

The `hologo` package

Heiko Oberdiek
<heiko.oberdiek at gmail.com>

2010/04/24 v1.2

Abstract

This package starts a collection of logos with support for bookmarks strings.

1 Documentation

1.1 Logo macros

`\hologo {<name>}`

Macro `\hologo` sets the logo with name `<name>`. The following table shows the supported names.

name	variant	logo	since
AmSLaTeX		$\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\text{A}\text{T}_{\text{E}}\text{X}$	2010/04/16
AmSTeX		$\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\text{T}_{\text{E}}\text{X}$	2010/04/16
eTeX		$\varepsilon\text{-}\text{T}_{\text{E}}\text{X}$	2010/04/08
LaTeX		$\mathcal{L}\text{A}\text{T}_{\text{E}}\text{X}$	2010/04/08
LaTeX2e		$\mathcal{L}\text{A}\text{T}_{\text{E}}\text{X } 2_{\varepsilon}$	2010/04/08
LaTeX3		$\mathcal{L}\text{A}\text{T}_{\text{E}}\text{X}3$	2010/04/24
LaTeXe		$\mathcal{L}\text{A}\text{T}_{\text{E}}\text{X } 2_{\varepsilon}$	2010/04/08
LuaLaTeX		Lua $\mathcal{L}\text{A}\text{T}_{\text{E}}\text{X}$	2010/04/08
LuaTeX		Lua $\text{T}_{\text{E}}\text{X}$	2010/04/08
pdfTeX		pdf $\text{T}_{\text{E}}\text{X}$	2010/04/08
pdfLaTeX		pdf $\mathcal{L}\text{A}\text{T}_{\text{E}}\text{X}$	2010/04/08
plainTeX		plain $\text{T}_{\text{E}}\text{X}$	2010/04/08
plainTeX	space	plain $\text{T}_{\text{E}}\text{X}$	2010/04/16
plainTeX	hyphen	plain- $\text{T}_{\text{E}}\text{X}$	2010/04/16
plainTeX	runtogether	plain $\text{T}_{\text{E}}\text{X}$	2010/04/16
TeX		$\text{T}_{\text{E}}\text{X}$	2010/04/08
VTeX		$\text{V}\text{T}_{\text{E}}\text{X}$	2010/04/24
XeLaTeX		$\text{X}_{\text{E}}\mathcal{L}\text{A}\text{T}_{\text{E}}\text{X}$	2010/04/08
XeTeX		$\text{X}_{\text{E}}\text{T}_{\text{E}}\text{X}$	2010/04/08

`\Hologo {<name>}`

Macro `\Hologo` starts the logo `<name>` with an uppercase letter.

1.2 Setup macros

The package does not support package options, but the following setup macros can be used to set options.

`\hologoSetup {<key value list>}`

Macro `\hologoSetup` sets global options.

`\hologoLogoSetup {<logo>} {<key value list>}`

Some options can also be used to configure a logo. These settings take precedence over global option settings.

1.3 Options

There are boolean and string options:

Boolean option: It takes `true` or `false` as value. If the value is omitted, then `true` is used.

String option: A value must be given as string. (But the string might be empty.)

The following options can be used both in `\hologoSetup` and `\hologoLogoSetup`:

break: enables or disables line breaks inside the logo. This setting is refined by options `hyphenbreak` or `spacebreak`. Default is `false`.

hyphenbreak: enables or disables the line break right after the hyphen character.

spacebreak: enables or disables line breaks at space characters.

Macro `\hologoLogoSetup` also knows:

variant: This is a string option. It specifies a variant of a logo that must exist. An empty string selects the package default variant.

Example:

```
\hologoSetup{break=false}
\hologoLogoSetup{plainTeX}{variant=hyphen,hyphenbreak}
Then "plain-TeX" contains one break point after the hyphen.
```

2 Implementation

```
1 (*package)
```

Reload check, especially if the package is not used with L^AT_EX.

3.2 Spacefactor

The space factor must be 1000 after a logo. If it is greater 1000 then the following space is a space after a sentence closing point. If the space factor is smaller 1000 then an immediate following dot is interpreted as abbreviation, not sentence closing point.

```

4 Installation

4.1 Download

Package. This package is available on CTAN¹:

[CTAN:macros/latex/contrib/oberdiek/hologo.dtx](#) The source file.

[CTAN:macros/latex/contrib/oberdiek/hologo.pdf](#) Documentation.

Bundle. All the packages of the bundle ‘oberdiek’ are also available in a TDS compliant ZIP archive. There the packages are already unpacked and the documentation files are generated. The files and directories obey the TDS standard.

[CTAN:install/macros/latex/contrib/oberdiek.tds.zip](#)

TDS refers to the standard “A Directory Structure for T_EX Files” ([CTAN:tds/tds.pdf](#)). Directories with `texmf` in their name are usually organized this way.

4.2 Bundle installation

Unpacking. Unpack the `oberdiek.tds.zip` in the TDS tree (also known as `texmf` tree) of your choice. Example (linux):

```
unzip oberdiek.tds.zip -d ~/texmf
```

Script installation. Check the directory `TDS:scripts/oberdiek/` for scripts that need further installation steps. Package `attachfile2` comes with the Perl script `pdfatfi.pl` that should be installed in such a way that it can be called as `pdfatfi`. Example (linux):

```
chmod +x scripts/oberdiek/pdfatfi.pl
cp scripts/oberdiek/pdfatfi.pl /usr/local/bin/
```

4.3 Package installation

Unpacking. The `.dtx` file is a self-extracting docstrip archive. The files are extracted by running the `.dtx` through plain T_EX:

```
tex hologo.dtx
```

¹<ftp://ftp.ctan.org/tex-archive/>

TDS. Now the different files must be moved into the different directories in your installation TDS tree (also known as `texmf` tree):

```
hologo.sty           → tex/generic/oberdiek/hologo.sty
hologo-test1.tex     → tex/generic/oberdiek/hologo-test1.tex
hologo-test-spacefactor.tex → tex/generic/oberdiek/hologo-test-spacefactor.tex
hologo.pdf           → doc/latex/oberdiek/hologo.pdf
hologo.dtx           → source/latex/oberdiek/hologo.dtx
```

If you have a `docstrip.cfg` that configures and enables `docstrip`'s TDS installing feature, then some files can already be in the right place, see the documentation of `docstrip`.

4.4 Refresh file name databases

If your \TeX distribution (`te \TeX` , `mik \TeX` , ...) relies on file name databases, you must refresh these. For example, `te \TeX` users run `texhash` or `mktextlsr`.

4.5 Some details for the interested

Attached source. The PDF documentation on CTAN also includes the `.dtx` source file. It can be extracted by AcrobatReader 6 or higher. Another option is `pdftk`, e.g. unpack the file into the current directory:

```
pdftk hologo.pdf unpack_files output .
```

Unpacking with \LaTeX . The `.dtx` chooses its action depending on the format:

plain \TeX : Run `docstrip` and extract the files.

\LaTeX : Generate the documentation.

If you insist on using \LaTeX for `docstrip` (really, `docstrip` does not need \LaTeX), then inform the autodetect routine about your intention:

```
latex \let\install=y\input{hologo.dtx}
```

Do not forget to quote the argument according to the demands of your shell.

Generating the documentation. You can use both the `.dtx` or the `.drv` to generate the documentation. The process can be configured by the configuration file `ltxdoc.cfg`. For instance, put this line into this file, if you want to have A4 as paper format:

```
\PassOptionsToClass{a4paper}{article}
```

An example follows how to generate the documentation with `pdf \LaTeX` :

```
pdflatex hologo.dtx
makeindex -s gind.ist hologo.idx
pdflatex hologo.dtx
makeindex -s gind.ist hologo.idx
pdflatex hologo.dtx
```

5 History

[2010/04/08 v1.0]

- The first version.

[2010/04/16 v1.1]

- \Hologo added for support of logos at start of a sentence.
- \hologoSetup and \hologoLogoSetup added.
- Options break, hyphenbreak, spacebreak added.
- Variant support added by option variant.

[2010/04/24 v1.2]

- L^AT_EX3 added.
- V_TE_X added.

6 Index

Numbers written in *italic* refer to the page where the corresponding entry is described; numbers underlined refer to the code line of the definition; plain numbers refer to the code lines where the entry is used.
