NAME

kpsereadlink - print contents of symbolic link

SYNOPSIS

kpsereadlink file

DESCRIPTION

If *file* is a symbolic link, print its contents (what it links to), and exit successfully. Exit with a failure otherwise.

On systems that do not support symbolic links, kpsereadlink will always fail.

OPTIONS

kpsereadlink accepts the following options:

--help Print help message and exit.

--version

Print version information and exit.
