Example for morefloats

This example demonstrates the use of package
morefloats, v1.0f as of 2012/01/28 (HMM; DH).
The package takes options (here: `maxfloats=19` is used).
For more details please see the documentation!

To reproduce the
LaTeX Error: Too many unprocessed floats,
comment out the `\usepackage...` in the preamble (line 3)
(by placing a % before it).

Save per page about $200\,ml$ water, $2\,g$ CO_2 and $2\,g$ wood:
Therefore please print only if this is really necessary.
I do NOT think, that it is necessary to print THIS file, really!

There follow a lot of floating tables.

A table, which will keep floating.

Table 1: The first Table

A table, which will keep floating.

Table 2: The second Table

Here are a lot of floating tables.

A table, which will keep floating.

Table 3: The third Table

A table, which will keep floating.

Table 4: The fourth Table

A table, which will keep floating.

Table 5: The fifth Table

A table, which will keep floating.

Table 6: The sixth Table

A table, which will keep floating.

Table 7: The seventh Table

A table, which will keep floating.

Table 8: The eighth Table

A table, which will keep floating.

Table 9: The ninth Table

A table, which will keep floating.

Table 10: The tenth Table

A table, which will keep floating.

Table 11: The eleventh Table

A table, which will keep floating.

Table 12: The twelfth Table

A table, which will keep floating.

Table 13: The thirteenth Table

A table, which will keep floating.

Table 14: The fourteenth Table

A table, which will keep floating.

Table 15: The fifteenth Table

A table, which will keep floating.

Table 16: The sixteenth Table

A table, which will keep floating.

Table 17: The seventeenth Table

A table, which will keep floating.

Table 18: The eighteenth Table

One floating table too many (without **morefloats** and appropriate option(s)).

Table 19: The nineteenth Table
