Updated on January 17, 2018

### **Objectives :**

- One image per command or parameter.
- the minimum amount of text possible.
- the most complete possible update after update.
- keep the same structure as VisualPSTricks

**Remarks :** Minimal code is given to show the effect of a command or a parameter. The effects are sometime exaggerated for clarity .To consult the documentation, I have given the number of the Section in pgfmanual

**You can contact me at** my personal email to

- let me know the mistakes found (please indicate the page)
- give me your commentaries, your suggestions ...

### **What's new :**

- Partial resolution of the conflict between \usetikzlibrary{patterns} (17) and \usepackage{tikzpeople} (123)
- Matrices of nodes 55
- Library matrix added 58
- Tikzducks package added 130
