

Example for tablefootnote

This example demonstrates the use of package `tablefootnote`, v1.1b as of 2014/01/20 (HMM).
There were no options used. (The package provides no options.)

The `tablefootnote-example.tex` needs to be compiled at least twice to get the references right!

If the `etoolbox`-package is found, it is automatically used.

For more details please see the documentation!

Save per page about 200 ml water, 2 g CO₂ and 2 g wood:
Therefore please print only if this is really necessary.

Here is some text.¹

Tables 1, 2, 3 and 5 show normal tables, table 4 depicts a sideways table.
Table 5 uses the float specifier `H` from the float package.

`Hyperref` option `pdfview=FitH` and `FitBH` do not work due to a bug in pdf_TE_X, computing wrong anchor coordinates (HEIKO OBERDIEK, 29. October 2011). Depending on used pdf-viewer, hyperlinks in sideways tables lead e. g. at the end of the document, not at the footnote. `pdfview=Fit`, `FitV`, `FitR`, `FitB`, `FitBV` work, print is OK for all those options.

List of Tables

1	A footnotesymbol table	2
2	A table	3
3	Another table	4
4	A sideways table	5
5	A last table	6

¹ And this is a text footnote.

Another[†] text[‡] in a table[§]

Table 1: A table with footnote-symbol-footnotes.

`\renewcommand{\thefootnote}{\fnsymbol{footnote}}` causes footnote-symbol-footnotes, which are possible (see Table 1).

Some text.¶

`\renewcommand{\thefootnote}{\arabic{footnote}}` switches back to normal footnote numbers again.

[†] A table footnote.

[‡] Another table footnote.

[§] A third table footnote.

¶ A text footnote.

Some⁶ text⁹⁹ in a table⁷

Table 2: A normal table.

Some text.⁸

⁶ A table footnote.

⁹⁹ A table footnote with custom footnote number.

⁷ A third table footnote.

⁸ Another text footnote.

Another ¹⁰	text ¹¹	in a table ¹²
-----------------------	--------------------	--------------------------

Table 3: Another table (third one)

More text.⁹

Please note that Table 3 floated to the top of the page. While the footnotes are set and (when hyperref is used) hyperlinked, they are not automatically adapted. Thus either do not use a footnote at the same page before the table, or place the table in “here” or “bottom” position. `\clear(double)page`, `h(!)`, `H` from the `float` package, or `\FloatBarrier` from the `picins` package might help, too. (Or move the table in the source code near the position where it floats to or use the optional footnote marks.)

Table 5 (page 6) uses float specifier `H` from the `float` package and does not float.

Some text.¹³

⁹ And yet another text footnote.

¹⁰ A 3^{rd} table footnote.

¹¹ Another 3^{rd} table footnote.

¹² A 3^{rd} third table footnote.

¹³ This is just another text footnote.

Text¹⁴ in a⁹⁸ sidewaysstable¹⁵

Table 4: A table in the `sideways` environment

¹⁴ Please rotate the view for testing the hyperlinks.

⁹⁸ Another sidewaysstable footnote with optional footnote mark.

¹⁵ Sidewaysstable-environment provided by <http://CTAN.org/pkg/rotating> package.

A last table, here with float specifier H from the float¹⁶ package.

Another¹⁷ text¹⁸ in a table¹⁹

Table 5: A very last table

Some text.²⁰

¹⁶ <http://CTAN.org/pkg/float>

¹⁷ A 5th table footnote.

¹⁸ Another 5th table footnote.

¹⁹ A 5th third table footnote.

²⁰ This is just another text footnote.

End of the example for the tablefootnote²¹ package.
