc [2] {%
619 \ifglstoc
620 \ifglsnumberline
621 \addcontentsline{toc}{#2}{\numberline{#1}}%
622 \else
623 \addcontentsline{toc}{#2}{#1}%
624 \fi
625 \fi}

```

1.4 Xindy

This section defines commands that only have an effect if `xindy` is used to sort the glossaries.

`\glsnoxindywarning` Issues a warning if `xindy` hasn't been specified. These warnings can be suppressed by redefining `\glsnoxindywarning` to ignore its argument

```

626 \newcommand*\glsnoxindywarning [1] {%
627 \GlossariesWarning{Not in xindy mode --- ignoring \string#1}%
628 }

```

`\@xdyattributes` Define list of attributes (`\string` is used in case the double quote character has been made active)

```
629 \ifglxindy
630 \edef\@xdyattributes{\string"default\string"}%
631 \fi
```

`\@xdyattributelist` Comma-separated list of attributes.

```
632 \ifglxindy
633 \edef\@xdyattributelist{}%
634 \fi
```

`\@xdylocref` Define list of markup location references.

```
635 \ifglxindy
636 \def\@xdylocref{}
637 \fi
```

`\@gls@ifinlist`

```
638 \newcommand*\@gls@ifinlist}[4]{%
639 \def\@do@ifinlist##1,#1,##2\end@ifinlist{%
640 \def\@gls@listsuffix{##2}%
641 \ifx\@gls@listsuffix\@empty
642 #4%
643 \else
644 #3%
645 \fi
646 }%
647 \@do@ifinlist,#2,#1,\end@ifinlist
648 }
```

`\GlsAddXdyCounters` Need to know all the counters that will be used in location numbers for Xindy. Argument may be a single counter name or a comma-separated list of counter names.

```
649 \ifglxindy
650 \newcommand*\@xdycounters{\glscounter}
651 \newcommand*\GlsAddXdyCounters[1]{%
652 \@for\@gls@ctr:=#1\do{%
```

Check if already in list before adding.

```
653 \edef\@do@addcounter{%
654 \noexpand\@gls@ifinlist{\@gls@ctr}{\@xdycounters}{}%
655 {%
656 \noexpand\edef\noexpand\@xdycounters{\@xdycounters,%
657 \noexpand\@gls@ctr}%
658 }%
659 }%
660 \@do@addcounter
661 }
662 }
```

Only has an effect before `\writeist`:

```
663 \@onlypremakeg\GlsAddXdyCounters
664 \else
665 \newcommand*\GlsAddXdyCounters[1]{%
666 \glsnoxindywarning\GlsAddXdyAttribute
667 }
668 \fi
```

`\d@glsaddxdycounters` Counters must all be identified before adding attributes.

```
669 \newcommand*\@disabled@glsaddxdycounters{%
670 \PackageError{glossaries}{\string\GlsAddXdyCounters\space
671 can't be used after \string\GlsAddXdyAttribute}{Move all
672 occurrences of \string\GlsAddXdyCounters\space before the first
673 instance of \string\GlsAddXdyAttribute}%
674 }
```

`\GlsAddXdyAttribute` Adds an attribute.

```
675 \ifglsexindy
```

First define internal command that adds an attribute for a given counter (2nd argument is the counter):

```
676 \newcommand*\@glsaddxdyattribute[2]{%
```

Add to xindy attribute list

```
677 \edef\@xdyattributes{\@xdyattributes ^^J \string"#1\string" ^^J
678 \string"#2#1\string"}%
```

Add to xindy markup location.

```
679 \expandafter\toks@\expandafter{\@xdylocref}%
680 \edef\@xdylocref{\the\toks@ ^^J%
681 (markup-locref
682 :open \string"\string~n%
683 \expandafter\string\csname glsX#2X#1\endcsname
684 \string" ^^J
685 :close \string"\string" ^^J
686 :attr \string"#2#1\string")}%
```

Define associated attribute command `\glsX<counter>X<attribute>{\Hprefix}\{<n>`

```
687 \expandafter\gdef\csname glsX#2X#1\endcsname##1##2{%
688 \setentrycounter{##1}{#2}\csname #1\endcsname{##2}%
689 }%
690 }
```

High-level command:

```
691 \newcommand*\GlsAddXdyAttribute[1]{%
```

Add to comma-separated attribute list

```
692 \ifx\@xdyattributelist\@empty
693 \edef\@xdyattributelist{#1}%
694 \else
695 \edef\@xdyattributelist{\@xdyattributelist,#1}%
696 \fi
```

Iterate through all specified counters and add counter-dependent attributes:

```
697 \for\@this@counter:=\@xdycounters\do{%
698 \protected@edef\gls@do@addxdyattribute{%
699 \noexpand\@glsaddxdyattribute{#1}{\@this@counter}%
700 }
701 \gls@do@addxdyattribute
702 }%
```

All occurrences of `\GlsAddXdyCounters` must be used before this command

```
703 \let\GlsAddXdyCounters\@disabled@glsaddxdycounters
704 }
```

Only has an effect before `\writeist`:

```
705 \@onlypremakeg\GlsAddXdyAttribute
706 \else
707 \newcommand*\GlsAddXdyAttribute[1]{%
708 \glsnoxindywarning\GlsAddXdyAttribute}
709 \fi
```

`redefinedattributes` Add known attributes for all defined counters

```
710 \ifglsxindy
711 \newcommand*\@gls@addpredefinedattributes}{%
712 \GlsAddXdyAttribute{glsnumberformat}
713 \GlsAddXdyAttribute{textrm}
714 \GlsAddXdyAttribute{textsf}
715 \GlsAddXdyAttribute{texttt}

940   \else
941     \def\@xdylettergroups{}
942   \fi
943 \fi

```

`\GlsAddLetterGroup` Add a new letter group. The first argument is the name of the letter group. The second argument is the xindy code specifying prefixes and ordering.

```

944   \newcommand*\GlsAddLetterGroup[2]{%
945     \expandafter\toks@\expandafter{\@xdylettergroups}%
946     \protected@edef\@xdylettergroups{\the\toks@^^J%
947       (define-letter-group \string"#1\string"^^J\space\space\space#2)}%
948   }%

```

1.5 Loops and conditionals

`\forallglossaries` To iterate through all glossaries (or comma-separated list of glossary names given in optional argument) use:

```
\forallglossaries[<glossary list>]{<cmd>}{<code>}
```

where *<cmd>* is a control sequence which will be set to the name of the glossary in the current iteration.

```

949 \newcommand*\forallglossaries[3][\@glo@types]{%
950   \@for#2:=#1\do{\ifx#2\@empty\else#3\fi}%
951 }

```

`\forglsentries` To iterate through all entries in a given glossary use:

```
\forglsentries[<type>]{<cmd>}{<code>}
```

where *<type>* is the glossary label and *<cmd>* is a control sequence which will be set to the entry label in the current iteration.

```

952 \newcommand*\forlgsentries}[3][\glsdefaulttype]{%
953   \edef\@glo@list{\csname glo@list@#1\endcsname}%
954   \@for#2:=\@glo@list\do{\ifx#2\@empty\else#3\fi}%
955 }

```

`\foralllgsentries` To iterate through all glossary entries over all glossaries listed in the optional argument (the default is all glossaries) use:

```
\foralllgsentries[glossary list]{cmd}{code}
```

Within `\foralllgsentries`, the current glossary type is given by `\@thisglo@`.

```

956 \newcommand*\foralllgsentries}[3][\@glo@types]{%
957 \expandafter\foralllgsentries\expandafter[#1]{\@thisglo@}{%
958 \forlgsentries[\@thisglo@]{#2}{#3}}

```

`\ifglossaryexists` To check to see if a glossary exists use:

```
\ifglossaryexists{type}{true-text}{false-text}
```

where *type* is the glossary's label.

```

959 \newcommand{\ifglossaryexists}[3]{%
960   \ifcsundef{glo@#1@out}{#3}{#2}%
961 }

```

`\iflgsentryexists` To check to see if a glossary entry has been defined use:

```
\iflgsentryexists{label}{true text}{false text}
```

where *label* is the entry's label.

```

962 \newcommand{\iflgsentryexists}[3]{%
963   \ifcsundef{glo@#1@name}{#3}{#2}%
964 }

```

`\ifglsused` To determine if given glossary entry has been used in the document text yet use:

```
\ifglsused{label}{true text}{false text}
```

where *label* is the entry's label. If true it will do *true text* otherwise it will do *false text*.

```
965 \newcommand*\ifglsused}[3]{\ifthenelse{\boolean{glo@#1@flag}}{#2}{#3}}
```

The following two commands will cause an error if the given condition fails:

```
\glsdoifexists {label}{code}
```

Generate an error if entry specified by *label* doesn't exist, otherwise do *code*.

```
966 \newcommand{\glsdoifexists}[2]{%
```

```

967 \ifglstryexists{#1}{#2}{%
968   \PackageError{glossaries}{Glossary entry ‘#1’ has not been
969   defined}{You need to define a glossary entry before you
970   can use it.}}%
971 }

```

```
\glsdoifnoexists \glsdoifnoexists{<label>}{<code>}
```

The opposite: only do second argument if the entry doesn't exist. Generate an error message if it exists.

```

972 \newcommand{\glsdoifnoexists}[2]{%
973   \ifglstryexists{#1}{%
974     \PackageError{glossaries}{Glossary entry ‘#1’ has already
975     been defined}{}}{#2}%
976 }

```

```
\ifglshaschildren \ifglshaschildren{<label>}{<>true part>}{<>false part>}
```

```

977 \newcommand{\ifglshaschildren}[3]{%
978   \glsdoifexists{#1}%
979   {%
980     \def\do@glshaschildren{#3}%
981     \expandafter\forglstryentries\expandafter[\csname glo@#1@type\endcsname]
982     {\glo@label}%
983     {%
984       \letcs\glo@parent{glo@\glo@label @parent}%
985       \ifthenelse{\equal{#1}{\glo@parent}}{%
986         {%
987           \def\do@glshaschildren{#2}%
988           \@endfortrue
989         }%
990         {}%
991       }%
992       \do@glshaschildren
993     }%
994 }

```

```
\ifglshasparent \ifglshaschildren{<label>}{<>true part>}{<>false part>}
```

```

995 \newcommand{\ifglshasparent}[3]{%
996   \glsdoifexists{#1}%
997   {%
998     \ifcsemt{glo@#1@parent}{#3}{#2}%
999   }%
1000 }

```

1.6 Defining new glossaries

A comma-separated list of glossary names is stored in `\@glo@types`. When a new glossary type is created, its identifying name is added to this list. This is used by commands that iterate through all glossaries (such as `\makeglossaries` and `\printglossaries`).

`\@glo@types`

```
1001 \newcommand*\@glo@types{,}
```

A new glossary type is defined using `\newglossary`. Syntax:

```
\newglossary[<log-ext>]{<name>}{<in-ext>}{<out-ext>}{<title>}[<counter>]
```

where *<log-ext>* is the extension of the makeindex transcript file, *<in-ext>* is the extension of the glossary input file (read in by `\printglossary` and created by `makeindex`), *<out-ext>* is the extension of the glossary output file which is read in by `makeindex` (lines are written to this file by the `\glossary` command), *<title>* is the title of the glossary that is used in `\glossarysection` and *<counter>* is the default counter to be used by entries belonging to this glossary. The `makeglossaries` Perl script reads in the relevant extensions from the auxiliary file, and passes the appropriate file names and switches to `makeindex`.

`\newglossary`

```
1002 \newcommand*\newglossary}[5][glg]{%
```

```
1003 \ifglossaryexists{#2}{%
```

```
1004 \PackageError{glossaries}{Glossary type ‘#2’ already exists}{%
```

```
1005 You can’t define a new glossary called ‘#2’ because it already
```

```
1006 exists}%
```

```
1007 }{%
```

Check if default has been set

```
1008 \ifx\glsdefaulttype\relax
```

```
1009 \gdef\glsdefaulttype{#2}%
```

```
1010 \fi
```

Add this to the list of glossary types:

```
1011 \toks@{#2}\edef\@glo@types{\@glo@types\the\toks@,}%
```

Define a comma-separated list of labels for this glossary type, so that all the entries for this glossary can be reset with a single command. When a new entry is created, its label is added to this list.

```
1012 \expandafter\gdef\csname glolist@#2\endcsname{,}%
```

Store details of this new glossary type:

```
1013 \expandafter\def\csname @glo@type@#2@in\endcsname{#3}%
```

```
1014 \expandafter\def\csname @glo@type@#2@out\endcsname{#4}%
```

```
1015 \expandafter\def\csname @glo@type@#2@title\endcsname{#5}%
```

```
1016 \protected@write\@auxout{}{\string\@newglossary{#2}{#1}{#3}{#4}}%
```

How to display this entry in the document text (uses `\glsdisplay` and `\glsdisplayfirst` by default). These can be redefined by the user later if required (see `\defglsdisplay` and `\defglsdisplayfirst`). These may already have been defined if this has been specified as a list of acronyms.

```
1017 \ifcsundef{gls@#2@display}%
```

```
1018 {%
```

```
1019 \expandafter\gdef\csname gls@#2@display\endcsname{\glsdisplay}%
```

```

1020 }%
1021 {}%
1022 \ifcsundef{gls@#2@displayfirst}%
1023 {%
1024   \expandafter\gdef\csname gls@#2@displayfirst\endcsname{%
1025     \glsdisplayfirst
1026   }%
1027 }%
1028 {}%

```

Define sort counter if required:

```
1029 \@gls@defsortcount{#2}%
```

Find out if the final optional argument has been specified, and use it to set the counter associated with this glossary. (Uses `\glscounter` if no optional argument is present.)

```

1030 \@ifnextchar[{\@gls@setcounter{#2}}%
1031   {\@gls@setcounter{#2}[\glscounter]}}%
1032 }

```

`\altnewglossary`

```

1033 \newcommand*\altnewglossary}[3]{%
1034   \newglossary[#2-glg]{#1}{#2-gls}{#2-glo}{#3}%
1035 }

```

Only define new glossaries in the preamble:

```
1036 \@onlypreamble{\newglossary}
```

Only define new glossaries before `\makeglossaries`

```
1037 \@onlypremakeg\newglossary
```

`\@newglossary` is used to specify the file extensions for the `makeindex` input, output and transcript files. It is written to the auxiliary file by `\newglossary`. Since it is not used by \LaTeX , `\@newglossary` simply ignores its arguments.

`\@newglossary`

```
1038 \newcommand*\@newglossary}[4]{}
```

Store counter to be used for given glossary type (the first argument is the glossary label, the second argument is the name of the counter):

`\@gls@setcounter`

```

1039 \def\@gls@setcounter#1[#2]{%
1040   \expandafter\def\csname @gls@#1@counter\endcsname{#2}%

```

Add counter to xindy list, if not already added:

```

1041   \ifglsxindy
1042     \GlsAddXdyCounters{#2}%
1043   \fi
1044 }

```

Get counter associated with given glossary (the argument is the glossary label):

`\@gls@getcounter`

```
1045 \newcommand*{\@gls@getcounter}[1]{%
1046 \csname @glo@type@#1@counter\endcsname}
```

Define the main glossary. This will be the first glossary to be displayed when using `\printglossaries`.

```
1047 \glsdefmain
```

1.7 Defining new entries

New glossary entries are defined using `\newglossaryentry`. This command requires a label and a key-value list that defines the relevant information for that entry. The definition for these keys follows. Note that the name, description and symbol keys will be sanitized later, depending on the value of the package option `sanitize` (this means that if some of the keys haven't been defined, they can be constructed from the name and description key before they are sanitized).

name The name key indicates the name of the term being defined. This is how the term will appear in the glossary. The name key is required when defining a new glossary entry.

```
1048 \define@key{glossentry}{name}{%
1049 \def\@glo@name{#1}%
1050 }
```

description The description key is usually only used in the glossary, but can be made to appear in the text by redefining `\glsdisplay` and `\glsdisplayfirst` (or using `\defglsdisplay` and `\defglsdisplayfirst`), however, you will have to disable the `sanitize` option (using the `sanitize` package option, `sanitize={description=false}`, and protect fragile commands). The description key is required when defining a new glossary entry. (Be careful not to make the description too long, because `makeindex` has a limited buffer. `\@glo@desc` is defined to be a short command to discourage lengthy descriptions for this reason. If you do have a very long description, or if you require paragraph breaks, define a separate command that contains the description, and use it as the value to the description key.)

```
1051 \define@key{glossentry}{description}{%
1052 \def\@glo@desc{#1}%
1053 }
```

descriptionplural

```
1054 \define@key{glossentry}{descriptionplural}{%
1055 \def\@glo@descplural{#1}%
1056 }
```

sort The sort key needs to be sanitized here (the sort key is provided for `makeindex`'s benefit, not for use in the document). The sort key is optional when defining a new glossary entry. If omitted, the value is given by $\langle name \rangle \langle description \rangle$.

```
1057 \define@key{glossentry}{sort}{%
1058 \def\@glo@sort{#1}}
```

text The text key determines how the term should appear when used in the document (i.e. outside of the glossary). If omitted, the value of the name key is used instead.

```
1059 \define@key{glossentry}{text}{%
1060 \def\@glo@text{#1}%
1061 }
```

plural The plural key determines how the plural form of the term should be displayed in the document. If omitted, the plural is constructed by appending `\glspluralsuffix` to the value of the text key.

```
1062 \define@key{glossentry}{plural}{%
1063 \def\@glo@plural{#1}%
1064 }
```

first The first key determines how the entry should be displayed in the document when it is first used. If omitted, it is taken to be the same as the value of the text key.

```
1065 \define@key{glossentry}{first}{%
1066 \def\@glo@first{#1}%
1067 }
```

firstplural The firstplural key is used to set the plural form for first use, in the event that the plural is required the first time the term is used. If omitted, it is constructed by appending `\glspluralsuffix` to the value of the first key.

```
1068 \define@key{glossentry}{firstplural}{%
1069 \def\@glo@firstplural{#1}%
1070 }
```

symbol The symbol key is ignored by most of the predefined glossary styles, and defaults to `\relax` if omitted. It is provided for glossary styles that require an associated symbol, as well as a name and description. To make this value appear in the glossary, you need to redefine `\glossaryentryfield` so that it uses its fourth parameter. If you want this value to appear in the text when the term is used by commands like `\gls`, you will need to change `\glsdisplay` and `\glsdisplayfirst` (either explicitly for all glossaries or via `\defglsdisplay` and `\defglsdisplayfirst` for individual glossaries).

```
1071 \define@key{glossentry}{symbol}{%
1072 \def\@glo@symbol{#1}%
1073 }
```

symbolplural

```
1074 \define@key{glossentry}{symbolplural}{%
1075 \def\@glo@symbolplural{#1}%
1076 }
```

type The type key specifies to which glossary this entry belongs. If omitted, the default glossary is used.

```
1077 \define@key{glossentry}{type}{%
1078 \def\@glo@type{#1}}
```

counter The counter key specifies the name of the counter associated with this glossary entry:

```
1079 \define@key{glossentry}{counter}{%
1080 \ifcsundef{c@#1}%
1081 {%
1082 \PackageError{glossaries}%
1083 {There is no counter called ‘#1’}%
1084 {%
1085 The counter key should have the name of a valid counter
1086 as its value%
1087 }%
1088 }%
1089 {%
1090 \def\@glo@counter{#1}%
1091 }%
1092 }
```

see The see key specifies a list of cross-references

```
1093 \define@key{glossentry}{see}{%
1094 \def\@glo@see{#1}%
1095 \@glo@seeautonumberlist
1096 }
```

parent The parent key specifies the parent entry, if required.

```
1097 \define@key{glossentry}{parent}{%
1098 \def\@glo@parent{#1}}
```

nonumberlist The nonumberlist key suppresses or activates the number list for the given entry.

```
1099 \define@choicekey{glossentry}{nonumberlist}[\val\nr]{true,false}[true]{%
1100 \ifcase\nr\relax
1101 \def\@glo@prefix{\glsnonextpages}%
1102 \else
1103 \def\@glo@prefix{\glsnextpages}%
1104 \fi
1105 }
```

Define some generic user keys. (6 ought to be enough!)

user1

```
1106 \define@key{glossentry}{user1}{%  
1107   \def\@glo@useri{#1}%  
1108 }
```

user2

```
1109 \define@key{glossentry}{user2}{%  
1110   \def\@glo@userii{#1}%  
1111 }
```

user3

```
1112 \define@key{glossentry}{user3}{%  
1113   \def\@glo@useriii{#1}%  
1114 }
```

user4

```
1115 \define@key{glossentry}{user4}{%  
1116   \def\@glo@useriv{#1}%  
1117 }
```

user5

```
1118 \define@key{glossentry}{user5}{%  
1119   \def\@glo@userv{#1}%

```

1.8 Resetting and unsetting entry flags

Each glossary entry is assigned a conditional of the form `\ifglo@<label>@flag` which determines whether or not the entry has been used (see also `\ifglsused` defined below). These flags can be set and unset using the following macros:

The command `\glsreset{<label>}` can be used to set the entry flag to indicate that it hasn't been used yet. The required argument is the entry label.

`\glsreset`

```
1410 \newcommand*\glsreset}[1]{%
1411 \glsdoifexists{#1}{%
1412 \expandafter\global\csname glo@#1@flagfalse\endcsname}}
```

As above, but with only a local effect:

`\glslocalreset`

```
1413 \newcommand*\glslocalreset}[1]{%
1414 \glsdoifexists{#1}{%
1415 \expandafter\let\csname ifglo@#1@flag\endcsname\iffalse}}
```

The command `\glsunset{<label>}` can be used to set the entry flag to indicate that it has been used. The required argument is the entry label.

`\glsunset`

```
1416 \newcommand*\glsunset}[1]{%
1417 \glsdoifexists{#1}{%
1418 \expandafter\global\csname glo@#1@flagtrue\endcsname}}
```

As above, but with only a local effect:

`\glslocalunset`

```
1419 \newcommand*\glslocalunset}[1]{%
1420 \glsdoifexists{#1}{%
1421 \expandafter\let\csname ifglo@#1@flag\endcsname\iftrue}}
```

Reset all entries for the named glossaries (supplied in a comma-separated list).
Syntax: `\glsresetall[<glossary-list>]`

`\glsresetall`

```
1422 \newcommand*{\glsresetall}[1][\@glo@types]{%
1423 \forallglsentries[#1]{\@glsentry}{%
1424 \glsreset{\@glsentry}}}
```

As above, but with only a local effect:

`\glslocalresetall`

```
1425 \newcommand*{\glslocalresetall}[1][\@glo@types]{%
1426 \forallglsentries[#1]{\@glsentry}{%
1427 \glslocalreset{\@glsentry}}}
```

Unset all entries for the named glossaries (supplied in a comma-separated list).

Syntax: `\glsunsetall` [*glossary-list*]

`\glsunsetall`

```
1428 \newcommand*{\glsunsetall}[1][\@glo@types]{%
1429 \forallglsentries[#1]{\@glsentry}{%
1430 \glsunset{\@glsentry}}}
```

As above, but with only a local effect:

`\glslocalunsetall`

```
1431 \newcommand*{\glslocalunsetall}[1][\@glo@types]{%
1432 \forallglsentries[#1]{\@glsentry}{%
1433 \glslocalunset{\@glsentry}}}
```

1.9 Loading files containing glossary entries

Glossary entries can be defined in an external file. These external files can contain `\newglossaryentry` and `\newacronym` commands.¹

`\loadglsentries` [*type*] {*filename*}

This command will input the file using `\input`. The optional argument specifies to which glossary the entries should be assigned if they haven't used the type key. If the optional argument is not specified, the default glossary is used. Only those entries used in the document (via `\glslink`, `\gls`, `\glspl` and uppercase variants or `\glsadd` and `\glsaddall` will appear in the glossary). The mandatory argument is the filename (with or without `.tex` extension).

`\loadglsentries`

```
1434 \newcommand*{\loadglsentries}[2][\@gls@default]{%
1435 \let\@gls@default\glsdefaulttype
1436 \def\glsdefaulttype{#1}\input{#2}%
1437 \let\glsdefaulttype\@gls@default}
```

`\loadglsentries` can only be used in the preamble:

```
1438 \@onlypreamble{\loadglsentries}
```

¹and any other valid \LaTeX code that can be used in the preamble.

1.10 Using glossary entries in the text

Any term that has been defined using `\newglossaryentry` (or `\newacronym`) can be displayed in the text (i.e. outside of the glossary) using one of the commands defined in this section. Unless you use `\glslink`, the way the term appears in the text is determined by `\glsdisplayfirst` (if it is the first time the term has been used) or `\glsdisplay` (for subsequent use). Any formatting commands (such as `\textbf`) is governed by `\glstextformat`. By default this just displays the link text “as is”.

`\glstextformat`

```
1439 \newcommand*{\glstextformat}[1]{#1}
```

The first time an entry is used, the way in which it is displayed is governed by `\glsdisplayfirst`. This takes four parameters: #1 will be the value of the entry’s first or firstplural key, #2 will be the value of the entry’s description key, #3 will be the value of the entry’s symbol key and #4 is additional text supplied by the final optional argument to commands like `\gls` and `\glspl`. The default is to display the first parameter followed by the additional text.

`\glsdisplayfirst`

```
1440 \newcommand*{\glsdisplayfirst}[4]{#1#4}
```

After the first use, the entry is displayed according to the format of `\glsdisplay`. Again, it takes four parameters: #1 will be the value of the entry’s text or plural key, #2 will be the value of the entry’s description key, #3 will be the value of the entry’s symbol key and #4 is additional text supplied by the final optional argument to commands like `\gls` and `\glspl`.

`\glsdisplay`

```
1441 \newcommand*{\glsdisplay}[4]{#1#4}
```

When a new glossary is created it uses `\glsdisplayfirst` and `\glsdisplay` as the default way of displaying its entry in the text. This can be changed for the entries belonging to an individual glossary using `\defglsdisplay` and `\defglsdisplayfirst`.

```
\defglsdisplay[<type>]{<definition>}
```

The glossary type is given by *<type>* (the default glossary if omitted) and *<definition>* should have at most #1, #2, #3 and #4. These represent the same arguments as those described for `\glsdisplay`.

`\defglsdisplay`

```
1442 \newcommand*{\defglsdisplay}[2][\glsdefaulttype]{%
```

```
1443 \expandafter\def\csname gls@#1@display\endcsname##1##2##3##4{#2}}
```

```
\defglsdisplayfirst[⟨type⟩]{⟨definition⟩}
```

The glossary type is given by *⟨type⟩* (the default glossary if omitted) and *⟨definition⟩* should have at most #1, #2, #3 and #4. These represent the same arguments as those described for `\glsdisplayfirst`.

```
\defglsdisplayfirst
```

```
1444 \newcommand*{\defglsdisplayfirst}[2][\glsdefaultttype]{%
1445 \expandafter\def\csname gls@#1@displayfirst\endcsname##1##2##3##4{#2}}
```

1.10.1 Links to glossary entries

The links to glossary entries all have a first optional argument that can be used to change the format and counter of the associated entry number. Except for `\glslink`, the commands like `\gls` have a final optional argument that can be used to insert additional text in the link (this will usually be appended, but can be redefined using `\defglsdisplay` and `\defglsdisplayfirst`). It goes against the L^AT_EX norm to have an optional argument after the mandatory arguments, but it makes more sense to write, say, `\gls{label}[’s]` rather than, say, `\gls[append=’s]{label}`. Since these control sequences are defined to include the final square bracket, spaces will be ignored after them. This is likely to lead to confusion as most users would not expect, say, `\gls{⟨label⟩}` to ignore following spaces, so `\new@ifnextchar` from the package is required.

The following keys can be used in the first optional argument. The counter key checks that the value is the name of a valid counter.

```
1446 \define@key{glslink}{counter}{%
1447   \ifcsundef{c@#1}%
1448   {%
1449     \PackageError{glossaries}%
1450     {There is no counter called ‘#1’}%
1451     {%
1452       The counter key should have the name of a valid counter
1453       as its value%
1454     }%
1455   }%
1456   {%
1457     \def\@gls@counter{#1}%
1458   }%
1459 }
```

The value of the format key should be the name of a command (without the initial backslash) that has a single mandatory argument which can be used to format the associated entry number.

```
1460 \define@key{glslink}{format}{%
1461 \def\@glsnumberformat{#1}}
```

The hyper key is a boolean key, it can either have the value true or false, and indicates whether or not to make a hyperlink to the relevant glossary entry. If

hyper is false, an entry will still be made in the glossary, but the given text won't be a hyperlink.

```
1462 \define@boolkey{glslink}{hyper}[true]{}
```

The local key is a boolean key. If true this indicates that commands such as `\gls` should only do a local reset rather than a global one.

```
1463 \define@boolkey{glslink}{local}[true]{}
```

Syntax:

```
\glslink[<options>]{<label>}{<text>}
```

Display *<text>* in the document, and add the entry information for *<label>* into the relevant glossary. The optional argument should be a key value list using the `glslink` keys defined above.

There is also a starred version:

```
\glslink*[<options>]{<label>}{<text>}
```

which is equivalent to `\glslink[hyper=false, <options>]{<label>}{<text>}`

First determine whether or not we are using the starred version:

```
\glslink
```

```
1464 \newrobustcmd*{\glslink}{%
```

```
1465 \@ifstar\@sgls@link\@gls@@link}
```

```
\@sgls@link The starred version of \glslink calls the unstarred version with hyperlinks disabled.
```

```
1466 \newcommand*{\@sgls@link}[1][\@gls@@link[hyper=false,#1]]
```

```
\@gls@@link The unstarred version of \glslink checks for the existence of the term. The main part of the business is in \@gls@link which shouldn't check if the term is defined as it's called by \gls etc which also perform that check.
```

```
1467 \newcommand*{\@gls@@link}[3][\@gls@link]
```

```
1468 \ifglsentryexists{#2}%
```

```
1469 {%
```

```
1470 \@gls@link[#1]{#2}{#3}%
```

```
1471 }%
```

```
1472 \PackageError{glossaries}{Glossary entry '#2' has not been
```

```
1473 defined}{You need to define a glossary entry before you
```

```
1474 can use it.}%
```

Display the specified text. (The entry doesn't exist so there's nothing to link it to.)

```
1475 \glstextformat{#3}%
```

```
1476 }%
```

```
1477 }
```

```
\@gls@link
```

```
1478 \def\@gls@link[#1]#2#3{%
```

```

1479 \leavevmode
1480 \def\glslabel{#2}%
1481 \def\@glsnumberformat{glsnumberformat}%
1482 \edef\@gls@counter{\csname glo@#2@counter\endcsname}%

```

If this is in one of the “nohypertypes” glossaries, suppress the hyperlink by default

```

1483 \expandafter\xifinlist\expandafter
1484   {\csname glo@#2@type\endcsname}{\@gls@nohyperlist}%
1485   {%
1486     \KV@glslink@hyperfalse
1487   }%
1488   {%
1489     \KV@glslink@hypertrue
1490   }%
1491 \setkeys{glslink}{#1}%

```

Store the entry’s counter in `\theglentrycounter`

```

1492 \@gls@saveentrycounter

```

Define sort key if necessary:

```

1493 \@gls@setsort{#2}%
1494 \@do@wrglossary{#2}%
1495 \ifKV@glslink@hyper
1496   \@glslink{\glo@linkprefix#2}{\gls@textformat{#3}}%
1497 \else
1498   \gls@textformat{#3}\relax
1499 \fi
1500 }

```

`\glo@linkprefix`

```

1501 \newcommand*{\glo@linkprefix}{glo:}

```

`\glsentrycounter` Set default value of entry counter

```

1502 \def\glsentrycounter{glscounter}%

```

`\@gls@saveentrycounter` Need to check if using equation counter in align environment:

```

1503 \newcommand*{\@gls@saveentrycounter}{%
1504   \def\@gls@Hcounter{}%
1505   \ifthenelse{\equal{\@gls@counter}{equation}}{%
1506     {

```

If we in align environment, `\xatlevel@` will be defined. (Can’t test for `\@currentenv` as may be inside an inner environment.)

```

1507   \ifcsundef{xatlevel@}%

```

```

1508   {%
1509     \edef\theglentrycounter{\expandafter\noexpand

1872 \gdef@glslink#1#2{\hyperlink{#1}{#2}}%
1873 }

```

`\glsstarget` If `\hypertarget` is not defined, `\glsstarget` ignores its first argument and just does the second argument, otherwise it is equivalent to `\hypertarget`.

```

1874 \newlength@gls@tmplen
1875 \ifcsundef{hypertarget}%
1876 {%
1877 \gdef@glsstarget#1#2{#2}%
1878 }%
1879 {%
1880 \gdef@glsstarget#1#2{%
1881 \settoheight@gls@tmplen{#2}%
1882 \raisebox@gls@tmplen{\hypertarget{#1}{}}#2%
1883 }%
1884 }

```

Glossary hyperlinks can be disabled using `\glsdisablehyper` (effect can be localised):

`\glsdisablehyper`

```
1885 \newcommand{\glsdisablehyper}{%
1886 \renewcommand*\@glslink[2]{##2}%
1887 \renewcommand*\@glsstarget[2]{##2}}
```

Glossary hyperlinks can be enabled using `\glsenablehyper` (effect can be localised):

`\glsenablehyper`

```
1888 \newcommand{\glsenablehyper}{%
1889 \renewcommand*\@glslink[2]{\hyperlink{##1}{##2}}%
1890 \renewcommand*\@glsstarget[2]{%
1891   \settoheight{\gls@tmplen}{##2}%
1892   \raisebox{\gls@tmplen}{\hypertarget{##1}{}}##2}}
```

Syntax:

`\gls [options] {label} [insert text]`

Link to glossary entry using singular form. The link text is taken from the value of the text or first keys used when the entry was defined.

The first optional argument is a key-value list, the same as `\glslink`, the mandatory argument is the entry label. After the mandatory argument, there is another optional argument to insert extra text in the link text (the location of the inserted text is governed by `\glsdisplay` and `\glsdisplayfirst`). As with `\glslink` there is a starred version which is the same as the unstarred version but with the `hyper` key set to `false`. (Additional options can also be specified in the first optional argument.)

First determine if we are using the starred form:

`\gls`

```
1893 \newrobustcmd*{\gls}{\@ifstar\@sgls\@gls}
```

Define the starred form:

`\@sgls`

```
1894 \newcommand*\@sgls[1] [] {\@gls[hyper=false,#1]}
```

Defined the un-starred form. Need to determine if there is a final optional argument

`\@gls`

```
1895 \newcommand*\@gls[2] [] {%
1896   \new@ifnextchar[{\@gls@#1}{#2}]{\@gls@#1}{#2} []}%
1897 }
```

`\@gls@` Read in the final optional argument:

```
1898 \def\@gls@#1#2[#3]{%
1899   \glsdoifexists{#2}%
1900   {%
1901     \edef\@glo@type{\glsentrytype{#2}}%
1902     \def\@gls@link@opts{#1}%
1903     \def\@gls@link@label{#2}%
1904     \ifglsused{#2}%
1905     {%
1906       \def\@glo@text{%
1907         \csname gls@\@glo@type @display\endcsname
1908         {\glsentrytext{#2}}{\glsentrydesc{#2}}{\glsentrysymbol{#2}}{#3}}%
1909     }%
1910     {%
1911       \def\@glo@text{%
1912         \csname gls@\@glo@type @displayfirst\endcsname
1913         {\glsentryfirst{#2}}{\glsentrydesc{#2}}{\glsentrysymbol{#2}}{#3}}%
1914     }%

```

Call `\@gls@link`. If footnote package option has been used and the glossary type is `\acronymtype`, suppress hyperlink for first use. Likewise if the `hyperfirst=false` package option is used.

```
1915   \ifglsused{#2}%
1916   {%
1917     \@gls@link[#1]{#2}{\@glo@text}%
1918   }%

`\glsdisp` `\glsdisp[(options)]{(label)}{(text)}` This is like `\gls` except that the link text is provided. This differs from `\glslink` in that it uses `\glsdisplay` or `\glsdisplayfirst` and unsets the first use flag.

First determine if we are using the starred form:

```

2192 \newrobustcmd*{\glsdisp}{\@ifstar\@sglsdisp\@glsdisp}

```

Define the starred form:

```

\@sgls
2193 \newcommand*{\@sglsdisp}[1] [] {\@glsdisp[hyper=false,#1]}

```

Defined the un-starred form.

`\@glsdisp`

```

2194 \newcommand*{\@glsdisp}[3] [] {%
2195   \glsdoifexists{#2}{%

```

```

2196     \edef\@glo@type{\glsentrytype{#2}}%

```

Save options in `\@gls@link@opts` and label in `\@gls@link@label`

```

2197     \def\@gls@link@opts{#1}%
2198     \def\@gls@link@label{#2}%

```

Determine what the link text should be (this is stored in `\@glo@text`)

```

2199     \ifglsused{#2}%
2200     {%
2201     \def\@glo@text{%
2202       \csname gls@\@glo@type @display\endcsname
2203       {#3}{\glsentrydesc{#2}}{\glsentrysymbol{#2}}{}}%
2204     }%
2205     {%

Call \@gls@link

```
2673 \@gls@link[#1]{#2}{\@glo@text#3}}%
2674 }%
2675 }
```

\Glsuservi behaves like \glsuservi except that the first letter is converted to uppercase.

\Glsuservi

```
2676 \newrobustcmd*{\Glsuservi}{\@ifstar\@sGlsuservi\@Glsuservi}
```

Define the starred form:

```
2677 \newcommand*{\@sGlsuservi}[1] [] {\@Glsuservi [hyper=false,#1]}
```

Defined the un-starred form. Need to determine if there is a final optional argument

```
2678 \newcommand*{\@Glsuservi}[2] [] {%
2679 \new@ifnextchar [{\@Glsuservi@{#1}{#2}}{\@Glsuservi@{#1}{#2} []}]}
```

Read in the final optional argument:

```
2680 \def\@Glsuservi@#1#2[#3] {%
2681 \glsdoifexists{#2}{\edef\@glo@type{\glsentrytype{#2}}%
```

Determine what the link text should be (this is stored in \@glo@text)

```
2682 \protected@edef\@glo@text{\glsentryuservi{#2}}%
```

Call \@gls@link

```
2683 \@gls@link[#1]{#2}{%
2684 \expandafter\makefirstuc\expandafter{\@glo@text}#3}%
2685 }%
2686 }
```

\GLSuservi behaves like \glsuservi except that the link text is converted to uppercase.

\GLSuservi

```
2687 \newrobustcmd*{\GLSuservi}{\@ifstar\@sGLSuservi\@GLSuservi}
```

Define the starred form:

```
2688 \newcommand*{\@sGLSuservi}[1] [] {\@GLSuservi[hyper=false,#1]}
```

Defined the un-starred form. Need to determine if there is a final optional argument

```
2689 \newcommand*{\@GLSuservi}[2] [] {%
2690 \new@ifnextchar [{\@GLSuservi@{#1}{#2}}{\@GLSuservi@{#1}{#2} []}]}
```

Read in the final optional argument:

```
2691 \def\@GLSuservi@#1#2[#3] {%
2692 \glsdoifexists{#2}{\edef\@glo@type{\glsentrytype{#2}}%
```

Determine what the link text should be (this is stored in \@glo@text)

```
2693 \protected@edef\@glo@text{\glsentryuservi{#2}}%
```

Call \@gls@link

```
2694 \@gls@link[#1]{#2}{\MakeUppercase{\@glo@text#3}}%
2695 }%
2696 }
```

Now deal with acronym related keys. First the short form:

\acrshort

```
2697 \newrobustcmd*{\acrshort}{\@ifstar\s@acrshort\ns@acrshort}
```

Define the starred form:

```
2698 \newcommand*{\s@acrshort}[2] [] {%
2699 \new@ifnextchar [{\@acrshort{hyper=false,#1}{#2}}%
2700 \@acrshort{hyper=false,#1}{#2} []}]%
2701 }
```

Defined the un-starred form. Need to determine if there is a final optional argument

```
2702 \newcommand*\ns@acrshort}[2] [] {%
2703   \new@ifnextchar[{\@acrshort{#1}{#2}}{\@acrshort{#1}{#2} []}]%
2704 }
```

Read in the final optional argument:

```
2705 \def\@acrshort#1#2[#3] {%
2706   \glsdoifexists{#2}%
2707   {%
2708     \edef\@glo@type{\glsentrytype{#2}}%
```

Determine what the link text should be (this is stored in \@glo@text)

```
2709   \protected@edef\@glo@text{\glsentryshort{#2}}%
```

Call \@gls@link

```
2710   \@gls@link[#1]{#2}{\acronymfont{\@glo@text}#3}%
2711   }%
2712 }
```

\Acrshort

```
2713 \newrobustcmd*\Acrshort{\@ifstar\s@Acrshort\ns@Acrshort}
```

Define the starred form:

```
2714 \newcommand*\s@Acrshort}[2] [] {%
2715   \new@ifnextchar[{\@Acrshort{hyper=false,#1}{#2}}%
2716   {\@Acrshort{hyper=false,#1}{#2} []}]%
2717 }
```

Defined the un-starred form. Need to determine if there is a final optional argument

```
2718 \newcommand*\ns@Acrshort}[2] [] {%
2719   \new@ifnextchar[{\@Acrshort{#1}{#2}}{\@Acrshort{#1}{#2} []}]%
2720 }
```

Read in the final optional argument:

```
2721 \def\@Acrshort#1#2[#3] {%
2722   \glsdoifexists{#2}%
2723   {%
2724     \edef\@glo@type{\glsentrytype{#2}}%
```

Determine what the link text should be (this is stored in \@glo@text)

```
2725   \protected@edef\@glo@text{\glsentryshort{#2}}%
```

Call \@gls@link

```
2726   \@gls@link[#1]{#2}%
2727   {%
2728     \acronymfont{\expandafter\makefirstuc\expandafter{\@glo@text}}#3%
2729   }%
2730   }%
2731 }
```

\ACRshort

```
2732 \newrobustcmd*{\ACRshort}{\@ifstar\s@ACRshort\@ns@ACRshort}
```

Define the starred form:

```
2733 \newcommand*{\s@ACRshort}[2] [] {%
2734   \new@ifnextchar[{\@ACRshort{hyper=false,#1}{#2}}%
2735     {\@ACRshort{hyper=false,#1}{#2} []}%
2736 }
```

Defined the un-starred form. Need to determine if there is a final optional argument

```
2737 \newcommand*{\ns@ACRshort}[2] [] {%
2738   \new@ifnextchar[{\@ACRshort{#1}{#2}}{\@ACRshort{#1}{#2} []}%
2739 }
```

Read in the final optional argument:

```
2740 \def\@ACRshort#1#2[#3] {%
2741   \glsdoifexists{#2}%
2742   {%
2743     \edef\@glo@type{\glsentrytype{#2}}%
```

Determine what the link text should be (this is stored in \@glo@text)

```
2744   \protected@edef\@glo@text{\glsentryshort{#2}}%
```

Call \@gls@link

```
2745   \@gls@link[#1]{#2}{\acronymfont{\MakeUppercase{\@glo@text#3}}}%
2746   }%
2747 }
```

Short plural:

\acrshortpl

```
2748 \newrobustcmd*{\acrshortpl}{\@ifstar\s@acrshortpl\@ns@acrshortpl}
```

Define the starred form:

```
2749 \newcommand*{\s@acrshortpl}[2] [] {%
2750   \new@ifnextchar[{\@acrshortpl{hyper=false,#1}{#2}}%
2751     {\@acrshortpl{hyper=false,#1}{#2} []}%
2752 }
```

Defined the un-starred form. Need to determine if there is a final optional argument

```
2753 \newcommand*{\ns@acrshortpl}[2] [] {%
2754   \new@ifnextchar[{\@acrshortpl{#1}{#2}}{\@acrshortpl{#1}{#2} []}%
2755 }
```

Read in the final optional argument:

```
2756 \def\@acrshortpl#1#2[#3] {%
2757   \glsdoifexists{#2}%
2758   {%
2759     \edef\@glo@type{\glsentrytype{#2}}%
```

Determine what the link text should be (this is stored in \@glo@text)

```

2760   \protected@edef\@glo@text{\glentryshortpl{#2}}%
      Call \@gls@link

2899   }%
2900 }
```

1.10.2 Displaying entry details without adding information to the glossary

These commands merely display entry information without adding entries in the associated file or having hyperlinks.

Get the entry name (as specified by the name key when the entry was defined). The argument is the label associated with the entry. Note that unless you used `name=false` in the `sanitize` package option you may get unexpected results if the name key contains any commands.

`\glentryname`

```
2901 \newcommand*{\glentryname}[1]{\csname glo@#1@name\endcsname}
```

`\Glentryname`

```
2902 \newcommand*{\Glentryname}[1]{%
2903 \protected@edef\@glo@text{\csname glo@#1@name\endcsname}%
2904 \expandafter\makefirstuc\expandafter{\@glo@text}}
```

Get the entry description (as specified by the description when the entry was defined). The argument is the label associated with the entry. Note that unless you used `description=false` in the `sanitize` package option you may get unexpected results if the description key contained any commands.

`\glentrydesc`

```
2905 \newcommand*{\glentrydesc}[1]{\csname glo@#1@desc\endcsname}
```

`\Glentrydesc`

```
2906 \newcommand*{\Glentrydesc}[1]{%
2907 \protected@edef\@glo@text{\csname glo@#1@desc\endcsname}%
2908 \expandafter\makefirstuc\expandafter{\@glo@text}}
```

Plural form:

`\glentrydescplural`

```
2909 \newcommand*{\glentrydescplural}[1]{%
2910 \csname glo@#1@descplural\endcsname}
```

`\Glentrydescplural`

```
2911 \newcommand*{\Glentrydescplural}[1]{%
2912 \protected@edef\@glo@text{\csname glo@#1@descplural\endcsname}%
2913 \expandafter\makefirstuc\expandafter{\@glo@text}}
```

Get the entry text, as specified by the text key when the entry was defined. The argument is the label associated with the entry:

`\glentrytext`

```
2914 \newcommand*{\glentrytext}[1]{\csname glo@#1@text\endcsname}
```

`\Glentrytext`

```
2915 \newcommand*{\Glentrytext}[1]{%
2916 \protected@edef\@glo@text{\csname glo@#1@text\endcsname}%
2917 \expandafter\makefirstuc\expandafter{\@glo@text}}
```

Get the plural form:

`\glsentryplural`

```
2918 \newcommand*{\glsentryplural}[1]{\csname glo@#1@plural\endcsname}
```

`\Glsentryplural`

```
2919 \newcommand*{\Glsentryplural}[1]{%
2920 \protected@edef\@glo@text{\csname glo@#1@plural\endcsname}%
2921 \expandafter\makefirstuc\expandafter{\@glo@text}}
```

Get the symbol associated with this entry. The argument is the label associated with the entry. Note that unless you used `symbol=false` in the `sanitize` package option you may get unexpected results if the symbol key contained any commands.

`\glsentrysymbol`

```
2922 \newcommand*{\glsentrysymbol}[1]{\csname glo@#1@symbol\endcsname}
```

`\Glsentrysymbol`

```
2923 \newcommand*{\Glsentrysymbol}[1]{%
2924 \protected@edef\@glo@text{\csname glo@#1@symbol\endcsname}%
2925 \expandafter\makefirstuc\expandafter{\@glo@text}}
```

Plural form:

`lsentrysymbolplural`

```
2926 \newcommand*{\glsentrysymbolplural}[1]{%
2927 \csname glo@#1@symbolplural\endcsname}
```

`\Glsentrysymbolplural`

```
2928 \newcommand*{\Glsentrysymbolplural}[1]{%
2929 \protected@edef\@glo@text{\csname glo@#1@symbolplural\endcsname}%
2930 \expandafter\makefirstuc\expandafter{\@glo@text}}
```

Get the entry text to be used when the entry is first used in the document (as specified by the `firstkey` when the entry was defined).

`\glsentryfirst`

```
2931 \newcommand*{\glsentryfirst}[1]{\csname glo@#1@first\endcsname}
```

`\Glsentryfirst`

```
2932 \newcommand*{\Glsentryfirst}[1]{%
2933 \protected@edef\@glo@text{\csname glo@#1@first\endcsname}%
2934 \expandafter\makefirstuc\expandafter{\@glo@text}}
```

Get the plural form (as specified by the `firstplural` key when the entry was defined).

`glsentryfirstplural`

```
2935 \newcommand*{\glsentryfirstplural}[1]{%
2936 \csname glo@#1@firstpl\endcsname}
```

Glsentryfirstplural

```
2937 \newcommand*{\Glsentryfirstplural}[1]{%
2938 \protected@edef\@glo@text{\csname glo@#1@firstpl\endcsname}%
2939 \expandafter\makefirststuc\expandafter{\@glo@text}}
```

Display the glossary type with which this entry is associated (as specified by the type key used when the entry was defined)

\glsentrytype

```
2940 \newcommand*{\glsentrytype}[1]{\csname glo@#1@type\endcsname}
```

Display the sort text used for this entry. Note that the sort key is sanitize, so unexpected results may occur if the sort key contained commands.

\glsentrysort

```
2941 \newcommand*{\glsentrysort}[1]{\csname glo@#1@sort\endcsname}
```

\glsentryuseri Get the first user key (as specified by the user1 when the entry was defined).
The argument is the label associated with the entry.

```
2942 \newcommand*{\glsentryuseri}[1]{\csname glo@#1@useri\endcsname}
```

\Glsentryuseri

```
2943 \newcommand*{\Glsentryuseri}[1]{%
2944 \protected@edef\@glo@text{\csname glo@#1@useri\endcsname}%
2945 \expandafter\makefirststuc\expandafter{\@glo@text}}
```

\glsentryuserii Get the second user key (as specified by the user2 when the entry was defined).
The argument is the label associated with the entry.

```
2946 \newcommand*{\glsentryuserii}[1]{\csname glo@#1@userii\endcsname}
```

\Glsentryuserii

```
2947 \newcommand*{\Glsentryuserii}[1]{%
2948 \protected@edef\@glo@text{\csname glo@#1@userii\endcsname}%
2949 \expandafter\makefirststuc\expandafter{\@glo@text}}
```

\glsentryuseriii Get the third user key (as specified by the user3 when the entry was defined).
The argument is the label associated with the entry.

```
2950 \newcommand*{\glsentryuseriii}[1]{\csname glo@#1@useriii\endcsname}
```

\Glsentryuseriii

```
2951 \newcommand*{\Glsentryuseriii}[1]{%
2952 \protected@edef\@glo@text{\csname glo@#1@useriii\endcsname}%
2953 \expandafter\makefirststuc\expandafter{\@glo@text}}
```

\glsentryuseriv Get the fourth user key (as specified by the user4 when the entry was defined).
The argument is the label associated with the entry.

```
2954 \newcommand*{\glsentryuseriv}[1]{\csname glo@#1@useriv\endcsname}
```

`\Glsentryuseriv`

```
2955 \newcommand*{\Glsentryuseriv}[1]{%

3047 \newcommand*{\glsnumlistlastsep}{ \& }
```

`\glshyperlink` Provide a hyperlink to a glossary entry without adding information to the glossary file. The entry needs to be added using a command like `\glslink` or `\glsadd` to ensure that the target is defined. The first (optional) argument specifies the link text. The entry name is used by default. The second argument is the entry label.

```
3048 \newrobustcmd*{\glshyperlink}[2][\glsentrytext{\@glo@label}]{%
3049 \def\@glo@label{#2}%
3050 \@glslink{\glo@linkprefix#2}{#1}}
```

1.11 Adding an entry to the glossary without generating text

The following keys are provided for `\glsadd` and `\glsaddall`:

```
3051 \define@key{glossadd}{counter}{\def\@gls@counter{#1}}
3052 \define@key{glossadd}{format}{\def\@glsnumberformat{#1}}
```

This key is only used by `\glsaddall`:

```
3053 \define@key{glossadd}{types}{\def\@glo@type{#1}}
```

`\glsadd[<options>]{<label>}`

Add a term to the glossary without generating any link text. The optional argument indicates which counter to use, and how to format it (using a key-value list) the second argument is the entry label. Note that *<options>* only has two keys: counter and format (the types key will be ignored).

`\glsadd`

```
3054 \newrobustcmd*{\glsadd}[2][]{%
3055 \glsdoifexists{#2}%
3056 {%
3057 \def\@glsnumberformat{glsnumberformat}%
3058 \edef\@gls@counter{\csname glo@#2@counter\endcsname}%
3059 \setkeys{glossadd}{#1}%
```

Store the entry's counter in `\theglsentrycounter`

```
3060 \@gls@saveentrycounter
3061 \@do@wrglossary{#2}%
3062 }%
3063 }
```

`\glsaddall[<option list>]`

Add all terms defined for the listed glossaries (without displaying any text). If types key is omitted, apply to all glossary types.

`\glsaddall`

```
3064 \newrobustcmd*{\glsaddall}[1][]{%
3065 \edef\@glo@type{\@glo@types}%
3066 \setkeys{glossadd}{#1}%
```

```

3067 \forallglsentries[\@glo@type]{\@glo@entry}{%
3068 \glsadd[#1]{\@glo@entry}}%
3069 }

```

1.12 Creating associated files

The `\writeist` command creates the associated customized `.ist` `makeindex` style file. While defining this command, some characters have their catcodes temporarily changed to ensure they get written to the `.ist` file correctly. The `makeindex` actual character (usually `@`) is redefined to be a `?`, to allow internal commands to be written to the glossary file output file.

The special characters are stored in `\@gls@actualchar`, `\@gls@encapchar`, `\@gls@levelchar` and `\@gls@quotechar` to make them easier to use later, but don't change these values, because the characters are encoded in the command definitions that are used to escape the special characters (which means that the user no longer needs to worry about `makeindex` special characters).

The symbols and numbers label for group headings are hardwired into the `.ist` file as `glsymbols` and `glsnumbers`, the group titles can be translated (so that `\glsymbolsgroupname` replaces `glsymbols` and `\glsnumbersgroupname` replaces `glsnumbers`) using the command `\glsgetgrouptitle` which is defined in `.`. This is done to prevent any problem characters in `\glsymbolsgroupname` and `\glsnumbersgroupname` from breaking hyperlinks.

`\glsopenbrace` Define `\glsopenbrace` to make it easier to write an opening brace to a file.

```
3070 \edef\glsopenbrace{\expandafter\@gobble\string\{}
```

`\glsclosebrace` Define `\glsclosebrace` to make it easier to write an opening brace to a file.

```
3071 \edef\glsclosebrace{\expandafter\@gobble\string\}}
```

`\glsquote` Define command that makes it easier to write quote marks to a file in the event that the double quote character has been made active.

```
3072 \edef\glsquote#1{\string"#1\string"}
```

`\@glsfirstletter` Define the first letter to come after the digits 0,...,9. Only required for `xindy`.

```
3073 \ifglsxindy
3074   \newcommand*{\@glsfirstletter}{A}
3075 \fi
```

`stLetterAfterDigits` Sets the first letter to come after the digits 0,...,9.

```
3076 \ifglsxindy
3077   \newcommand*{\GlsSetXdyFirstLetterAfterDigits}[1]{%
3078     \renewcommand*{\@glsfirstletter}{#1}}
3079 \else
3080   \newcommand*{\GlsSetXdyFirstLetterAfterDigits}[1]{%
3081     \glsnoxindywarning\GlsSetXdyFirstLetterAfterDigits}
3082 \fi
```

`\@glsminrange` Define the minimum number of successive location references to merge into a range.

```
3083 \newcommand*{\@glsminrange}{2}
```

`\GlsSetXdyMinRangeLength` Set the minimum range length. The value must either be none or a positive integer. The glossaries package doesn't check if the argument is valid, that is left to xindy.

```
3084 \ifglxindy
3085   \newcommand*{\GlsSetXdyMinRangeLength}[1]{%
3086     \renewcommand*{\@glsminrange}{#1}}
3087 \else
3088   \newcommand*{\GlsSetXdyMinRangeLength}[1]{%
3089     \glsnoxindywarning\GlsSetXdyMinRangeLength}
3090 \fi
```

`\writeist`

```
3091 \ifglxindy
```

Code to use if xindy is required.

```
3092 \def\writeist{%
```

Update attributes list

```
3093   \@gls@addpredefinedattributes
```

Open the file.

```
3094   \openout\glswrite=\istfilename

3296 \fi

```

The command `\noist` will suppress the creation of the `.ist` file. Obviously you need to use this command before `\writeist` to have any effect.

`\noist`

```

3297 \newcommand{\noist}{%
    Update attributes list
3298     \@gls@addpredefinedattributes
3299     \let\writeist\relax
3300 }

```

`\@makeglossary` is an internal command that takes an argument indicating the glossary type. This command will create the glossary file required by `makeindex` for the given glossary type, using the extension supplied by the `<out-ext>` parameter used in `\newglossary` (and it will also activate the `\glossary` command, and create the customized `.ist` `makeindex` style file).

Note that you can't use `\@makeglossary` for only some of the defined glossaries. You either need to have a `\makeglossary` for all glossaries or none (otherwise you will end up with a situation where \TeX is trying to write to a non-existent file). The relevant glossary must be defined prior to using `\@makeglossary`.

`\@makeglossary`

```
3301 \newcommand*\@makeglossary}[1]{%
3302   \ifglossaryexists{#1}%
3303   {%
```

Only create a new write if `savewrites=false` otherwise create a token to collect the information.

```
3304   \ifglssavewrites
3305     \expandafter\newtoks\csname glo@#1@filetok\endcsname
3306   \else
3307     \expandafter\newwrite\csname glo@#1@file\endcsname
3308     \expandafter\@glsopenfile\csname glo@#1@file\endcsname{#1}%
3309   \fi
3310   \@gls@renewglossary
3311   \writeist
3312 }%
3313 {%
3314   \PackageError{glossaries}%
3315   {Glossary type ‘#1’ not defined}%
3316   {New glossaries must be defined before using \string\makeglossary}%
3317 }%
3318 }
```

`\@glsopenfile` Open write file associated with the given glossary.

```
3319 \newcommand*\@glsopenfile}[2]{%
3320   \immediate\openout#1=\jobname.\csname @glotype@#2@out\endcsname

3389   }%
3390 }
3391 \else
3392   \let\glswritefiles\relax
3393 \fi

```

The `\glossary` command is redefined so that it takes an optional argument $\langle type \rangle$ to specify the glossary type (use `\glsdefaulttype` glossary by default). This shouldn't be used at user level as `\glslink` sets the correct format. The associated number should be stored in `\theglsentrycounter` before using `\glossary`.

`\glossary`

```

3394 \renewcommand*{\glossary}[1][\glsdefaulttype]{%
3395   \@glossary[#1]%
3396 }

```

Define internal `\@glossary` to ignore its argument. This gets redefined in `\@makeglossary`. This is defined to just `\index` as memoir changes the definition of `\@index`. (Thanks to Dan Luecking for pointing this out.)

`\@glossary`

```

3397 \def\@glossary[#1]{\index}

```

This is a convenience command to set `\@glossary`. It is used by `\@makeglossary` and then redefined to do nothing, as it only needs to be done once.

`\@gls@renewglossary`

```

3398 \newcommand{\@gls@renewglossary}{%
3399   \gdef\@glossary[##1]{\@bsphack\begingroup\@wrglossary{##1}}%
3400   \let\@gls@renewglossary\@empty
3401 }

```

The `\@wrglossary` command is redefined to have two arguments. The first argument is the glossary type, the second argument is the glossary entry (the format of which is set in `\glslink`).

`\@wrglossary`

```

3402 \renewcommand*{\@wrglossary}[2]{%
3403   \ifglssavewrites
3404     \protected@edef\@gls@tmp{\the\csname glo@#1@filetok\endcsname#2}%

```

3438 \newcommand*\gls@romanpage{\romannumeral\c@page}

```

\gls@Romanpage

```

3439 \newcommand*\gls@Romanpage{\@Roman\c@page}

```

\do@wrglossary Write the glossary entry in the appropriate format. (Need to set \gls@numberformat and \gls@counter prior to use.) The argument is the entry's label.

```

3440 \newcommand*\do@wrglossary}[1]{%
3441     \begingroup

```

First a bit of hackery to prevent premature expansion of \c@page. Store original definitions:

```

3442 \let\orgthe\the
3443 \let\orgnumber\number
3444 \let\orgromannumeral\romannumeral
3445 \let\orgalph\@alph
3446 \let\orgAlph\@Alph
3447 \let\orgRoman\@Roman

```

Redefine:

```

3448 \def\the##1{%
3449   \ifx##1\c@page \gls@numberpage\else\orgthe##1\fi}%
3450 \def\number##1{%
3451   \ifx##1\c@page \gls@numberpage\else\orgnumber##1\fi}%
3452 \def\romannumeral##1{%
3453   \ifx##1\c@page \gls@romanpage\else\orgromannumeral##1\fi}%
3454 \def\@Roman##1{%
3455   \ifx##1\c@page \gls@Romanpage\else\orgRoman##1\fi}%
3456 \def\@alph##1{%
3457   \ifx##1\c@page \gls@alphpage\else\orgalph##1\fi}%
3458 \def\@Alph##1{%
3459   \ifx##1\c@page \gls@Alphpage\else\orgAlph##1\fi}%

```

Prevent expansion:

```

3460 \gls@disablepagerefexpansion

```

Now store location in \@glslocref:

```

3461 \protected@xdef\@glslocref{\theglsentrycounter}%
3462 \endgroup

```

Escape any special characters

```

3463 \@gls@checkmkidxchars\@glslocref

```

Check if the hyper-location is the same as the location and set the hyper prefix.

```

Suppress warning about no `\printglossary`

```
3651 \global\let\warn@noprintglossary\relax
```

```
3652 }
```

The `\printglossaries` command will do `\printglossary` for each glossary type that has been defined. It is better to use `\printglossaries` rather

than individual `\printglossary` commands to ensure that you don't forget any new glossaries you may have created. It also makes it easier to chop and change the value of the `acronym` package option. However, if you want to list the glossaries in a different order, or if you want to set the title or table of contents entry, or if you want to use different glossary styles for each glossary, you will need to use `\printglossary` explicitly for each glossary type.

`\printglossaries`

```
3653 \newcommand*\printglossaries{%
3654   \forallglossaries{\@glo@type}{\printglossary[type=\@glo@type]}%
3655 }
```

The keys that can be used in the optional argument to `\printglossary` are as follows: The `type` key sets the glossary type.

```
3656 \define@key{printgloss}{type}{\def\@glo@type{#1}}
```

The `title` key sets the title used in the glossary section header. This overrides the title used in `\newglossary`.

```
3657 \define@key{printgloss}{title}{%
3658   \def\glossarytitle{#1}%
3659   \let\gls@dotoc@title\relax
3660 }
```

The `toctitle` sets the text used for the relevant entry in the table of contents.

```
3661 \define@key{printgloss}{toctitle}{%
3662   \def\glossarytoctitle{#1}%
3663   \let\gls@dotoc@title\relax
3664 }
```

The `style` key sets the glossary style (but only for the given glossary).

```
3665 \define@key{printgloss}{style}{%
3666   \ifcsundef{@glsstyle@#1}%
3667     {%
3668       \PackageError{glossaries}%
3669         {Glossary style ‘#1’ undefined}{}%
3670     }%
3671     {%
3672       \def\@glossarystyle{\csname @glsstyle@#1\endcsname}%
3673     }%
3674 }
```

The `numberedsection` key determines if this glossary should be in a numbered section.

```
3675 \define@choicekey{printgloss}{numberedsection}[\val\nr]{%
3676   false,nolabel,autolabel}[nolabel]{%
3677   \ifcase\nr\relax
3678     \renewcommand*\@glossarysecstar{*}%
3679     \renewcommand*\@glossaryseclabel{}%
3680   \or
3681     \renewcommand*\@glossarysecstar{}%
3682   }
```

```

3682 \renewcommand*{\@@glossaryseclabel}{}%
3683 \or
3684 \renewcommand*{\@@glossarysecstar}{}%
3685 \renewcommand*{\@@glossaryseclabel}{\label{\glsautoprefix\@glo@type}}%
3686 \fi}

```

The nonnumberlist key determines if this glossary should have a number list.

```

3687 \define@boolkey{printgloss}[gls]{nonnumberlist}[true]{%
3688 \ifglsnonnumberlist
3689 \def\glossaryentrynumbers##1{%

3783 \newcommand*\glssubentryitem}[1]{%
3784 \fi

```

`theglossary` If the `theglossary` environment has already been defined, a warning will be issued. This environment should be redefined by glossary styles.

```

3785 \ifcsundef{theglossary}%
3786 {%
3787 \newenvironment{theglossary}{}{}%
3788 }%
3789 {%
3790 \GlossariesWarning{overriding 'theglossary' environment}%
3791 \renewenvironment{theglossary}{}{}%
3792 }

```

The glossary header is given by `\glossaryheader`. This forms part of the glossary style, and must indicate what should appear immediately after the start of the `theglossary` environment. (For example, if the glossary uses a tabular-like environment, it may be used to set the header row.) Note that if you don't want a header row, the glossary style must redefine `\glossaryheader` to do nothing.

`\glossaryheader`

```

3793 \newcommand*\glossaryheader{}

```

`\glstarget` `\glstarget{<label>}{<name>}`

Provide user interface to `\@glstarget` to make it easier to modify the glossary style in the document.

```

3794 \newcommand*\glstarget}[2]{\@glstarget{\glolinkprefix#1}{#2}}

```

`\glossaryentryfield` `\glossaryentryfield{<label>}{<name>}{<description>}{<symbol>}{<page-list>}`

This command governs how each entry row should be formatted in the glossary. Glossary styles need to redefine this command. Most of the predefined styles ignore `<symbol>`.

```

3795 \newcommand*\glossaryentryfield}[5]{%
3796 \noindent\textbf{\glstarget{#1}{#2}} #4 #3. #5\par}

```

`\glossaryentryfield` `\glossarysubentryfield{<level>}{<label>}{<name>}{<description>}{<symbol>}{<page-list>}`

This command governs how each subentry should be formatted in the glossary. Glossary styles need to redefine this command. Most of the predefined styles ignore `<symbol>`. The first argument is a number indicating the level. (The level should be greater than or equal to 1.)

```
3797 \newcommand*\glossarysubentryfield}[6]{%
3798 \glstarget{#2}{\strut}#4. #6\par}
```

Within each glossary, the entries form distinct groups which are determined by the first character of the sort key. When using `makeindex`, there will be a maximum of 28 groups: symbols, numbers, and the 26 alphabetical groups A, ..., Z. If you use `xindy` the groups will depend on whatever alphabet is used. This is determined by the language or custom alphabets can be created in the `xindy` style file. The command `\glsgroupskip` specifies what to do between glossary groups. Glossary styles must redefine this command. (Note that `\glsgroupskip` only occurs between groups, not at the start or end of the glossary.)

`\glsgroupskip`

```
3799 \newcommand*\glsgroupskip}{}
```

Each of the 28 glossary groups described above is preceded by a group heading. This is formatted by the command `\glsgroupheading` which takes one argument which is the *label* assigned to that group (not the title). The corresponding labels are: `glsymbols`, `glsnumbers`, A, ..., Z. Glossary styles must redefine this command. (In between groups, `\glsgroupheading` comes immediately after `\glsgroupskip`.)

`\glsgroupheading`

```
3800 \newcommand*\glsgroupheading}[1]{}
```

It is possible to “trick” `makeindex` into treating entries as though they belong to the same group, even if the terms don’t start with the same letter, by modifying the sort key. For example, all entries belonging to one group could be defined so that the sort key starts with an a, while entries belonging to another group could be defined so that the sort key starts with a b, and so on. If you want each group to have a heading, you would then need to modify the translation control sequences `\glsgetgrouptitle` and `\glsgetgrouplabel` so that the label is translated into the required title (and vice-versa).

```
\glsgetgrouptitle{<label>}
```

This command produces the title for the glossary group whose label is given by `<label>`. By default, the group labelled `glsymbols` produces `\glsymbolsgroupname`, the group labelled `glsnumbers` produces `\glsnumbersgroupname` and all the other groups simply produce their label. As mentioned above, the group labels are: `glsymbols`, `glsnumbers`, A, ..., Z. If you want to redefine the group titles, you will need to redefine this command.

`\glsgetgrouptitle`

```
3801 \newcommand*\glsgetgrouptitle}[1]{%
3802 \ifcsundef{#1groupname}{#1}{\csname #1groupname\endcsname}%
3803 }
```

`\glsgetgrouplabel{<title>}`

This command does the reverse to the previous command. The argument is the group title, and it produces the group label. Note that if you redefine `\glsgetgrouptitle`, you will also need to redefine `\glsgetgrouplabel`.

`\glsgetgrouplabel`

```
3804 \newcommand*{\glsgetgrouplabel}[1]{%
3805 \ifthenelse{\equal{#1}{\glsymbolsgroupname}}{\glsymbols}{%
3806 \ifthenelse{\equal{#1}{\glsnumbersgroupname}}{\glsnumbers}{#1}}
```

The command `\setentrycounter` sets the entry's associated counter (required by `\glshypernumber` etc.) `\glslink` and `\glsadd` encode the `\glossary` argument so that the relevant counter is set prior to the formatting command.

`\setentrycounter`

```
3807 \newcommand*{\setentrycounter}[2] [] {%
3808   \def\@glo@counterprefix{#1}%
3809   \ifx\@glo@counterprefix\@empty
3810     \def\@glo@counterprefix{.}%
3811   \else
3812     \def\@glo@counterprefix{.#1.}%
3813   \fi
3814   \def\glsentrycounter{#2}%
3815 }
```

The current glossary style can be set using `\glossarystyle{<style>}`.

`\glossarystyle`

```
3816 \newcommand*{\glossarystyle}[1]{%
3817   \ifcsundef{@glsstyle@#1}%
3818   {%
3819     \PackageError{glossaries}{Glossary style ‘#1’ undefined}{%
3820   }%
3821   {%
3822     \csname @glsstyle@#1\endcsname
3823   }%
3824 }
```

`\newglossarystyle` New glossary styles can be defined using:

`\newglossarystyle{<name>}{<definition>}`

The `<definition>` argument should redefine `theglossary`, `\glossaryheader`, `\glsgroupheading`, `\glossaryentryfield` and `\glsgroupskip` (see [subsection 1.18](#) for the definitions of predefined styles). Glossary styles should not redefine `\glossarypreamble` and `\glossarypostamble`, as the user should be able to switch between styles without affecting the pre- and postambles.

```
3825 \newcommand{\newglossarystyle}[2]{%
```

```

3826 \ifcsundef{@glsstyle@#1}%
3827 {%
3828   \expandafter\def\csname @glsstyle@#1\endcsname{#2}%
3829 }%
3830 {%
3831   \PackageError{glossaries}{Glossary style ‘#1’ is already defined}{}%
3832 }%
3833 }

```

`\renewglossarystyle` Code for this macro supplied by Marco Daniel.

```

3834 \newcommand{\renewglossarystyle}[2]{%
3835   \ifcsundef{@glsstyle@#1}%
3836   {%
3837     \PackageError{glossaries}{Glossary style ‘#1’ isn’t already defined}{}%
3838   }%
3839   {%
3840     \csdef{@glsstyle@#1}{#2}%
3841   }%
3842 }

```

Glossary entries are encoded so that the second argument to `\glossaryentryfield` is always specified as `\glsnamefont{<name>}`. This allows the user to change the font used to display the name term without having to redefine `\glossaryentryfield`. The default uses the surrounding font, so in the list type styles (which place the name in the optional argument to `\item`) the name will appear in bold.

`\glsnamefont`

```

3843 \newcommand*{\glsnamefont}[1]{#1}

```

Each glossary entry has an associated number list (usually page numbers) that indicate where in the document the entry has been used. The format for these number lists can be changed using the format key in commands like `\glslink`. The default format is given by `\glshypernumber`. This takes a single argument which may be a single number, a number range or a number list. The number ranges are delimited with `\delimR`, the number lists are delimited with `\delimN`.

If the document doesn’t have hyperlinks, the numbers can be displayed just as they are, but if the document supports hyperlinks, the numbers should link to the relevant location. This means extracting the individual numbers from the list or ranges. The package does this with the `\hyperpage` command, but this is encoded for comma and dash delimiters and only for the page counter, but this code needs to be more general. So I have adapted the code used in the package.

`\glshypernumber`

```

3844 \ifcsundef{hyperlink}%
3845 {%

```

```

3846 \def\glshypernumber#1{#1}%
3847 }%
3848 {%
3849 \def\glshypernumber#1{\@glshypernumber#1\nohyperpage{}}\@nil}
3850 }

```

`\@glshypernumber` This code was provided by Heiko Oberdiek to allow material to be attached to the location.

```

3851 \def\@glshypernumber#1\nohyperpage#2#3\@nil{%
3852 \ifx\#1\%
3853 \else
3854 \@delimR#1\delimR\delimR\%
3855 \fi
3856 \ifx\#2\%
3857 \else
3858 #2%
3859 \fi
3860 \ifx\#3\%
3861 \else
3862 \@glshypernumber#3\@nil
3863 \fi
3864 }

```

`\@delimR` displays a range of numbers for the counter whose name is given by `\@gls@counter` (which must be set prior to using `\glshypernumber`).

`\@delimR`

```

3865 \def\@delimR#1\delimR #2\delimR #3\%
3866 \ifx\#2\%
3867 \@delimN{#1}%
3868 \else
3869 \@gls@numberlink{#1}\delimR\@gls@numberlink{#2}%
3870 \fi}

```

`\@delimN` displays a list of individual numbers, instead of a range:

`\@delimN`

```

3871 \def\@delimN#1{\@delimN#1\delimN \delimN\}
3872 \def\@delimN#1\delimN #2\delimN#3\%
3873 \ifx\#3\%
3874 \@gls@numberlink{#1}%
3875 \else
3876 \@gls@numberlink{#1}\delimN\@gls@numberlink{#2}%
3877 \fi
3878 }

```

The following code is modified from hyperref's `\HyInd@pagelink` where the name of the counter being used is given by `\@gls@counter`.

```

3879 \def\@gls@numberlink#1{%

```

```

3880 \begingroup

3895 \@gls@removespaces#2\@nil
3896 }%
3897 \fi
3898 }
3899 \long\def\@gls@ReturnAfterFi#1\fi{\fi#1}

```

The following commands will switch to the appropriate font, and create a hyperlink, if hyperlinks are supported. If hyperlinks are not supported, they will just display their argument in the appropriate font.

```

\hyperm
3900 \newcommand*\hyperm}[1]{\textrm{\glshypernumber{#1}}}

\hypersf
3901 \newcommand*\hypersf}[1]{\textsf{\glshypernumber{#1}}}

\hypertt
3902 \newcommand*\hypertt}[1]{\texttt{\glshypernumber{#1}}}

\hyperbf
3903 \newcommand*\hyperbf}[1]{\textbf{\glshypernumber{#1}}}

\hypermd
3904 \newcommand*\hypermd}[1]{\textmd{\glshypernumber{#1}}}

\hyperit
3905 \newcommand*\hyperit}[1]{\textit{\glshypernumber{#1}}}

\hypersl
3906 \newcommand*\hypersl}[1]{\textsl{\glshypernumber{#1}}}

\hyperup
3907 \newcommand*\hyperup}[1]{\textup{\glshypernumber{#1}}}

```

`\hypersc`

```
3908 \newcommand*\hypersc[1]{\textsc{\glsnumber{#1}}}
```

`\hyperemph`

```
3909 \newcommand*\hyperemph[1]{\emph{\glsnumber{#1}}}
```

1.16 Acronyms

If the acronym package option is used, a new glossary called `acronym` is created

```
3910 \ifglsacronym
```

```
3911 \newglossary[alg]{acronym}{acr}{acn}{\acronymname}
```

and `\acronymtype` is set to the name of this new glossary.

```
3912 \renewcommand*\acronymtype{acronym}
```

```
3913 \fi
```

```
\oldacronym \oldacronym[<label>]{<abbrv>}{<long>}{<key-val list>}
```

This emulates the way the old package defined acronyms. It is equivalent to `\newacronym[<key-val list>]{<label>}{<abbrv>}{<long>}` and it additionally defines the command `\<label>` which is equivalent to `\gls{<label>}` (thus `<label>` must only contain alphabetical characters). If `<label>` is omitted, `<abbrv>` is used. This only emulates the syntax of the old package. The way the acronyms appear in the list of acronyms is determined by the definition of `\newacronym` and the glossary style.

Note that `\<label>` can't have an optional argument if the package is loaded. If hasn't been loaded then you can do `\<label>[<insert>]` but you can't do `\<label>[<key-val list>]`. For example if you define the acronym `svm`, then you can do `\svm['s]` but you can't do `\svm[format=textbf]`. If the package is loaded, `\svm['s]` will appear as `svm ['s]` which is unlikely to be the desired result. In this case, you will need to use `\gls` explicitly, e.g. `\gls{svm}['s]`. Note that it is up to the user to load if desired.

```
3914 \newcommand{\oldacronym}[4][\gls@label]{%
```

```
3915 \def\gls@label{#2}%
```

```
3916 \newacronym[#4]{#1}{#2}{#3}%
```

```
3917 \ifcsundef{xspace}%
```

```
3918 {%
```

```
3919 \expandafter\edef\csname#1\endcsname{%
```

```
3920 \noexpand@ifstar{\noexpand\Gls{#1}}{\noexpand\gls{#1}}%
```

```
3921 }%
```

```
3922 }%
```

```
3923 {%
```

```
3924 \expandafter\edef\csname#1\endcsname{%
```

```
3925 \noexpand@ifstar{\noexpand\Gls{#1}\noexpand\xspace}{%
```

```
3926 \noexpand\gls{#1}\noexpand\xspace}%
```

```
3927 }%
```

```
3928 }%
```

```
3929 }
```

`\newacronym[⟨key-val list⟩]{⟨label⟩}{⟨abbrev⟩}{⟨long⟩}`

This is a quick way of defining acronyms, all it does is call `\newglossaryentry` with the appropriate values. It sets the glossary type to `\acronymtype` which will be `acronym` if the package option `acronym` has been used, otherwise it will be the default glossary. Since `\newacronym` merely calls `\newglossaryentry`, the acronym is treated like any other glossary entry.

If you prefer a different format, you can redefine `\newacronym` as required. The optional argument can be used to override any of the settings.

This is just a stub. It's redefined by commands like `\SetDefaultAcronymStyle`.

`\newacronym`

```
3930 \newcommand{\newacronym}[4] [] {}
```

Set up some convenient short cuts. These need to be changed if `\newacronym` is changed (or if the description key is changed).

`\acrpluralsuffix` Plural suffix used by `\newacronym`. This just defaults to `\glspluralsuffix` but is changed to include `\textup` if the `smallcaps` option is used, so that the suffix doesn't appear in small caps as it doesn't look right. For example, `ABCS` looks as though the "s" is part of the acronym, but `ABCs` looks as though the "s" is a plural suffix. Since the entire text `abcs` is set in `\textsc`, `\textup` is needed to cancel it out.

```
3931 \newcommand*{\acrpluralsuffix}{\glspluralsuffix}
```

The following are defined for compatibility with version 2.07 and earlier.

`\glsshortkey`

```
3932 \newcommand*{\glsshortkey}{short}
```

`\glsshortpluralkey`

```
3933 \newcommand*{\glsshortpluralkey}{shortplural}
```

`\glslongkey`

```
3934 \newcommand*{\glslongkey}{long}
```

`\glslongpluralkey`

```
3935 \newcommand*{\glslongpluralkey}{longplural}
```

`\acrfull` Full form of the acronym.

```
3936 \newrobustcmd*{\acrfull}{%
```

```
3937 \ifstar\s@acrfull\ns@acrfull
```

```
3938 }
```

```

```

1.17 Predefined acronym styles

`\acronymfont` This is only used with the additional acronym styles:

```
4024 \newcommand{\acronymfont}[1]{#1}
```

`\firstacronymfont` This is only used with the additional acronym styles:

```
4025 \newcommand{\firstacronymfont}[1]{\acronymfont{#1}}
```

`\acrnameformat` The styles that allow an additional description use `\acrnameformat{<short>}{<long>}` to determine what information is displayed in the name.

```
4026 \newcommand*\acrnameformat[2]{\acronymfont{#1}}
```

Define some tokens used by `\newacronym`:

`\glskeylisttok`

```
4027 \newtoks\glskeylisttok
```

`\glslabeltok`

```
4028 \newtoks\glslabeltok
```

`\glsshorttok`

```
4029 \newtoks\glsshorttok
```

`\glslongtok`

```
4030 \newtoks\glslongtok
```

`\newacronymhook` Provide a hook for `\newacronym`:

```
4031 \newcommand*\newacronymhook{}
```

AcronymDisplayStyle Sets the default acronym display style for given glossary.

```
4032 \newcommand*{\SetDefaultAcronymDisplayStyle}[1]{%
4033   \defglsdisplay[#1]{##1##4}%
4034   \defglsdisplayfirst[#1]{##1##4}%
4035 }
```

defaultNewAcronymDef Sets up the acronym definition for the default style. The information is provided by the tokens `\glslabeltok`, `\glsshorttok`, `\glslongtok` and `\glskeylisttok`.

```
4036 \newcommand*{\DefaultNewAcronymDef}{%
4037   \edef\@do@newglossaryentry{%
4038     \noexpand\newglossaryentry{\the\glslabeltok}%
4039     {%
4040       type=\acronymtype,%
4041       name={\the\glsshorttok},%
4042       sort={\the\glsshorttok},%
4043       text={\the\glsshorttok},%
4044       first={\acrfullformat{\the\glslongtok}{\the\glsshorttok}},%
4045       plural={\the\glsshorttok\noexpand\acrpluralsuffix},%
4046       firstplural={\acrfullformat{\noexpand\@glo@longpl}%
4047                   {\noexpand\@glo@shortpl}},%
4048       short={\the\glsshorttok},%
4049       shortplural={\the\glsshorttok\noexpand\acrpluralsuffix},%
4050       long={\the\glslongtok},%
4051       longplural={\the\glslongtok\noexpand\acrpluralsuffix},%
4052       description={\the\glslongtok},%
4053       descriptionplural={\the\glslongtok\noexpand\acrpluralsuffix},%
4054       \the\glskeylisttok
4055     }%
4056   }%
4057   \@do@newglossaryentry
4058 }
```

Remaining options specified by the user:

DefaultAcronymStyle Set up the default acronym style:

```
4059 \newcommand*{\SetDefaultAcronymStyle}{%
4060   Set the display style:
4061   \@for\@gls@type:=\@glsacronymlists\do{%
4062     \SetDefaultAcronymDisplayStyle{\@gls@type}%
4063   }%
4064   Set up the definition of \newacronym:
4065   \renewcommand{\newacronym}[4][\@empty]{%
4066     If user is just using the main glossary and hasn't identified it as a list of
4067     acronyms, then update. (This is done to ensure backwards compatibility with
4068     versions prior to 2.04).
4069     \ifx\@glsacronymlists\@empty
```

```

4065     \def\@glo@type{\acronymtype}%

1.18 Predefined Glossary Styles

The glossaries bundle comes with some predefined glossary styles. These need to be loaded now for the style option to use them.

First, the glossary hyper-navigation commands need to be loaded.

```
4521 \RequirePackage{glossary-hypernav}
```

The styles that use list-like environments. These are not loaded if the `nolist` option is used:

```
4522 \@gls@loadlist
```

The styles that use the `longtable` environment. These are not loaded if the `no-long package` option is used.

```
4523 \@gls@loadlong
```

The styles that use the `supertabular` environment. These are not loaded if the `nosuper` package option is used or if the package isn't installed.

```
4524 \@gls@loadsuper
```

The tree-like styles. These are not loaded if the `notree` package option is used.

```
4525 \@gls@loadtree
```

The default glossary style is set according to the `style` package option, but can be overridden by `\glossarystyle`. The required style must be defined at this point.

```
4526 \ifx\@glossary@default@style\relax
```

```
4527 \else
```

```
4528 \glossarystyle{\@glossary@default@style}
```

```
4529 \fi
```

```
4587 \newcommand*{\showglosymbolplural}[1]{%
4588   \expandafter\show\csname glo@#1@symbolplural\endcsname
4589 }
```

`\showgloindex` `\showgloindex{<label>}`

```
4590 \newcommand*{\showgloindex}[1]{%
4591   \expandafter\show\csname glo@#1@index\endcsname
4592 }
```

`\showgloflag` `\showgloflag{<label>}`

```
4593 \newcommand*{\showgloflag}[1]{%
4594   \expandafter\show\csname ifglo@#1@flag\endcsname
4595 }
```

`\showacronymlists` `\showacronymlists`

Show list of glossaries that have been flagged as a list of acronyms.

```
4596 \newcommand*\showacronymlists}{%
4597   \show\@glsacronymlists
4598 }
```

`\showglossaries` `\showglossaries`

Show list of defined glossaries.

```
4599 \newcommand*\showglossaries}{%
4600   \show\@glo@types
4601 }
```

`\showglossaryin` `\showglossaryin{<glossary-label>}`

Show the 'in' extension for the given glossary.

```
4602 \newcommand*\showglossaryin}[1]{%
4603   \expandafter\show\csname @glo@type@#1@in\endcsname
4604 }
```

`\showglossaryout` `\showglossaryout{<glossary-label>}`

Show the 'out' extension for the given glossary.

```
4605 \newcommand*\showglossaryout}[1]{%
4606   \expandafter\show\csname @glo@type@#1@out\endcsname
4607 }
```

`\showglossarytitle` `\showglossarytitle{<glossary-label>}`

Show the title for the given glossary.

```
4608 \newcommand*\showglossarytitle}[1]{%
4609   \expandafter\show\csname @glo@type@#1@title\endcsname
4610 }
```

`\showglossarycounter` `\showglossarycounter{<glossary-label>}`

Show the counter for the given glossary.

```
4611 \newcommand*\showglossarycounter}[1]{%
4612   \expandafter\show\csname @glo@type@#1@counter\endcsname
4613 }
```

`\showglossaryentries` `\showglossaryentries{<glossary-label>}`

Show the list of entry labels for the given glossary.

```
4614 \newcommand*{\showglossaryentries}[1]{%
4615   \expandafter\show\csname glolist@#1\endcsname
4616 }
```

1.20 Compatibility with version 2.07 and below

In order to fix some bugs in v3.0, it was necessary to change the way information is written to the `glo` file, which also meant a change in the format of the Xindy style file. The compatibility option is meant for documents that use a customised Xindy style file with `\noist`. With the compatibility option, hopefully xindy will still be able to process the old document, but the bugs will remain. The issues in versions 2.07 and below:

- With xindy, the counter used by the entry was hard-coded into the Xindy style file. This meant that you couldn't use the counter to swap counters.
- With both xindy and makeindex, if used with hyperref and `\theH<counter>` was different to `\thecounter`, the link in the location number would be undefined.

```
4617 \csname ifglscpatible-2.07\endcsname
4618   \RequirePackage{glossaries-compatible-207}
4619 \fi
```

2 Mfirstuc Documented Code

```
4620 \NeedsTeXFormat{LaTeX2e}
4621 \ProvidesPackage{mfirstuc}[2012/05/21 v1.06 (NLCT)]
```

Requires etoolbox:

```
4622 \RequirePackage{etoolbox}
```

`\makefirstuc` Syntax:

```
\makefirstuc{<text>}
```

Makes the first letter uppercase, but will skip initial control sequences if they are followed by a group and make the first thing in the group uppercase, unless the group is empty. Thus `\makefirstuc{abc}` will produce: `Abc`, `\makefirstuc{\ae bc}` will produce: `Æbc`, but `\makefirstuc{\emph{abc}}` will produce `Abc`. This is required by `\Gls` and `\Glspl`.

```
4623 \newif\if@glscs
4624 \newtoks\@glsmfirst
4625 \newtoks\@glsmrest
4626 \def\makefirstuc#1{%
4627   \def\gls@argi{#1}%
4628   \ifx\gls@argi\@empty
```

If the argument is empty, do nothing.

```
4629   \else
```

```

4630 \def\@gls@tmp{\ #1}%
4631 \@onelevel@sanitize\@gls@tmp
4632 \expandafter\@gls@checkcs\@gls@tmp\relax\relax
4633 \if@glscs
4634 \@gls@getbody #1{\@nil
4635 \ifx\@gls@rest\@empty
4636 \glsmakefirstuc{#1}%
4637 \else
4638 \expandafter\@gls@split\@gls@rest\@nil
4639 \ifx\@gls@first\@empty
4640 \glsmakefirstuc{#1}%
4641 \else
4642 \expandafter\@glsmfirst\expandafter{\@gls@first}%
4643 \expandafter\@glsmrest\expandafter{\@gls@rest}%
4644 \edef\@gls@domfirstuc{\noexpand\@gls@body
4645 {\noexpand\glsmakefirstuc\the\@glsmfirst}%
4646 \the\@glsmrest}%
4647 \@gls@domfirstuc
4648 \fi
4649 \fi
4650 \else
4651 \glsmakefirstuc{#1}%
4652 \fi
4653 \fi
4654 }

```

Put first argument in \@gls@first and second argument in \@gls@rest:

```

4655 \def\@gls@split#1#2\@nil{%
4656 \def\@gls@first{#1}\def\@gls@rest{#2}%
4657 }

4658 \def\@gls@checkcs#1 #2#3\relax{%
4659 \def\@gls@argi{#1}\def\@gls@argii{#2}%
4660 \ifx\@gls@argi\@gls@argii
4661 \@glscstrue
4662 \else
4663 \@glscsfalse
4664 \fi
4665 }

```

Make first thing upper case:

```

4666 \def\@gls@makefirstuc#1{\MakeUppercase #1}

```

`\glsmakefirstuc` Provide a user command to make it easier to customise.

```

4667 \newcommand*{\glsmakefirstuc}[1]{\@gls@makefirstuc{#1}}

```

Get the first grouped argument and stores in \@gls@body.

```

4668 \def\@gls@getbody#1#\def\@gls@body{#1}\@gls@gobbletonil}

```

Scoup up everything to \@nil and store in \@gls@rest:

```

4669 \def\@gls@gobbletonil#1\@nil{\def\@gls@rest{#1}}

```

`\xmakefirstuc` Expand argument once before applying `\makefirstuc` (added v1.01).

```
4670 \newcommand*\xmakefirstuc}[1]{%
4671 \expandafter\makefirstuc\expandafter{#1}}
```

`\capitalisewords` Capitalise each word in the argument. Words are considered to be separated by plain spaces (i.e. non-breakable spaces won't be considered a word break).

```
4672 \newcommand*\capitalisewords}[1]{%
4673   \def\gls@add@space{%
4674     \mfu@capitalisewords#1 \@nil\mfu@endcap
4675     %\gls@add@space\makefirstuc{##1}\def\gls@add@space{ }%
4676 }

4677 \def\mfu@capitalisewords#1 #2\mfu@endcap{%
4678   \def\mfu@cap@first{#1}%
4679   \def\mfu@cap@second{#2}%
4680   \gls@add@space
4681   \makefirstuc{#1}%
4682   \def\gls@add@space{ }%
4683   \ifx\mfu@cap@second\@nnil
4684     \let\next@mfu@cap\mfu@noop
4685   \else
4686     \let\next@mfu@cap\mfu@capitalisewords
4687   \fi
4688   \next@mfu@cap#2\mfu@endcap
4689 }
4690 \def\mfu@noop#1\mfu@endcap{}
```

`\xcapitalisewords` Short-cut command:

```
4691 \newcommand*\xcapitalisewords}[1]{%
4692   \expandafter\capitalisewords\expandafter{#1}%
4693 }
```

3 Glossary Styles

3.1 Glossary hyper-navigation definitions (glossary-hypernav package)

Package Definition:

```
4694 \ProvidesPackage{glossary-hypernav}[2007/07/04 v1.01 (NLCT)]
```

The commands defined in this package are provided to help navigate around the groups within a glossary (see [subsection 1.15.](#)) `\printglossary` (and `\printglossaries`) set `\@glo@type` to the label of the current glossary. This is used to create a unique hypertextarget in the event of multiple glossaries.

```
\glsnavhyperlink[<type>]{<label>}{<text>}
```

This command makes `<text>` a hyperlink to the glossary group whose label is given by `<label>` for the glossary given by `<type>`.

`\glsnavhyperlink`

```
4695 \newcommand*{\glsnavhyperlink}[3][\@glo@type]{%
4696   \edef\gls@grplabel{#2}\protected@edef\gls@grptitle{#3}%
4697   \@glslink{glsn:#1@#2}{#3}}
```

```
\glsnavhypertarget [<type>]{<label>}{<text>}
```

This command makes *<text>* a hypertarget for the glossary group whose label is given by *<label>* in the glossary given by *<type>*. If *<type>* is omitted, `\@glo@type` is used which is set by `\printglossary` to the current glossary label.

`\glsnavhypertarget`

```
4698 \newcommand*{\glsnavhypertarget}[3][\@glo@type]{%
  Add this group to the aux file for re-run check.
4699   \protected@write\@auxout{}{\string\@gls@hypergroup{#1}{#2}}%
  Add the target.
4700   \@gls@target{glsn:#1@#2}{#3}%
  Check list of know groups to determine if a re-run is required.
4701   \expandafter\let
4702     \expandafter\@gls@list\c@name @gls@hypergroup@list@#1\endc@name
  Iterate through list and terminate loop if this group is found.
4703   \@for\@gls@elem:=\@gls@list\do{%
4704     \ifthenelse{\equal{\@gls@elem}{#2}}{\@endfortrue}{}%
  Check if list terminated prematurely.
4705   \if@endfor
4706   \else
  This group was not included in the list, so issue a warning.
4707     \GlossariesWarningNoLine{Navigation panel
4708       for glossary type ‘#1’^^Jmissing group ‘#2’}%
4709     \gdef\gls@hypergroup@rerun{%
4710       \GlossariesWarningNoLine{Navigation panel
4711         has changed. Rerun LaTeX}}%
4712     \fi
4713 }
```

`\gls@hypergroup@rerun` Give a warning at the end if re-run required

```
4714 \let\gls@hypergroup@rerun\relax
4715 \AtEndDocument{\gls@hypergroup@rerun}
```

`\@gls@hypergroup` This adds to (or creates) the command `\@gls@hypergroup@list@<glossary type>` which lists all groups for a given glossary, so that the navigation bar only contains those groups that are present. However it requires at least 2 runs to ensure the information is up-to-date.

```
4716 \newcommand*{\@gls@hypergroup}[2]{%
```

```

4717 \@ifundefined{@gls@hypergrouplist@#1}{%
4718   \expandafter\xdef\csname @gls@hypergrouplist@#1\endcsname{#2}%
4719 }{%
4720   \expandafter\let\expandafter\@gls@tmp
4721     \csname @gls@hypergrouplist@#1\endcsname
4722   \expandafter\xdef\csname @gls@hypergrouplist@#1\endcsname{%
4723     \@gls@tmp,#2}%
4724 }%
4725 }

```

The `\glsnavigation` command displays a simple glossary group navigation. The symbol and number elements are defined separately, so that they can be suppressed if need be. Note that this command will produce a link to all 28 groups, but some groups may not be defined if there are groups that do not contain any terms, in which case you will get an undefined hyperlink warning. Now for the whole navigation bit:

`\glsnavigation`

```

4726 \newcommand*{\glsnavigation}{%
4727 \def\@gls@between{}%
4728 \@ifundefined{@gls@hypergrouplist@\@glo@type}{%
4729   \def\@gls@list{}%
4730 }{%
4731   \expandafter\let\expandafter\@gls@list
4732     \csname @gls@hypergrouplist@\@glo@type\endcsname
4733 }%
4734 \@for\@gls@tmp:=\@gls@list\do{%
4735   \@gls@between
4736   \glsnavhyperlink{\@gls@tmp}{\glsgetgrouptitle{\@gls@tmp}}%
4737   \let\@gls@between\glshypernavsep%
4738 }%
4739 }

```

`\glshypernavsep` Separator for the hyper navigation bar.

```

4740 \newcommand*{\glshypernavsep}{\space\textbar\space}

```

The `\glssymbolnav` produces a simple navigation set of links for just the symbol and number groups. This used to be used at the start of `\glsnavigation`. This command is no longer needed.

`\glssymbolnav`

```

4741 \newcommand*{\glssymbolnav}{%
4742 \glsnavhyperlink{glssymbols}{\glsgetgrouptitle{glssymbols}}%
4743 \glshypernavsep
4744 \glsnavhyperlink{glsnumbers}{\glsgetgrouptitle{glsnumbers}}%
4745 \glshypernavsep
4746 }

```

3.2 In-line Style (glossary-inline.sty)

This defines an in-line style where the entries are comma-separated with just the name and description displayed.

```
4747 \ProvidesPackage{glossary-inline}[2012/09/21 v3.03 (NLCT)]
```

`inline` Define the inline style.

```
4748 \newglossarystyle{inline}{%
```

Start of glossary sets up first empty separator between entries. (This is then changed by `\glossaryentryfield`)

```
4749 \renewenvironment{theglossary}{%
4750   {%
4751     \def\gls@inlinesep{}%
4752     \def\gls@inlinesubsep{}%
4753     \def\gls@inlinepostchild{}%
4754   }%
4755   {\glspostinline}%
```

No header:

```
4756 \renewcommand*{\glossaryheader}{}%
```

No group headings (if heading is required, add `\glsinlinedopostchild` to start definition in case heading follows a child entry):

```
4757 \renewcommand*{\glsgroupheading}[1]{}%
```

Just display separator followed by name and description:

```
4758 \renewcommand{\glossaryentryfield}[5]{%
4759   \glsinlinedopostchild
4760   \gls@inlinesep
4761   \def\glo@desc{##3}%
4762   \def\@no@post@desc{\nopostdesc}%
4763   \glsentryitem{##1}\glsinlinenameformat{##1}{##2}%
4764   \ifx\glo@desc\@no@post@desc
4765     \glsinlineemptydescformat{##4}{##5}%
4766   \else
4767     \ifstrempy{##3}%
4768     {\glsinlineemptydescformat{##4}{##5}}%
4769     {\glsinlinedescformat{##3}{##4}{##5}}%
4770   \fi
4771   \ifgls@haschildren{##1}%
4772   {%
4773     \glsresetsubentrycounter
4774     \glsinlineparentchildseparator
4775     \def\gls@inlinesubsep{}%
4776     \def\gls@inlinepostchild{\glsinlinepostchild}%
4777   }%
4778   {}%
4779   \def\gls@inlinesep{\glsinlineseparator}%
4780 }%
```

Sub-entries display description:

```
4781 \renewcommand{\glossarysubentryfield}[6]{%
4782   \gls@inlinesubsep%
4783   \glsinlinesubnameformat{##2}{##3}%
4784   \glssubentryitem{##2}\glsinlinesubdescformat{##4}{##5}{##6}%
4785   \def\gls@inlinesubsep{\glsinlinesubseparator}%
4786 }%
```

Nothing special between groups:

```
4787 \renewcommand*{\glsgroupskip}{}%
4788 }
```

`\glsinlinedopostchild`

```
4789 \newcommand*{\glsinlinedopostchild}{%
4790   \gls@inlinepostchild
4791   \def\gls@inlinepostchild{}%
4792 }
```

`\glsinlineseparator` Separator to use between entries.

```
4793 \newcommand*{\glsinlineseparator}{;\space}
```

`\glsinlinesubseparator` Separator to use between sub-entries.

```
4794 \newcommand*{\glsinlinesubseparator}{,\space}
```

`\glsinlineparentchildseparator` Separator to use between parent and children.

```
4795 \newcommand*{\glsinlineparentchildseparator}{:\space}
```

`\glsinlinepostchild` Hook to use between child and next entry

```
4796 \newcommand*{\glsinlinepostchild}{}
```

`\glspostinline` Terminator for inline glossary.

```
4797 \newcommand*{\glspostinline}{\glspostdescription\space}
```

`\glsinlinenameformat` Formats the name of the entry (first argument label, second argument name):

```
4798 \newcommand*{\glsinlinenameformat}[2]{\glstarget{#1}{#2}}
```

`\glsinlinedescformat` Formats the entry's description, symbol and location list:

```
4799 \newcommand*{\glsinlinedescformat}[3]{\space#1}
```

`\glsinlineemptydescformat` Formats the entry's symbol and location list when the description is empty:

```
4800 \newcommand*{\glsinlineemptydescformat}[2]{}
```

`\glsinlinesubnameformat` Formats the name of the subentry (first argument label, second argument name):

```
4801 \newcommand*{\glsinlinesubnameformat}[2]{\glstarget{#1}{}}
```

`\glsinlinesubdescformat` Formats the subentry's description, symbol and location list:

```
4802 \newcommand*{\glsinlinesubdescformat}[3]{#1}
```

3.3 List Style (glossary-list.sty)

The style file defines glossary styles that use the description environment. Note that since the entry name is placed in the optional argument to the `\item` command, it will appear in a bold font by default.

```
4803 \ProvidesPackage{glossary-list}[2012/11/11 v3.04 (NLCT)]
```

`list` The list glossary style uses the description environment. The group separator `\glsgroupskip` is redefined as `\indexspace` which produces a gap between groups. The glossary heading and the group headings do nothing. Sub-entries immediately follow the main entry without the sub-entry name. This style does not use the entry's symbol. This is used as the default style for the glossaries package.

```
4804 \newglossarystyle{list}{%
```

Use description environment:

```
4805 \renewenvironment{theglossary}{%
```

```
4806   {\begin{description}}{\end{description}}%
```

No header at the start of the environment:

```
4807 \renewcommand*{\glossaryheader}{}%
```

No group headings:

```
4808 \renewcommand*{\glsgroupheading}[1]{}%
```

Main (level 0) entries start a new item in the list:

```
4809 \renewcommand*{\glossaryentryfield}[5]{}%
```

```
4810   \item[\glsentryitem{##1}\glstarget{##1}{##2}]
```

```
4811     ##3\glspostdescription\space ##5)%
```

Sub-entries continue on the same line:

```
4812 \renewcommand*{\glossarysubentryfield}[6]{}%
```

```
4813   \glssubentryitem{##2}%
```

```
4814   \glstarget{##2}{\strut}##4\glspostdescription\space ##6.}%
```

```
4815% \end{macrocode}
```

```
4816% Add vertical space between groups:
```

```
4817%\changes{3.03}{2012/09/21}{added check for glsnogroupskip}
```

```
4818% \begin{macrocode}
```

```
4819 \renewcommand*{\glsgroupskip}{\ifglsnogroupskip\else\indexspace\fi}%
```

```
4820 }
```

`listgroup` The listgroup style is like the list style, but the glossary groups have headings.

```
4821 \newglossarystyle{listgroup}{%
```

Base it on the list style:

```
4822 \glossarystyle{list}%
```

Each group has a heading:

```
4823 \renewcommand*{\glsgroupheading}[1]{\item[\glsgetgrouptitle{##1}]}
```

`listhypergroup` The `listhypergroup` style is like the `listgroup` style, but has a set of links to the groups at the start of the glossary.

```
4824 \newglossarystyle{listhypergroup}{%
```

Base it on the list style:

```
4825 \glossarystyle{list}%
```

Add navigation links at the start of the environment:

```
4826 \renewcommand*{\glossaryheader}{%
```

```
4827 \item[\glsnavigation]}%
```

Each group has a heading with a hypertarget:

```
4828 \renewcommand*{\glsgroupheading}[1]{%
```

```
4829 \item[\glsnavhypertarget{##1}{\glsgetgrouptitle{##1}}]}
```

`altlist` The `altlist` glossary style is like the `list` style, but places the description on a new line. Sub-entries follow in separate paragraphs without the sub-entry name. This style does not use the entry's symbol.

```
4830 \newglossarystyle{altlist}{%
```

Base it on the list style:

```
4831 \glossarystyle{list}%
```

Main (level 0) entries start a new item in the list with a line break after the entry name:

```
4832 \renewcommand*{\glossaryentryfield}[5]{%
```

```
4833 \item[\glsentryitem{##1}\glstarget{##1}{##2}]%
```

Version 3.04 changed `\newline` to the following paragraph break stuff (thanks to Daniel Gebhardt for supplying the fix) to prevent a page break occurring at this point.

```
4834 \mbox{}\par\nobreak\@afterheading
```

```
4835 ##3\glspostdescription\space ##5}%
```

Sub-entries start a new paragraph:

```
4836 \renewcommand{\glossarysubentryfield}[6]{%
```

```
4837 \par
```

```
4838 \glssubentryitem{##2}%
```

```
4839 \glstarget{##2}{\strut}##4\glspostdescription\space ##6)%
```

```
4840 }
```

`altlistgroup` The `altlistgroup` glossary style is like the `altlist` style, but the glossary groups have headings.

```
4841 \newglossarystyle{altlistgroup}{%
```

Base it on the `altlist` style:

```
4842 \glossarystyle{altlist}%
```

Each group has a heading:

```
4843 \renewcommand*{\glsgroupheading}[1]{\item[\glsgetgrouptitle{##1}]}}
```

`altlisthypergroup` The `altlisthypergroup` glossary style is like the `altlistgroup` style, but has a set of links to the groups at the start of the glossary.

```
4844 \newglossarystyle{altlisthypergroup}{%
```

```
    Base it on the altlist style:
```

```
4845  \glossarystyle{altlist}%
```

```
    Add navigation links at the start of the environment:
```

```
4846  \renewcommand*{\glossaryheader}{%
```

```
4847    \item[\glsnavigation]}%
```

```
    Each group has a heading with a hypertarget:
```

```
4848  \renewcommand*{\glsgroupheading}[1]{%
```

```
4849    \item[\glsnavhypertarget{##1}{\glsgetgrouptitle{##1}}]}
```

`listdotted` The `listdotted` glossary style was supplied by Axel Menzel. I've modified it slightly so that the distance from the start of the name to the end of the dotted line is specified by `\glslistdottedwidth`. Note that this style ignores the page numbers as well as the symbol. Sub-entries are displayed in the same way as top-level entries.

```
4850 \newglossarystyle{listdotted}{%
```

```
    Base it on the list style:
```

```
4851  \glossarystyle{list}%
```

```
    Each main (level 0) entry starts a new item:
```

```
4852  \renewcommand*{\glossaryentryfield}[5]{%
```

```
4853    \item[]\makebox[\glslistdottedwidth][l]{%
```

```
4854      \glsentryitem{##1}\glstarget{##1}{##2}%
```

```
4855      \unskip\leaders\hbox to 2.9mm{\hss.}\hfill\strut}##3}%
```

```
    Sub entries have the same format as main entries:
```

```
4856  \renewcommand*{\glossarysubentryfield}[6]{%
```

```
4857    \item[]\makebox[\glslistdottedwidth][l]{%
```

```
4858      \glssubentryitem{##2}%
```

```
4859      \glstarget{##2}{##3}%
```

```
4860      \unskip\leaders\hbox to 2.9mm{\hss.}\hfill\strut}##4}%
```

```
4861 }
```

`\glslistdottedwidth`

```
4862 \newlength\glslistdottedwidth
```

```
4863 \setlength{\glslistdottedwidth}{.5\hsize}
```

`sublistdotted` This style is similar to the `glostylelistdotted` style, except that the main entries just have the name displayed.

```
4864 \newglossarystyle{sublistdotted}{%
```

```
    Base it on the listdotted style:
```

```
4865  \glossarystyle{listdotted}%
```

Main (level 0) entries just display the name:

```
4866 \renewcommand*{\glossaryentryfield}[5]{%
4867   \item[\glsentryitem{##1}\glstarget{##1}{##2}]}%
4868 }
```

3.4 Glossary Styles using longtable (the glossary-long package)

The glossary styles defined in the package used the longtable environment in the glossary.

```
4869 \ProvidesPackage{glossary-long}[2012/09/21 v3.03 (NLCT)]
```

Requires the package:

```
4870 \RequirePackage{longtable}
```

`\glsdescwidth` This is a length that governs the width of the description column. (There's a chance that the user may specify `nolong` and then load later, in which case `\glsdescwidth` may have already been defined by . The same goes for `\glspagelistwidth`.)

```
4871 \@ifundefined{glsdescwidth}{%
4872   \newlength\glsdescwidth
4873   \setlength{\glsdescwidth}{0.6\hsize}
4874 }{}
```

`\glspagelistwidth` This is a length that governs the width of the page list column.

```
4875 \@ifundefined{glspagelistwidth}{%
4876   \newlength\glspagelistwidth
4877   \setlength{\glspagelistwidth}{0.1\hsize}
4878 }{}
```

`long` The long glossary style command which uses the longtable environment:

```
4879 \newglossarystyle{long}{%
```

Use longtable with two columns:

```
4880 \renewenvironment{theglossary}%
4881   {\begin{longtable}{lp{\glsdescwidth}}}%
4882   {\end{longtable}}%
```

Do nothing at the start of the environment:

```
4883 \renewcommand*{\glossaryheader}{}%
```

No heading between groups:

```
4884 \renewcommand*{\glsgroupheading}[1]{}%
```

Main (level 0) entries displayed in a row:

```
4885 \renewcommand*{\glossaryentryfield}[5]{%
4886   \glsentryitem{##1}\glstarget{##1}{##2} & ##3\glspostdescription\space ##5\\}%
```

Sub entries displayed on the following row without the name:

```
4887 \renewcommand*{\glossarysubentryfield}[6]{%
4888   &
```

```

4889     \glssubentryitem{##2}%
4890     \glstarget{##2}{\strut}##4\glspostdescription\space ##6\\}%

```

Blank row between groups:

```

4891     \renewcommand*{\glsgroupskip}{\ifglsgroupskip\else & \\fi}%
4892 }

```

longborder The longborder style is like the above, but with horizontal and vertical lines:

```

4893 \newglossarystyle{longborder}{%
    Base it on the glostylelong style:
4894     \glossarystyle{long}%
    Use longtable with two columns with vertical lines between each column:
4895     \renewenvironment{theglossary}{%
4896         \begin{longtable}{|l|p{\glstdescwidth}|}{\end{longtable}}%
    Place horizontal lines at the head and foot of the table:
4897     \renewcommand*{\glossaryheader}{\hline\endhead\hline\endfoot}%
4898 }

```

longheader The longheader style is like the long style but with a header:

```

4899 \newglossarystyle{longheader}{%
    Base it on the glostylelong style:
4900     \glossarystyle{long}%
    Set the table's header:
4901     \renewcommand*{\glossaryheader}{%
4902         \bfseries \entryname & \bfseries \descriptionname\\endhead}%
4903 }

```

longheaderborder The longheaderborder style is like the long style but with a header and border:

```

4904 \newglossarystyle{longheaderborder}{%
    Base it on the glostylelongborder style:
4905     \glossarystyle{longborder}%
    Set the table's header and add horizontal line to table's foot:
4906     \renewcommand*{\glossaryheader}{%
4907         \hline\bfseries \entryname & \bfseries \descriptionname\\hline
4908         \endhead
4909         \hline\endfoot}%
4910 }

```

long3col The long3col style is like long but with 3 columns

```

4911 \newglossarystyle{long3col}{%
    Use a longtable with 3 columns:
4912     \renewenvironment{theglossary}{%
4913         {\begin{longtable}{lp{\glstdescwidth}p{\glspagelistwidth}}}%
4914         {\end{longtable}}%

```

No table header:

```
4915 \renewcommand*\glossaryheader}{}
```

No headings between groups:

```
4916 \renewcommand*\glsgroupheading}[1]{}%
```

Main (level 0) entries on a row (name in first column, description in second column, page list in last column):

```
4917 \renewcommand*\glossaryentryfield}[5]{}%
```

```
4918 \glsentryitem{##1}\glstarget{##1}{##2} & ##3 & ##5\\%
```

Sub-entries on a separate row (no name, description in second column, page list in third column):

```
4919 \renewcommand*\glossarysubentryfield}[6]{}%
```

```
4920 &
```

```
4921 \glssubentryitem{##2}{}%
```

```
4922 \glstarget{##2}{\strut}##4 & ##6\\%
```

Blank row between groups:

```
4923 \renewcommand*\glsgroupskip{\ifglsnogroupskip\else & \\fi}%
```

```
4924 }
```

`long3colborder` The `long3colborder` style is like the `long3col` style but with a border:

```
4925 \newglossarystyle{long3colborder}{}%
```

Base it on the `glostylelong3col` style:

```
4926 \glossarystyle{long3col}{}%
```

Use a `longtable` with 3 columns with vertical lines around them:

```
4927 \renewenvironment{theglossary}{}%
```

```
4928 {\begin{longtable}{|l|p{\glsdescwidth}|p{\glspagelistwidth}|}{}%
```

```
4929 {\end{longtable}}{}%
```

Place horizontal lines at the head and foot of the table:

```
4930 \renewcommand*\glossaryheader{\hline\endhead\hline\endfoot}{}%
```

```
4931 }
```

`long3colheader` The `long3colheader` style is like `long3col` but with a header row:

```
4932 \newglossarystyle{long3colheader}{}%
```

Base it on the `glostylelong3col` style:

```
4933 \glossarystyle{long3col}{}%
```

Set the table's header:

```
4934 \renewcommand*\glossaryheader{}%
```

```
4935 \bfseries\entryname&\bfseries\descriptionname&
```

```
4936 \bfseries\pagelistname\\endhead}{}%
```

```
4937 }
```

`long3colheaderborder` The `long3colheaderborder` style is like the above but with a border

```
4938 \newglossarystyle{long3colheaderborder}{}%
```

Base it on the `glostylelong3colborder` style:

```
4939 \glossarystyle{long3colborder}%
```

Set the table's header and add horizontal line at table's foot:

```
4940 \renewcommand*{\glossaryheader}{%
4941   \hline
4942   \bfseries\entryname&\bfseries\descriptionname&
4943   \bfseries\pagelistname\\ \hline\endhead
4944   \hline\endfoot}%
4945 }
```

`long4col` The `long4col` style has four columns where the third column contains the value of the associated symbol key.

```
4946 \newglossarystyle{long4col}{%
```

Use a `longtable` with 4 columns:

```
4947 \renewenvironment{theglossary}%
4948   {\begin{longtable}{llll}}%
4949   {\end{longtable}}%
```

No table header:

```
4950 \renewcommand*{\glossaryheader}{}%
```

No group headings:

```
4951 \renewcommand*{\glsgroupheading}[1]{}%
```

Main (level 0) entries on a single row (name in first column, description in second column, symbol in third column, page list in last column):

```
4952 \renewcommand*{\glossaryentryfield}[5]{%
4953   \glsentryitem{##1}\glstarget{##1}{##2} & ##3 & ##4 & ##5\\}%
```

Sub entries on a single row with no name (description in second column, symbol in third column, page list in last column):

```
4954 \renewcommand*{\glossarysubentryfield}[6]{%
4955   &
4956   \glssubentryitem{##2}%
4957   \glstarget{##2}{\strut}##4 & ##5 & ##6\\}%
```

Blank row between groups:

```
4958 \renewcommand*{\glsgroupskip}{\ifglsnogroupskip\else & & \\fi}%
4959 }
```

`long4colheader` The `long4colheader` style is like `long4col` but with a header row.

```
4960 \newglossarystyle{long4colheader}{%
```

Base it on the `glostylelong4col` style:

```
4961 \glossarystyle{long4col}%
```

Table has a header:

```
4962 \renewcommand*{\glossaryheader}{%
4963   \bfseries\entryname&\bfseries\descriptionname&
4964   \bfseries \symbolname&
```

```
4965 \bfseries\pagelistname\\\endhead}%
4966 }
```

`long4colborder` The `long4colborder` style is like `long4col` but with a border.

```
4967 \newglossarystyle{long4colborder}{%
  Base it on the glostylelong4col style:
4968 \glossarystyle{long4col}%
  Use a longtable with 4 columns surrounded by vertical lines:
4969 \renewenvironment{theglossary}%
4970 {\begin{longtable}{|l|l|l|l|}}%
4971 {\end{longtable}}%
  Add horizontal lines to the head and foot of the table:
4972 \renewcommand*{\glossaryheader}{\hline\endhead\hline\endfoot}%
4973 }
```

`long4colheaderborder` The `long4colheaderborder` style is like the above but with a border.

```
4974 \newglossarystyle{long4colheaderborder}{%
  Base it on the glostylelong4col style:
4975 \glossarystyle{long4col}%
  Use a longtable with 4 columns surrounded by vertical lines:
4976 \renewenvironment{theglossary}%
4977 {\begin{longtable}{|l|l|l|l|}}%
4978 {\end{longtable}}%
  Add table header and horizontal line at the table's foot:
4979 \renewcommand*{\glossaryheader}{%
4980 \hline\bfseries\entryname&\bfseries\descriptionname&
4981 \bfseries \symbolname&
4982 \bfseries\pagelistname\\\hline\endhead\hline\endfoot}%
4983 }
```

`altlong4col` The `altlong4col` style is like the `long4col` style but can have multiline descriptions and page lists.

```
4984 \newglossarystyle{altlong4col}{%
  Base it on the glostylelong4col style:
4985 \glossarystyle{long4col}%
  Use a longtable with 4 columns where the second and last columns may have
  multiple lines in each row:
4986 \renewenvironment{theglossary}%
4987 {\begin{longtable}{lp{\glsdescwidth}lp{\glspagelistwidth}}}%
4988 {\end{longtable}}%
4989 }
```

`altlong4colheader` The `altlong4colheader` style is like `altlong4col` but with a header row.

```
4990 \newglossarystyle{altlong4colheader}{%
```

Base it on the `glostylelong4colheader` style:

```
4991 \glossarystyle{long4colheader}%
```

Use a `longtable` with 4 columns where the second and last columns may have multiple lines in each row:

```
4992 \renewenvironment{theglossary}%  
4993   {\begin{longtable}{lp{\glsdescwidth}lp{\glspagelistwidth}}}%  
4994   {\end{longtable}}%  
4995 }
```

`altlong4colborder` The `altlong4colborder` style is like `altlong4col` but with a border.

```
4996 \newglossarystyle{altlong4colborder}{%
```

Base it on the `glostylelong4colborder` style:

```
4997 \glossarystyle{long4colborder}%
```

Use a `longtable` with 4 columns where the second and last columns may have multiple lines in each row:

```
4998 \renewenvironment{theglossary}%  
4999   {\begin{longtable}{|lp{\glsdescwidth}|lp{\glspagelistwidth}|}}%  
5000   {\end{longtable}}%  
5001 }
```

`altlong4colheaderborder` The `altlong4colheaderborder` style is like the above but with a header as well as a border.

```
5002 \newglossarystyle{altlong4colheaderborder}{%
```

Base it on the `glostylelong4colheaderborder` style:

```
5003 \glossarystyle{long4colheaderborder}%
```

Use a `longtable` with 4 columns where the second and last columns may have multiple lines in each row:

```
5004 \renewenvironment{theglossary}%  
5005   {\begin{longtable}{|lp{\glsdescwidth}|lp{\glspagelistwidth}|}}%  
5006   {\end{longtable}}%  
5007 }
```

3.5 Glossary Styles using `longtable` (the `glossary-longragged` package)

The glossary styles defined in the package used the `longtable` environment in the glossary and use ragged right formatting for the multiline columns.

```
5008 \ProvidesPackage{glossary-longragged}[2012/09/21 v3.03 (NLCT)]
```

Requires the package:

```
5009 \RequirePackage{array}
```

Requires the package:

```
5010 \RequirePackage{longtable}
```

`\glsdescwidth` This is a length that governs the width of the description column. This may have already been defined.

```
5011 \@ifundefined{glsdescwidth}{%
5012   \newlength{glsdescwidth}
5013   \setlength{glsdescwidth}{0.6\hsize}
5014 }{}
```

`\glspagelistwidth` This is a length that governs the width of the page list column. This may already have been defined.

```
5015 \@ifundefined{glspagelistwidth}{%
5016   \newlength{glspagelistwidth}
5017   \setlength{glspagelistwidth}{0.1\hsize}
5018 }{}
```

`longragged` The longragged glossary style is like the long but uses ragged right formatting for the description column.

```
5019 \newglossarystyle{longragged}{%
```

Use longtable with two columns:

```
5020   \renewenvironment{theglossary}%
5021     {\begin{longtable}[1>{\raggedright}p{\glsdescwidth}}%
5022     {\end{longtable}}%
```

Do nothing at the start of the environment:

```
5023   \renewcommand*{\glossaryheader}{}%
```

No heading between groups:

```
5024   \renewcommand*{\glsgroupheading}[1]{}%
```

Main (level 0) entries displayed in a row:

```
5025   \renewcommand*{\glossaryentryfield}[5]{%
5026     \glstarget{##1}\glstarget{##1}{##2} & ##3\glspostdescription\space ##5%
5027     \tabularnewline}%
```

Sub entries displayed on the following row without the name:

```
5028   \renewcommand*{\glossarysubentryfield}[6]{%
5029     &
5030     \glssubentryitem{##2}%
5031     \glstarget{##2}{\strut}##4\glspostdescription\space ##6%
5032     \tabularnewline}%
```

Blank row between groups:

```
5033   \renewcommand*{\glsgroupskip}{\ifglsnogroupskip\else & \tabularnewline\fi}%
5034 }
```

`longraggedborder` The longraggedborder style is like the above, but with horizontal and vertical lines:

```
5035 \newglossarystyle{longraggedborder}{%
```

Base it on the glostylelongragged style:

```
5036   \glossarystyle{longragged}%
```

Use longtable with two columns with vertical lines between each column:

```
5037 \renewenvironment{theglossary}{%
5038   \begin{longtable}{|l|>{\raggedright}p{\glsdescwidth}|}%
5039   {\end{longtable}}%
```

Place horizontal lines at the head and foot of the table:

```
5040 \renewcommand*{\glossaryheader}{\hline\endhead\hline\endfoot}%
5041 }
```

`longraggedheader` The longraggedheader style is like the longragged style but with a header:

```
5042 \newglossarystyle{longraggedheader}{%
```

Base it on the `glostylelongragged` style:

```
5043 \glossarystyle{longragged}%
```

Set the table's header:

```
5044 \renewcommand*{\glossaryheader}{%
5045   \bfseries \entryname & \bfseries \descriptionname
5046   \tabularnewline\endhead}%
5047 }
```

`longraggedheaderborder` The longraggedheaderborder style is like the longragged style but with a header and border:

```
5048 \newglossarystyle{longraggedheaderborder}{%
```

Base it on the `glostylelongraggedborder` style:

```
5049 \glossarystyle{longraggedborder}%
```

Set the table's header and add horizontal line to table's foot:

```
5050 \renewcommand*{\glossaryheader}{%
5051   \hline\bfseries \entryname & \bfseries \descriptionname
5052   \tabularnewline\hline
5053   \endhead
5054   \hline\endfoot}%
5055 }
```

`longragged3col` The longragged3col style is like longragged but with 3 columns

```
5056 \newglossarystyle{longragged3col}{%
```

Use a longtable with 3 columns:

```
5057 \renewenvironment{theglossary}{%
5058   {\begin{longtable}{l>{\raggedright}p{\glsdescwidth}%
5059     >{\raggedright}p{\glspagelistwidth}}}%
5060   {\end{longtable}}%
```

No table header:

```
5061 \renewcommand*{\glossaryheader}{}%
```

No headings between groups:

```
5062 \renewcommand*{\glsgroupheading}[1]{}%
```

Main (level 0) entries on a row (name in first column, description in second column, page list in last column):

```
5063 \renewcommand*{\glossaryentryfield}[5]{%
5064   \glstarget{##1}\glstarget{##1}{##2} & ##3 & ##5\tabularnewline}%
```

Sub-entries on a separate row (no name, description in second column, page list in third column):

```
5065 \renewcommand*{\glossarysubentryfield}[6]{%
5066   &
5067   \glssubentryitem{##2}%
5068   \glstarget{##2}{\strut}##4 & ##6\tabularnewline}%
```

Blank row between groups:

```
5069 \renewcommand*{\glsgroupskip}{\ifglsnogroupskip\else & \tabularnewline\fi}%
5070 }
```

`longragged3colborder` The `longragged3colborder` style is like the `longragged3col` style but with a border:

```
5071 \newglossarystyle{longragged3colborder}{%
```

Base it on the `glostylelongragged3col` style:

```
5072 \glossarystyle{longragged3col}%
```

Use a `longtable` with 3 columns with vertical lines around them:

```
5073 \renewenvironment{theglossary}%
5074   {\begin{longtable}{|l|>{\raggedright}p{\glsdescwidth}|%
5075    >{\raggedright}p{\glspagelistwidth}|}%
5076   {\end{longtable}}%
```

Place horizontal lines at the head and foot of the table:

```
5077 \renewcommand*{\glossaryheader}{\hline\endhead\hline\endfoot}%
5078 }
```

`longragged3colheader` The `longragged3colheader` style is like `longragged3col` but with a header row:

```
5079 \newglossarystyle{longragged3colheader}{%
```

Base it on the `glostylelongragged3col` style:

```
5080 \glossarystyle{longragged3col}%
```

Set the table's header:

```
5081 \renewcommand*{\glossaryheader}{%
5082   \bfseries\entryname&\bfseries\descriptionname&
5083   \bfseries\pagelistname\tabularnewline\endhead}%
5084 }
```

`longragged3colheaderborder` The `longragged3colheaderborder` style is like the above but with a border

```
5085 \newglossarystyle{longragged3colheaderborder}{%
```

Base it on the `glostylelongragged3colborder` style:

```
5086 \glossarystyle{longragged3colborder}%
```

Set the table's header and add horizontal line at table's foot:

```
5087 \renewcommand*{\glossaryheader}{%
5088   \hline
5089   \bfseries\entryname&\bfseries\descriptionname&
5090   \bfseries\pagelistname\tabularnewline\hline\endhead
5091   \hline\endfoot}%
5092 }
```

`altlongragged4col` The `altlongragged4col` style is like the `altlong4col` style defined in the package, except that ragged right formatting is used for the description and page list columns.

```
5093 \newglossarystyle{altlongragged4col}{%
```

Use a longtable with 4 columns where the second and last columns may have multiple lines in each row:

```
5094 \renewenvironment{theglossary}%
5095   {\begin{longtable}{l>{\raggedright}p{\glsdescwidth}l%
5096     >{\raggedright}p{\glspagelistwidth}}}%
5097   {\end{longtable}}%
```

No table header:

```
5098 \renewcommand*{\glossaryheader}{}%
```

No group headings:

```
5099 \renewcommand*{\glsgroupheading}[1]{}%
```

Main (level 0) entries on a single row (name in first column, description in second column, symbol in third column, page list in last column):

```
5100 \renewcommand*{\glossaryentryfield}[5]{%
5101   \glsentryitem{##1}\glstarget{##1}{##2} & ##3 & ##4 & ##5\tabularnewline}%
```

Sub entries on a single row with no name (description in second column, symbol in third column, page list in last column):

```
5102 \renewcommand*{\glossarysubentryfield}[6]{%
5103   &
5104   \glssubentryitem{##2}%
5105   \glstarget{##2}{\strut}##4 & ##5 & ##6\tabularnewline}%
```

Blank row between groups:

```
5106 \renewcommand*{\glsgroupskip}{\ifglsnogroupskip\else & & \tabularnewline\fi}%
5107 }
```

`ongragged4colheader` The `altlongragged4colheader` style is like `altlongragged4col` but with a header row.

```
5108 \newglossarystyle{altlongragged4colheader}{%
```

Base it on the `glostylealtlongragged4col` style:

```
5109 \glossarystyle{altlongragged4col}%
```

Use a longtable with 4 columns where the second and last columns may have multiple lines in each row:

```
5110 \renewenvironment{theglossary}%
5111   {\begin{longtable}{l>{\raggedright}p{\glsdescwidth}l%
5112     >{\raggedright}p{\glspagelistwidth}}}%
5113   {\end{longtable}}%
```

Table has a header:

```
5114 \renewcommand*{\glossaryheader}{%
5115   \bfseries\entryname&\bfseries\descriptionname&
5116   \bfseries \symbolname&
5117   \bfseries\pagelistname\tabularnewline\endhead}%
5118 }
```

`longragged4colborder` The `altlongragged4colborder` style is like `altlongragged4col` but with a border.

```
5119 \newglossarystyle{altlongragged4colborder}{%
```

Base it on the `glostylealtlongragged4col` style:

```
5120 \glossarystyle{altlongragged4col}%
```

Use a longtable with 4 columns where the second and last columns may have multiple lines in each row:

```
5121 \renewenvironment{theglossary}%
5122   {\begin{longtable}{|l|>{\raggedright}p{\glsdescwidth}|l|%
5123     >{\raggedright}p{\glspagelistwidth}|}%
5124   {\end{longtable}}%
```

Add horizontal lines to the head and foot of the table:

```
5125 \renewcommand*{\glossaryheader}{\hline\endhead\hline\endfoot}%
5126 }
```

`longragged4colheaderborder` The `altlongragged4colheaderborder` style is like the above but with a header as well as a border.

```
5127 \newglossarystyle{altlongragged4colheaderborder}{%
```

Base it on the `glostylealtlongragged4col` style:

```
5128 \glossarystyle{altlongragged4col}%
```

Use a longtable with 4 columns where the second and last columns may have multiple lines in each row:

```
5129 \renewenvironment{theglossary}%
5130   {\begin{longtable}{|l|>{\raggedright}p{\glsdescwidth}|l|%
5131     >{\raggedright}p{\glspagelistwidth}|}%
5132   {\end{longtable}}%
```

Add table header and horizontal line at the table's foot:

```
5133 \renewcommand*{\glossaryheader}{%
5134   \hline\bfseries\entryname&\bfseries\descriptionname&
5135   \bfseries \symbolname&
5136   \bfseries\pagelistname\tabularnewline\hline\endhead
5137   \hline\endfoot}%
5138 }
```

3.6 Glossary Styles using multicol (glossary-mcols.sty)

The style file defines glossary styles that use the multicol package. These use the tree-like glossary styles in a multicol environment.

```
5139 \ProvidesPackage{glossary-mcols}[2012/05/21 v1.0 (NLCT)]
```

Required packages:

```
5140 \RequirePackage{multicol}
5141 \RequirePackage{glossary-tree}
```

`\glsmcols` Define macro in which to store the number of columns. (Defaults to 2.)

```
5142 \newcommand*\glsmcols{2}
```

`mcolindex` Multi-column index style. Same as the index, but puts the glossary in multiple columns. (Ideally the glossary title should go in the optional argument of multicol, but the title isn't part of the glossary style.)

```
5143 \newglossarystyle{mcolindex}{%
5144   \glossarystyle{index}%
5145   \renewenvironment{theglossary}%
5146     {%
5147       \begin{multicols}{\glsmcols}
5148       \setlength{\parindent}{0pt}%
5149       \setlength{\parskip}{0pt plus 0.3pt}%
5150       \let\item\@idxitem}%
5151   {\end{multicols}}%
5152 }
```

`mcolindexgroup` As `mcolindex` but has headings:

```
5153 \newglossarystyle{mcolindexgroup}{%
5154   \glossarystyle{mcolindex}%
5155   \renewcommand*\glsgroupheading[1]{%
5156     \item\textbf{\glsgroupheading{##1}}\indexspace}%
5157 }
```

`mcolindexhypergroup` The `mcolindexhypergroup` style is like the `mcolindexgroup` style but has hyper navigation.

```
5158 \newglossarystyle{mcolindexhypergroup}{%
```

Base it on the `glostylemcolindex` style:

```
5159   \glossarystyle{mcolindex}%
```

Put navigation links to the groups at the start of the glossary:

```
5160   \renewcommand*\glossaryheader{%
5161     \item\textbf{\glsnavigation}\indexspace}%
```

Add a heading for each group (with a target). The group's title is in bold followed by a vertical gap.

```
5162   \renewcommand*\glsgroupheading[1]{%
5163     \item\textbf{\glsnavhypertarget{##1}}{\glsgroupheading{##1}}}%
```

```
5164 \indexspace}%
5165 }
```

mcoltree Multi-column index style. Same as the tree, but puts the glossary in multiple columns.

```
5166 \newglossarystyle{mcoltree}{%
5167 \glossarystyle{tree}%
5168 \renewenvironment{theglossary}%
5169 {%
5170 \begin{multicols}{\glsmcols}
5171 \setlength{\parindent}{0pt}%
5172 \setlength{\parskip}{0pt plus 0.3pt}%
5173 }%
5174 {\end{multicols}}}%
5175 }
```

mcoltreegroup Like the mcoltree style but the glossary groups have headings.

```
5176 \newglossarystyle{mcoltreegroup}{%
Base it on the glostylemcoltree style:
5177 \glossarystyle{mcoltree}%
Each group has a heading (in bold) followed by a vertical gap):
5178 \renewcommand{\glsgroupheading}[1]{\par
5179 \noindent\textbf{\glsgetgrouptitle{##1}}\par\indexspace}%
5180 }
```

mcoltreehypergroup The mcoltreehypergroup style is like the treegroup style, but has a set of links to the groups at the start of the glossary.

```
5181 \newglossarystyle{mcoltreehypergroup}{%
Base it on the glostylemcoltree style:
5182 \glossarystyle{mcoltree}%
Put navigation links to the groups at the start of the theglossary environment:
5183 \renewcommand*{\glossaryheader}{%
5184 \par\noindent\textbf{\glsnavigation}\par\indexspace}%
Each group has a heading (in bold with a target) followed by a vertical gap):
5185 \renewcommand*{\glsgroupheading}[1]{%
5186 \par\noindent
5187 \textbf{\glsnavhypertarget{##1}{\glsgetgrouptitle{##1}}}\par
5188 \indexspace}%
5189 }
```

mcoltreename Multi-column index style. Same as the treename, but puts the glossary in multiple columns.

```
5190 \newglossarystyle{mcoltreename}{%
5191 \glossarystyle{treename}%
5192 \renewenvironment{theglossary}%
5193 {%
```

```

5194     \begin{multicols}{\glsmcols}
5195     \setlength{\parindent}{0pt}%
5196     \setlength{\parskip}{0pt plus 0.3pt}%
5197   }%
5198   {\end{multicols}}}%
5199 }

```

`mcoltreenamegroup` Like the `mcoltreename` style but the glossary groups have headings.

```

5200 \newglossarystyle{mcoltreenamegroup}{%
      Base it on the glostylemcoltreename style:
5201   \glossarystyle{mcoltreename}%
      Give each group a heading:
5202   \renewcommand{\glsgroupheading}[1]{\par
5203     \noindent\textbf{\glsgetgrouptitle{##1}}\par\indexspace}%
5204 }

```

`treenamehypergroup` The `mcoltreenamehypergroup` style is like the `mcoltreenamegroup` style, but has a set of links to the groups at the start of the glossary.

```

5205 \newglossarystyle{mcoltreenamehypergroup}{%
      Base it on the glostylemcoltreename style:
5206   \glossarystyle{mcoltreename}%
      Put navigation links to the groups at the start of the theglossary environment:
5207   \renewcommand*{\glossaryheader}{%
5208     \par\noindent\textbf{\glsnavigation}\par\indexspace}%
      Each group has a heading (in bold with a target) followed by a vertical gap):
5209   \renewcommand*{\glsgroupheading}[1]{%
5210     \par\noindent
5211     \textbf{\glsnavhypertarget{##1}{\glsgetgrouptitle{##1}}}\par
5212     \indexspace}%
5213 }

```

`mcolalmtree` Multi-column index style. Same as the `almtree`, but puts the glossary in multiple columns.

```

5214 \newglossarystyle{mcolalmtree}{%
5215   \glossarystyle{almtree}%
5216   \renewenvironment{theglossary}%
5217   {%
5218     \begin{multicols}{\glsmcols}
5219     \def\@gls@prevlevel{-1}%
5220     \mbox{}\par
5221   }%
5222   {\par\end{multicols}}}%
5223 }

```

`mcolalmtreegroup` Like the `mcolalmtree` style but the glossary groups have headings.

```
5224 \newglossarystyle{mcolalmtreegroup}{%
    Base it on the glostylemcolalmtree style:
5225 \glossarystyle{mcolalmtree}%
    Give each group a heading.
5226 \renewcommand{\glsgroupheading}[1]{\par
5227 \def\@gls@prevlevel{-1}%
5228 \hangindent0pt\relax
5229 \parindent0pt\relax
5230 \textbf{\glsgetgrouptitle{##1}}\par\indexspace}%
5231 }
```

`colalmtreehypergroup` The `mcolalmtreehypergroup` style is like the `mcolalmtreegroup` style, but has a set of links to the groups at the start of the glossary.

```
5232 \newglossarystyle{mcolalmtreehypergroup}{%
    Base it on the glostylemcolalmtree style:
5233 \glossarystyle{mcolalmtree}%
    Put the navigation links in the header
5234 \renewcommand*{\glossaryheader}{%
5235 \par
5236 \def\@gls@prevlevel{-1}%
5237 \hangindent0pt\relax
5238 \parindent0pt\relax
5239 \textbf{\glsnavigation}\par\indexspace}%
    Put a hypertarget at the start of each group
5240 \renewcommand*{\glsgroupheading}[1]{%
5241 \par
5242 \def\@gls@prevlevel{-1}%
5243 \hangindent0pt\relax
5244 \parindent0pt\relax
5245 \textbf{\glsnavhypertarget{##1}{\glsgetgrouptitle{##1}}}\par
5246 \indexspace}}
```

3.7 Glossary Styles using supertabular environment (`glossary-super` package)

The glossary styles defined in the package use the `supertabular` environment.

```
5247 \ProvidesPackage{glossary-super}[2012/09/21 v3.03 (NLCT)]
```

Requires the package:

```
5248 \RequirePackage{supertabular}
```

`\glsdescwidth` This is a length that governs the width of the description column. This may already have been defined if `glossary-super` has been loaded.

```
5249 \@ifundefined{glsdescwidth}{%
```

```

5250 \newlength\glsdescwidth
5251 \setlength{\glsdescwidth}{0.6\hsize}
5252 }{}

```

`\glspagelistwidth` This is a length that governs the width of the page list column. This may already have been defined if has been loaded.

```

5253 \@ifundefined{glspagelistwidth}{%
5254 \newlength\glspagelistwidth
5255 \setlength{\glspagelistwidth}{0.1\hsize}
5256 }{}

```

`super` The super glossary style uses the supertabular environment (it uses lengths defined in the package.)

```
5257 \newglossarystyle{super}{%
```

Put the glossary in a supertabular environment with two columns and no head or tail:

```

5258 \renewenvironment{theglossary}%
5259 {\tablehead{}\tabletail}%
5260 \begin{supertabular}{lp{\glsdescwidth}}%
5261 {\end{supertabular}}%

```

Do nothing at the start of the table:

```
5262 \renewcommand*\glossaryheader{}%
```

No group headings:

```
5263 \renewcommand*\glsgroupheading[1]{}%
```

Main (level 0) entries put in a row (name in first column, description and page list in second column):

```

5264 \renewcommand*\glossaryentryfield[5]{%
5265 \glsentryitem{##1}\glstarget{##1}{##2} & ##3\glspostdescription\space ##5\\}%

```

Sub entries put in a row (no name, description and page list in second column):

```

5266 \renewcommand*\glossarysubentryfield[6]{%
5267 &
5268 \glssubentryitem{##2}%
5269 \glstarget{##2}{\strut}##4\glspostdescription\space ##6\\}%

```

Blank row between groups:

```

5270 \renewcommand*\glsgroupskip{\ifglsnogroupskip\else & \\fi}%
5271 }

```

`superborder` The superborder style is like the above, but with horizontal and vertical lines:

```
5272 \newglossarystyle{superborder}{%
```

Base it on the `glostylesuper` style:

```
5273 \glossarystyle{super}%
```

Put the glossary in a supertabular environment with two columns and a horizontal line in the head and tail:

```
5274 \renewenvironment{theglossary}%
5275   {\tablehead{\hline}\tabletail{\hline}%
5276    \begin{supertabular}{|l|p{\glsdescwidth}|}}%
5277   {\end{supertabular}}%
5278 }
```

superheader The superheader style is like the super style, but with a header:

```
5279 \newglossarystyle{superheader}{%
```

Base it on the glostylesuper style:

```
5280 \glossarystyle{super}%
```

Put the glossary in a supertabular environment with two columns, a header and no tail:

```
5281 \renewenvironment{theglossary}%
5282   {\tablehead{\bfseries \entryname & \bfseries \descriptionname\\}%
5283    \tabletail{}}%
5284   \begin{supertabular}{lp{\glsdescwidth}}%
5285   {\end{supertabular}}%
5286 }
```

superheaderborder The superheaderborder style is like the super style but with a header and border:

```
5287 \newglossarystyle{superheaderborder}{%
```

Base it on the glostylesuper style:

```
5288 \glossarystyle{super}%
```

Put the glossary in a supertabular environment with two columns, a header and horizontal lines above and below the table:

```
5289 \renewenvironment{theglossary}%
5290   {\tablehead{\hline\bfseries \entryname &
5291    \bfseries \descriptionname\\ \hline}%
5292    \tabletail{\hline}
5293    \begin{supertabular}{|l|p{\glsdescwidth}|}}%
5294   {\end{supertabular}}%
5295 }
```

super3col The super3col style is like the super style, but with 3 columns:

```
5296 \newglossarystyle{super3col}{%
```

Put the glossary in a supertabular environment with three columns and no head or tail:

```
5297 \renewenvironment{theglossary}%
5298   {\tablehead{}\tabletail{}}%
5299   \begin{supertabular}{lp{\glsdescwidth}p{\glspagelistwidth}}%
5300   {\end{supertabular}}%
```

Do nothing at the start of the table:

```
5301 \renewcommand*{\glossaryheader}{}%
```

No group headings:

```
5302 \renewcommand*\glsgroupheading}[1]{%
```

Main (level 0) entries on a row (name in first column, description in second column, page list in last column):

```
5303 \renewcommand*\glossaryentryfield}[5]{%
```

```
5304 \glsentryitem{##1}\glstarget{##1}{##2} & ##3 & ##5\\}%
```

Sub entries on a row (no name, description in second column, page list in last column):

```
5305 \renewcommand*\glossarysubentryfield}[6]{%
```

```
5306 &
```

```
5307 \glssubentryitem{##2}%
```

```
5308 \glstarget{##2}{\strut}##4 & ##6\\}%
```

Blank row between groups:

```
5309 \renewcommand*\glsgroupskip{\ifglsnogroupskip\else & \\ \fi}%
```

```
5310 }
```

super3colborder The `super3colborder` style is like the `super3col` style, but with a border:

```
5311 \newglossarystyle{super3colborder}{%
```

Base it on the `glostylesuper3col` style:

```
5312 \glossarystyle{super3col}%
```

Put the glossary in a `supertabular` environment with three columns and a horizontal line in the head and tail:

```
5313 \renewenvironment{theglossary}%
```

```
5314 {\tablehead{\hline}\tabletail{\hline}%
```

```
5315 \begin{supertabular}{|l|p{\glsdescwidth}|p{\glspagelistwidth}|}%
```

```
5316 {\end{supertabular}}%
```

```
5317 }
```

super3colheader The `super3colheader` style is like the `super3col` style but with a header row:

```
5318 \newglossarystyle{super3colheader}{%
```

Base it on the `glostylesuper3col` style:

```
5319 \glossarystyle{super3col}%
```

Put the glossary in a `supertabular` environment with three columns, a header and no tail:

```
5320 \renewenvironment{theglossary}%
```

```
5321 {\tablehead{\bfseries\entryname&\bfseries\descriptionname&
```

```
5322 \bfseries\pagelistname\\}\tabletail{}%
```

```
5323 \begin{supertabular}{lp{\glsdescwidth}p{\glspagelistwidth}}%
```

```
5324 {\end{supertabular}}%
```

```
5325 }
```

super3colheaderborder The `super3colheaderborder` style is like the `super3col` style but with a header and border:

```
5326 \newglossarystyle{super3colheaderborder}{%
```

Base it on the `glostylesuper3colborder` style:

```
5327 \glossarystyle{super3colborder}%
```

Put the glossary in a `supertabular` environment with three columns, a header with horizontal lines and a horizontal line in the tail:

```
5328 \renewenvironment{theglossary}%
5329   {\tablehead{\hline
5330     \bfseries\entryname&\bfseries\descriptionname&
5331     \bfseries\pagelistname\\ \hline}%
5332   \tabletail{\hline}%
5333   \begin{supertabular}{|l|p{\glsdescwidth}|p{\glspagelistwidth}|}%
5334   {\end{supertabular}}%
5335 }
```

`super4col` The `super4col` glossary style has four columns, where the third column contains the value of the corresponding symbol key used when that entry was defined.

```
5336 \newglossarystyle{super4col}{%
```

Put the glossary in a `supertabular` environment with four columns and no head or tail:

```
5337 \renewenvironment{theglossary}%
5338   {\tablehead{}\tabletail{}%
5339   \begin{supertabular}{|l|l|l|l|}%
5340   \end{supertabular}}%
```

Do nothing at the start of the table:

```
5341 \renewcommand*{\glossaryheader}{}%
```

No group headings:

```
5342 \renewcommand*{\glsgroupheading}[1]{}%
```

Main (level 0) entries on a row with the name in the first column, description in second column, symbol in third column and page list in last column:

```
5343 \renewcommand*{\glossaryentryfield}[5]{%
5344   \glsentryitem{##1}\glstarget{##1}{##2} & ##3 & ##4 & ##5\\}%
```

Sub entries on a row with no name, the description in the second column, symbol in third column and page list in last column:

```
5345 \renewcommand*{\glossarysubentryfield}[6]{%
5346   &
5347   \glssubentryitem{##2}%
5348   \glstarget{##2}{\strut}##4 & ##5 & ##6\\}%
```

Blank row between groups:

```
5349 \renewcommand*{\glsgroupskip}{\ifglsnogroupskip\else & & \\ \fi}%
5350 }
```

`super4colheader` The `super4colheader` style is like the `super4col` but with a header row.

```
5351 \newglossarystyle{super4colheader}{%
```

Base it on the `glostylesuper4col` style:

```
5352 \glossarystyle{super4col}%
```

Put the glossary in a supertabular environment with four columns, a header and no tail:

```

5353 \renewenvironment{theglossary}%
5354   {\tablehead{\bfseries\entryname&\bfseries\descriptionname&
5355             \bfseries\symbolname &
5356             \bfseries\pagelistname\\}}%
5357   \tabletail{}}%
5358   \begin{supertabular}{|l|l|l|l|}%
5359   {\end{supertabular}}%
5360 }

```

`super4colborder` The `super4colborder` style is like the `super4col` but with a border.

```
5361 \newglossarystyle{super4colborder}{%
```

Base it on the `glostylesuper4col` style:

```
5362 \glossarystyle{super4col}%
```

Put the glossary in a supertabular environment with four columns and a horizontal line in the head and tail:

```

5363 \renewenvironment{theglossary}%
5364   {\tablehead{\hline}\tabletail{\hline}%
5365   \begin{supertabular}{|l|l|l|l|}%
5366   {\end{supertabular}}%
5367 }

```

`super4colheaderborder` The `super4colheaderborder` style is like the `super4col` but with a header and border.

```
5368 \newglossarystyle{super4colheaderborder}{%
```

Base it on the `glostylesuper4col` style:

```
5369 \glossarystyle{super4col}%
```

Put the glossary in a supertabular environment with four columns and a header bordered by horizontal lines and a horizontal line in the tail:

```

5370 \renewenvironment{theglossary}%
5371   {\tablehead{\hline\bfseries\entryname&\bfseries\descriptionname&
5372             \bfseries\symbolname &
5373             \bfseries\pagelistname\\}\tabletail{\hline}%
5374   \begin{supertabular}{|l|l|l|l|}%
5375   {\end{supertabular}}%
5376 }

```

`altsuper4col` The `altsuper4col` glossary style is like `super4col` but has provision for multiline descriptions.

```
5377 \newglossarystyle{altsuper4col}{%
```

Base it on the `glostylesuper4col` style:

```
5378 \glossarystyle{super4col}%
```

Put the glossary in a supertabular environment with four columns and no head or tail:

```
5379 \renewenvironment{theglossary}%
5380   {\tablehead{}\tabletail{}}%
5381   \begin{supertabular}{lp{\glstdescwidth}lp{\glspagelistwidth}}}%
5382   {\end{supertabular}}}%
5383 }
```

`altsuper4colheader` The `altsuper4colheader` style is like the `altsuper4col` but with a header row.

```
5384 \newglossarystyle{altsuper4colheader}{%
```

Base it on the `glostylesuper4colheader` style:

```
5385 \glossarystyle{super4colheader}%
```

Put the glossary in a supertabular environment with four columns, a header and no tail:

```
5386 \renewenvironment{theglossary}%
5387   {\tablehead{\bfseries\entryname&\bfseries\descriptionname&
5388     \bfseries\symbolname &
5389     \bfseries\pagelistname\\}\tabletail{}}%
5390   \begin{supertabular}{lp{\glstdescwidth}lp{\glspagelistwidth}}}%
5391   {\end{supertabular}}}%
5392 }
```

`altsuper4colborder` The `altsuper4colborder` style is like the `altsuper4col` but with a border.

```
5393 \newglossarystyle{altsuper4colborder}{%
```

Base it on the `glostylesuper4colborder` style:

```
5394 \glossarystyle{super4colborder}%
```

Put the glossary in a supertabular environment with four columns and a horizontal line in the head and tail:

```
5395 \renewenvironment{theglossary}%
5396   {\tablehead{\hline}\tabletail{\hline}}%
5397   \begin{supertabular}%
5398     {||lp{\glstdescwidth}||lp{\glspagelistwidth}||}%
5399   {\end{supertabular}}}%
5400 }
```

`altsuper4colheaderborder` The `altsuper4colheaderborder` style is like the `altsuper4col` but with a header and border.

```
5401 \newglossarystyle{altsuper4colheaderborder}{%
```

Base it on the `glostylesuper4colheaderborder` style:

```
5402 \glossarystyle{super4colheaderborder}%
```

Put the glossary in a supertabular environment with four columns and a header bordered by horizontal lines and a horizontal line in the tail:

```
5403 \renewenvironment{theglossary}%
5404   {\tablehead{\hline
```

```

5405     \bfseries\entryname &
5406     \bfseries\descriptionname &
5407     \bfseries\symbolname &
5408     \bfseries\pagelistname\\\hline}%
5409     \tabletail{\hline}%
5410     \begin{supertabular}%
5411         {1|p{\glsdescwidth}|1|p{\glspagelistwidth}|}%
5412     {\end{supertabular}}%
5413 }

```

3.8 Glossary Styles using supertabular environment (glossary-superragged package)

The glossary styles defined in the package use the supertabular environment. These styles are like those provided by the package, except that the multiline columns have ragged right justification.

```
5414 \ProvidesPackage{glossary-superragged}[2012/09/21 v3.03 (NLCT)]
```

Requires the package:

```
5415 \RequirePackage{array}
```

Requires the package:

```
5416 \RequirePackage{supertabular}
```

`\glsdescwidth` This is a length that governs the width of the description column. This may already have been defined.

```

5417 \@ifundefined{glsdescwidth}{%
5418   \newlength\glsdescwidth
5419   \setlength{\glsdescwidth}{0.6\hsize}
5420 }{}

```

`\glspagelistwidth` This is a length that governs the width of the page list column. This may already have been defined.

```

5421 \@ifundefined{glspagelistwidth}{%
5422   \newlength\glspagelistwidth
5423   \setlength{\glspagelistwidth}{0.1\hsize}
5424 }{}

```

`superragged` The superragged glossary style uses the supertabular environment.

```
5425 \newglossarystyle{superragged}{%
```

Put the glossary in a supertabular environment with two columns and no head or tail:

```

5426   \renewenvironment{theglossary}%
5427     {\tablehead{\tabletail}{}%
5428     \begin{supertabular}{1>{\raggedright}p{\glsdescwidth}}%
5429     {\end{supertabular}}%

```

Do nothing at the start of the table:

```
5430   \renewcommand*{\glossaryheader}{}%
```

No group headings:

```
5431 \renewcommand*{\glsgroupheading}[1]{%
```

Main (level 0) entries put in a row (name in first column, description and page list in second column):

```
5432 \renewcommand*{\glossaryentryfield}[5]{%
5433 \glsentryitem{##1}\glstarget{##1}{##2} & ##3\glspostdescription\space ##5%
5434 \tabularnewline}%
```

Sub entries put in a row (no name, description and page list in second column):

```
5435 \renewcommand*{\glossarysubentryfield}[6]{%
5436 &
5437 \glssubentryitem{##2}%
5438 \glstarget{##2}{\strut}##4\glspostdescription\space ##6%
5439 \tabularnewline}%
```

Blank row between groups:

```
5440 \renewcommand*{\glsgroupskip}{\ifglsnogroupskip\else & \tabularnewline\fi}%
5441 }
```

superraggedborder The superraggedborder style is like the above, but with horizontal and vertical lines:

```
5442 \newglossarystyle{superraggedborder}{%
```

Base it on the `glostylesuperragged` style:

```
5443 \glossarystyle{superragged}%
```

Put the glossary in a `supertabular` environment with two columns and a horizontal line in the head and tail:

```
5444 \renewenvironment{theglossary}%
5445 {\tablehead{\hline}\tabletail{\hline}%
5446 \begin{supertabular}{|l|>{\raggedright}p{\glsdescwidth}|}}%
5447 {\end{supertabular}}%
5448 }
```

superraggedheader The superraggedheader style is like the super style, but with a header:

```
5449 \newglossarystyle{superraggedheader}{%
```

Base it on the `glostylesuperragged` style:

```
5450 \glossarystyle{superragged}%
```

Put the glossary in a `supertabular` environment with two columns, a header and no tail:

```
5451 \renewenvironment{theglossary}%
5452 {\tablehead{\bfseries \entryname & \bfseries \descriptionname
5453 \tabularnewline}%
5454 \tabletail{}}%
5455 \begin{supertabular}{l>{\raggedright}p{\glsdescwidth}}}%
5456 {\end{supertabular}}%
5457 }
```

rraggedheaderborder The superraggedheaderborder style is like the superragged style but with a header and border:

```
5458 \newglossarystyle{superraggedheaderborder}{%
```

Base it on the glostylesuper style:

```
5459 \glossarystyle{superragged}%
```

Put the glossary in a supertabular environment with two columns, a header and horizontal lines above and below the table:

```
5460 \renewenvironment{theglossary}%  
5461   {\tablehead{\hline\bfseries \entryname &  
5462     \bfseries \descriptionname\tabularnewline\hline}%  
5463   \tabletail{\hline}  
5464   \begin{supertabular}{|l|>{\raggedright}p{\glsdescwidth}|}%  
5465   {\end{supertabular}}%  
5466 }
```

superragged3col The superragged3col style is like the superragged style, but with 3 columns:

```
5467 \newglossarystyle{superragged3col}{%
```

Put the glossary in a supertabular environment with three columns and no head or tail:

```
5468 \renewenvironment{theglossary}%  
5469   {\tablehead{}\tabletail{}}%  
5470   \begin{supertabular}{|l>{\raggedright}p{\glsdescwidth}%  
5471     >{\raggedright}p{\glspagelistwidth}}%  
5472   {\end{supertabular}}%
```

Do nothing at the start of the table:

```
5473 \renewcommand*{\glossaryheader}{}%
```

No group headings:

```
5474 \renewcommand*{\glsgroupheading}[1]{}%
```

Main (level 0) entries on a row (name in first column, description in second column, page list in last column):

```
5475 \renewcommand*{\glossaryentryfield}[5]{%  
5476   \glsentryitem{##1}\glstarget{##1}{##2} & ##3 & ##5\tabularnewline}%
```

Sub entries on a row (no name, description in second column, page list in last column):

```
5477 \renewcommand*{\glossarysubentryfield}[6]{%  
5478   &  
5479   \glssubentryitem{##2}%  
5480   \glstarget{##2}{\strut}##4 & ##6\tabularnewline}%
```

Blank row between groups:

```
5481 \renewcommand*{\glsgroupskip}{\ifglsnogroupskip\else & \tabularnewline\fi}%  
5482 }
```

`superragged3colborder` The `superragged3colborder` style is like the `superragged3col` style, but with a border:

```
5483 \newglossarystyle{superragged3colborder}{%
```

```
    Base it on the glostylesuperragged3col style:
```

```
5484   \glossarystyle{superragged3col}%
```

```
    Put the glossary in a supertabular environment with three columns and a horizontal line in the head and tail:
```

```
5485   \renewenvironment{theglossary}{%
```

```
5486     {\tablehead{\hline}\tabletail{\hline}%
```

```
5487     \begin{supertabular}{|l|>{\raggedright}p{\glsdescwidth}|%
```

```
5488       >{\raggedright}p{\glspagelistwidth}|}%
```

```
5489     {\end{supertabular}}}%
```

```
5490 }
```

`superragged3colheader` The `superragged3colheader` style is like the `superragged3col` style but with a header row:

```
5491 \newglossarystyle{superragged3colheader}{%
```

```
    Base it on the glostylesuperragged3col style:
```

```
5492   \glossarystyle{superragged3col}%
```

```
    Put the glossary in a supertabular environment with three columns, a header and no tail:
```

```
5493   \renewenvironment{theglossary}{%
```

```
5494     {\tablehead{\bfseries\entryname&\bfseries\descriptionname&
```

```
5495       \bfseries\pagelistname\tablearnewline}\tabletail{}}%
```

```
5496     \begin{supertabular}{|l>{\raggedright}p{\glsdescwidth}|%
```

```
5497       >{\raggedright}p{\glspagelistwidth}}}%
```

```
5498     {\end{supertabular}}}%
```

```
5499 }
```

`superragged3colheaderborder` The `superragged3colheaderborder` style is like the `superragged3col` style but with a header and border:

```
5500 \newglossarystyle{superragged3colheaderborder}{%
```

```
    Base it on the glostylesuperragged3colborder style:
```

```
5501   \glossarystyle{superragged3colborder}%
```

```
    Put the glossary in a supertabular environment with three columns, a header with horizontal lines and a horizontal line in the tail:
```

```
5502   \renewenvironment{theglossary}{%
```

```
5503     {\tablehead{\hline
```

```
5504       \bfseries\entryname&\bfseries\descriptionname&
```

```
5505       \bfseries\pagelistname\tablearnewline\hline}%
```

```
5506     \tabletail{\hline}%
```

```
5507     \begin{supertabular}{|l|>{\raggedright}p{\glsdescwidth}|%
```

```
5508       >{\raggedright}p{\glspagelistwidth}|}%
```

```
5509     {\end{supertabular}}}%
```

```
5510 }
```

`altsuperragged4col` The `altsuperragged4col` glossary style is like `altsuper4col` style in the package but uses ragged right formatting in the description and page list columns.

```

5511 \newglossarystyle{altsuperragged4col}{%
    Put the glossary in a supertabular environment with four columns and no head
    or tail:
5512   \renewenvironment{theglossary}%
5513     {\tablehead{}\tabletail{}}%
5514     \begin{supertabular}{1>{\raggedright}p{\glsdescwidth}1%
5515       >{\raggedright}p{\glspagelistwidth}}}%
5516     {\end{supertabular}}%

    Do nothing at the start of the table:
5517   \renewcommand*{\glossaryheader}{}%

    No group headings:
5518   \renewcommand*{\glsgroupheading}[1]{}%

    Main (level 0) entries on a row with the name in the first column, description
    in second column, symbol in third column and page list in last column:
5519   \renewcommand*{\glossaryentryfield}[5]{%
5520     \glsentryitem{##1}\glstarget{##1}{##2} & ##3 & ##4 & ##5\tabularnewline}%

    Sub entries on a row with no name, the description in the second column, sym-
    bol in third column and page list in last column:
5521   \renewcommand*{\glossarysubentryfield}[6]{%
5522     &
5523     \glsesubentryitem{##2}%
5524     \glstarget{##2}{\strut}##4 & ##5 & ##6\tabularnewline}%

    Blank row between groups:
5525   \renewcommand*{\glsgroupskip}{\ifglsnogroupskip\else & & \tabularnewline\fi}%
5526 }

```

`perragged4colheader` The `altsuperragged4colheader` style is like the `altsuperragged4col` style but with a header row.

```

5527 \newglossarystyle{altsuperragged4colheader}{%
    Base it on the glostylealtsuperragged4col style:
5528   \glossarystyle{altsuperragged4col}%

    Put the glossary in a supertabular environment with four columns, a header and
    no tail:
5529   \renewenvironment{theglossary}%
5530     {\tablehead{\bfseries\entryname&\bfseries\descriptionname&
5531       \bfseries\symbolname &
5532       \bfseries\pagelistname\tabularnewline}\tabletail{}}%
5533     \begin{supertabular}{1>{\raggedright}p{\glsdescwidth}1%
5534       >{\raggedright}p{\glspagelistwidth}}}%
5535     {\end{supertabular}}%
5536 }

```

`altsuperragged4colborder` The `altsuperragged4colborder` style is like the `altsuperragged4col` style but with a border.

```
5537 \newglossarystyle{altsuperragged4colborder}{%
```

Base it on the `glostylealtsuperragged4col` style:

```
5538 \glossarystyle{altsuper4col}%
```

Put the glossary in a `supertabular` environment with four columns and a horizontal line in the head and tail:

```
5539 \renewenvironment{theglossary}%  
5540   {\tablehead{\hline}\tabletail{\hline}}%  
5541   \begin{supertabular}%  
5542     {||>{\raggedright}p{\glsdescwidth}|||}%  
5543     >{\raggedright}p{\glspagelistwidth}||}%  
5544   {\end{supertabular}}%  
5545 }
```

`altsuperragged4colheaderborder` The `altsuperragged4colheaderborder` style is like the `altsuperragged4col` style but with a header and border.

```
5546 \newglossarystyle{altsuperragged4colheaderborder}{%
```

Base it on the `glostylealtsuperragged4col` style:

```
5547 \glossarystyle{altsuperragged4col}%
```

Put the glossary in a `supertabular` environment with four columns and a header bordered by horizontal lines and a horizontal line in the tail:

```
5548 \renewenvironment{theglossary}%  
5549   {\tablehead{\hline  
5550     \bfseries\entryname &  
5551     \bfseries\descriptionname &  
5552     \bfseries\symbolname &  
5553     \bfseries\pagelistname\tablearnewline\hline}}%  
5554   \tabletail{\hline}}%  
5555   \begin{supertabular}%  
5556     {||>{\raggedright}p{\glsdescwidth}|||}%  
5557     >{\raggedright}p{\glspagelistwidth}||}%  
5558   {\end{supertabular}}%  
5559 }
```

3.9 Tree Styles (`glossary-tree.sty`)

The style file defines glossary styles that have a tree-like structure. These are designed for hierarchical glossaries.

```
5560 \ProvidesPackage{glossary-tree}[2012/09/21 v3.03 (NLCT)]
```

`index` The `index` glossary style is similar in style to the way indices are usually typeset using `\item`, `\subitem` and `\subsubitem`. The entry name is set in bold. If an entry has a symbol, it is placed in brackets after the name. Then the description is displayed, followed by the number list. This style allows up to three levels.

```
5561 \newglossarystyle{index}{%
```

Set the paragraph indentation and skip and define `\item` to be the same as that used by `theindex`:

```
5562 \renewenvironment{theglossary}%  
5563   {\setlength{\parindent}{0pt}%  
5564    \setlength{\parskip}{0pt plus 0.3pt}%  
5565    \let\item\@idxitem}%  
5566   {}}%
```

Do nothing at the start of the environment:

```
5567 \renewcommand*{\glossaryheader}{}%
```

No group headers:

```
5568 \renewcommand*{\glsgroupheading}[1]{}%
```

Main (level 0) entry starts a new item with the name in bold followed by the symbol in brackets (if it exists), the description and the page list.

```
5569 \renewcommand*{\glossaryentryfield}[5]{%  
5570 \item\glsentryitem{##1}\textbf{\glstarget{##1}{##2}}%  
5571 \ifx\relax##4\relax  
5572   \else  
5573     \space{##4}%  
5574   \fi  
5575   \space ##3\glspostdescription \space ##5}%
```

Sub entries: level 1 entries use `\subitem`, levels greater than 1 use `\subsubitem`. The level (`##1`) shouldn't be 0, as that's catered by `\glossaryentryfield`, but for completeness, if the level is 0, `\item` is used. The name is put in bold, followed by the symbol in brackets (if it exists), the description and the page list.

```
5576 \renewcommand*{\glossarysubentryfield}[6]{%  
5577   \ifcase##1\relax  
5578     % level 0  
5579     \item  
5580   \or  
5581     % level 1  
5582     \subitem  
5583     \glssubentryitem{##2}%  
5584   \else  
5585     % all other levels  
5586     \subsubitem  
5587   \fi  
5588   \textbf{\glstarget{##2}{##3}}%  
5589   \ifx\relax##5\relax  
5590   \else  
5591     \space{##5}%  
5592   \fi  
5593   \space##4\glspostdescription\space ##6}%
```

Vertical gap between groups is the same as that used by indices:

```
5594 \renewcommand*{\glsgroupskip}{\ifglsnogroupskip\else\indexspace\fi}}
```

`indexgroup` The `indexgroup` style is like the `index` style but has headings.

```
5595 \newglossarystyle{indexgroup}{%
```

Base it on the `glostyleindex` style:

```
5596 \glossarystyle{index}{%
```

Add a heading for each group. This puts the group's title in bold followed by a vertical gap.

```
5597 \renewcommand*{\glsgroupheading}[1]{%
```

```
5598 \item\textbf{\glsgetgrouptitle{##1}}\indexspace}%
```

```
5599 }
```

`indexhypergroup` The `indexhypergroup` style is like the `indexgroup` style but has hyper navigation.

```
5600 \newglossarystyle{indexhypergroup}{%
```

Base it on the `glostyleindex` style:

```
5601 \glossarystyle{index}{%
```

Put navigation links to the groups at the start of the glossary:

```
5602 \renewcommand*{\glossaryheader}{%
```

```
5603 \item\textbf{\glsnavigation}\indexspace}%
```

Add a heading for each group (with a target). The group's title is in bold followed by a vertical gap.

```
5604 \renewcommand*{\glsgroupheading}[1]{%
```

```
5605 \item\textbf{\glsnavhypertarget{##1}}{\glsgetgrouptitle{##1}}}%
```

```
5606 \indexspace}%
```

```
5607 }
```

`tree` The tree glossary style is similar in style to the `index` style, but can have arbitrary levels.

```
5608 \newglossarystyle{tree}{%
```

Set the paragraph indentation and skip:

```
5609 \renewenvironment{theglossary}{%
```

```
5610 {\setlength{\parindent}{0pt}}%
```

```
5611 \setlength{\parskip}{0pt plus 0.3pt}}%
```

```
5612 {}%
```

Do nothing at the start of the `theglossary` environment:

```
5613 \renewcommand*{\glossaryheader}{}%
```

No group headings:

```
5614 \renewcommand*{\glsgroupheading}[1]{}%
```

Main (level 0) entries: name in bold, followed by symbol in brackets (if it exists), the description and the page list:

```
5615 \renewcommand{\glossaryentryfield}[5]{%
```

```
5616 \hangindent0pt\relax
```

```
5617 \parindent0pt\relax
```

```
5618 \glsentryitem{##1}\textbf{\glsstarget{##1}}{##2}}%
```

```
5619 \ifx\relax##4\relax
```

```

5620 \else
5621 \space{##4}%
5622 \fi
5623 \space ##3\glspostdescription \space ##5\par}%

```

Sub entries: level $\langle n \rangle$ is indented by $\langle n \rangle$ times `\glstreeindent`. The name is in bold, followed by the symbol in brackets (if it exists), the description and the page list.

```

5624 \renewcommand{\glossarysubentryfield}[6]{%
5625 \hangindent##1\glstreeindent\relax
5626 \parindent##1\glstreeindent\relax
5627 \ifnum##1=1\relax
5628 \glssubentryitem{##2}%
5629 \fi
5630 \textbf{\glstarget{##2}{##3}}%
5631 \ifx\relax##5\relax
5632 \else
5633 \space{##5}%
5634 \fi
5635 \space##4\glspostdescription\space ##6\par}%

```

Vertical gap between groups is the same as that used by indices:

```

5636 \renewcommand*{\glsgroupskip}{\ifglsnogroupskip\else\indexspace\fi}}

```

`treegroup` Like the tree style but the glossary groups have headings.

```

5637 \newglossarystyle{treegroup}{%

```

Base it on the `glostyletree` style:

```

5638 \glossarystyle{tree}%

```

Each group has a heading (in bold) followed by a vertical gap):

```

5639 \renewcommand{\glsgroupheading}[1]{\par
5640 \noindent\textbf{\glsgetgrouptitle{##1}}\par\indexspace}%
5641 }

```

`treehypergroup` The `treehypergroup` style is like the `treegroup` style, but has a set of links to the groups at the start of the glossary.

```

5642 \newglossarystyle{treehypergroup}{%

```

Base it on the `glostyletree` style:

```

5643 \glossarystyle{tree}%

```

Put navigation links to the groups at the start of the `theglossary` environment:

```

5644 \renewcommand*{\glossaryheader}{%
5645 \par\noindent\textbf{\glsnavigation}\par\indexspace}%

```

Each group has a heading (in bold with a target) followed by a vertical gap):

```

5646 \renewcommand*{\glsgroupheading}[1]{%
5647 \par\noindent
5648 \textbf{\glsnavhypertarget{##1}{\glsgetgrouptitle{##1}}}\par
5649 \indexspace}%
5650 }

```

`\glstreeindent` Length governing left indent for each level of the tree style.

```
5651 \newlength\glstreeindent
5652 \setlength{\glstreeindent}{10pt}
```

`treenoname` The `treenoname` glossary style is like the tree style, but doesn't print the name or symbol for sub-levels.

```
5653 \newglossarystyle{treenoname}{%
  Set the paragraph indentation and skip:
5654   \renewenvironment{theglossary}{%
5655     {\setlength{\parindent}{0pt}}%
5656     \setlength{\parskip}{0pt plus 0.3pt}}%
5657   {}}%
```

No header:

```
5658 \renewcommand*{\glossaryheader}{}%
```

No group headings:

```
5659 \renewcommand*{\glsgroupheading}[1]{}%
```

Main (level 0) entries: the name is in bold, followed by the symbol in brackets (if it exists), the description and the page list.

```
5660 \renewcommand{\glossaryentryfield}[5]{%
5661   \hangindent0pt\relax
5662   \parindent0pt\relax
5663   \glsentryitem{##1}\textbf{\glstarget{##1}{##2}}%
5664   \ifx\relax##4\relax
5665   \else
5666     \space{##4}%
5667   \fi
5668   \space ##3\glspostdescription \space ##5\par}%
```

Sub entries: level $\langle n \rangle$ is indented by $\langle n \rangle$ times `\glstreeindent`. The name and symbol are omitted. The description followed by the page list are displayed.

```
5669 \renewcommand{\glossarysubentryfield}[6]{%
5670   \hangindent##1\glstreeindent\relax
5671   \parindent##1\glstreeindent\relax
5672   \ifnum##1=1\relax
5673     \glssubentryitem{##2}%
5674   \fi
5675   \glstarget{##2}{\strut}%
5676   ##4\glspostdescription\space ##6\par}%
```

Vertical gap between groups is the same as that used by indices:

```
5677 \renewcommand*{\glsgroupskip}{\ifglsnogroupskip\else\indexspace\fi}%
5678 }
```

`treenonamegroup` Like the `treenoname` style but the glossary groups have headings.

```
5679 \newglossarystyle{treenonamegroup}{%
```

Base it on the `glostyletreenoname` style:

```
5680 \glossarystyle{treenoname}%
```

Give each group a heading:

```
5681 \renewcommand{\glsgroupheading}[1]{\par
5682 \noindent\textbf{\glsgetgrouptitle{##1}}\par\indexspace}%
5683 }
```

`treenonamehypergroup` The `treenonamehypergroup` style is like the `treenonamegroup` style, but has a set of links to the groups at the start of the glossary.

```
5684 \newglossarystyle{treenonamehypergroup}{%
```

Base it on the `glostyletreenoname` style:

```
5685 \glossarystyle{treenoname}%
```

Put navigation links to the groups at the start of the `theglossary` environment:

```
5686 \renewcommand*\glossaryheader}{%
5687 \par\noindent\textbf{\glsnavigation}\par\indexspace}%
```

Each group has a heading (in bold with a target) followed by a vertical gap):

```
5688 \renewcommand*\glsgroupheading}[1]{%
5689 \par\noindent
5690 \textbf{\glsnavhypertarget{##1}{\glsgetgrouptitle{##1}}}\par
5691 \indexspace}%
5692 }
```

`\glssetwidest` `\glssetwidest[level]{text}` sets the widest text for the given level. It is used by the `almtree` glossary styles to determine the indentation of each level.

```
5693 \newcommand*\glssetwidest}[2][0]{%
5694 \expandafter\def\csname @glswidestname\romannumeral#1\endcsname{%
5695 #2}%
5696 }
```

`\@glswidestname` Initialise `\@glswidestname`.

```
5697 \newcommand*\@glswidestname}{}
```

`almtree` The `almtree` glossary style is similar in style to the `tree` style, but the indentation is obtained from the width of `\@glswidestname` which is set using `\glssetwidest`.

```
5698 \newglossarystyle{almtree}{%
```

Redefine the `theglossary` environment.

```
5699 \renewenvironment{theglossary}%
5700 {\def\@gls@prevlevel{-1}%
5701 \mbox{}\par}%
5702 {\par}%
```

Set the header and group headers to nothing.

```
5703 \renewcommand*\glossaryheader}{}%
5704 \renewcommand*\glsgroupheading}[1]{}%
```

Redefine the way that the level 0 entries are displayed.

```
5705 \renewcommand{\glossaryentryfield}[5]{%
```

If the level hasn't changed, keep the same settings, otherwise change `\glstreeindent` accordingly.

```
5706 \ifnum\@gls@prevlevel=0\relax
5707 \else
```

Find out how big the indentation should be by measuring the widest entry.

```
5708 \settowidth{\glstreeindent}{\textbf{\@glswidestname\space}}%
```

Set the hangindent and paragraph indent.

```
5709 \hangindent\glstreeindent
5710 \parindent\glstreeindent
5711 \fi
```

Put the name to the left of the paragraph block.

```
5712 \makebox[0pt][r]{\makebox[\glstreeindent][l]{%
5713 \glssentryitem{##1}\textbf{\glstarget{##1}{##2}}}}%
```

If the symbol is missing, ignore it, otherwise put it in brackets.

```
5714 \ifx\relax##4\relax
5715 \else
5716 (##4)\space
5717 \fi
```

Do the description followed by the description terminator and location list.

```
5718 ##3\glspostdescription \space ##5\par
```

Set the previous level to 0.

```
5719 \def\@gls@prevlevel{0}%
5720 }%
```

Redefine the way sub-entries are displayed.

```
5721 \renewcommand{\glossarysubentryfield}[6]{%
```

Increment and display the sub-entry counter if this is a level 1 entry and the sub-entry counter is in use.

```
5722 \ifnum##1=1\relax
5723 \glssubentryitem{##2}%
5724 \fi
```

If the level hasn't changed, keep the same settings, otherwise adjust `\glstreeindent` accordingly.

```
5725 \ifnum\@gls@prevlevel=##1\relax
5726 \else
```

Compute the widest entry for this level, or for level 0 if not defined for this level.

Store in `\gls@tmplen`

```
5727 \@ifundefined{glswidestname\romannumeral##1}{%
5728 \settowidth{\gls@tmplen}{\textbf{\@glswidestname\space}}{%
5729 \settowidth{\gls@tmplen}{\textbf{%
5730 \csname @glswidestname\romannumeral##1\endcsname\space}}}%%
```

Determine if going up or down a level

```
5731 \ifnum\@gls@prevlevel<##1\relax
```

Depth has increased, so add the width of the widest entry to `\glstreeindent`.

```
5732     \setlength\glstreeindent\gls@tmplen
5733     \addtolength\glstreeindent\parindent
5734     \parindent\glstreeindent
5735     \else
```

Depth has decreased, so subtract width of the widest entry from the previous level to `\glstreeindent`. First determine the width of the widest entry for the previous level and store in `\glstreeindent`.

```
5736     \@ifundefined{@glswidestname\romannumeral\@gls@prevlevel}{%
5737     \settowidth{\glstreeindent}{\textbf{%
5738     \@glswidestname\space}}}{%
5739     \settowidth{\glstreeindent}{\textbf{%
5740     \csname @glswidestname\romannumeral\@gls@prevlevel
5741     \endcsname\space}}}{%}
```

Subtract this length from the previous level's paragraph indent and set to `\glstreeindent`.

```
5742     \addtolength\parindent{-\glstreeindent}%
5743     \setlength\glstreeindent\parindent
5744     \fi
5745     \fi
```

Set the hanging indentation.

```
5746     \hangindent\glstreeindent
```

Put the name to the left of the paragraph block

```
5747     \makebox[0pt][r]{\makebox[\gls@tmplen][l]{%
5748     \textbf{\glstarget{##2}{##3}}}}%
```

If the symbol is missing, ignore it, otherwise put it in brackets.

```
5749     \ifx##5\relax\relax
5750     \else
5751     (##5)\space
5752     \fi
```

Do the description followed by the description terminator and location list.

```
5753     ##4\glspostdescription\space ##6\par
```

Set the previous level macro to the current level.

```
5754     \def\@gls@prevlevel{##1}%
5755     }%
```

Vertical gap between groups is the same as that used by indices:

```
5756     \renewcommand*{\glsgroupskip}{\ifglsnogroupskip\else\indexspace\fi}%
5757 }
```

`almtreegroup` Like the `almtree` style but the glossary groups have headings.

```
5758 \newglossarystyle{almtreegroup}{%
```

Base it on the `glostylealmtree` style:

```
5759     \glossarystyle{almtree}%
```

Give each group a heading.

```
5760 \renewcommand{\glsgroupheading}[1]{\par
5761 \def\@gls@prevlevel{-1}%
5762 \hangindent0pt\relax
5763 \parindent0pt\relax
5764 \textbf{\glsgetgrouptitle{##1}}\par\indexspace}%
5765 }
```

`alttreehypergroup` The `alttreehypergroup` style is like the `alttreegroup` style, but has a set of links to the groups at the start of the glossary.

```
5766 \newglossarystyle{alttreehypergroup}{%
```

Base it on the `glostylealttree` style:

```
5767 \glossarystyle{alttree}%
```

Put the navigation links in the header

```
5768 \renewcommand*\glossaryheader{%
5769 \par
5770 \def\@gls@prevlevel{-1}%
5771 \hangindent0pt\relax
5772 \parindent0pt\relax
5773 \textbf{\glsnavigation}\par\indexspace}%
```

Put a `hypertarget` at the start of each group

```
5774 \renewcommand*\glsgroupheading[1]{%
5775 \par
5776 \def\@gls@prevlevel{-1}%
5777 \hangindent0pt\relax
5778 \parindent0pt\relax
5779 \textbf{\glsnavhypertarget{##1}{\glsgetgrouptitle{##1}}}\par
5780 \indexspace}}
```

4 glossaries-compatible-207

Provides compatibility with version 2.07 and below. This uses original glossaries `xindy` and `makeindex` formatting, so can be used with old documents that had customized style files, but hyperlinks may not work properly.

```
5781 \NeedsTeXFormat{LaTeX2e}
5782 \ProvidesPackage{glossaries-compatible-207}[2011/04/02 v1.0 (NLCT)]
```

`\GlsAddXdyAttribute` Adds an attribute in old format.

```
5783 \ifglsxindy
5784 \renewcommand*\GlsAddXdyAttribute[1]{%
5785 \edef\@xdyattributes{\@xdyattributes ^^J \string"#1\string"}%
5786 \expandafter\toks@\expandafter{\@xdylocref}%
5787 \edef\@xdylocref{\the\toks@ ^^J%
5788 (markup-locref
5789 :open \string"\string~\string\setentrycounter
```

```

5790   {\noexpand\glscounter}%
5791   \expandafter\string\csname#1\endcsname
5792   \expandafter@gobble\string\{\string" ^^J
5793   :close \string"\expandafter@gobble\string\}\string" ^^J
5794   :attr \string"#1\string")}}

```

Only has an effect before `\writeist`:

```
5795 \fi
```

`\GlsAddXdyCounters`

```

5796 \renewcommand*\GlsAddXdyCounters[1]{%
5797   \GlossariesWarning{\string\GlsAddXdyCounters\space not available
5798     in compatibility mode.}%
5799 }

```

Add predefined attributes

```

5800 \GlsAddXdyAttribute{glsnumberformat}
5801 \GlsAddXdyAttribute{textrm}
5802 \GlsAddXdyAttribute{textsf}
5803 \GlsAddXdyAttribute{texttt}
5804 \GlsAddXdyAttribute{textbf}
5805 \GlsAddXdyAttribute{textmd}
5806 \GlsAddXdyAttribute{textit}
5807 \GlsAddXdyAttribute{textup}
5808 \GlsAddXdyAttribute{textsl}
5809 \GlsAddXdyAttribute{textsc}
5810 \GlsAddXdyAttribute{emph}

5 Accessibility Support (glossaries-accsupp Code)

The package is experimental. It is intended to provide a means of using the PDF accessibility support in glossary entries. See the documentation for further details about accessibility support.

```
6066 \NeedsTeXFormat{LaTeX2e}
```

Package version number now in line with main glossaries package number but will only be updated when `glossaries-accsupp.sty` is modified.

```
6067 \ProvidesPackage{glossaries-accsupp}[2011/04/02 v3.0 (NLCT)]
```

```
6068 Experimental glossaries accessibility]
```

Pass all options to `glossaries`:

```
6069 \DeclareOption*{\PassOptionsToPackage{\CurrentOption}{glossaries}}
```

Process options:

```
6070 \ProcessOptions
```

Required packages:

```
6071 \RequirePackage{glossaries}
```

```
6072 \RequirePackage{accsupp}
```

5.1 Defining Replacement Text

The version 0.1 stored the replacement text in the symbol key. This has been changed to use the new keys defined here. Example of use:

```
\newglossaryentry{dr}{name=Dr,description={},access={Doctor}}
```

`access` The replacement text corresponding to the name key:

```
6073 \define@key{glossentry}{access}{%
```

```
6074 \def\@glo@access{#1}%
```

```
6075 }
```

`textaccess` The replacement text corresponding to the text key:

```
6076 \define@key{glossentry}{textaccess}{%
```

```
6077 \def\@glo@textaccess{#1}%
```

```
6078 }
```

firstaccess The replacement text corresponding to the first key:

```
6079 \define@key{glossentry}{firstaccess}{%
6080   \def\@glo@firstaccess{#1}%
6081 }
```

pluralaccess The replacement text corresponding to the plural key:

```
6082 \define@key{glossentry}{pluralaccess}{%
6083   \def\@glo@pluralaccess{#1}%
6084 }
```

firstpluralaccess The replacement text corresponding to the firstplural key:

```
6085 \define@key{glossentry}{firstpluralaccess}{%
6086   \def\@glo@firstpluralaccess{#1}%
6087 }
```

symbolaccess The replacement text corresponding to the symbol key:

```
6088 \define@key{glossentry}{symbolaccess}{%
6089   \def\@glo@symbolaccess{#1}%
6090 }
```

symbolpluralaccess The replacement text corresponding to the symbolplural key:

```
6091 \define@key{glossentry}{symbolpluralaccess}{%
6092   \def\@glo@symbolpluralaccess{#1}%
6093 }
```

descriptionaccess The replacement text corresponding to the description key:

```
6094 \define@key{glossentry}{descriptionaccess}{%
6095   \def\@glo@descaccess{#1}%
6096 }
```

descriptionpluralaccess The replacement text corresponding to the descriptionplural key:

```
6097 \define@key{glossentry}{descriptionpluralaccess}{%
6098   \def\@glo@descpluralaccess{#1}%
6099 }
```

shortaccess The replacement text corresponding to the short key:

```
6100 \define@key{glossentry}{shortaccess}{%
6101   \def\@glo@shortaccess{#1}%
6102 }
```

shortpluralaccess The replacement text corresponding to the shortplural key:

```
6103 \define@key{glossentry}{shortpluralaccess}{%
6104   \def\@glo@shortpluralaccess{#1}%
6105 }
```

longaccess The replacement text corresponding to the long key:

```
6106 \define@key{glossentry}{longaccess}{%
6107   \def\@glo@longaccess{#1}%
6108 }
```

longpluralaccess The replacement text corresponding to the longplural key:

```
6109 \define@key{glossentry}{longpluralaccess}{%
6110   \def\@glo@longpluralaccess{#1}%
6111 }
```

There are no equivalent keys for the user1...user6 keys. The replacement text would have to be explicitly put in the value, e.g., user1={\glsaccsup{inches}{in}}.

\@gls@noaccess Indicates that no replacement text has been provided.

```
6112 \def\@gls@noaccess{\relax}
```

Add to the start hook (the access key is initialised to the value of the symbol key at the start for backwards compatibility):

```
6113 \let\@gls@oldnewglossaryentryprehook\@newglossaryentryprehook
6114 \renewcommand*{\@newglossaryentryprehook}{%
6115   \@gls@oldnewglossaryentryprehook
6116   \def\@glo@access{\@glo@symbol}%
```

Initialise the other keys:

```
6117   \def\@glo@textaccess{\@glo@access}%
6118   \def\@glo@firstaccess{\@glo@access}%
6119   \def\@glo@pluralaccess{\@glo@textaccess}%
6120   \def\@glo@firstpluralaccess{\@glo@pluralaccess}%
6121   \def\@glo@symbolaccess{\relax}%
6122   \def\@glo@symbolpluralaccess{\@glo@symbolaccess}%
6123   \def\@glo@descaccess{\relax}%
6124   \def\@glo@descpluralaccess{\@glo@descaccess}%
6125   \def\@glo@shortaccess{\relax}%
6126   \def\@glo@shortpluralaccess{\@glo@shortaccess}%
6127   \def\@glo@longaccess{\relax}%
6128   \def\@glo@longpluralaccess{\@glo@longaccess}%
6129 }
```

Add to the end hook:

```
6130 \let\@gls@oldnewglossaryentryposthook\@newglossaryentryposthook
6131 \renewcommand*{\@newglossaryentryposthook}{%
6132   \@gls@oldnewglossaryentryposthook
```

Store the access information:

```
6133   \expandafter
6134     \protected@xdef\csname glo@\@glo@label @access\endcsname{%
6135       \@glo@access}%
6136   \expandafter
6137     \protected@xdef\csname glo@\@glo@label @textaccess\endcsname{%
6138       \@glo@textaccess}%
6139   \expandafter
6140     \protected@xdef\csname glo@\@glo@label @firstaccess\endcsname{%
6141       \@glo@firstaccess}%
6142   \expandafter
6143     \protected@xdef\csname glo@\@glo@label @pluralaccess\endcsname{%
```

```

6144     \@glo@pluralaccess}%
6145 \expandafter
6146     \protected@xdef\csname glo@\@glo@label @firstpluralaccess\endcsname{%
6147     \@glo@firstpluralaccess}%
6148 \expandafter
6149     \protected@xdef\csname glo@\@glo@label @symbolaccess\endcsname{%
6150     \@glo@symbolaccess}%
6151 \expandafter
6152     \protected@xdef\csname glo@\@glo@label @symbolpluralaccess\endcsname{%
6153     \@glo@symbolpluralaccess}%
6154 \expandafter
6155     \protected@xdef\csname glo@\@glo@label @descaccess\endcsname{%
6156     \@glo@descaccess}%
6157 \expandafter
6158     \protected@xdef\csname glo@\@glo@label @descpluralaccess\endcsname{%
6159     \@glo@descpluralaccess}%
6160 \expandafter
6161     \protected@xdef\csname glo@\@glo@label @shortaccess\endcsname{%
6162     \@glo@shortaccess}%
6163 \expandafter
6164     \protected@xdef\csname glo@\@glo@label @shortpluralaccess\endcsname{%
6165     \@glo@shortpluralaccess}%
6166 \expandafter
6167     \protected@xdef\csname glo@\@glo@label @longaccess\endcsname{%
6168     \@glo@longaccess}%
6169 \expandafter
6170     \protected@xdef\csname glo@\@glo@label @longpluralaccess\endcsname{%
6171     \@glo@longpluralaccess}%
6172 }

```

5.2 Accessing Replacement Text

`\glsentryaccess` Get the value of the access key for the entry with the given label:

```

6173 \newcommand*\glsentryaccess}[1]{%
6174   \csname glo@#1@access\endcsname
6175 }

```

`\glsentrytextaccess` Get the value of the textaccess key for the entry with the given label:

```

6176 \newcommand*\glsentrytextaccess}[1]{%
6177   \csname glo@#1@textaccess\endcsname
6178 }

```

`\glsentryfirstaccess` Get the value of the firstaccess key for the entry with the given label:

```

6179 \newcommand*\glsentryfirstaccess}[1]{%
6180   \csname glo@#1@firstaccess\endcsname
6181 }

```

`\glsentrypluralaccess` Get the value of the pluralaccess key for the entry with the given label:

```

6182 \newcommand*\glsentrypluralaccess}[1]{%
6183   \csname glo@#1@pluralaccess\endcsname
6184 }

ryfirstpluralaccess  Get the value of the firstpluralaccess key for the entry with the given label:
6185 \newcommand*\glsentryfirstpluralaccess}[1]{%
6186   \csname glo@#1@firstpluralaccess\endcsname
6187 }

lentrysymbolaccess  Get the value of the symbolaccess key for the entry with the given label:
6188 \newcommand*\glsentrysymbolaccess}[1]{%
6189   \csname glo@#1@symbolaccess\endcsname
6190 }

ysymbolpluralaccess  Get the value of the symbolpluralaccess key for the entry with the given label:
6191 \newcommand*\glsentrysymbolpluralaccess}[1]{%
6192   \csname glo@#1@symbolpluralaccess\endcsname
6193 }

\glsentrydescaccess  Get the value of the descriptionaccess key for the entry with the given label:
6194 \newcommand*\glsentrydescaccess}[1]{%
6195   \csname glo@#1@descaccess\endcsname
6196 }

trydescpluralaccess  Get the value of the descriptionpluralaccess key for the entry with the given la-
    bel:
6197 \newcommand*\glsentrydescpluralaccess}[1]{%
6198   \csname glo@#1@descaccess\endcsname
6199 }

glsentryshortaccess  Get the value of the shortaccess key for the entry with the given label:
6200 \newcommand*\glsentryshortaccess}[1]{%
6201   \csname glo@#1@shortaccess\endcsname
6202 }

ryshortpluralaccess  Get the value of the shortpluralaccess key for the entry with the given label:
6203 \newcommand*\glsentryshortpluralaccess}[1]{%
6204   \csname glo@#1@shortpluralaccess\endcsname
6205 }

\glsentrylongaccess  Get the value of the longaccess key for the entry with the given label:
6206 \newcommand*\glsentrylongaccess}[1]{%
6207   \csname glo@#1@longaccess\endcsname
6208 }

trylongpluralaccess  Get the value of the longpluralaccess key for the entry with the given label:
6209 \newcommand*\glsentrylongpluralaccess}[1]{%
6210   \csname glo@#1@longpluralaccess\endcsname
6211 }

```

`\glsaccsupp` `\glsaccsupp{<replacement text>}{<text>}`

This can be redefined to use E or Alt instead of ActualText. (I don't have the software to test the E or Alt options.)

```
6212 \newcommand*{\glsaccsupp}[2]{%
6213   \BeginAccSupp{ActualText=#1}#2\EndAccSupp{}}%
6214 }
```

`\xglsaccsupp` Fully expands replacement text before calling `\glsaccsupp`

```
6215 \newcommand*{\xglsaccsupp}[2]{%
6216   \protected@edef\@gls@replacementtext{#1}%
6217   \expandafter\glsaccsupp\expandafter{\@gls@replacementtext}{#2}%
6218 }
```

`\glsnameaccessdisplay` Displays the first argument with the accessibility text for the entry with the label given by the second argument (if set).

```
6219 \DeclareRobustCommand*{\glsnameaccessdisplay}[2]{%
6220   \protected@edef\@glo@access{\glsentryaccess{#2}}%
6221   \ifx\@glo@access\@gls@noaccess
6222     #1%
6223   \else
6224     \xglsaccsupp{\@glo@access}{#1}%
6225   \fi
6226 }
```

`\glsntextaccessdisplay` As above but for the textaccess replacement text.

```
6227 \DeclareRobustCommand*{\glsntextaccessdisplay}[2]{%
6228   \protected@edef\@glo@access{\glsentrytextaccess{#2}}%
6229   \ifx\@glo@access\@gls@noaccess
6230     #1%
6231   \else
6232     \xglsaccsupp{\@glo@access}{#1}%
6233   \fi
6234 }
```

`\glspluralaccessdisplay` As above but for the pluralaccess replacement text.

```
6235 \DeclareRobustCommand*{\glspluralaccessdisplay}[2]{%
6236   \protected@edef\@glo@access{\glsentrypluralaccess{#2}}%
6237   \ifx\@glo@access\@gls@noaccess

5.3 Displaying the Glossary

Entries within the glossary or list of acronyms are now formatted via `\accsuppglossaryentryfield` and `\accsuppglossarysubentryfield`.

`@glossaryentryfield`

```
6624 \ifglxindy
6625   \renewcommand*{\@glossaryentryfield}{%
6626     \string\accsuppglossaryentryfield}
6627 \else
6628   \renewcommand*{\@glossaryentryfield}{%
6629     \string\accsuppglossaryentryfield}
6630 \fi
```

`glossarysubentryfield`

```
6631 \ifglxindy
6632   \renewcommand*{\@glossarysubentryfield}{%
6633     \string\accsuppglossarysubentryfield}
6634 \else
6635   \renewcommand*{\@glossarysubentryfield}{%
6636     \string\accsuppglossarysubentryfield}
6637 \fi
```

`pglossaryentryfield`

```
6638 \newcommand*{\accsuppglossaryentryfield}[5]{%
6639   \glossaryentryfield{#1}%
6640   {\glsnameaccessdisplay{#2}{#1}}%
6641   {\glsdescriptionaccessdisplay{#3}{#1}}%
6642   {\glsymbolaccessdisplay{#4}{#1}}{#5}%
6643 }
```

`glossarysubentryfield`

```
6644 \newcommand*{\accsuppglossarysubentryfield}[6]{%
6645   \glossaryentryfield{#1}{#2}%
6646   {\glsnameaccessdisplay{#3}{#2}}%
6647   {\glsdescriptionaccessdisplay{#4}{#2}}%
6648   {\glsymbolaccessdisplay{#5}{#2}}{#6}%
6649 }
```

5.4 Acronyms

Use `\newacronymhook` to modify the key list to set the access text to the long version by default.

```
6650 \renewcommand*{\newacronymhook}{%
6651   \edef\@gls@keylist{shortaccess=\the\glslongtok,%
6652     \the\glskeylisttok}%
6653   \expandafter\glskeylisttok\expandafter{\@gls@keylist}%
6654 }
```

efaultNewAcronymDef Modify default style to use access text:

```
6655 \renewcommand*{\DefaultNewAcronymDef}{%
6656   \edef\@do@newglossaryentry{%
6657     \noexpand\newglossaryentry{\the\glslabeltok}%
6658     {%

German (quite a few variations were suggested for German; I settled on the following):

```
6933 \@ifundefined{captionsgerman}{}{%
6934   \addto\captionsgerman{%
6935     \renewcommand*{\glossaryname}{Glossar}%
6936     \renewcommand*{\acronymname}{Akronyme}%
6937     \renewcommand*{\entryname}{Bezeichnung}%
6938     \renewcommand*{\descriptionname}{Beschreibung}%
6939     \renewcommand*{\symbolname}{Symbol}%
6940     \renewcommand*{\pagelistname}{Seiten}%
6941     \renewcommand*{\glssymbolsgroupname}{Symbole}%
6942     \renewcommand*{\glsnumbersgroupname}{Zahlen}}
6943 }
```

ngerman is identical to German:

```
6944 \@ifundefined{captionsgerman}{}{%
6945   \addto\captionsgerman{%
6946     \renewcommand*{\glossaryname}{Glossar}%
6947     \renewcommand*{\acronymname}{Akronyme}%
6948     \renewcommand*{\entryname}{Bezeichnung}%
6949     \renewcommand*{\descriptionname}{Beschreibung}%
6950     \renewcommand*{\symbolname}{Symbol}%
6951     \renewcommand*{\pagelistname}{Seiten}%
6952     \renewcommand*{\glssymbolsgroupname}{Symbole}%
6953     \renewcommand*{\glsnumbersgroupname}{Zahlen}}
6954 }
```

Italian:

```
6955 \@ifundefined{captionssitalian}{}{%
6956   \addto\captionssitalian{%
6957     \renewcommand*{\glossaryname}{Glossario}%
6958     \renewcommand*{\acronymname}{Acronimi}%
6959     \renewcommand*{\entryname}{Nomenclatura}%
6960     \renewcommand*{\descriptionname}{Descrizione}%
6961     \renewcommand*{\symbolname}{Simbolo}%

6.3 Brazilian Dictionary

This is a dictionary file provided by Thiago de Melo for use with the package.

```
7235 \ProvidesDictionary{glossaries-dictionary}{Brazilian}
```

Provide Brazilian translations:

```
7236 \providetranslation{Glossary}{Gloss\`ario}
7237 \providetranslation{Acronyms}{Siglas}
7238 \providetranslation{Notation (glossaries)}{Nota\c c\~ao}
7239 \providetranslation{Description (glossaries)}{Descri\c c\~ao}
7240 \providetranslation{Symbol (glossaries)}{S\`imbolo}
7241 \providetranslation{Page List (glossaries)}{Lista de P\`aginas}
7242 \providetranslation{Symbols (glossaries)}{S\`imbolos}
7243 \providetranslation{Numbers (glossaries)}{N\`umeros}
```

6.4 Danish Dictionary

This is a dictionary file provided for use with the package.

```
7244 \ProvidesDictionary{glossaries-dictionary}{Danish}
```

Provide Danish translations:

```
7245 \providetranslation{Glossary}{Ordliste}
7246 \providetranslation{Acronyms}{Akronymer}
7247 \providetranslation{Notation (glossaries)}{Symbolforklaring}
7248 \providetranslation{Description (glossaries)}{Beskrivelse}
7249 \providetranslation{Symbol (glossaries)}{Symbol}
7250 \providetranslation{Page List (glossaries)}{Side}
7251 \providetranslation{Symbols (glossaries)}{Symboler}
7252 \providetranslation{Numbers (glossaries)}{Tal}
```

6.5 Dutch Dictionary

This is a dictionary file provided for use with the package.

```
7253 \ProvidesDictionary{glossaries-dictionary}{Dutch}
```

Provide Dutch translations:

```
7254 \providetranslation{Glossary}{Woordenlijst}
7255 \providetranslation{Acronyms}{Acroniemen}
7256 \providetranslation{Notation (glossaries)}{Benaming}
7257 \providetranslation{Description (glossaries)}{Beschrijving}
7258 \providetranslation{Symbol (glossaries)}{Symbool}
7259 \providetranslation{Page List (glossaries)}{Pagina's}
7260 \providetranslation{Symbols (glossaries)}{Symbolen}
7261 \providetranslation{Numbers (glossaries)}{Cijfers}
```

6.6 English Dictionary

This is a dictionary file provided for use with the package.

```
7262 \ProvidesDictionary{glossaries-dictionary}{English}
```

Provide English translations:

```
7263 \providetranslation{Glossary}{Glossary}
7264 \providetranslation{Acronyms}{Acronyms}
7265 \providetranslation{Notation (glossaries)}{Notation}
7266 \providetranslation{Description (glossaries)}{Description}
7267 \providetranslation{Symbol (glossaries)}{Symbol}
7268 \providetranslation{Page List (glossaries)}{Page List}
7269 \providetranslation{Symbols (glossaries)}{Symbols}
7270 \providetranslation{Numbers (glossaries)}{Numbers}
```

6.7 French Dictionary

This is a dictionary file provided for use with the package.

```
7271 \ProvidesDictionary{glossaries-dictionary}{French}
```

Provide French translations:

```
7272 \providetranslation{Glossary}{Glossaire}
7273 \providetranslation{Acronyms}{Acronymes}
7274 \providetranslation{Notation (glossaries)}{Terme}
7275 \providetranslation{Description (glossaries)}{Description}
7276 \providetranslation{Symbol (glossaries)}{Symbole}
7277 \providetranslation{Page List (glossaries)}{Pages}
7278 \providetranslation{Symbols (glossaries)}{Symboles}
7279 \providetranslation{Numbers (glossaries)}{Nombres}
```

6.8 German Dictionary

This is a dictionary file provided for use with the package.

```
7280 \ProvidesDictionary{glossaries-dictionary}{German}
```

Provide German translations (quite a few variations were suggested for German; I settled on the following):

```
7281 \providetranslation{Glossary}{Glossar}
7282 \providetranslation{Acronyms}{Akronyme}
7283 \providetranslation{Notation (glossaries)}{Bezeichnung}
7284 \providetranslation{Description (glossaries)}{Beschreibung}
7285 \providetranslation{Symbol (glossaries)}{Symbol}
7286 \providetranslation{Page List (glossaries)}{Seiten}
7287 \providetranslation{Symbols (glossaries)}{Symbole}
7288 \providetranslation{Numbers (glossaries)}{Zahlen}
```

6.9 Irish Dictionary

This is a dictionary file provided for use with the package.

```
7289 \ProvidesDictionary{glossaries-dictionary}{Irish}
```

Provide Irish translations:

```
7290 \providetranslation{Glossary}{Gluais}
7291 \providetranslation{Acronyms}{Acrainmneacha}
```

```

7292 \providetranslation{Notation (glossaries)}{Ciall}
7293 \providetranslation{Description (glossaries)}{Tuairisc}
7294 \providetranslation{Symbol (glossaries)}{Comhartha}
7295 \providetranslation{Page List (glossaries)}{Leathanaigh}
7296 \providetranslation{Symbols (glossaries)}{Comhartha\'}{i}}
7297 \providetranslation{Numbers (glossaries)}{Uimhreacha}

```

6.10 Italian Dictionary

This is a dictionary file provided for use with the package.

```
7298 \ProvidesDictionary{glossaries-dictionary}{Italian}
```

Provide Italian translations:

```

7299 \providetranslation{Glossary}{Glossario}
7300 \providetranslation{Acronyms}{Acronimi}
7301 \providetranslation{Notation (glossaries)}{Nomenclatura}
7302 \providetranslation{Description (glossaries)}{Descrizione}
7303 \providetranslation{Symbol (glossaries)}{Simbolo}
7304 \providetranslation{Page List (glossaries)}{Elenco delle pagine}
7305 \providetranslation{Symbols (glossaries)}{Simboli}
7306 \providetranslation{Numbers (glossaries)}{Numeri}

```

6.11 Magyar Dictionary

This is a dictionary file provided for use with the package.

```
7307 \ProvidesDictionary{glossaries-dictionary}{Magyar}
```

Provide translations:

```

7308 \providetranslation{Glossary}{Sz\'ojegyz\'ek}
7309 \providetranslation{Acronyms}{Bet\H uszavak}
7310 \providetranslation{Notation (glossaries)}{Kifejez\'es}
7311 \providetranslation{Description (glossaries)}{Magyar\'azat}
7312 \providetranslation{Symbol (glossaries)}{Jel\'ol\'es}
7313 \providetranslation{Page List (glossaries)}{Oldalsz\'am}
7314 \providetranslation{Symbols (glossaries)}{Jelek}
7315 \providetranslation{Numbers (glossaries)}{Sz\'amjegyek}

```

6.12 Polish Dictionary

This is a dictionary file provided for use with the package.

```
7316 \ProvidesDictionary{glossaries-dictionary}{Polish}
```

Provide Polish translations:

```

7317 \providetranslation{Glossary}{S\lownik termin\'ow}
7318 \providetranslation{Acronyms}{Skr\'ot}
7319 \providetranslation{Notation (glossaries)}{Termin}
7320 \providetranslation{Description (glossaries)}{Opis}
7321 \providetranslation{Symbol (glossaries)}{Symbol}
7322 \providetranslation{Page List (glossaries)}{Strony}

```

```
7323 \providetranslation{Symbols (glossaries)}{Symbole}
7324 \providetranslation{Numbers (glossaries)}{Liczby}
```

6.13 Serbian Dictionary

This dictionary was provided by Zoran Filipovic.

```
7325 \ProvidesDictionary{glossaries-dictionary}{Serbian}
7326 \providetranslation{Glossary}{Mali re\vnik}
7327 \providetranslation{Acronyms}{Skra\'cenice}
7328 \providetranslation{Notation (glossaries)}{Oznaka}
7329 \providetranslation{Description (glossaries)}{Opis}
7330 \providetranslation{Symbol (glossaries)}{Simbol}
7331 \providetranslation{Page List (glossaries)}{Stranica}
7332 \providetranslation{Symbols (glossaries)}{Simboli}
7333 \providetranslation{Numbers (glossaries)}{Brojevi}
```

6.14 Spanish Dictionary

This is a dictionary file provided for use with the package.

```
7334 \ProvidesDictionary{glossaries-dictionary}{Spanish}
```

Provide Spanish translations:

```
7335 \providetranslation{Glossary}{Glosario}
7336 \providetranslation{Acronyms}{Siglas}
7337 \providetranslation{Notation (glossaries)}{Entrada}
7338 \providetranslation{Description (glossaries)}{Descripci\'on}
7339 \providetranslation{Symbol (glossaries)}{S\'{i}mbolo}
7340 \providetranslation{Page List (glossaries)}{Lista de p\'aginas}
7341 \providetranslation{Symbols (glossaries)}{S\'{i}mbolos}
7342 \providetranslation{Numbers (glossaries)}{N\'umeros}
```

Glossary

`makeindex` An indexing application. [17](#)

`xindy` An flexible indexing application with multilingual support written in Perl. [17](#)

Change History

??		<code>\glsmcols</code>	191
	<code>mcolalttree</code> : replaced '2' with	<code>mcoltree</code> : replaced '2' with	
	<code>\glsmcols</code>	<code>\glsmcols</code>	192
	<code>mcolindex</code> : replaced '2' with	<code>mcoltreename</code> : replaced '2'	

	with \glsmcols	193		
1.01	General: Added range facility in format key	61		
	\writeist: Added spaces after 'delimN and 'delimR in ist file	118		
1.03	\makefirstuc: changed 'protected@edef to 'def	171		
1.04	General: Added 'glstextformat ...	57		
1.05	\glossarysection: added '@mk-both to 'glossarysection	26		
	\glsmakefirstuc: new	171		
	\newglossaryentry: Changed the default value of the sort key to just the value of the name key	48		
1.06	General: now requires etoolbox .	170		
	\capitalisewords: new	172		
	\xcapitalisewords: new	172		
1.07	\@gls@link: fixed bug caused by \theglsentrycounter setting the page number too soon	59		
	\glsadd: fixed bug caused by \theglsentrycounter setting the page number too soon	116		
1.08	General: Added babel support ...	21		
	listgroup: changed listgroup style to use \glsgetgrouptitle	177		
	atlistgroup: changed atlistgroup style to use \glsgetgrouptitle	178		
	\newglossaryentry: Fixed error message to say "description key" rather than "desc key" ..	48		
1.1	\@glossarysection: numbered sections and auto label added	27		
	\@gls@tmpb: changed \toksdef to \newtoks	64		
	\@gls@toc: numberline added ..	28		
	\@p@glossarysection: numbered sections and auto label added	27		
	General: Added support for translator package	21		
	amsgen now loaded (\new@ifnextchar needed)	3		
	translate: translate option added	15		
	\setglossarysection: new ...	27		
	numberedsection: numbered-section package option added .	6		
	numberline: numberline option added	5		
1.12	\@GLSp1: now uses 'glsentrydescplural and 'glsentrysymbolplural instead of 'glsentrydesc and 'glsentrysymbol	78		
	\@GLspl0: now uses 'glsentrydescplural and 'glsentrysymbolplural instead of 'glsentrydesc and 'glsentrysymbol	76		
	\@glspl0: now uses 'glsentrydescplural and 'glsentrysymbolplural instead of 'glsentrydesc and 'glsentrysymbol	75		
	General: added check for 'hypertarget separate to 'hyperlink (memoir defines 'hyperlink but not 'hypertarget) ...	69		
	fixed bug ('GLSdesc shouldn't use 'gls@<type>@display)	89		
	fixed bug ('Glsdesc shouldn't use 'gls@<type>@display)	88		
	fixed bug ('glsdesc shouldn't use 'gls@<type>@display)	88		
	fixed bug ('GLSfirst shouldn't use 'gls@<type>@display)	83		
	fixed bug ('Glsfirst shouldn't use 'gls@<type>@display)	82		
	fixed bug ('glsfirst shouldn't use 'gls@<type>@display)	82		
	fixed bug ('GLSfirstplural shouldn't use 'gls@<type>@display)	86		
	fixed bug ('Glsfirstplural shouldn't use 'gls@<type>@display)	85		

fixed bug ('glsfirstplural shouldn't use 'gls@<type>@display)	85		
fixed bug ('GLSname shouldn't use 'gls@<type>@display)	87		
fixed bug ('glsname shouldn't use 'gls@<type>@display) ..	86, 87		
fixed bug ('GLSpplural shouldn't use 'gls@<type>@display)	84		
fixed bug ('Glsplural shouldn't use 'gls@<type>@display)	84		
fixed bug ('glsplural shouldn't use 'gls@<type>@display)	83		
fixed bug ('GLSsymbol shouldn't use 'gls@<type>@display)	92		
fixed bug ('Glsymbol shouldn't use 'gls@<type>@display)	91		
fixed bug ('glssymbol shouldn't use 'gls@<type>@display)	91		
fixed bug ('glssymbolplural shouldn't use 'gls@<type>@display)	92		
fixed bug ('GLStext shouldn't use 'gls@<type>@display)	81		
fixed bug ('Glstext shouldn't use 'gls@<type>@display)	81
