Sectioning commands with critical notes in parallel colums

January 31, 2017

This file provides examples of using sectioning commands with reledpar. The section titles are in the line numbering, and have critical notes.

The left and right sides are put in columns. We use \eledsectnotoc{L} to say we want the right titles be added to the table of contents, and not the left titles. We also use \eledsectmark{R} to use the right side to add $\ensuremath{\texttt{ETEX}}$ marks for headers.

We use the \reledxxx commands, each of them in their own $\pstart...\pend$ group.

Page clearings are manually added before chapter with \beforeeledchapter.

Contents

1	Rigł	it chapter	3
	1.1	Right section	3
		1.1.1 Right subsection	
	1.2	Right section	4
