

# The `pdfcolmk` package

Heiko Oberdiek\*  
<heiko.oberdiek at googlemail.com>

2016/05/16 v1.3

## Abstract

This package tries a solution for the missing color stack of pdfTEX.

# 1 Documentation

## 1.1 Introduction

This package uses a mark register in order to solve the problem of a missing color stack of pdfTeX prior 1.40.0. Since this version of pdfTeX a color stack is available and supported by `pdftex.def` 2007/01/01 v0.04a. In this case this package is obsolete and the package stops its loading.

## 1.2 Background

After the Dante meeting (Clausthal 2000) I have started to experiment with the eTeX method of a *colour* mark. One of the major problems is the understanding of the output routine and the need to rewrite it because of missing hooks. Currently I have made some tests in in onecolumn and twocolumn mode, but the state is experimental.

## 1.3 Limitations

- Mark limitations: page breaks in math.
- L<sup>A</sup>T<sub>E</sub>X's output routine is redefined.
  - Changes in the output routine of newer versions of L<sup>A</sup>T<sub>E</sub>X are not detected.
  - Packages that change the output routine are not supported.
- It does not support several independent text streams like footnotes.
- Limitations in float and marginpar support.

## 1.4 Recommendation

$\varepsilon$ -T<sub>E</sub>X (for additional mark register) Without  $\varepsilon$ -T<sub>E</sub>X L<sup>A</sup>T<sub>E</sub>X's mark commands are redefined to store an additional color value.

## 1.5 Usage

Load after package color:

```
\usepackage[pdftex]{color}
\usepackage{pdfcolmk}
```

## 1.6 Compatibility

- Load the following packages after `pdfcolmk`:

`mparhack.sty`

- Load the following packages before `pdfcolmk`:

`marn.sty`  
`newmarn.sty`

- Supported `\@addmarginpar` patch:

`latex/base/latex.ltx`  
`memoir.cls`  
`poemscol/marn.sty, poemscol/newmarn.sty`  
`mparhack.sty`

- Unsupported `\@addmarginpar` patch:

`lineno.sty`  
`sttools/marginal.sty`  
`revtex4.cls`

## 2 Implementation

1 `(*package)`

Package identification.

### 3 Installation

#### 3.1 Download

**Package.** This package is available on CTAN<sup>1</sup>:

[CTAN:macros/latex/contrib/oberdiek/pdfcolmk.dtx](http://ctan.org/pkg/pdfcolmk) The source file.

[CTAN:macros/latex/contrib/oberdiek/pdfcolmk.pdf](http://ctan.org/pkg/pdfcolmk.pdf) Documentation.

**Bundle.** All the packages of the bundle ‘oberdiek’ are also available in a TDS compliant ZIP archive. There the packages are already unpacked and the documentation files are generated. The files and directories obey the TDS standard.

[CTAN:install/macros/latex/contrib/oberdiek.tds.zip](http://ctan.org/install/macros/latex/contrib/oberdiek.tds.zip)

*TDS* refers to the standard “A Directory Structure for TeX Files” ([CTAN:tds/tds.pdf](http://ctan.org/tds/tds.pdf)). Directories with `texmf` in their name are usually organized this way.

#### 3.2 Bundle installation

**Unpacking.** Unpack the `oberdiek.tds.zip` in the TDS tree (also known as `texmf` tree) of your choice. Example (linux):

```
unzip oberdiek.tds.zip -d ~/texmf
```

**Script installation.** Check the directory `TDSScripts/oberdiek/` for scripts that need further installation steps. Package `attachfile2` comes with the Perl script `pdflatfi.pl` that should be installed in such a way that it can be called as `pdflatfi`. Example (linux):

```
chmod +x scripts/oberdiek/pdflatfi.pl
cp scripts/oberdiek/pdflatfi.pl /usr/local/bin/
```

---

<sup>1</sup><http://ctan.org/pkg/pdfcolmk>

### 3.3 Package installation

**Unpacking.** The `.dtx` file is a self-extracting `docstrip` archive. The files are extracted by running the `.dtx` through plain `TEX`:

```
tex pdfcolmk.dtx
```

**TDS.** Now the different files must be moved into the different directories in your installation TDS tree (also known as `texmf` tree):

```
pdfcolmk.sty → tex/latex/oberdiek/pdfcolmk.sty  
pdfcolmk.pdf → doc/latex/oberdiek/pdfcolmk.pdf  
pdfcolmk.dtx → source/latex/oberdiek/pdfcolmk.dtx
```

If you have a `docstrip.cfg` that configures and enables `docstrip`'s TDS installing feature, then some files can already be in the right place, see the documentation of `docstrip`.

### 3.4 Refresh file name databases

If your `TEX` distribution (`teTEX`, `mikTEX`, ...) relies on file name databases, you must refresh these. For example, `teTEX` users run `texhash` or `mktexlsr`.

### 3.5 Some details for the interested

**Attached source.** The PDF documentation on CTAN also includes the `.dtx` source file. It can be extracted by AcrobatReader 6 or higher. Another option is `pdftk`, e.g. unpack the file into the current directory:

```
pdftk pdfcolmk.pdf unpack_files output .
```

**Unpacking with L<sup>A</sup>T<sub>E</sub>X.** The `.dtx` chooses its action depending on the format:

**plain T<sub>E</sub>X:** Run `docstrip` and extract the files.

**L<sup>A</sup>T<sub>E</sub>X:** Generate the documentation.

If you insist on using L<sup>A</sup>T<sub>E</sub>X for `docstrip` (really, `docstrip` does not need L<sup>A</sup>T<sub>E</sub>X), then inform the autodetect routine about your intention:

```
latex \let\install=y\input{pdfcolmk.dtx}
```

Do not forget to quote the argument according to the demands of your shell.

**Generating the documentation.** You can use both the `.dtx` or the `.drv` to generate the documentation. The process can be configured by the configuration file `ltxdoc.cfg`. For instance, put this line into this file, if you want to have A4 as paper format:

```
\PassOptionsToClass{a4paper}{article}
```

An example follows how to generate the documentation with `pdflatEX`:

```
pdflatex pdfcolmk.dtx  
makeindex -s gind.ist pdfcolmk.idx  
pdflatex pdfcolmk.dtx  
makeindex -s gind.ist pdfcolmk.idx  
pdflatex pdfcolmk.dtx
```

## 4 Catalogue

The following XML file can be used as source for the [TEX Catalogue](#). The elements `caption` and `description` are imported from the original XML file from the Catalogue. The name of the XML file in the Catalogue is `pdfcolmk.xml`.

```
449 /*catalogue)
450 <?xml version='1.0' encoding='us-ascii'?>
451 <!DOCTYPE entry SYSTEM 'catalogue.dtd'>
452 <entry datestamp='$Date$' modifier='Author$' id='pdfcolmk'>
453   <name>pdfcolmk</name>
454   <caption>Improving colour support under pdftex.</caption>
455   <authorref id='auth:oberdiek'>
456   <copyright owner='Heiko Oberdiek' year='2000,2005-2008' />
457   <license type='lppl1.3' />
458   <version number='1.3' />
459   <description>
460     The package provides macros that emulate the &#x2018;colour stack&#x2019;;
461     functionality of dvips. The colour stack deals with colour
462     manipulations when asynchronous events (like page-breaking) occur;
463     pdftex does not (yet) have such a stack, but dvips does, and the
464     <xref refid='color'>color</xref> package makes extensive use of
465     it.
466   <p/>
467   This package is an experimental solution to the problem, and works
468   best with pdf-e-tex.
469   <p/>
470   The package is part of the <xref refid='oberdiek'>oberdiek</xref> bundle.
471 </description>
472 <documentation details='Package documentation'
473   href='ctan:/macros/latex/contrib/oberdiek/pdfcolmk.pdf' />
474 <ctan file='true' path='/macros/latex/contrib/oberdiek/pdfcolmk.dtx' />
475 <miktex location='oberdiek' />
476 <texlive location='oberdiek' />
477 <install path='/macros/latex/contrib/oberdiek/oberdiek.tds.zip' />
478 </entry>
479 </catalogue>
```

## 5 History

[2000/08/27 v0.1]

- First published version in newsgroup `comp.text.tex`:  
“pdftex: bug with colors?”<sup>2</sup>

[2000/09/02 v0.2]

- Next try.

[2000/09/02 v0.3]

- Solution without  $\varepsilon$ -TEX added.

[2000/09/06 v0.4]

- Patch commands added.

---

<sup>2</sup>Url: <http://groups.google.com/group/comp.text.tex/msg/6f088e69e4085d2c>

- Patch for seminar.cls added.

### [2000/09/06 v0.5]

- Bug fix: initialization of \pec@value added.

### [2005/06/15 v0.6]

- Support for \marginpar added. See thread in [comp.text.tex](#):  
“Using \textcolor and \marginpar together”<sup>3</sup>

### [2005/07/09 v0.7]

- Output support added for memoir, provided by Lars Madsen.

### [2006/02/20 v0.8]

- Code is not changed.
- DTX framework.

### [2007/01/01 v1.0]

- If pdftex.def >= 2007/01/01 v0.04a is used with pdfTeX >= 1.40.0, then package pdfcolmk is obsolete.

### [2007/04/11 v1.1]

- Line ends sanitized.

### [2008/08/11 v1.2]

- Code is not changed.
- URLs updated.

### [2016/05/16 v1.3]

- Documentation updates.

## 6 Index

Numbers written in italic refer to the page where the corresponding entry is described; numbers underlined refer to the code line of the definition; plain numbers refer to the code lines where the entry is used.
