

# Sample Document using the glossaries Package

Nicola Talbot

September 21, 2012

## **Abstract**

This is a sample document illustrating the use of the `glossaries` package. In this example, a new glossary type called `notation` is defined, so that the document can have a separate glossary of terms and index of notation. The index of notation doesn't have associated numbers.

# Contents

|          |                        |          |
|----------|------------------------|----------|
| <b>1</b> | <b>Introduction</b>    | <b>1</b> |
| <b>2</b> | <b>Another Chapter</b> | <b>2</b> |

# Glossary

**cardinality** The number of elements in the specified set. [1](#)

**set** A collection of distinct objects. [1](#)

# Notation

$|\mathcal{S}|$  cardinality of  $\mathcal{S}$ . [1](#)

$!$  factorial. [2](#)

$\mathcal{S}$  A set. [1](#)

$\mathcal{U}$  The universal set. [1](#), [2](#)

# Chapter 1

## Introduction

Sets are denoted by a caligraphic font e.g.  $\mathcal{S}$ .  
Let  $\mathcal{U}$  denote the universal set.  
The cardinality of a set  $\mathcal{S}$  is denoted  $|\mathcal{S}|$ .

## Chapter 2

# Another Chapter

Another mention of the universal set  $\mathcal{U}$ .  
The factorial symbol:  $!$ .
