

NAME

mktxlsr – create ls-R databases

SYNOPSIS

mktxlsr [*directories*]

DESCRIPTION

This manual page is not meant to be exhaustive. The complete documentation for this version of T_EX can be found in the info file or manual *Kpathsea: A library for path searching*.

mktxlsr is used to generate the ls-R databases used by the kpathsea library. It will create them for the specified directories, or for a default list if no directories are specified.

OPTIONS

mktxlsr accepts the following options:

--help Print help message and exit.

--version
Print version information and exit.
