

Example for tablefootnote

This example demonstrates the use of package `tablefootnote`, v1.0b as of 2011/10/29 (HMM).
There were no options used. (The package provides no options.)

The `tablefootnote-example.tex` needs to be compiled at least twice to get the references right!

If the `etoolbox`-package is found, it is automatically used.

For more details please see the documentation!

Save per page about 200 ml water, 2 g CO₂ and 2 g wood:
Therefore please print only if this is really necessary.

Here is some text.¹

Tables 1, 2 and 4 show normal tables, table 3 depicts a `sidewaystable`. Table 4 uses the float specifier `H` from the `float` package.

`Hyperref` option `pdfview=FitH` and `FitBH` do not work: hyperlinks in `sidewaystable`s aim at the end of the document, not at the footnote. `pdfview=Fit`, `FitV`, `FitR`, `FitB`, `FitBV` work, print is OK for all those options.

List of Tables

1	A table	2
2	Another table	3
3	A sideways table	4
4	A last table	5

¹And this is a text footnote.

Some² text³ in a table⁴

Table 1: A first table

Some text.⁵

²A table footnote.

³Another table footnote.

⁴A third table footnote.

⁵Another text footnote.

Another ⁷	text ⁸	in a table ⁹
----------------------	-------------------	-------------------------

Table 2: Another table (second one)

More text.⁶

Please note that the table floated to the top of the page. While the footnotes are set and (when hyperref is used) hyperlinked, they are not automatically adapted. Thus either do not use a footnote at the same page before the table, or place the table in “here” or “bottom” position. `\clear(double)page, h(!)`, `H` from the `float` package, or `\FloatBarrier` from the `picins` package might help, too. (Or move the table in the source code near the position where it floats to.)

Table 4 (page 5) uses float specifier `H` from the `float` package and does not float.

Some text.¹⁰

⁶And yet another text footnote.

⁷A 2nd table footnote.

⁸Another 2nd table footnote.

⁹A 2nd third table footnote.

¹⁰This is just another text footnote.

Text¹¹ in a¹² `sidewaystable`¹³

Table 3: A table in the `sideways` environment

¹¹ Rotate view for testing the hyperlinks.

¹² Another `sidewaystable` footnote.

¹³ `Sidewaystable-environment` provided by `http://CTAN.org/pkg/rotating` package.

A last table, here with float specifier H from the float¹⁴ package.

Another¹⁵ text¹⁶ in a table¹⁷

Table 4: A very last table

Some text.¹⁸

¹⁴<http://CTAN.org/pkg/float>

¹⁵A 4th table footnote.

¹⁶Another 4th table footnote.

¹⁷A 4th third table footnote.

¹⁸This is just another text footnote.

End of the example for the tablefootnote¹⁹ package.
