## NAME

bg5conv – convert a TeX document in Big 5 encoding into 'preprocessed' form.

# SYNOPSIS

**bg5conv** < *infile* > *outfile* 

### DESCRIPTION

Big 5 encoding for traditional Chinese uses the characters {, }, and  $\$  which have special meanings in T<sub>E</sub>X documents.

After processing a  $L^{AT}EX 2_{\varepsilon}$  document which contains Big 5 characters with **bg5conv** you need not care about these special characters.

This filter is part of the CJK macro package for  $L^{AT}EX 2_{E}$ 

### SEE ALSO

**sjisconv**(1), **cefconv**(1), **cef5conv**(1), **extconv**(1), **extconv**(1), the **CJK** documentation files.
