NAME

    texdoc − find & view documentation in TeX Live

SYNOPSIS

    texdoc [OPTION]... NAME...

    texdoc [OPTION]... ACTION

DESCRIPTION

    Try to find appropriate TeX documentation for the specified NAME(s). Alternatively, perform the given ACTION and exit.

OPTIONS

    −w, **−−view**

        Use view mode: start a viewer. **(default)**

    −m, **−−mixed**

        Use mixed mode (view or list).

    −l, **−−list**

        Use list mode: show a list of results.

    −s, **−−showall**

        Use showall mode: show also "bad" results.

    −i, **−−interact**

        Use interactive menus. **(default)**

    −I, **−−nointeract**

        Use plain lists, no interaction required.

    −M, **−−machine**

        Machine−readable output for lists (implies −I).

    −q, **−−quiet**

        Suppress warnings and most error messages.

    −v, **−−verbose**

        Print additional information (e.g., viewer command).

    −D, **−−debug**

        Activate all debug output (equal to "−−debug=all").

    −d LIST, **−−debug**=LIST

        Activate debug output restricted to the categories specified in LIST.
        Available categories: **config**, **files**, **search**, **score**, **texdocs**, **tlpdb**, **version**, **view**, and **all** to activate all of these.

    −c NAME=VALUE

        Set configuration item NAME to VALUE.

ACTIONS

    −h, **−−help**

        Print this help message.

    −V, **−−version**

        Print the version number.

−f, **−−files**

> Print the list of configuration files used.

−−just−view FILE

> Display FILE, given with full path (no searching).

ENVIRONMENT

The following environment variables can be split by colon and used to set viewers:

BROWSER, **BROWSER_texdoc**

> Set the command to be used for HTML documents.

DVIVIEWER, **DVIVIEWER_texdoc**

> Set the command to be used for DVI documents.

MDVIEWER, **MDVIEWER_texdoc**

> Set the command to be used for Markdown documents.

PAGER, **PAGER_texdoc**

> Set the command to be used for text documents.

PDFVIEWER, **PDFVIEWER_texdoc**

> Set the command to be used for PDF documents.

PSVIEWER, **PSVIEWER_texdoc**

> Set the command to be used for PS documents.

The following environment variables are also used:

LANG, **LC_ALL** and so on

> Set the locale (which will influence on the search results).

TEXDOCS

> In addition to the documents included in the TeX Live database, Texdoc also searches documentation under TEXMF trees specified by the kpathsea variable **TEXDOCS**.

FILES

\<texmf\>/texdoc/texdoc.cnf, see output of the **−−files** option.

EXIT STATUS

The **texdoc** command exists with one of the following values:

0   Success.

1   Internal error.

2   Usage error.

3   No documentation found.

REPORTING BUGS

Report bugs to *texdoc@tug.org*.
