The package has the following options:

- **oldstyle, osf**: use old style numbers.
- **lining, nf, lf**: use lining numbers.
- **tabular**: use fixed-width numbers.
- **proportional**: use normal numbers.
- **black**: `\bfseries` is black.
- **semibold**: `\bfseries` is semibold.

The following options are enabled by default: lining, proportional, bold and regular.

7 Version history

2.1

- Updated fonts to 1.040

2.0

- Merged all .sty files into source-sanspro.sty.
- default option now sets the default font family to Source Sans Pro, not \sfdefault.
- type1, t1, opentype and otf option added to override automatic detection.
- Added OT1 to fontspec options.

1.02

- Changed the order of T1 and LY1.
- Changed lining/nf behaviour.
- Redefined \oldstylenums.

8 Known issues

- Using \liningnums when the default numbers are oldstyle results in an ‘font feature does not exist’ error and no lining numbers due to lack of the ‘lnum’ font feature.
- For Type1 users the weight options are set globally.
