

# The `catchfile` package

Heiko Oberdiek  
<oberdiek@uni-freiburg.de>

2007/05/30 v1.0

## Abstract

This package catches the contents of a file and puts it in a macro. It requires  $\varepsilon$ -TeX. Both L<sup>A</sup>T<sub>E</sub>X and plain-T<sub>E</sub>X are supported.

## Contents

## 1 Documentation

The package relies on  $\varepsilon$ -TeX's `\everyeof`. Otherwise it aborts with an error message.

<code>\CatchFileDef</code> $\{\langle cmd \rangle\}$ $\{\langle file name \rangle\}$ $\{\langle setup \rangle\}$ <code>\CatchFileEdef</code> $\{\langle cmd \rangle\}$ $\{\langle file name \rangle\}$ $\{\langle setup \rangle\}$
---

Macro  $\langle cmd \rangle$  is defined with the contents of file  $\langle file name \rangle$ . `\CatchFileDef` uses `\def`, `\CatchFileEdef` `\edef` for the definition. Additional setup code for setting catcodes or treatment of line ends can be given in code  $\langle setup \rangle$ . See the test files for an example.

## 2 Implementation

```
1 (*package)
```

### 2.1 Reload check and package identification

Reload check, especially if the package is not used with L<sup>A</sup>T<sub>E</sub>X.

```
2 \begingroup
3 \catcode44 12 % ,
4 \catcode45 12 % -
5 \catcode46 12 % .
6 \catcode58 12 % :

```

## 2.2 Catcodes

```

55 \expandafter\edef\csname CatchFile@End\endcsname{%
56   \catcode44 \the\catcode44\relax % ,
57   \catcode45 \the\catcode45\relax % -
58   \catcode46 \the\catcode46\relax % .
59   \catcode61 \the\catcode61\relax % =
60   \catcode64 \the\catcode64\relax % @
61   \catcode96 \the\catcode96\relax % ‘
62   \noexpand\endinput
63 }
64 \catcode44 12 % ,
65 \catcode45 12 % -
66 \catcode46 12 % .
67 \catcode61 12 % =
68 \catcode64 11 % @
69 \catcode96 12 % ‘

```

## 2.3 Preparations

```

70 \begingroup\expandafter\expandafter\expandafter\endgroup
71 \expandafter\ifx\csname RequirePackage\endcsname\relax
72   \input infwarerr.sty\relax
73 \else
74   \RequirePackage{infwarerr}%
75 \fi

```

Check for  $\varepsilon$ -TeX's `\everyeof`.

```

76 \begingroup
77   \escapechar=92\relax
78   \edef\TestString{\string\everyeof}%
79   \edef\TestMeaning{\meaning\everyeof}%
80   \ifx\TestString\TestMeaning
81     \else
82       \@PackageErrorNoLine{catchfile}{%
83         Cannot find e-TeX's \string\everyeof, \MessageBreak
84         package loading is aborted%
85       }\@ehd
86     \endgroup
87     \expandafter\CatchFile@End
88   \fi
89 \endgroup

```

## 2.4 Looking for primitive `\input`

`\CatchFile@Input` The package needs the expandable primitive `\input`. However there are formats that redefine it. For example, L<sup>A</sup>T<sub>E</sub>X's `\input` is not expandable, but it stores the primitive in `\@@input`. The third possibility is `\pdfprimitive`, introduced in pdf<sub>T</sub>E<sub>X</sub> 1.40.0.

Thus we try to find the primitive and store it in `\CatchFile@Input`. If it is used, it must be expanded twice (because of the solution with `\pdfprimitive`).

```

90 \begingroup
91   \def\Check#1#2#3#4\endgroup{%
92     \edef\TestString{\string#1}%
93     \edef\TestMeaning{\meaning#2}%
94     \ifx\TestString\TestMeaning
95       \endgroup
96       \let\CatchFile@Primitive#2%
97       \def\CatchFile@Input{\CatchFile@Primitive#3}%
98     \else
99       #4\endgroup
100   \fi
101 }%
102 \Check\input\input{%

```

```

103 \Check\input\@input{}%
104 \Check\pdfprimitive\pdfprimitive\input
105 \@PackageErrorNoLine{%
106   Cannot find primitive \string\input,\MessageBreak
107   package loading is aborted%
108 }\@ehd
109 \csname endgroup\endcsname
110 \CatchFile@End
111 \endgroup

```

## 2.5 Input file check

\CatchFile@CheckFileExists

```

112 \begingroup\expandafter\expandafter\expandafter\endgroup
113 \expandafter\ifx\csname IfFileExists\endcsname\relax
114 \begingroup\expandafter\expandafter\expandafter\endgroup
115 \expandafter\ifx\csname pdffilesize\endcsname\relax
116   \def\CatchFile@CheckFileExists#1{%
117     \expandafter\ifx\csname @inputcheck\endcsname\relax
118       \csname newread\endcsname\@inputcheck
119     \fi
120     \openin\@inputcheck#1\relax
121     \ifeof\@inputcheck
122       \let\CatchFile@File\relax
123     \else
124       \closein\@inputcheck
125       \def\CatchFile@File{#1}%
126     \fi
127   }%
128 \else
129   \def\CatchFile@CheckFileExists#1{%
130     \expandafter\ifx\expandafter\\pdffilesize{#1}\\%
131       \let\CatchFile@File\relax
132     \else
133       \def\CatchFile@File{#1}%
134     \fi
135   }%
136 \fi
137 \else
138   \def\CatchFile@CheckFileExists#1{%
139     \IfFileExists{#1}{%
140       \expandafter\CatchFile@DefFile\@filef@und\@nil
141       \begingroup\expandafter\expandafter\expandafter\endgroup
142       \expandafter\ifx\csname @addtofilelist\endcsname\relax
143       \else
144         \@addtofilelist\CatchFile@File
145       \fi
146     }{%
147       \let\CatchFile@File\relax
148     }%
149   }%
150   \def\CatchFile@DefFile#1 \@nil{%
151     \def\CatchFile@File{#1}%
152   }%
153 \fi

```

\CatchFileNotFound

```

154 \def\CatchFile@NotFound#1#2{%
155   \def#1{%
156     \@PackageError{catchfile}{%
157       File ‘#2’ not found%
158     }\@ehc

```

159 }

## 2.6 Catch file contents

\CatchFileEdef

```
160 \long\def\CatchFileEdef#1#2#3{%
161   \CatchFile@CheckFileExists{#2}%
162   \ifx\CatchFile@File\relax
163     \CatchFile@NotFound{#1}{#2}%
164   \else
165     \begingroup
166       \everyeof{\noexpand}%
167       #3%
168       \xdef\CatchFile@Contents{\CatchFile@Input\CatchFile@File\space}%
169     \endgroup
170     \let#1\CatchFile@Contents
171   \fi
172 }
```

\CatchFileDef

```
173 \long\def\CatchFileDef#1#2#3{%
174   \CatchFile@CheckFileExists{#2}%
175   \ifx\CatchFile@File\relax
176     \CatchFile@NotFound{#1}{#2}%
177   \else
178     \begingroup
179       \everyeof\expandafter{%
180         \CatchFile@EOF
181         \noexpand
182       }%
183       \expandafter\long\expandafter\def\expandafter\CatchFile@Do
184         \expandafter##\expandafter1\CatchFile@EOF{%
185         \endgroup
186         \def#1{##1}%
187       }%
188       #3%
189       \expandafter\expandafter\expandafter\CatchFile@Do
190       \CatchFile@Input\CatchFile@File\relax
191   \fi
192 }
```

\CatchFile@EOF If the file is read the catcode mappings are fixed. This means that the same character cannot occur inside the file with different catcodes. Thus we use as end of file marker the at sign twice with different catcodes.

```
193 \begingroup
194   \lccode65=64 % lowercase('A') = '@'
195   \lccode66=64 % lowercase('B') = '@'
196   \catcode65=8 % catcode('A') = subscript
197   \catcode66=3 % catcode('B') = math shift
198 \lowercase{\endgroup
199   \def\CatchFile@EOF{AB}%
200 }
```

```
201 \CatchFile@End
202 \endpackage
```

## 3 Test

### 3.1 L<sup>A</sup>T<sub>E</sub>X

```
203 \test1
```

```

204 \NeedsTeXFormat{LaTeX2e}
205 \nofiles
206 \listfiles
207 \documentclass{minimal}
208 \usepackage{catchfile}[2007/05/30]
209 \makeatletter
210 \def\mysetup{%
211   \let\do\@makeoother
212   \dospecials
213 }
214 \makeatother
215 \begin{document}
216
217 \CatchFileDef\contents{catchfile.sty}\mysetup
218 \typeout{\meaning\contents}
219
220 \CatchFileEdef\contents{catchfile.sty}{%
221   \mysetup
222   \def\par{^^J}%
223   \obeylines
224 }
225 \typeout{\contents}
226 \end{document}
227 </test1>

```

## 3.2 plain-TeX

```

228 <*test2>
229 \def\msg#{\immediate\write16}
230 \newlinechar=10 %
231 \input catchfile.sty\relax
232
233 \def\mysetup{%
234   \def\do##1{%
235     \catcode'##1=12\relax
236   }%
237   \dospecials
238 }
239
240 \CatchFileDef\contents{catchfile.sty}\mysetup
241 \msg{\meaning\contents}
242
243 \CatchFileEdef\contents{catchfile.sty}{%
244   \mysetup
245   \def\par{^^J}%
246   \obeylines
247 }
248 \msg{\contents}
249
250 \csname @@end\endcsname
251 \end
252 </test2>

```

## 4 Installation

### 4.1 Download

**Package.** This package is available on CTAN<sup>1</sup>:

[CTAN:macros/latex/contrib/oberdiek/catchfile.dtx](http://ftp.ctan.org/tex-archive/macros/latex/contrib/oberdiek/catchfile.dtx) The source file.

[CTAN:macros/latex/contrib/oberdiek/catchfile.pdf](http://ftp.ctan.org/tex-archive/macros/latex/contrib/oberdiek/catchfile.pdf) Documentation.

---

<sup>1</sup><http://ftp.ctan.org/tex-archive/>

**Bundle.** All the packages of the bundle ‘oberdiek’ are also available in a TDS compliant ZIP archive. There the packages are already unpacked and the documentation files are generated. The files and directories obey the TDS standard.

[CTAN:macros/latex/contrib/oberdiek/oberdiek-tds.zip](#)

*TDS* refers to the standard “A Directory Structure for T<sub>E</sub>X Files” ([CTAN:tds/tds.pdf](#)). Directories with `texmf` in their name are usually organized this way.

## 4.2 Bundle installation

**Unpacking.** Unpack the `oberdiek-tds.zip` in the TDS tree (also known as `texmf` tree) of your choice. Example (linux):

```
unzip oberdiek-tds.zip -d ~/texmf
```

**Script installation.** Check the directory `TDS:scripts/oberdiek/` for scripts that need further installation steps. Package `attachfile2` comes with the Perl script `pdfatfi.pl` that should be installed in such a way that it can be called as `pdfatfi`. Example (linux):

```
chmod +x scripts/oberdiek/pdfatfi.pl
cp scripts/oberdiek/pdfatfi.pl /usr/local/bin/
```

## 4.3 Package installation

**Unpacking.** The `.dtx` file is a self-extracting `docstrip` archive. The files are extracted by running the `.dtx` through plain-T<sub>E</sub>X:

```
tex catchfile.dtx
```

**TDS.** Now the different files must be moved into the different directories in your installation TDS tree (also known as `texmf` tree):

```
catchfile.sty      → tex/generic/oberdiek/catchfile.sty
catchfile.pdf      → doc/latex/oberdiek/catchfile.pdf
catchfile-test1.tex → doc/latex/oberdiek/catchfile-test1.tex
catchfile-test2.tex → doc/latex/oberdiek/catchfile-test2.tex
catchfile.dtx      → source/latex/oberdiek/catchfile.dtx
```

If you have a `docstrip.cfg` that configures and enables `docstrip`’s TDS installing feature, then some files can already be in the right place, see the documentation of `docstrip`.

## 4.4 Refresh file name databases

If your T<sub>E</sub>X distribution (teT<sub>E</sub>X, miK<sub>T</sub><sub>E</sub>X, ...) relies on file name databases, you must refresh these. For example, teT<sub>E</sub>X users run `texhash` or `mktextlsr`.

## 4.5 Some details for the interested

**Attached source.** The PDF documentation on CTAN also includes the `.dtx` source file. It can be extracted by AcrobatReader 6 or higher. Another option is `pdftk`, e.g. unpack the file into the current directory:

```
pdftk catchfile.pdf unpack_files output .
```

**Unpacking with L<sup>A</sup>T<sub>E</sub>X.** The .dtx chooses its action depending on the format:

**plain-T<sub>E</sub>X:** Run docstrip and extract the files.

**L<sup>A</sup>T<sub>E</sub>X:** Generate the documentation.

If you insist on using L<sup>A</sup>T<sub>E</sub>X for docstrip (really, docstrip does not need L<sup>A</sup>T<sub>E</sub>X), then inform the autodetect routine about your intention:

```
latex \let\install=y\input{catchfile.dtx}
```

Do not forget to quote the argument according to the demands of your shell.

**Generating the documentation.** You can use both the .dtx or the .drv to generate the documentation. The process can be configured by the configuration file ltxdoc.cfg. For instance, put this line into this file, if you want to have A4 as paper format:

```
\PassOptionsToClass{a4paper}{article}
```

An example follows how to generate the documentation with pdfL<sup>A</sup>T<sub>E</sub>X:

```
pdflatex catchfile.dtx
makeindex -s gind.ist catchfile.idx
pdflatex catchfile.dtx
makeindex -s gind.ist catchfile.idx
pdflatex catchfile.dtx
```

## 5 History
