### **NAME**

kpsereadlink - print contents of symbolic link

# **SYNOPSIS**

kpsereadlink file

### **DESCRIPTION**

If *file* is a symbolic link, print its contents (what it links to), and exit successfully. Exit with a failure otherwise.

On systems that do not support symbolic links, **kpsereadlink** will always fail.

## **OPTIONS**

kpsereadlink accepts the following options:

--help Print help message and exit.

--version

Print version information and exit.
