

Tests for pgfplots.sty

Christian Feuersänger

March 25, 2010

Contents

1 pgfplotstest.file.tex	9
1.1 ‘plot file’ test	9
1.1.1 A file in gnuplot format ‘num num i’	9
1.1.2 A file which differs slightly from gnuplot format	9
1.1.3 A file which starts with newlines	10
1.2 ‘plot table’ test	11
1.2.1 Plot by column ‘dof’ versus column ‘Lmax’	11
1.2.2 Plot by column ‘dof’ versus column ‘LmaxXX’, a col alias	12
1.2.3 Plot by column ‘dof’ versus column ‘L/m=ax’, a col alias	12
1.2.4 Plot by column ‘dof’ versus column ‘L/m=ax’, a col alias	12
1.2.5 showing the plot data with both, ‘create on use’ and col alias	12
1.2.6 Plot by column #2 versus column #3	12
1.2.7 Plot by preloaded tables	13
1.2.8 a table which has no column names	13
1.3 Table Column Separators	15
1.3.1 the same with active characters	16
1.4 ‘plot file’ sanity checking test	16
1.4.1 2d	16
1.4.2 2d + meta	16
1.4.3 3d	16
1.4.4 3d + meta	17
2 pgfplotstest.colormap.tex	18
2.1 Basic level experiment	18
2.2 Colorbars	18
2.2.1 default config	18
2.2.2 colorbar right	18
2.2.3 colorbar left	18
2.2.4 colorbar horizontal	19
2.2.5 colorbar horizontal; top with customization	19
2.2.6 colorbar horizontal; top with even more customization	19
2.2.7 Testing at=(1.03,0.5),anchor=west	19
3 pgfplotstest.marks.tex	20
3.1 Testing special treatment for no marks and only marks	20
3.1.1 both, marks and lines	20
3.1.2 only marks	20
3.1.3 no marks	21
3.2 Testing special treatment for no marks and only marks for STACKED PLOTS	21

3.2.1	both, marks and lines	21
3.2.2	only marks	21
3.2.3	no marks	22
3.3	nodes near coords	22
4	pgfplotstest.function.tex	23
4.1	'plot function' test	23
4.1.1	$\sin(x)$	23
4.1.2	$\exp(x)$	23
4.2	3D plots	23
4.2.1	plot expression	23
4.2.2	plot gnuplot	24
5	pgfplotstest.expr.tex	28
5.1	'plot expression' test	28
5.1.1	$\sin(x)$	28
5.1.2	x^2	28
5.1.3	x^{10}	28
5.1.4	x^{10}	28
5.1.5	$x * 5 * (1 - 100)/(1 - x)$	29
5.1.6	$x * 5 * (1 - 100)/(1 - x)$	29
5.1.7	$1/x$	29
5.1.8	$\exp(0 - (x - 90)^2 / 0.0001)$	29
5.1.9	$\sqrt{abs(x)}$	29
5.1.10	$-5 + x - x^2 * x/3$	29
5.1.11	$-\sin(4 * \deg(x))$	30
5.1.12	$\max(0, x - 4)$	30
5.1.13	$\min(0, x - 4)$	30
5.1.14	$\min(0, x - 4)$	30
6	pgfplotstest.axispath.tex	31
6.1	Testing path commands inside of axis	31
6.1.1	log plot	31
6.1.2	Linear plot	31
6.2	Checking plot expression	31
7	pgfplotstest.axislines.tex	32
7.1	Axialines placement – centered axis lines	32
7.1.1	tick align=outside	32
7.1.2	centered axis lines – axis y line=center, axis x line=bottom	32
7.1.3	centered axis lines – axis x line=bottom, axis y line=center / tick align/ y discontinuity	32
7.1.4	centered axis lines – axis [xy] line/ tick align/ x discontinuity	34
7.1.5	centered axis lines – axis y discontinuity	35
7.2	Axialines placement – Separate lines	35
7.2.1	tick align=outside	35
7.2.2	Separate lines – axis y line=center, axis x line=bottom	35
7.2.3	Separate lines – axis x line=bottom, axis y line=center / tick align/ y discontinuity	35
7.2.4	Separate lines – axis [xy] line/ tick align/ x discontinuity	36
7.2.5	Separate lines – axis y discontinuity	37

7.3	x line=none; – tick marks shouldn't disappear	38
8	pgfplotstest.axislines.3d.tex	39
8.1	Boxed	39
8.2	axis lines=left	39
8.3	axis lines=right	39
8.4	axis lines=middle, axis on top	39
8.5	Only axis x line=middle	40
8.6	3d box=complete	40
8.6.1	grid lines	40
8.6.2	grid lines und completeSTAR	40
8.6.3	grid lines und completeSTAR und styles	40
9	pgfplotstest.scaling.tex	41
9.1	Standard placement normal plot	41
9.2	Scaling tests	41
9.2.1	width=5cm	41
9.2.2	width=linewidth	41
9.2.3	width=linewidth, height=textheight	42
9.2.4	height=3cm	42
9.2.5	x=3cm	42
9.2.6	x=3cm, y=4cm	42
9.2.7	y=3cm	42
9.2.8	Scale vs. Datascale trafo	42
9.2.9	Testing numeric artefacts around tick position '0'	43
9.3	Scaling log plots	43
9.4	Scaletest	44
9.5	Scaling test for very small or very large x values	44
9.5.1	1e-2	44
9.5.2	1e+2	44
9.5.3	x=1e+11; y=1e-6	45
9.5.4	1e+1	45
9.5.5	1e+3	45
9.5.6	1e+4	45
9.5.7	1e-2, 1e+4	45
10	pgfplotstest.ticks.tex	46
10.1	Ticks for very small data range vs Datascaletrafo	46
10.1.1	Critical Range in y	46
10.2	Tick align	46
10.2.1	xtick align=inside, ytick align=inside	46
10.2.2	xtick align=inside, ytick align=outside	46
10.2.3	xtick align=outside, ytick align=outside	46
10.2.4	xtick align=center, ytick align=inside	47
10.2.5	xtick align=center, ytick align=center	47
10.2.6	xtick align=outside, ytick align=center	47
10.3	Scaled ticks	47
10.3.1	false	47

10.3.2	true	47
10.3.3	base 10:3	47
10.3.4	real:3.1415	48
10.3.5	real:3.1415 und y = base 10:-2	48
10.3.6	real:3.1415 und y = real:2	48
10.4	Scaled Ticks 3D	48
10.4.1	false	48
10.4.2	true	48
10.4.3	base 10:3	48
10.4.4	real:3.1415	49
10.5	Minor ticks	49
10.5.1	+ Explicit tick marks (non-uniform)	49
10.5.2	+ Explicit tick marks (uniform)	49
10.6	Tick placement	50
10.6.1	xtick=data	50
10.6.2	ticks on axis rectangle	50
10.6.3	modified labels	51
10.7	Tick label assignment tests	51
10.7.1	Using xticklabel and xtick	51
10.7.2	Showing ticknum verbatim	51
10.7.3	Using xticklabels	52
10.7.4	With xtick labels and commas by hand	52
10.7.5	Only with auto number formatting options; different for x and y	52
10.7.6	Using yticklabels in logplot	52
10.8	Tick/Tick-Label placement log plots	52
10.8.1	y tickten	52
10.8.2	ytick	52
10.8.3	extra y ticks	53
10.8.4	extra x and y ticks, linear plot	53
10.9	tick pos	53
10.9.1	Standard	53
10.9.2	Reversed axes	53
10.9.3	axis lines =center	54
10.9.4	axis lines =left	54
10.9.5	axis lines =right	55
10.9.6	reversed axes and axis lines =center	55
10.9.7	reversed axes and axis lines =left	56
10.9.8	reversed axes and axis lines =right	56
11	pgfplotstest.enlargelimits.tex	58
11.1	Limit computation	58
11.1.1	User specified limits	58
11.1.2	Log plots	59
11.1.3	Enlargelimits tests	60
11.2	Once again with partial limits	62
11.2.1	Unconstraint	62
11.2.2	ymax=5	62

11.2.3	ymax=0.5	62
11.2.4	xmin=0	62
11.2.5	xmin=768	62
11.2.6	ymax=5.8e-4	62
11.2.7	constant in <i>y</i>	63
11.2.8	constant in <i>x</i>	63
12	pgfplotstest.logplotenv.tex	64
12.1	Default options log plot	64
12.1.1	Default size	64
12.1.2	Small size	64
12.1.3	Very small size	64
12.1.4	Large size	64
12.1.5	Large size; large range	64
12.1.6	Extremely small <i>y</i> range for log plot	65
12.2	Semilogy plot	65
12.3	Semilogx plot	65
12.3.1	Extra ticks	65
12.4	log basis <i>y</i> =2, log basis <i>x</i> =2	65
12.5	log basis <i>y</i> =2, std for <i>x</i>	66
13	pgfplotstest.hansmeine_app.tex	67
13.1	Application example of Hans Meine	67
13.1.1	With plot file	67
13.1.2	With plot file and restricted bounding box, centered	67
14	pgfplotstest.3d.tex	68
14.1	View	68
14.1.1	Test von YAW	68
14.1.2	Test von PITCH	70
14.2	Tests and Debugging of near ticklabel anchors	72
14.2.1	Placement of ticklabels	75
14.3	Sanity checking	75
14.3.1	addplot in 3D axis	75
14.3.2	addplot and addplot3 in an axis	75
14.3.3	addplot and addplot3 in an axis	75
15	pgfplotstest.legend.tex	76
15.1	Legends	76
15.1.1	Old-format legends with two backslashes as separator	76
15.1.2	Using comma-separated-legends	76
15.1.3	testing legend columns	76
15.1.4	“legend plot pos” options	77
16	pgfplotstest.misc.tex	79
16.1	Paths after addplot	79
16.1.1	plot coordinates	79
16.1.2	plot table	79
16.1.3	plot function	80

16.2	Title-option	80
16.3	Filter test	80
16.4	Test for addplot+ [...]	80
16.5	Hide axis test	81
16.5.1	hide x/y axis	81
16.6	disabledatascaling / disablelogfilter	82
16.6.1	disabledatascaling	82
16.6.2	disabledatascaling+circle at (0,0) radius (0.5)	82
16.6.3	disabledatascaling + explicit limits	82
16.6.4	disabledatascaling + explicit limits + error bars	83
16.6.5	Reading nan und inf in linear axis	83
16.6.6	check for special limit cases	83
16.7	interrupt bounding box	83
17	pgfplotstest.reverseaxis.tex	84
17.1	x dir=reverse	84
17.2	x dir=reverse, axis lines=left	84
17.3	x dir=reverse, axis lines=center	84
17.4	x dir=reverse, axis lines=right	84
17.5	y dir=reverse	85
17.6	y dir=reverse, axis lines=left	85
17.7	y dir=reverse, axis lines=center	85
17.8	y dir=reverse, axis lines=right	85
18	pgfplotstest.align.tex	86
18.1	Anchors, alignment, baselines, sub nodes	86
18.1.1	Baseline alignment	86
18.1.2	Baseline alignment and externalized graphics	86
18.1.3	Baseline alignment and externalized graphics II	86
18.1.4	Horizontal and Vertical alignment	86
18.1.5	Anchortest	87
18.1.6	Reversed axes	88
18.1.7	Using non-standard unit vectors	89
18.1.8	3D	90
18.1.9	Using anchors before axis is finished	91
18.1.10	Accessing sub-nodes	93
18.1.11	Funny bounding boxes	93
18.2	ticklabel cs	93
18.3	sloped like XXX axis	93
18.4	xyshift in axis and contained nodes	94
19	pgfplotstest.gridtick.tex	95
19.1	Grid lines test	95
19.2	Tick lines test	96
19.2.1	xmajorticks=false,xminorticks=true	96
19.2.2	ymajorticks=false,yminorticks=false	96
19.2.3	ticks=none	96
19.2.4	ticks=major	96

19.3	TikZ-coordinate system ‘axis’	96
19.4	Grid styles and axis line styles	97
20	pgfplotstest.styles.tex	98
20.1	Style–tests	98
20.1.1	Limits in ‘every axis’; ‘cycle list’ option and ‘cycle list name’ option	98
20.1.2	testing ‘every loglog axis’ style	98
20.1.3	Using several ‘every ...’ styles	98
20.1.4	Using the ‘style=’ option	98
20.1.5	legend style, grid style, x label style etc. options	99
20.1.6	Providing TikZ-options to either tikzpicture or axis	99
20.1.7	xlabel style and ylabel style	99
20.1.8	Collecting many options together	99
20.1.9	Line width	100
21	pgfplotstest.errorbars.tex	101
21.1	Errorbars	101
21.1.1	Log-plot	102
22	pgfplotstest.plottypes.tex	104
22.1	Stacked plots	104
22.1.1	stack y, sharp plot	104
22.1.2	stack y, ybar	104
22.1.3	stack y, ybar, minus	105
22.1.4	stack x, sharp plot [not useful]	105
22.1.5	stack x, xbar	105
22.1.6	stack x, xbar, minus	105
22.2	Bar diagrams	105
22.2.1	Interval bar handlers	105
22.3	const plot	106
22.4	const plot mark right	106
22.5	jump mark right	106
22.6	jump mark left	106
23	pgfplotstest.binary.tex	107
23.1	bytes=4, pgfplotsbinaryencodeunsigned	107
23.2	bytes=2, pgfplotsbinaryencodeunsigned	107
23.3	bytes=4, pgfplotsbinaryencodesignedmaplinearly	107
23.4	bytes=3, pgfplotsbinaryencodesignedmaplinearly	108
23.5	bytes=2, pgfplotsbinaryencodesignedmaplinearly	108
23.6	bytes=4, pgfplotsbinaryencodedimenmaplinearly	108
23.7	bytes=3, pgfplotsbinaryencodedimenmaplinearly	108
23.8	bytes=2, pgfplotsbinaryencodedimenmaplinearly	108
23.9	Library: Units in labels	109
23.10	Library: Groupplots	110
24	pgfplotstest.utils	111
24.1	Unscoped pgfplotsforeachentryinCSV Loops	111
24.2	pgfplotsforeachungrouped	111

24.2.1 without FPU	111
24.2.2 with FPU	112

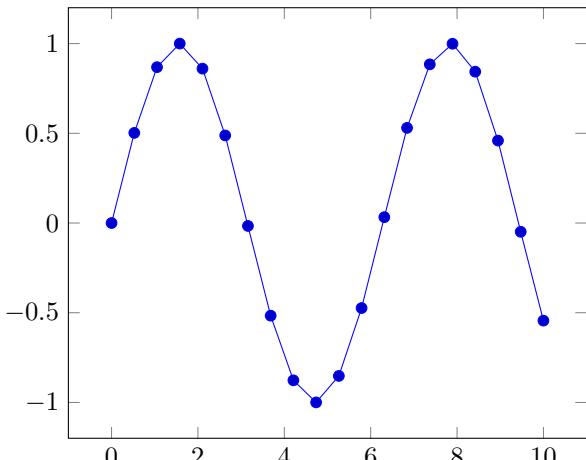

Chapter 1

pgfplotstest.tex

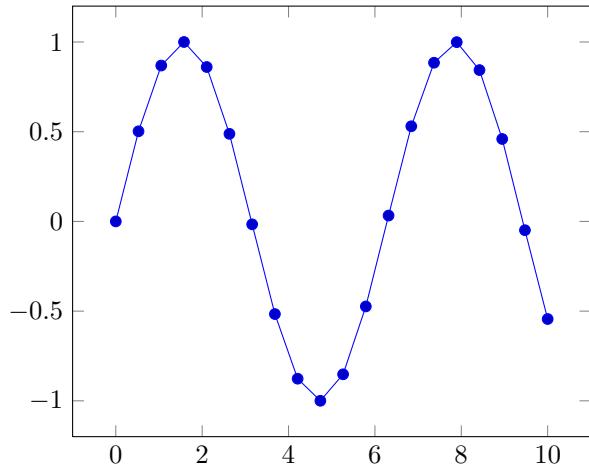

1.1 ‘plot file’ test

1.1.1 A file in gnuplot format ‘num num i’

```
1 #Curve_0_of_1,_20_points
2 #x_y_type
3 0.00000_0.00000_ii
4 0.52632_0.50235_ii
5 1.05263_0.86873_ii
6 1.57895_0.99997_ii
7 2.10526_0.86054_ii
8 2.63158_0.48819_ii
9 3.15789_-0.01630_ii
10 3.68421_-0.51638_ii
11 4.21053_-0.87669_ii
12 4.73684_-0.99970_ii
13 5.26316_-0.85212_ii
14 5.78947_-0.47390_ii
15 6.31579_0.03260_ii
16 6.84211_0.53027_ii
17 7.36842_0.88441_ii
18 7.89474_0.99917_ii
19 8.42105_0.84348_ii
20 8.94737_0.45948_ii
21 9.47368_-0.04889_ii
22 10.00000_-0.54402_ii
```

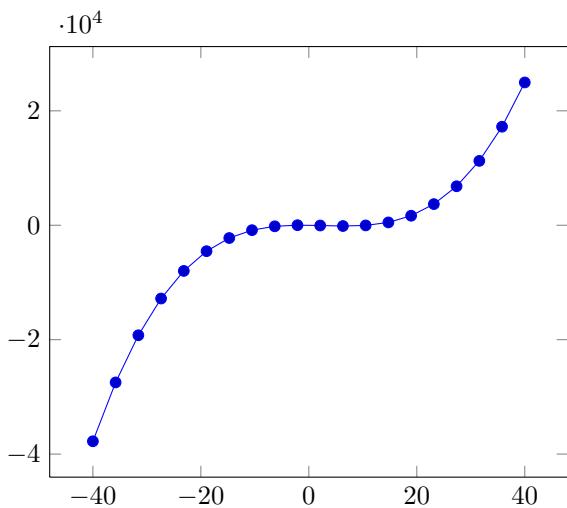

Same file loaded with ‘plot table’

1.1.2 A file which differs slightly from gnuplot format

```
1 #Curve_0_of_1,_20_points
2 #_.5*x**3_-.4*x**2_-.16*x**1
3 #x_y_type
4 -40.00000_-37760.00000_ii

1.4.1 2d

The input file has just one column.

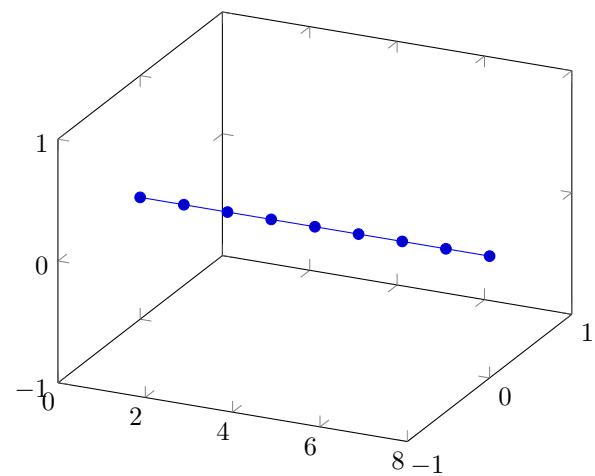

1.4.2 2d + meta

The input file has just one column.

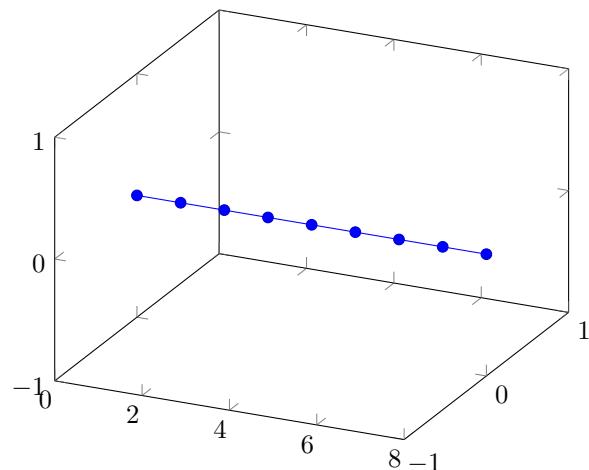

1.4.3 3d

The input file has just one column.

1.4.4 3d + meta

The input file has just one column.

Chapter 2

pgfplotstest.colormap.tex

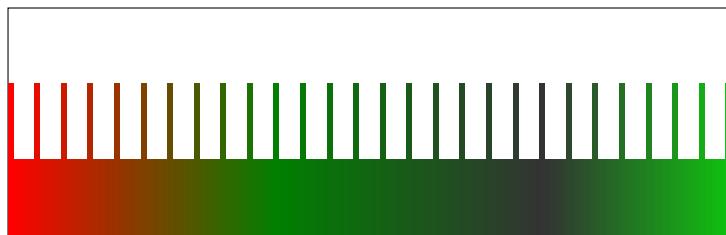

2.1 Basic level experiment

Experiment:

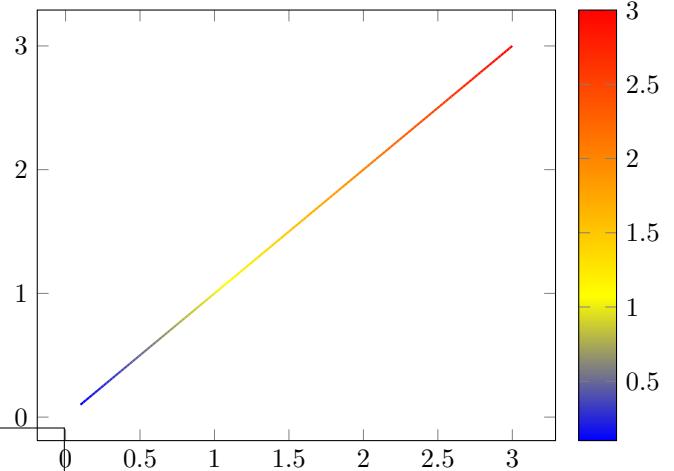

- Define a color map,
- convert it back to a shading; draw that shading,
- for a set of sample points, map them linearly into the color map and draw small “tick” lines over the shading.

The test PASSES IF AND ONLY IF: the shading and the “tick” lines have the same color.

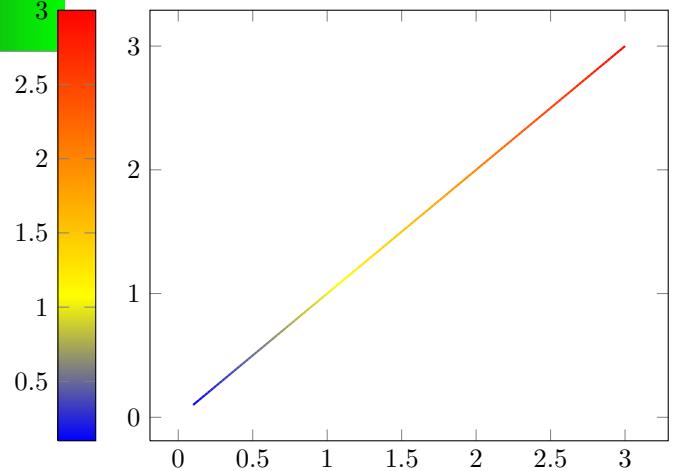

Color spec: $\text{rgb}(0\text{cm})=(1,0,0)$; $\text{rgb}(2\text{cm})=(0,0.5,0)$;
 $\text{gray}(4\text{cm})=(0.2)$; $\text{color}(6\text{cm})=(\text{green})$;

2.2.2 colorbar right

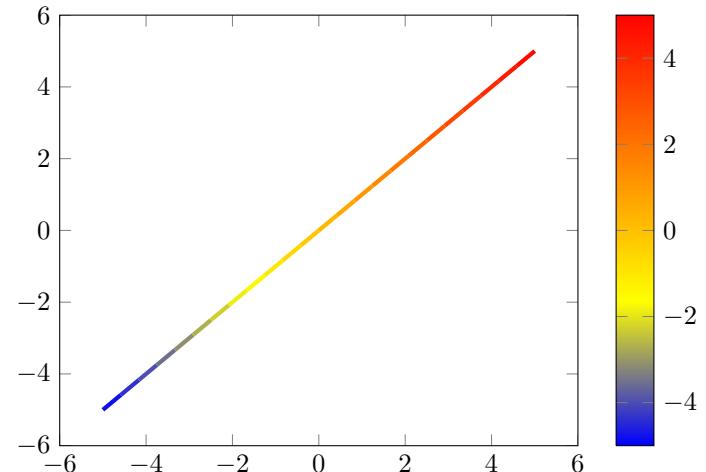

2.2.3 colorbar left

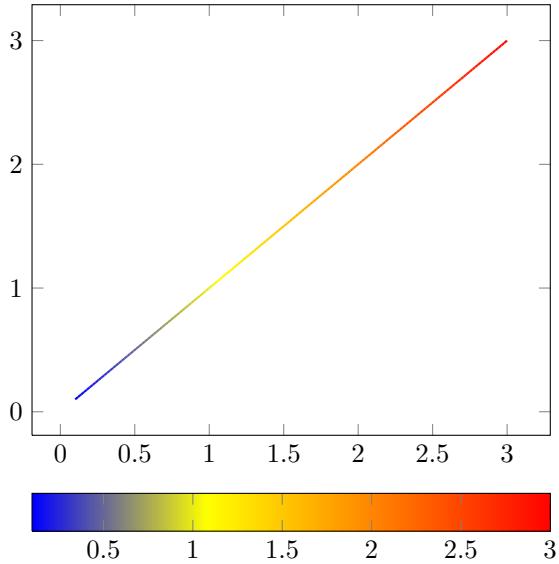

2.2 Colorbars

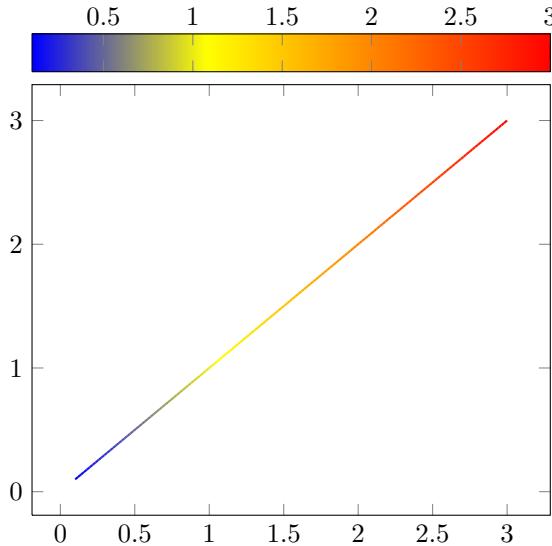

2.2.1 default config

2.2.4 colorbar horizontal

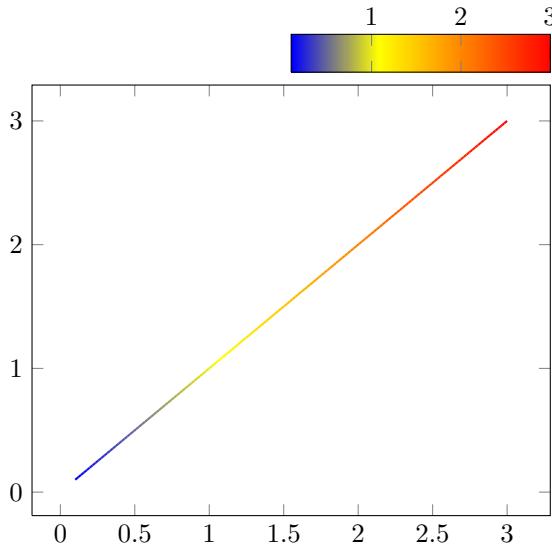

2.2.5 colorbar horizontal; top with customization

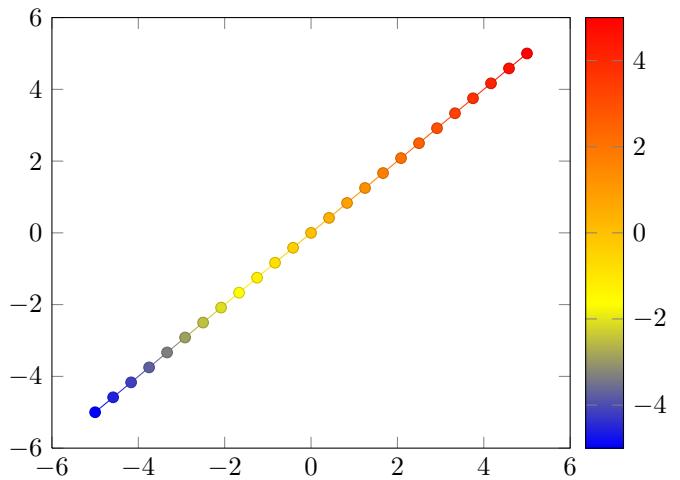

2.2.6 colorbar horizontal; top with even more customization

More Customization: “colorbar top”

2.2.7 Testing at=(1.03,0.5), anchor=west

Chapter 9

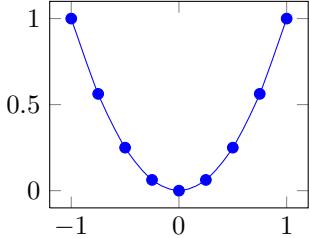

pgfplotstest.scaling.tex

9.1 Standard placement normal plot

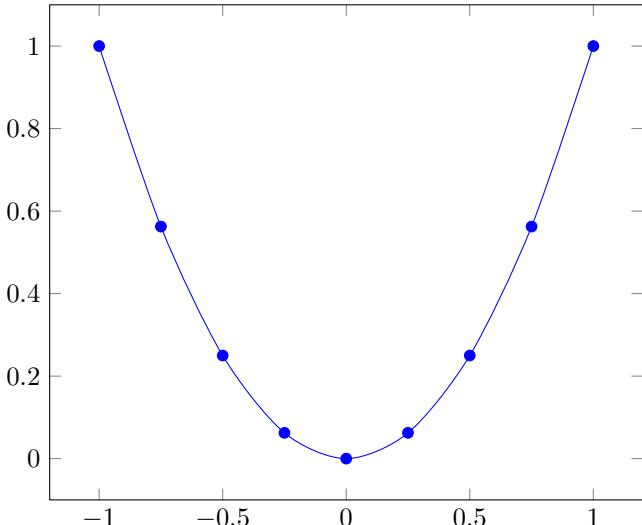

9.2 Scaling tests

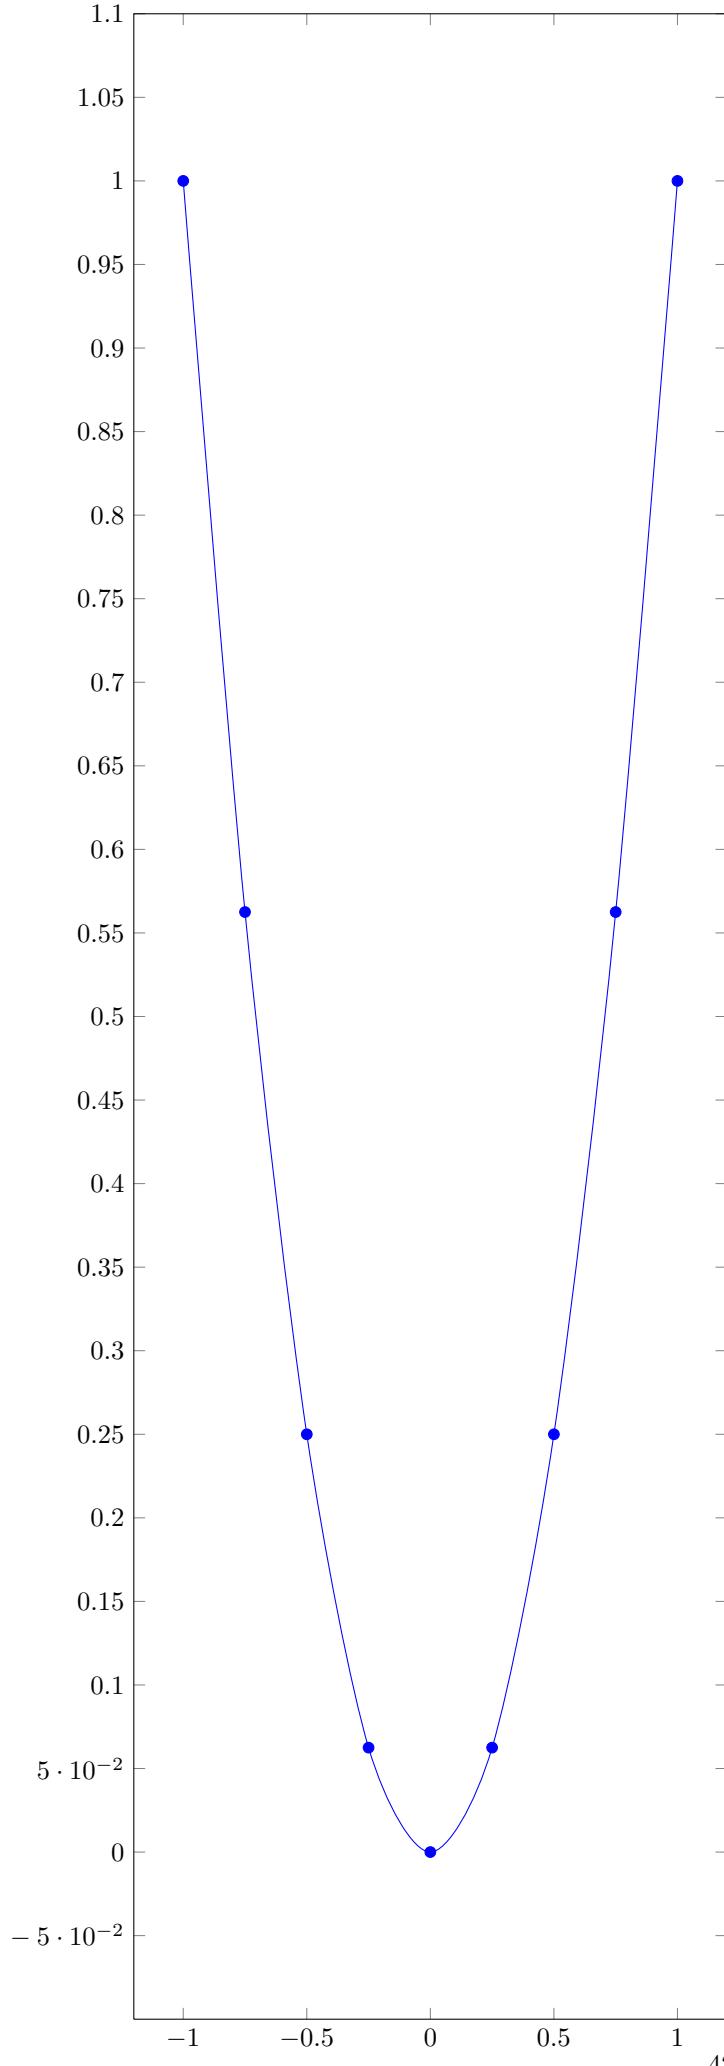

9.2.1 width=5cm

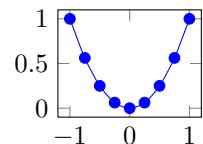

9.2.2 width=linewidth

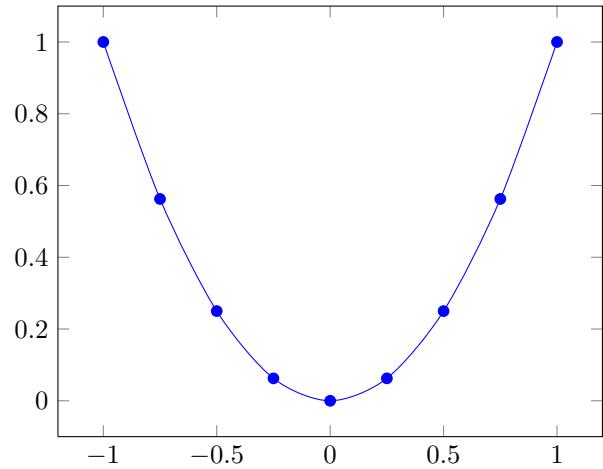

9.2.3 width=linewidth, height=textheight

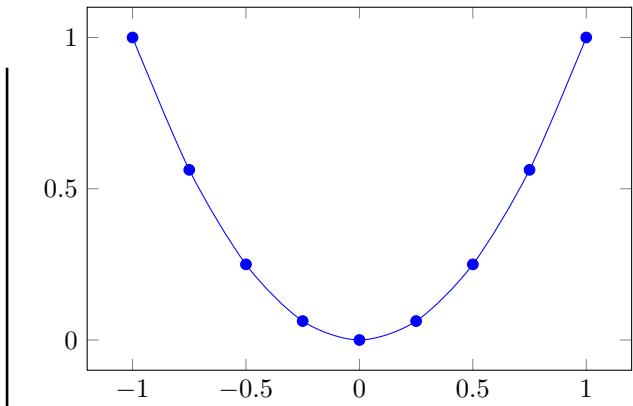

9.2.4 height=3cm

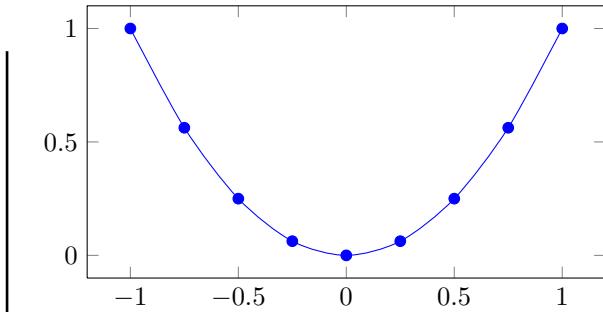

9.2.5 x=3cm

9.2.6 x=3cm, y=4cm

9.2.7 y=3cm

9.2.8 Scale vs. Datascale trafo

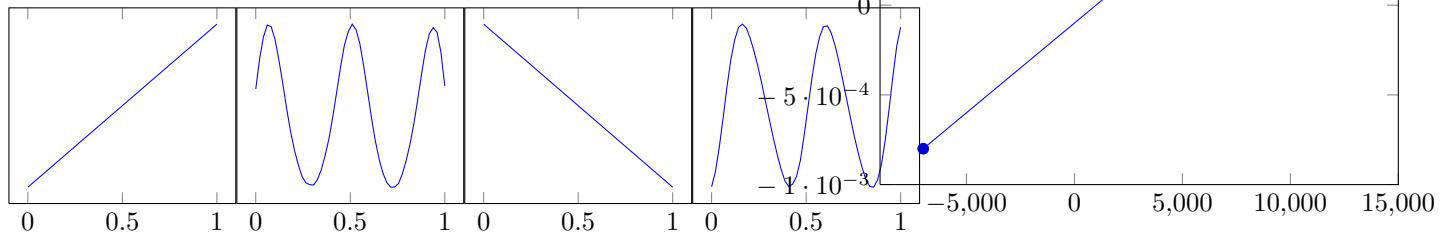

All should have the same size; especially the same height. This tests the data scale transformation and rounding inaccuracies during the computation of x and y unit vectors,

$$x = \frac{W}{T(\bar{x}) - T(x)}.$$

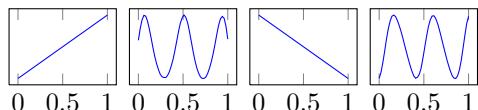

The larger x , the higher the scaling accuracy. Large x means small $T(\bar{x}) - T(x)$ (relative to width W). But this implies low

accuracy for the input data! And nobody wants inaccurate plots.

The datascale transformation T is set up such that $O(W) = O(x)$, but I am not sure if I need to adjust some parameters. Some parameters lead to inaccurate x and y vectors, such that axis sizes are *not* the same although W and H (width and height) are the same.

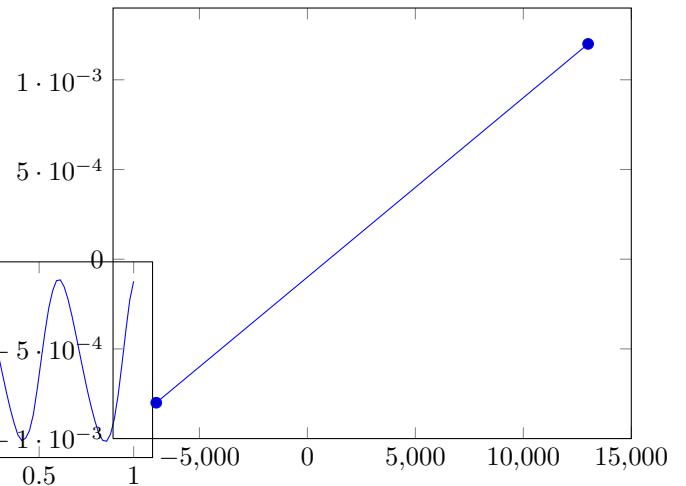

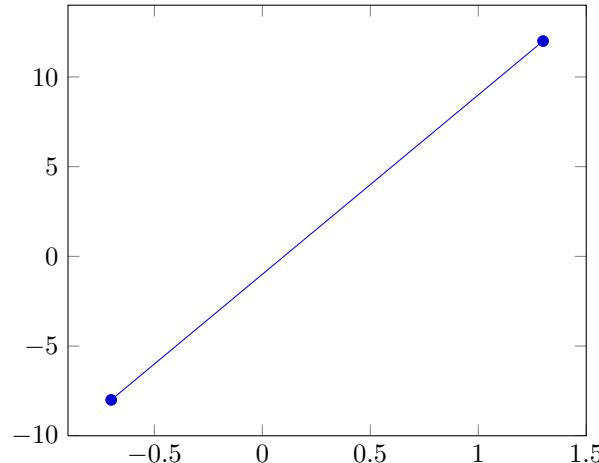

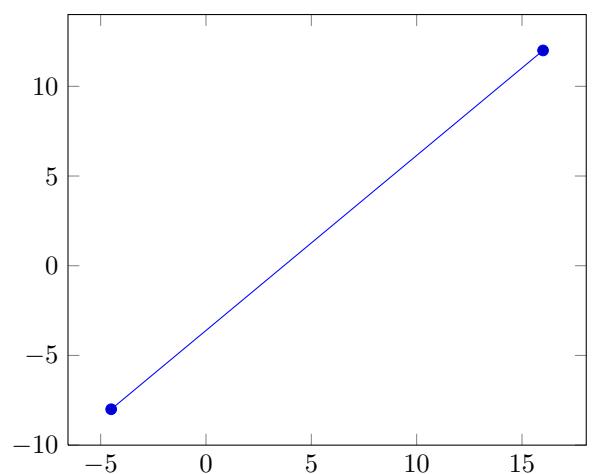

once more again without ‘scale only axis’:

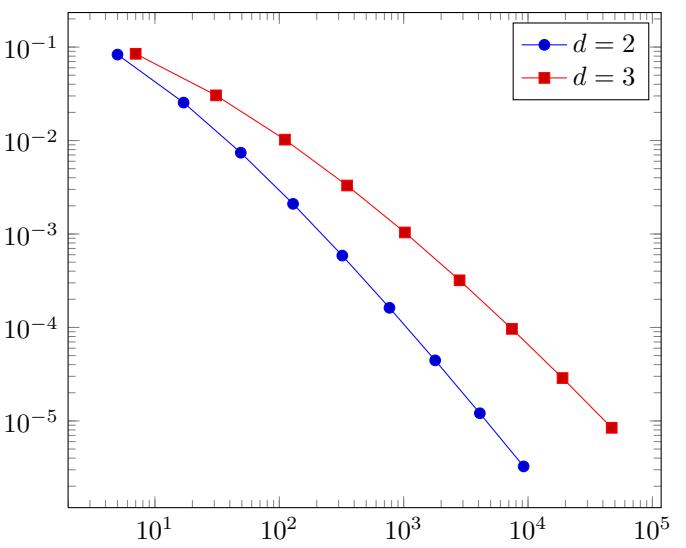

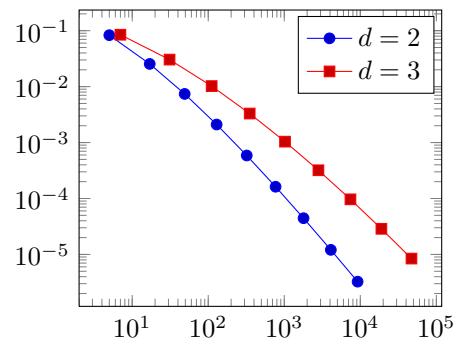

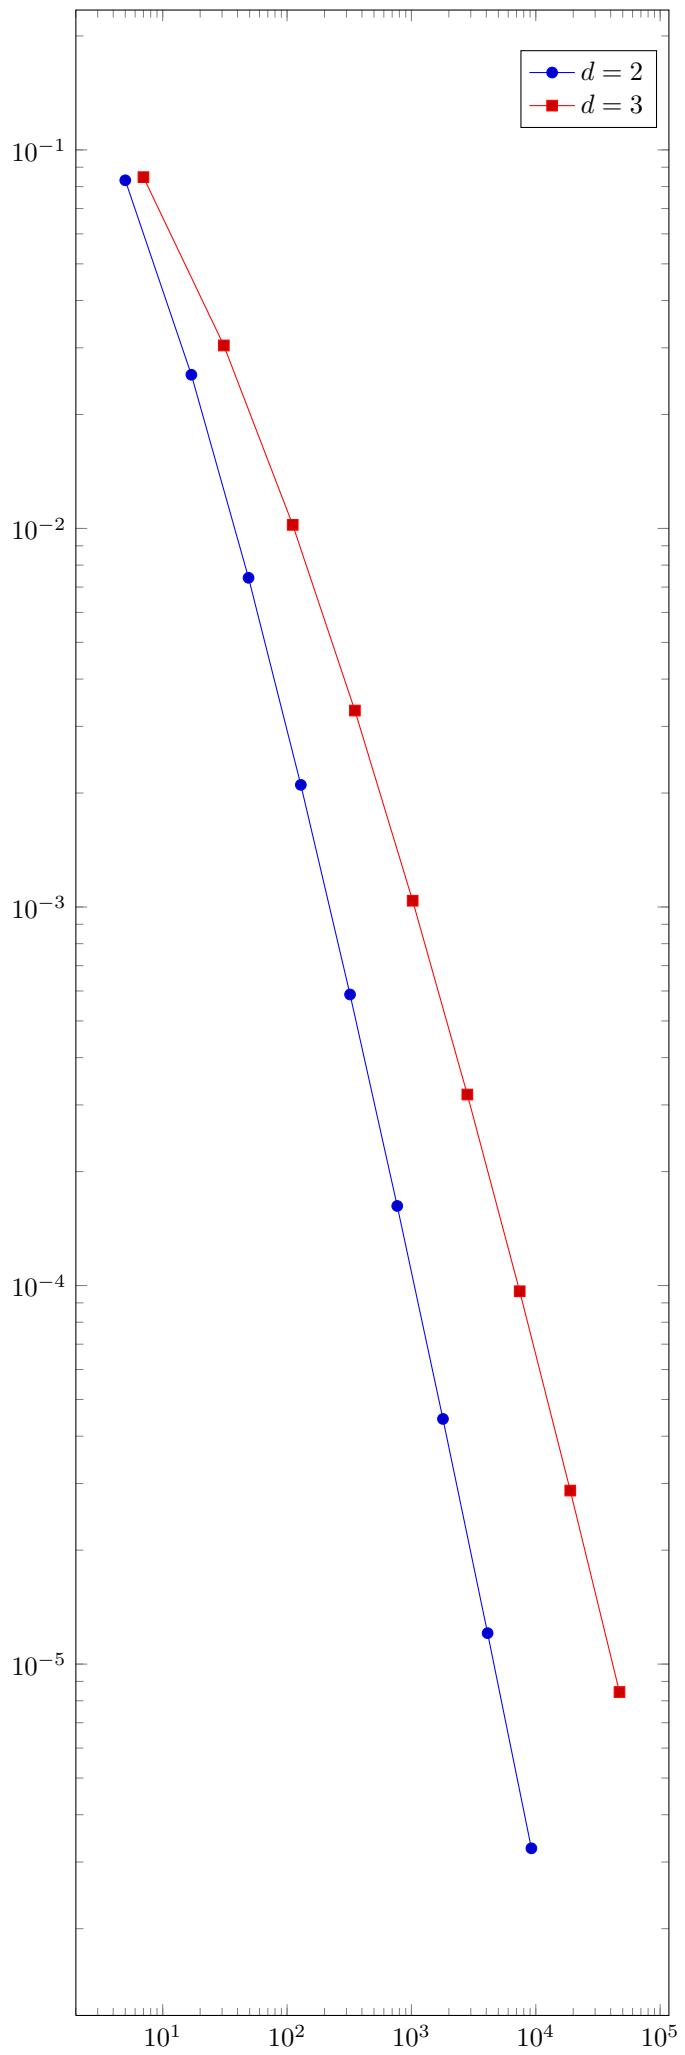

9.2.9 Testing numeric artefacts around tick position ‘0’

[scaled ticks=false] in this subsection

9.3 Scaling log plots

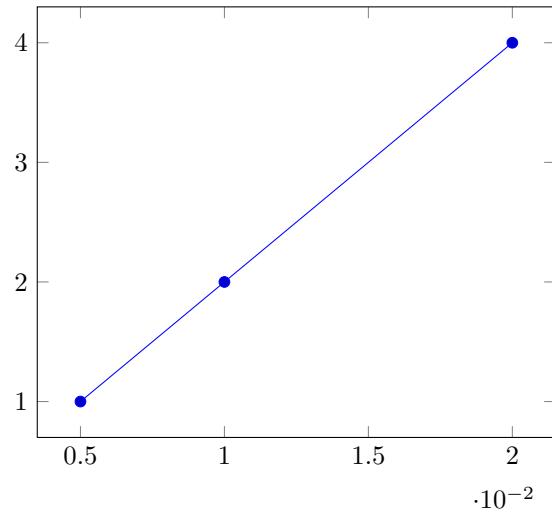

9.4 Scaletest

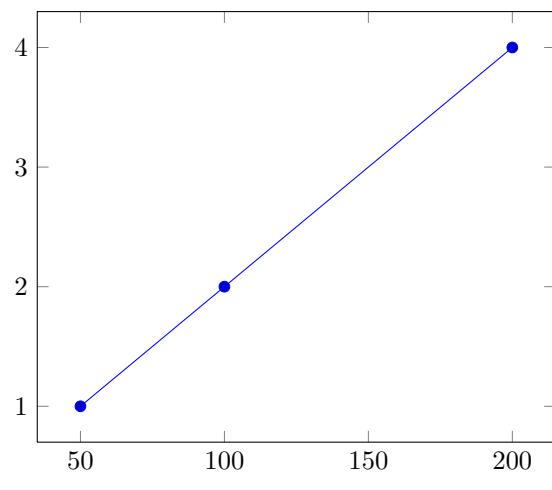

9.5 Scaling test for very small or very large x values

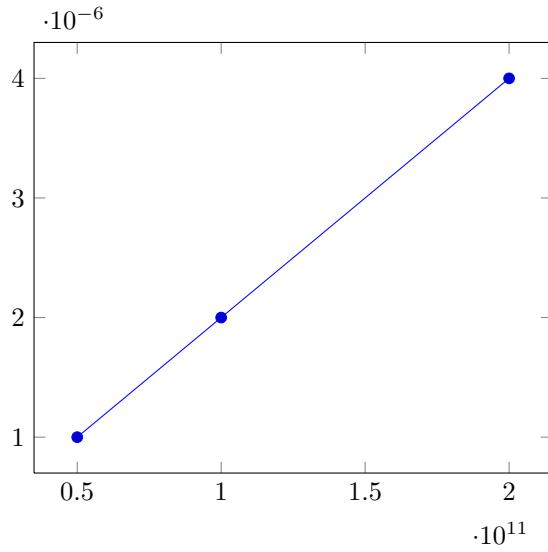

9.5.1 $1e-2$

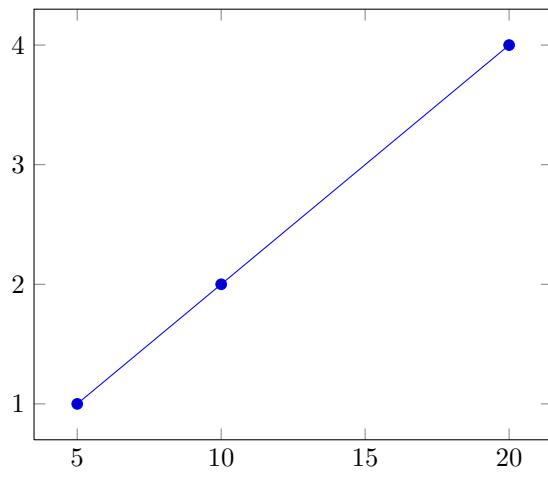

9.5.2 $1e+2$

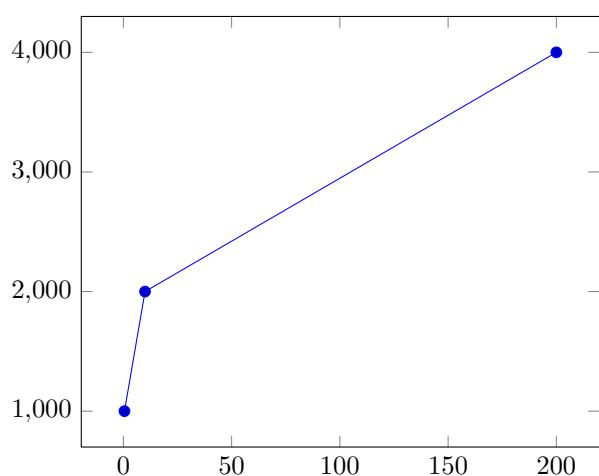

9.5.3 $x=1e+11$; $y=1e-6$

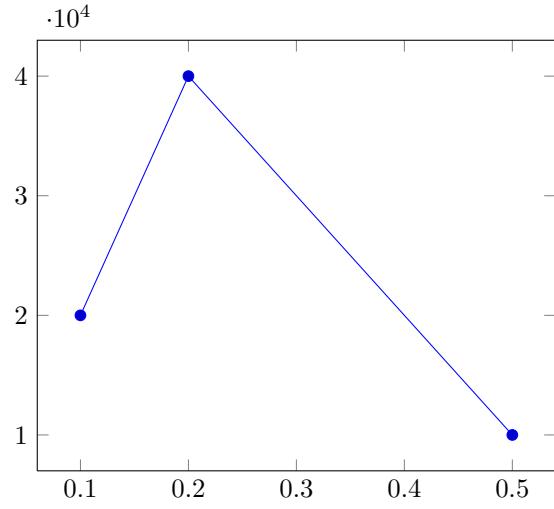

9.5.4 $1e+1$

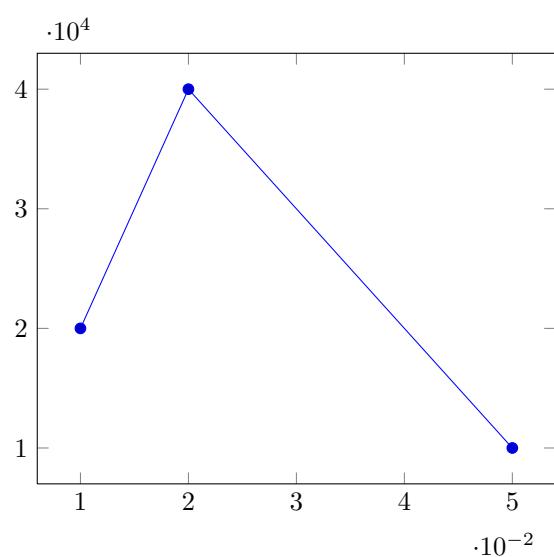

9.5.5 $1e+3$

9.5.6 $1e+4$

9.5.7 $1e-2, 1e+4$

Chapter 11

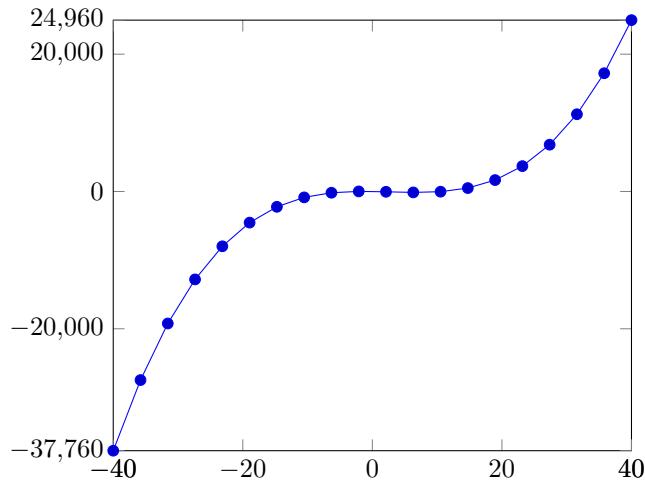

pgfplotstest.enlargelimits.tex

11.1 Limit computation

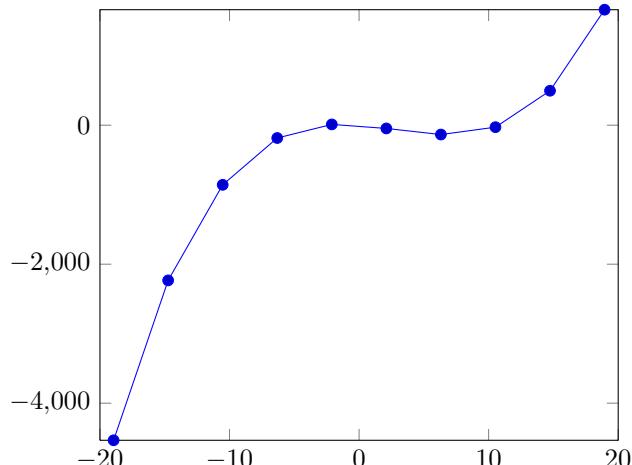

11.1.1 User specified limits

[scaled ticks = false,enlargelimits=false] in this section

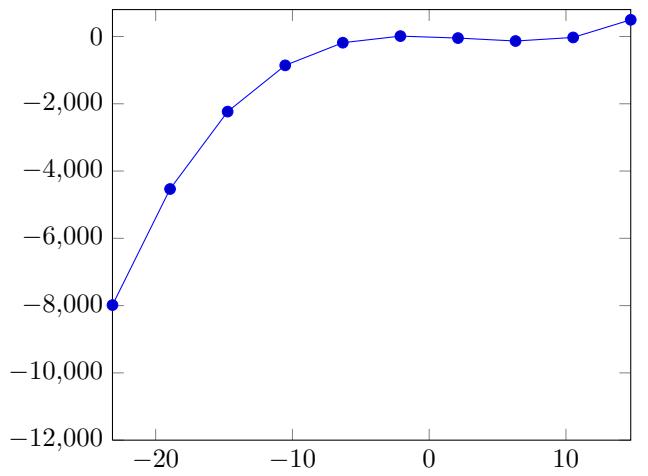

linear plot, unconstraint

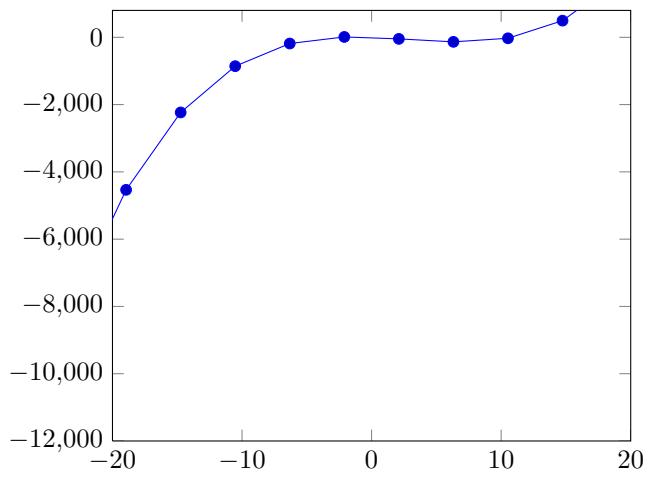

linear plot, limited to $x \in [-20, 20]$

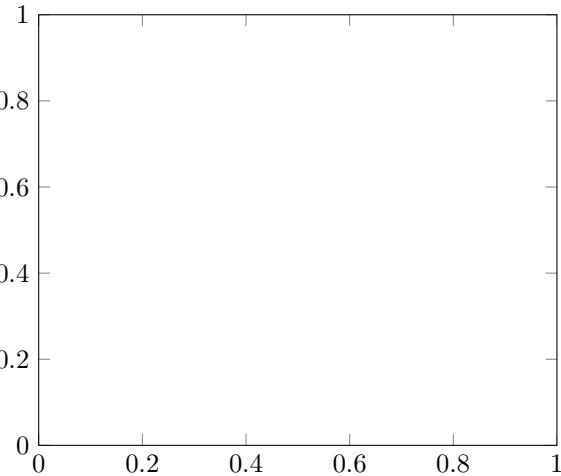

linear plot, limited to $y \in [-12000, 800]$

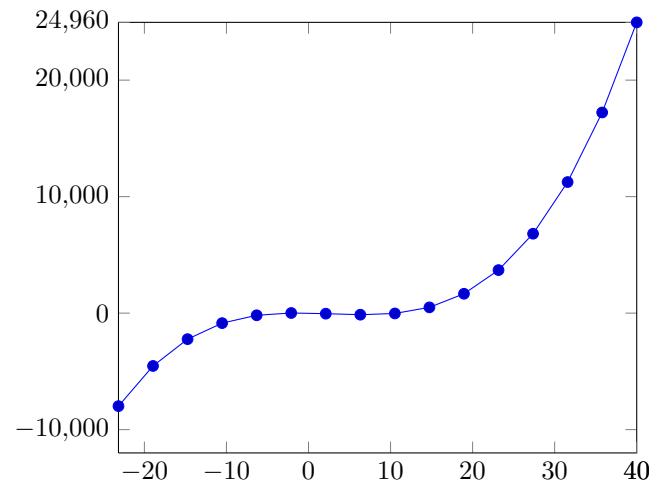

linear plot, limited to $x \in [-20, 20]; y \in [-12000, 800]$

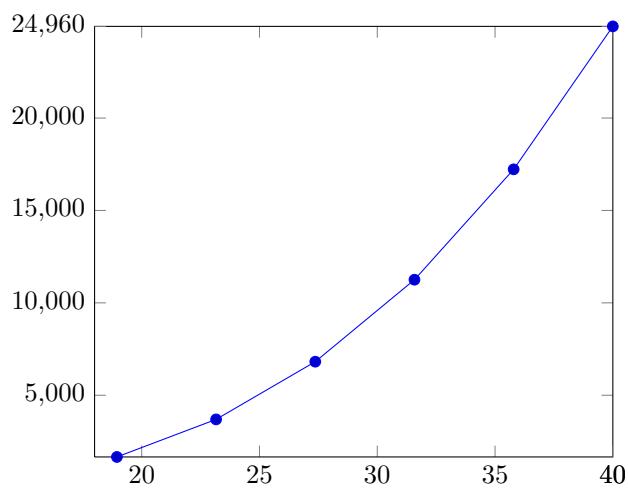

linear plot, limited to empty x -range

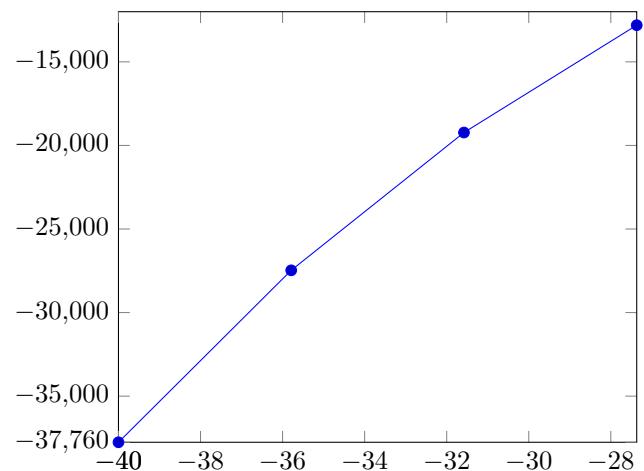

linear plot, limited only in $y_{min}=-12000$

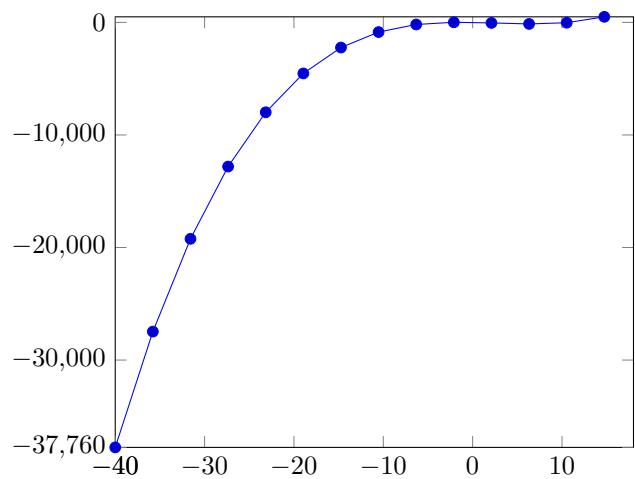

linear plot, limited to $x_{min}=18$

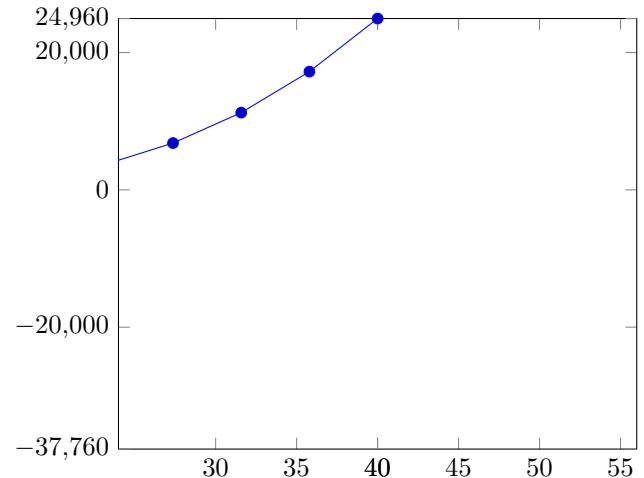

linear plot, limited only in $y_{max}=-12000$

linear plot, limited only in $x_{max}=18$

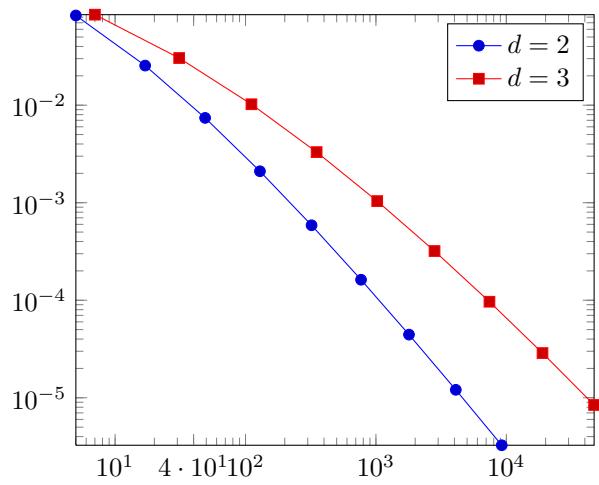

linear plot, clip limits=false and $x_{min}=50$

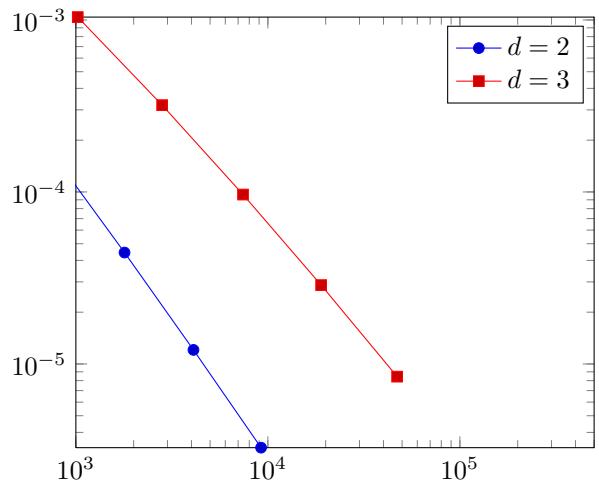

11.1.2 Log plots

Log-plots use the same code; they should work in the same way!

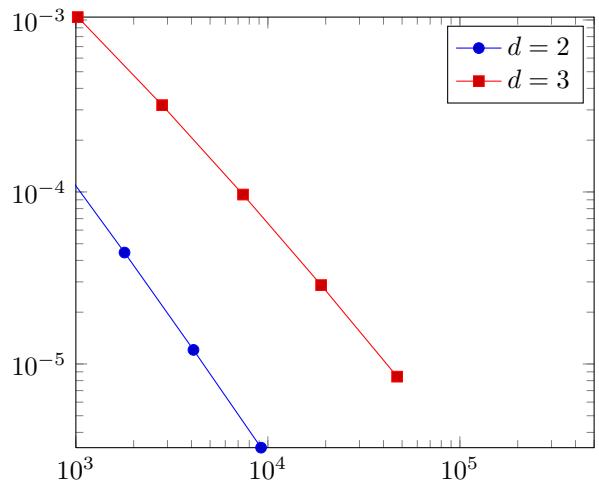

log plot unconstraint

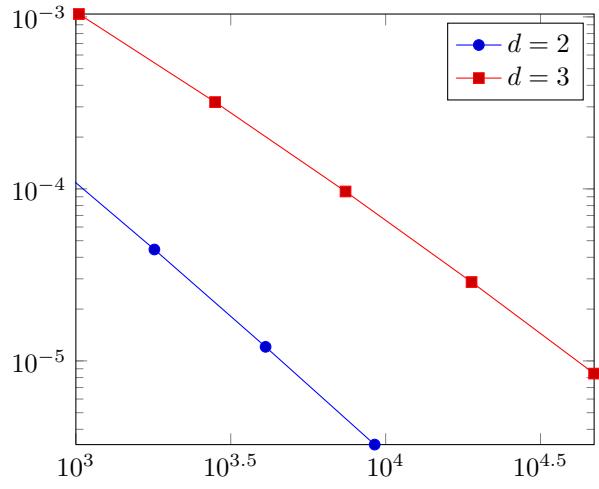

log plot limited to $y \in [10^{-5}, 2 \cdot 10^{-3}]$

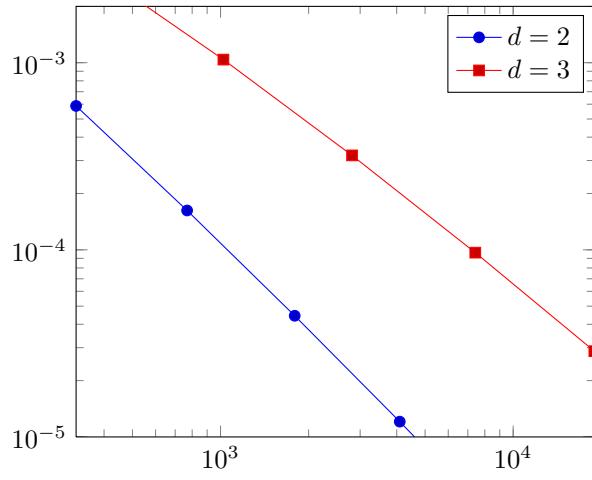

log plot limited to $x \in [10^3, 5 \cdot 10^5]$

log plot limited to $x > 10^3$

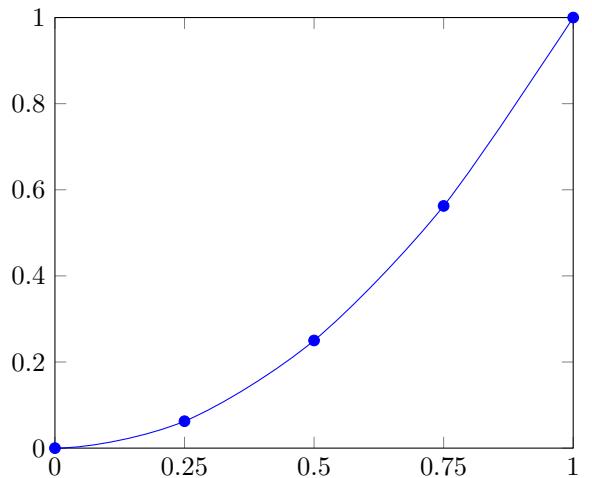

log plot limited to $y \in [10^{-5}, 2 \cdot 10^{-3}]$

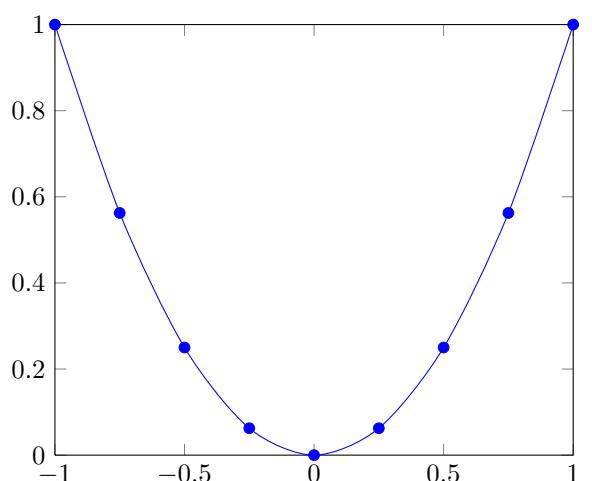

11.1.3 Enlargelimits tests

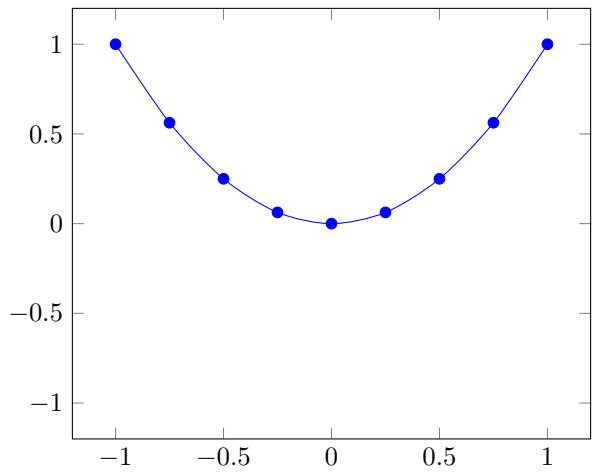

enlargelimits=false, x limits provided

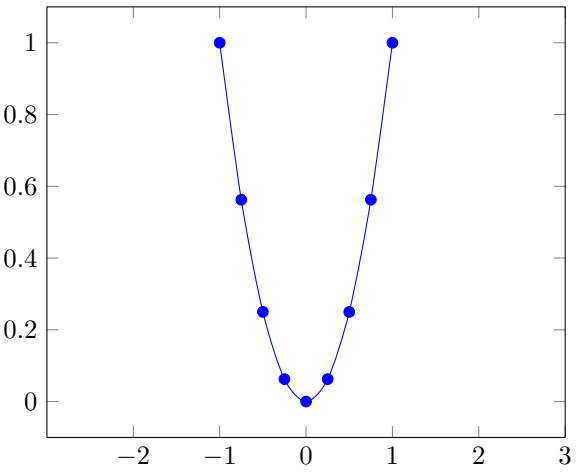

enlargelimits=false, no limits provided

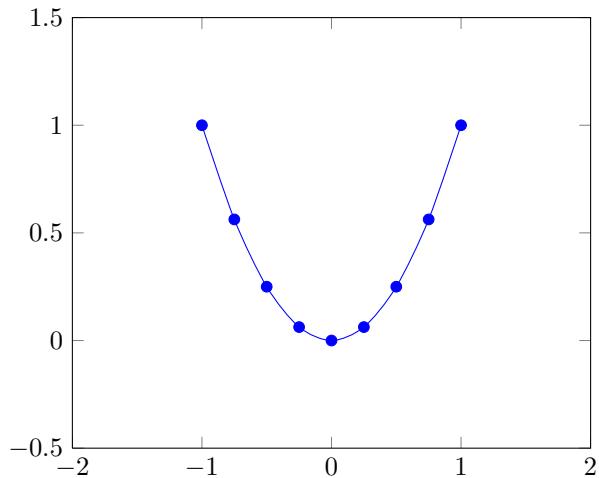

`enlargelimits=true`, all limits provided $[-1, 1] \times [-1, 1]$

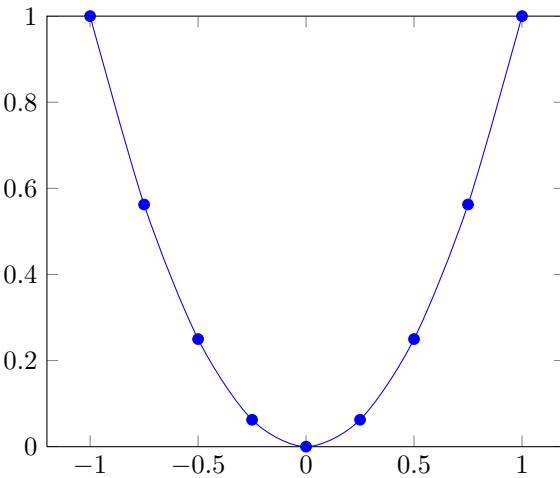

`enlarge x limits=1`

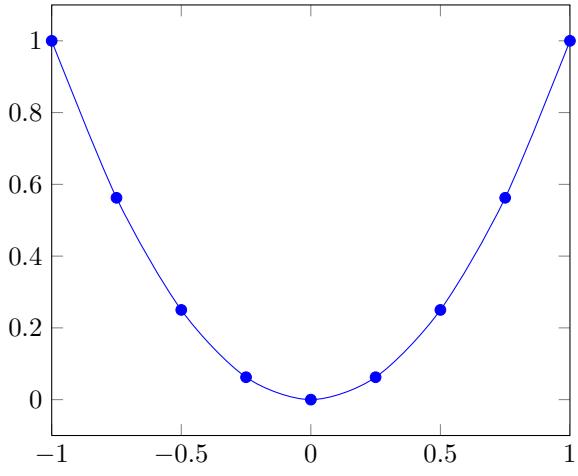

`enlargelimits=0.5`

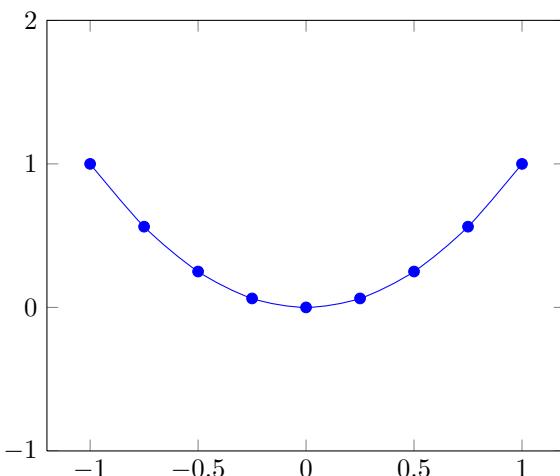

`enlarge y limits=false`

`enlarge x limits=false`

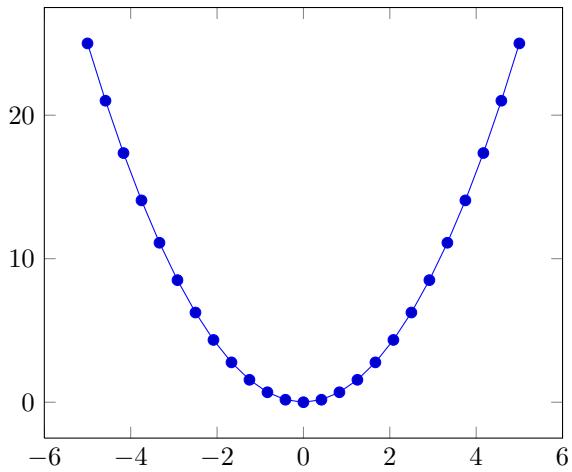

`enlarge y limits=1`

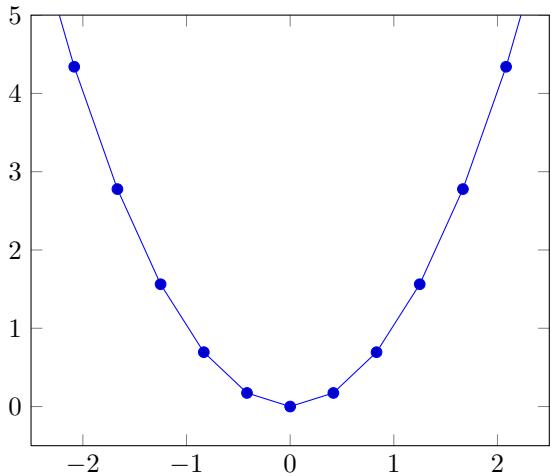

11.2 Once again with partial limits

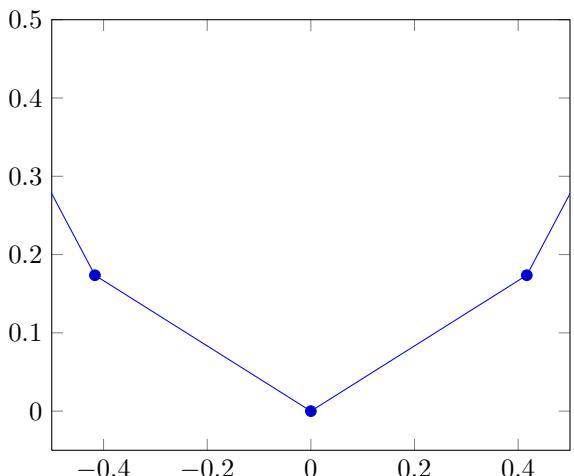

11.2.1 Unconstraint

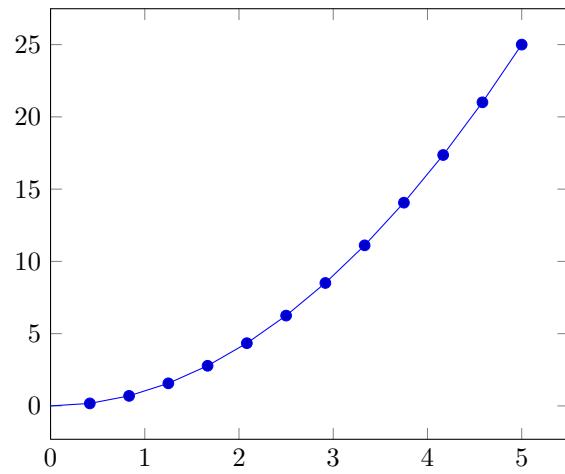

11.2.2 ymax=5

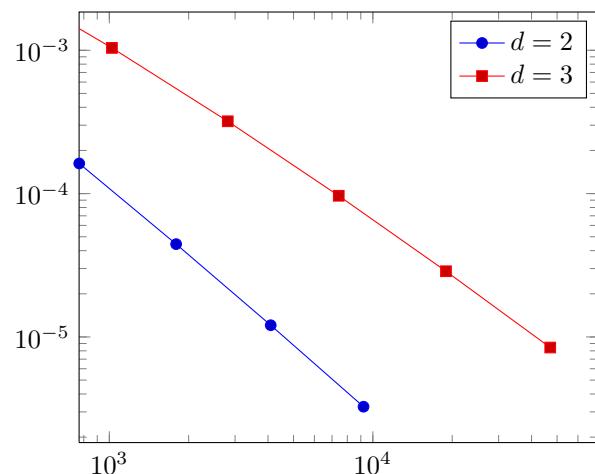

11.2.3 ymax=0.5

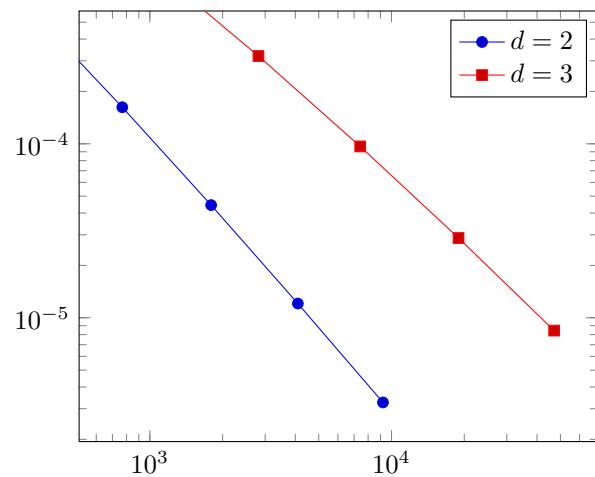

11.2.4 xmin=0

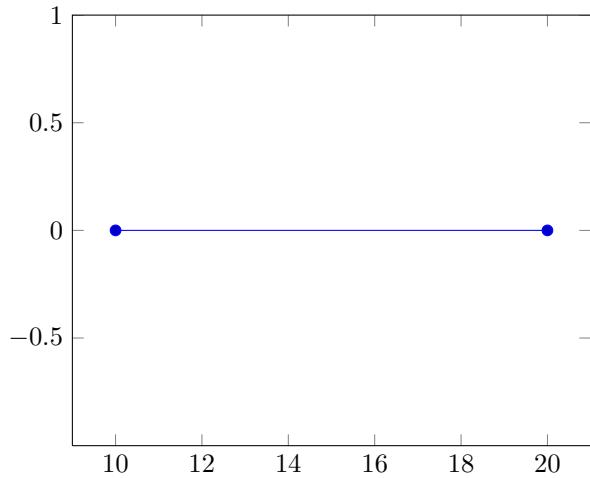

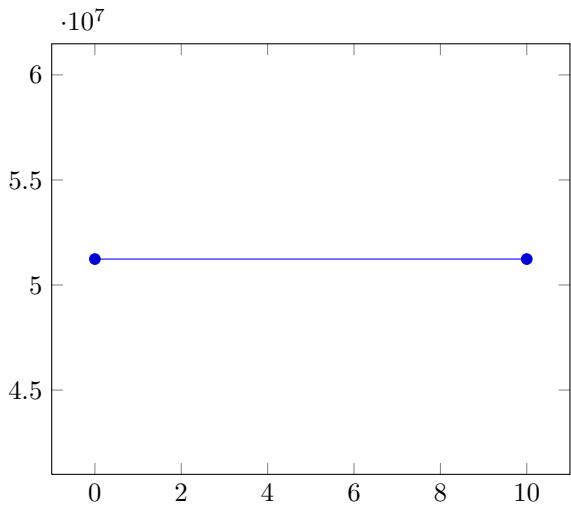

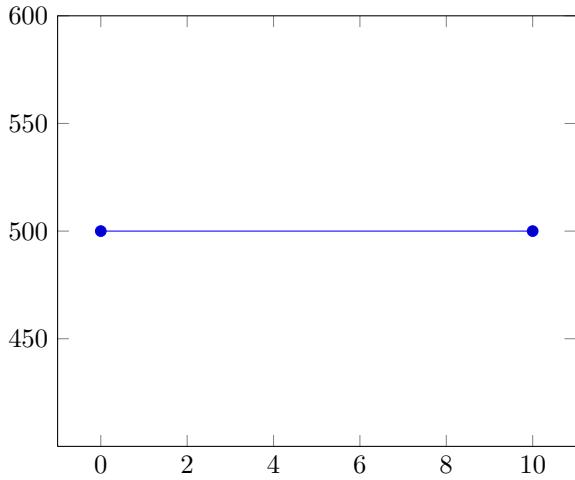

11.2.5 xmin=768

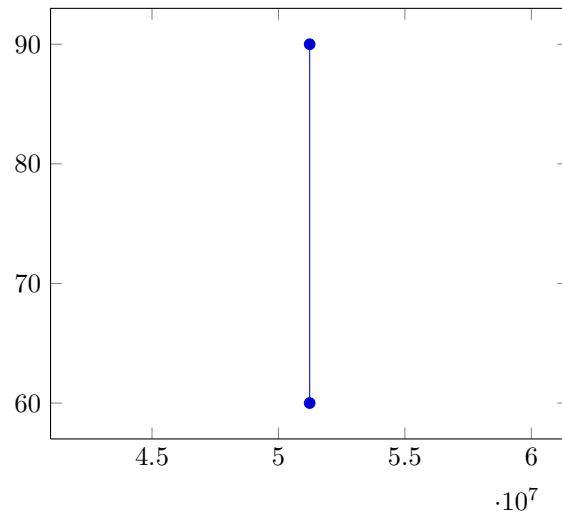

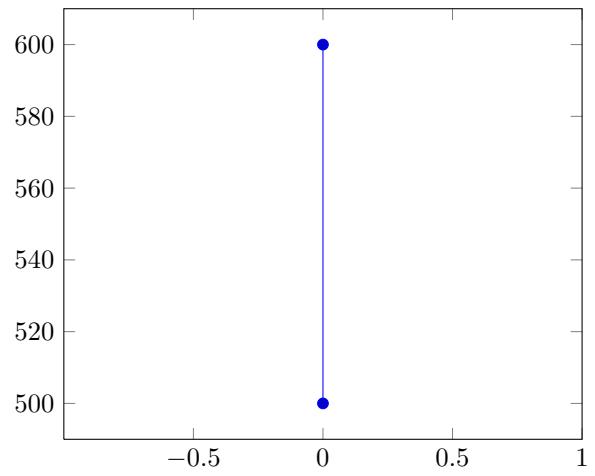

11.2.6 ymax=5.8e-4

11.2.7 constant in y

11.2.8 constant in x

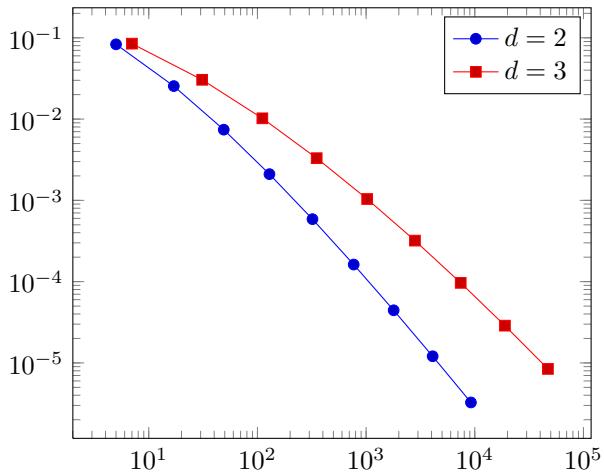

Chapter 12

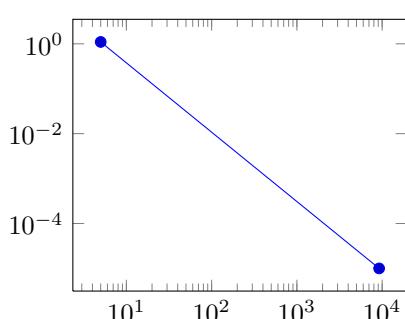

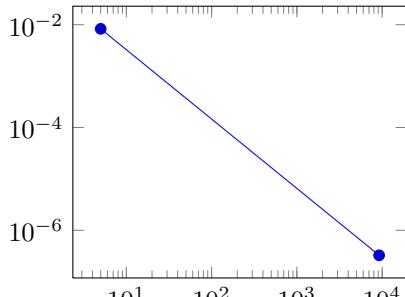

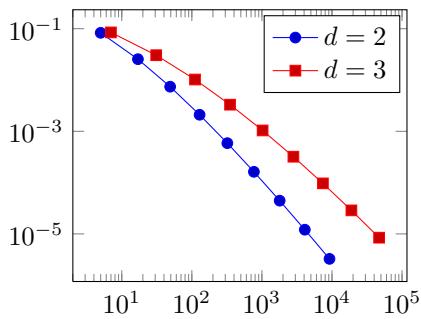

pgfplotstest.logplotenv.tex

12.1 Default options log plot

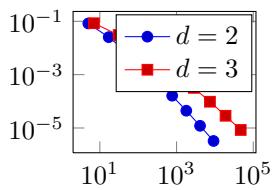

12.1.1 Default size

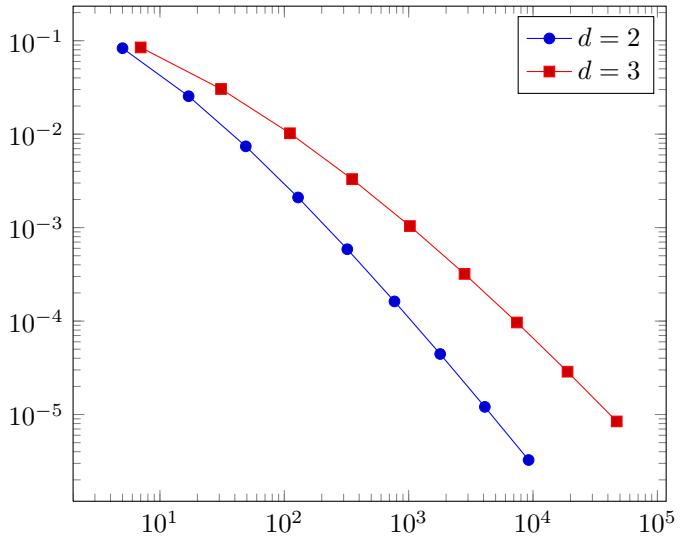

12.1.2 Small size

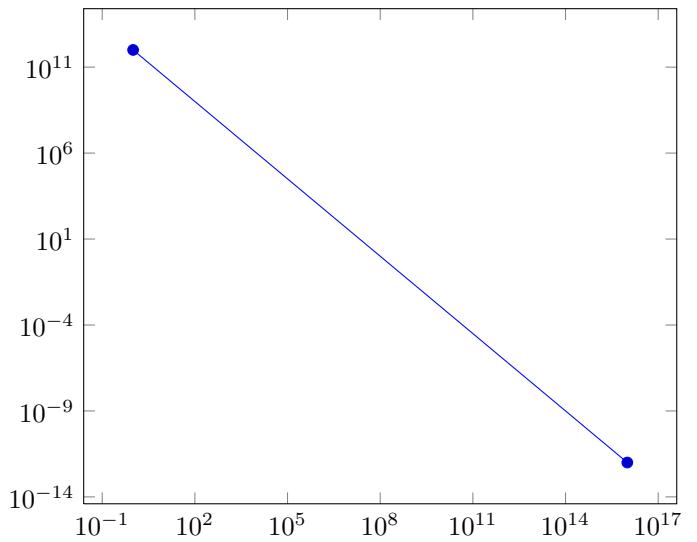

12.1.3 Very small size

12.1.4 Large size

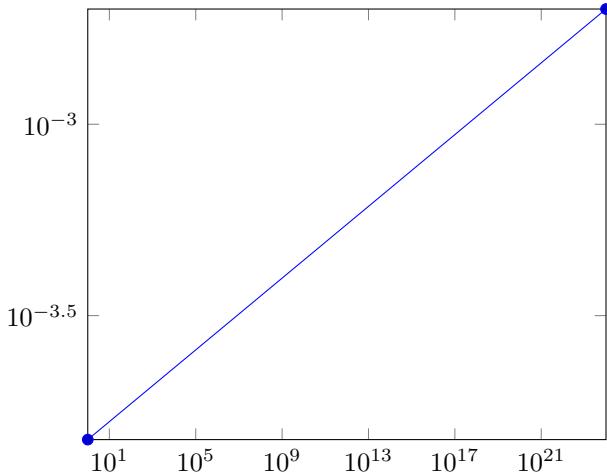

12.1.5 Large size; large range

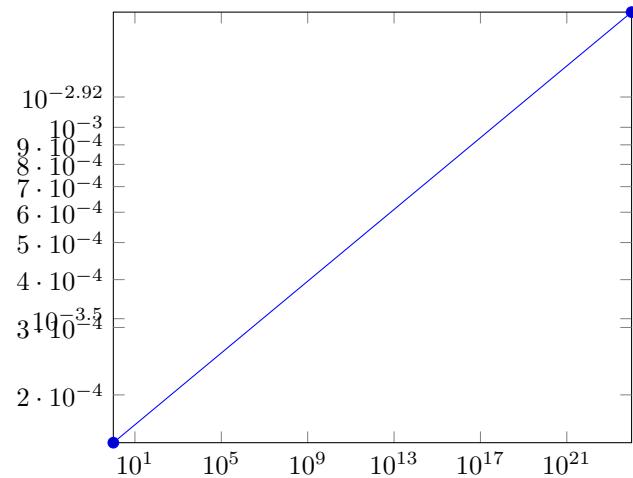

12.1.6 Extremely small y range for log plot

Without extra ticks, enlargelimits=false

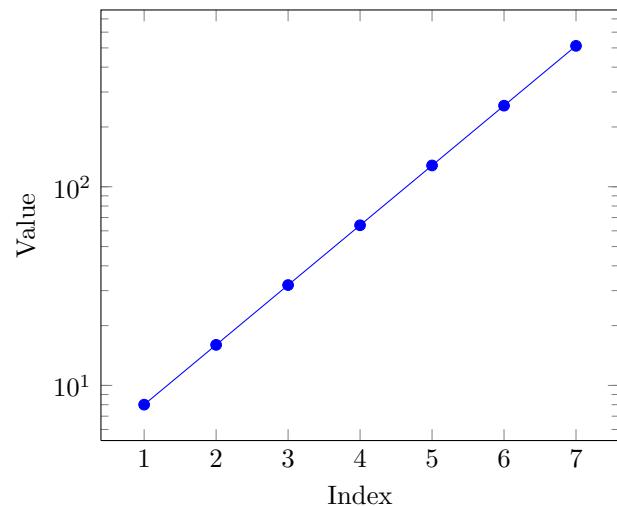

With extra ticks, enlargelimits=false

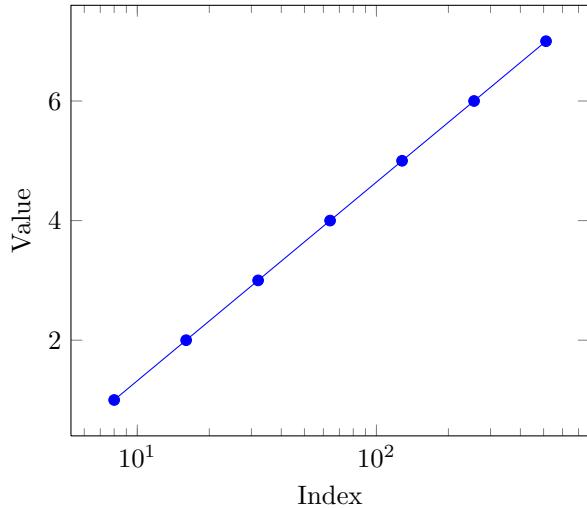

extra y ticks={2e-4,3e-4,4e-4,5e-4,6e-4,7e-4,8e-4,9e-4,1.2e-3}

17.2 x dir=reverse, axis lines=left

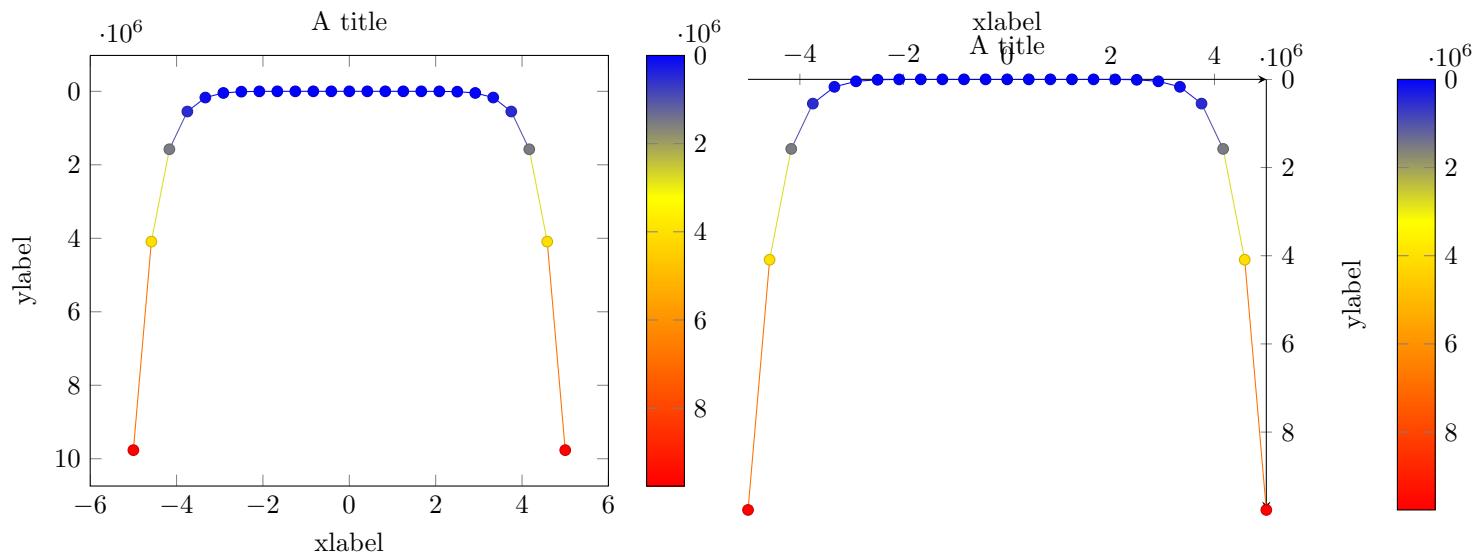

17.3 x dir=reverse, axis lines=center

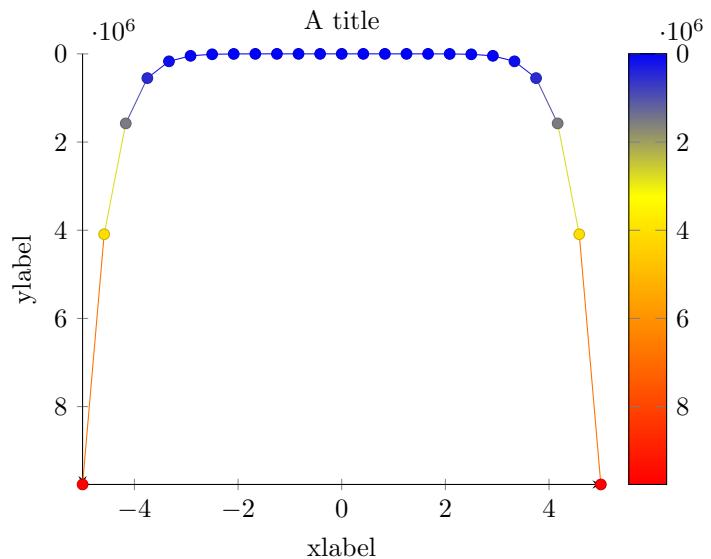

17.4 x dir=reverse, axis lines=right

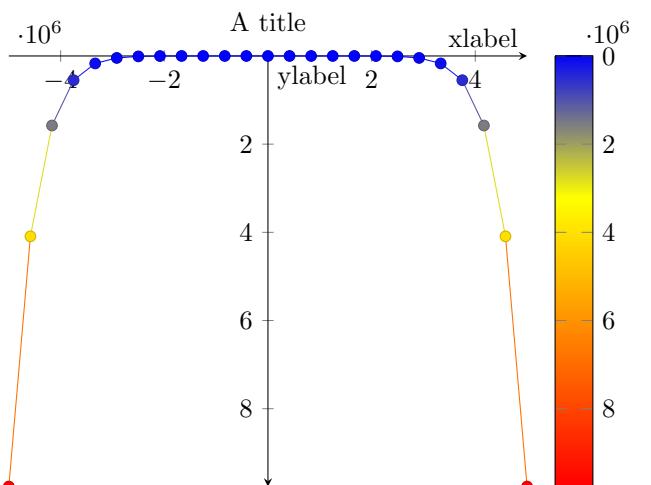

17.5 y dir=reverse

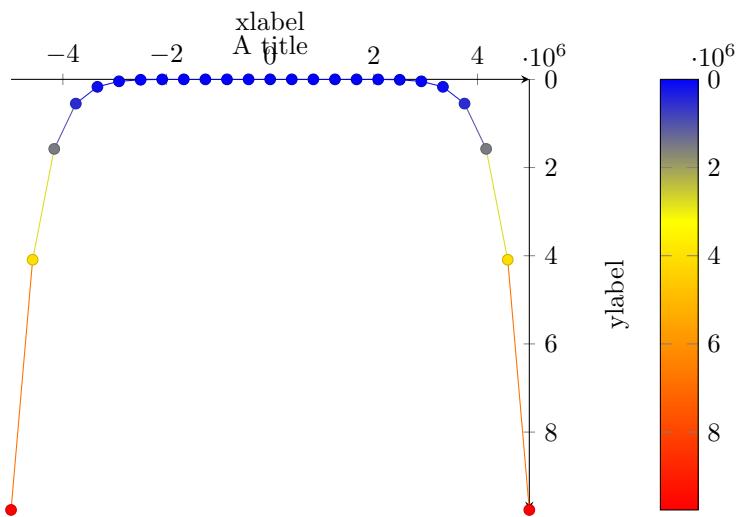

17.6 y dir=reverse, axis lines=left

17.7 y dir=reverse, axis lines=center

17.8 y dir=reverse, axis lines=right

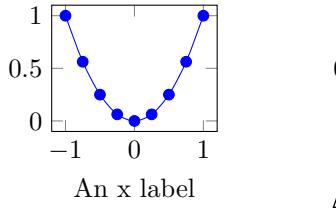

Chapter 18

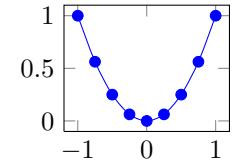

pgfplotstest.align.tex

18.1 Anchors, alignment, baselines, sub nodes

18.1.1 Baseline alignment

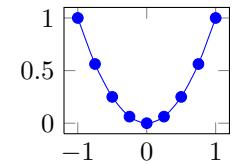

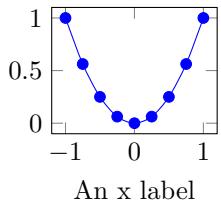

An x label

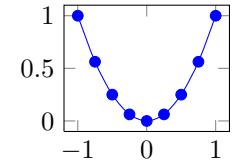

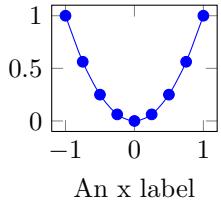

18.1.2 Baseline alignment and externalized graphics

One needs `\begin{pgfgraphicnamed}` around the complete paragraph, so this here doesn't work (see source code):

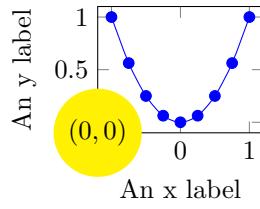

An x label

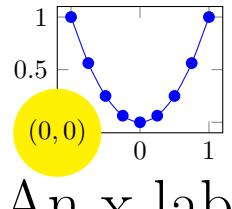

18.1.3 Baseline alignment and externalized graphics II

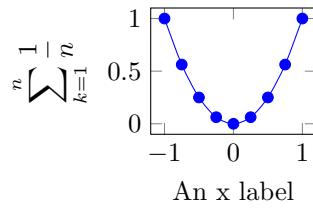

An x label

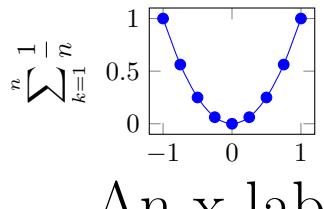

An x label

An x label

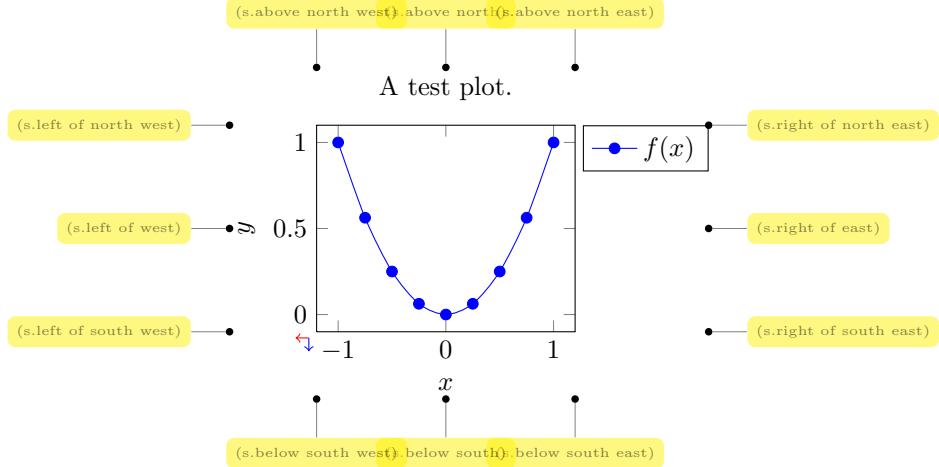

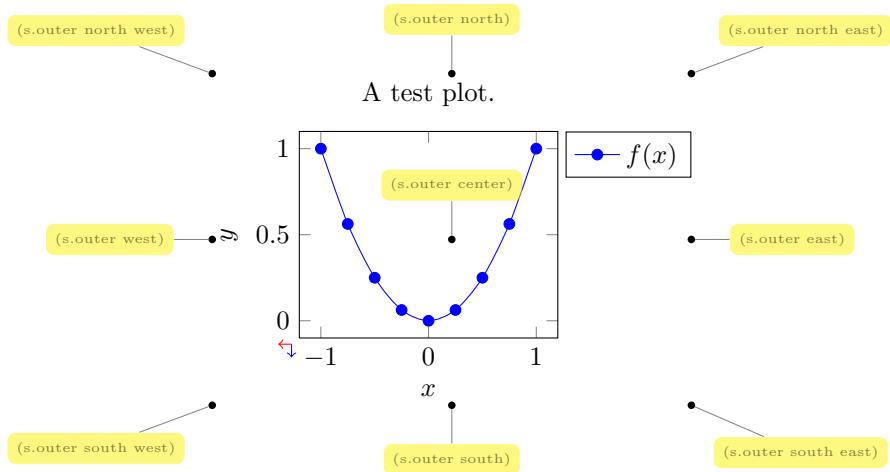

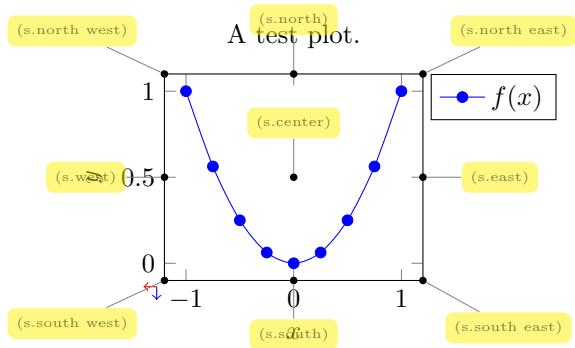

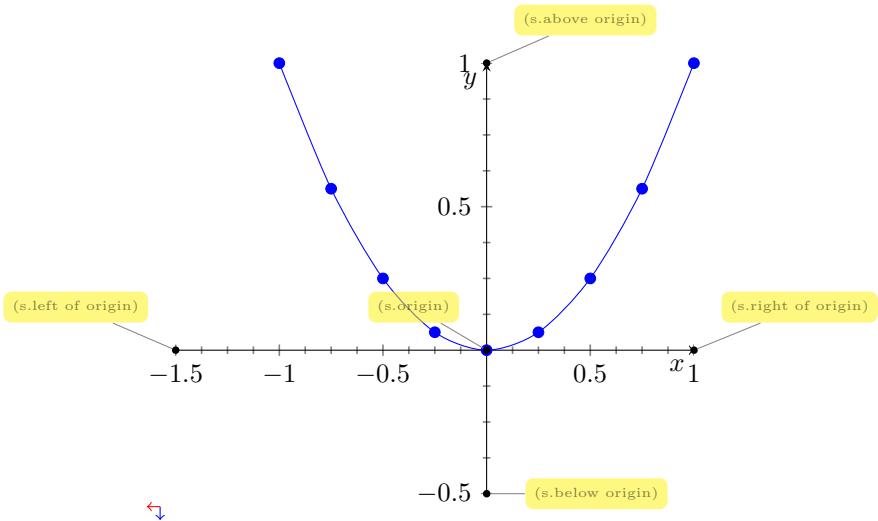

An x label

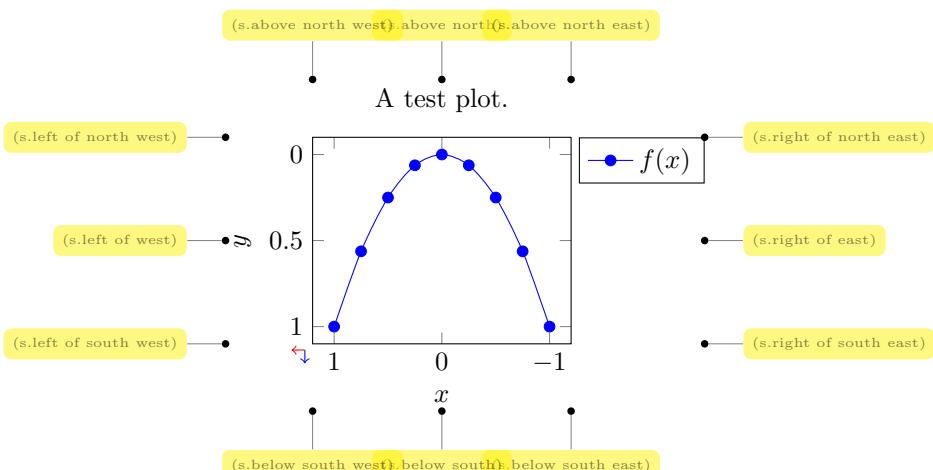

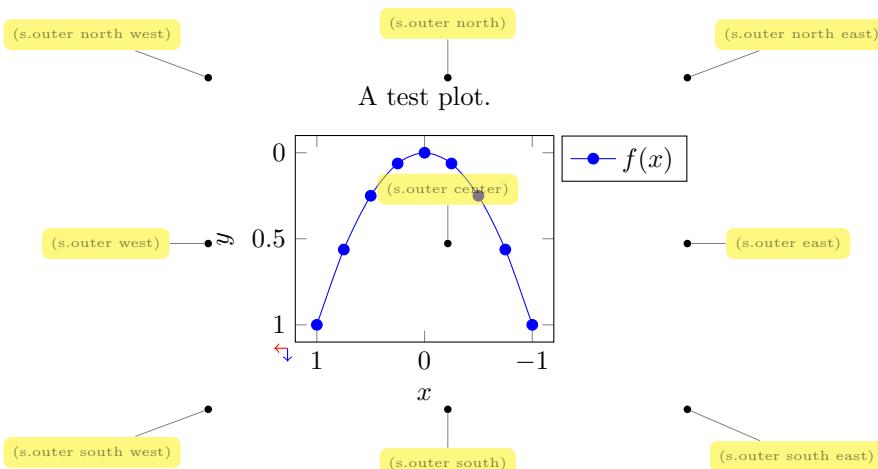

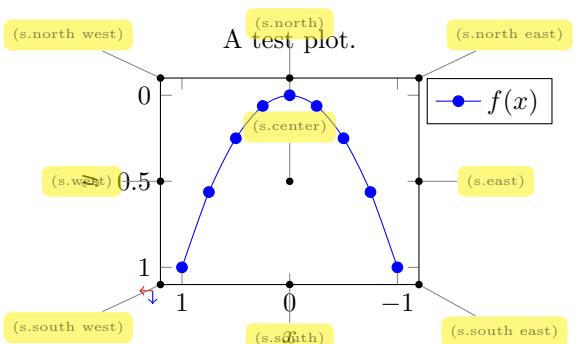

An x label

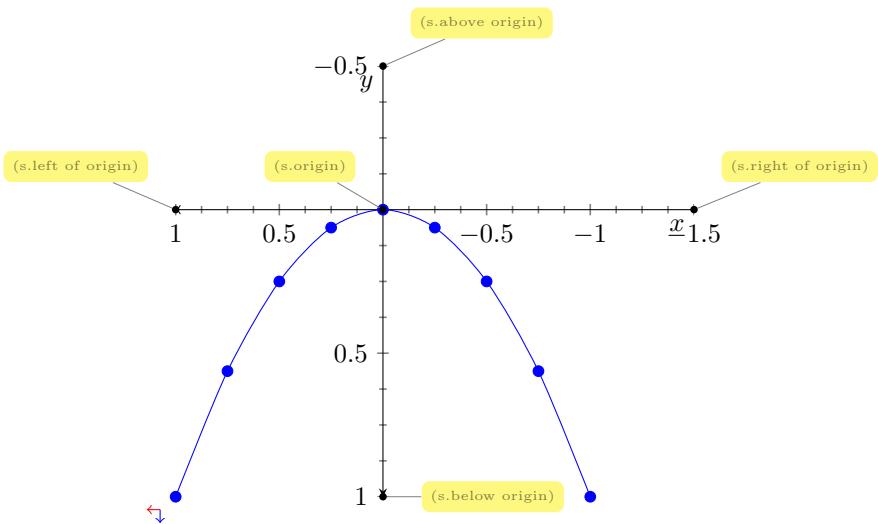

18.1.5 Anchortest

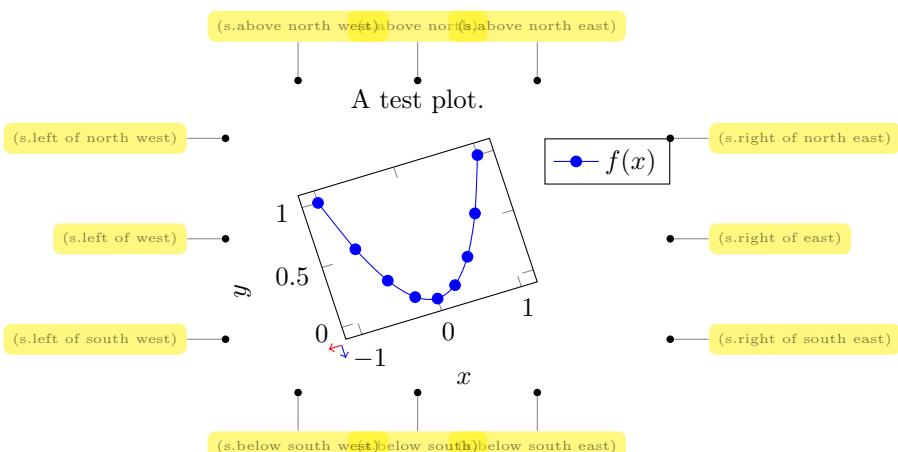

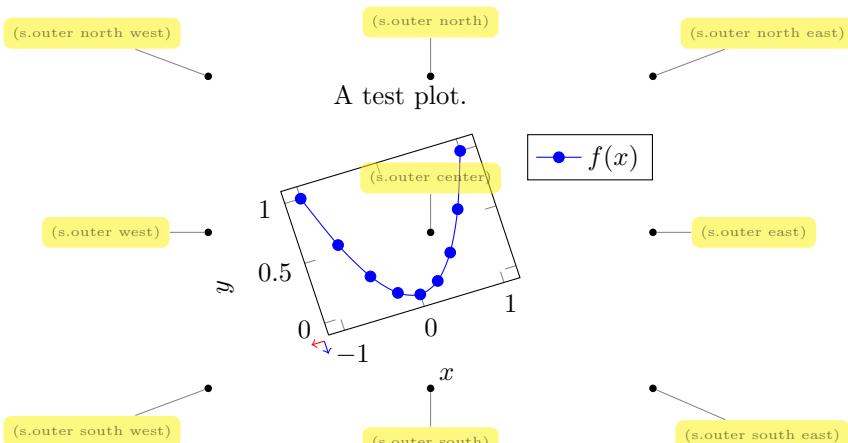

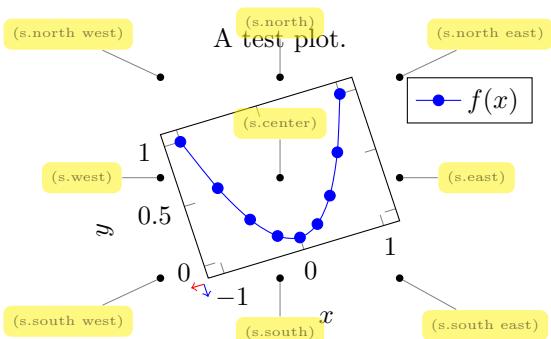

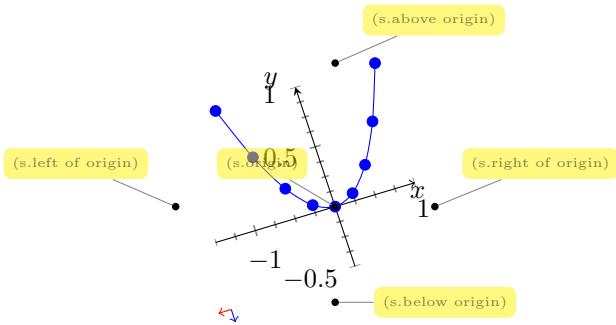

18.1.6 Reversed axes

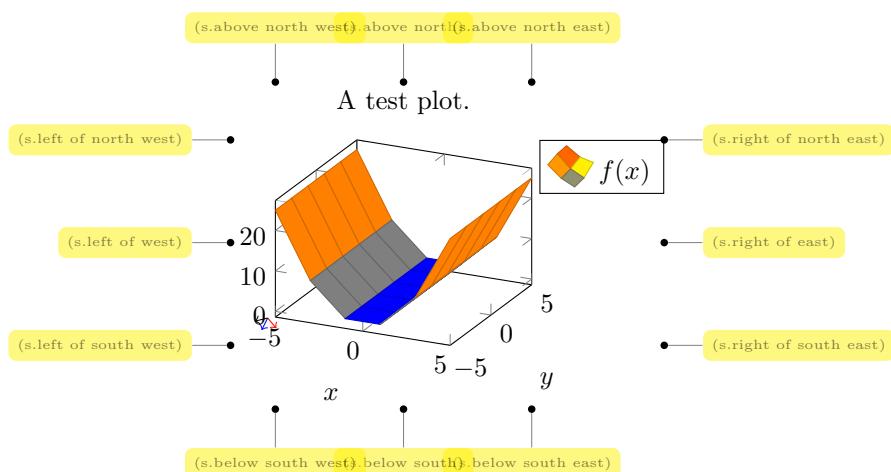

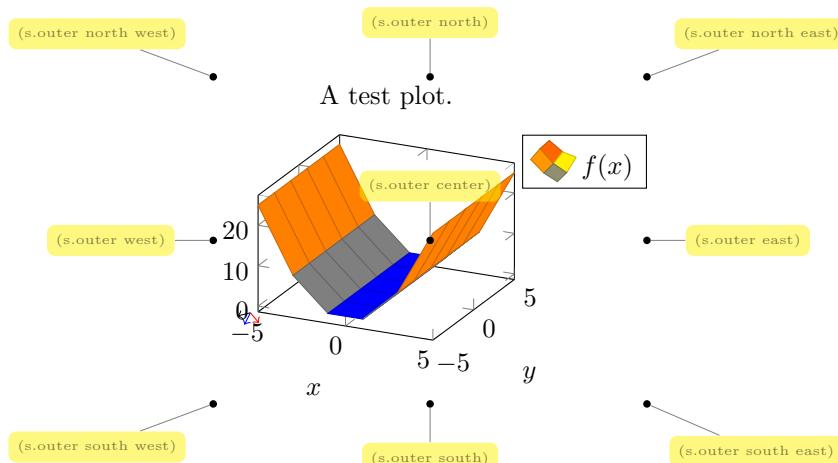

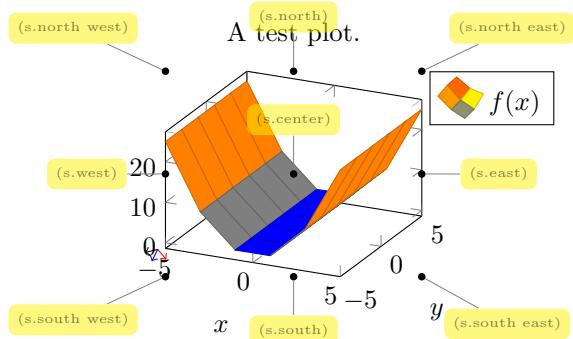

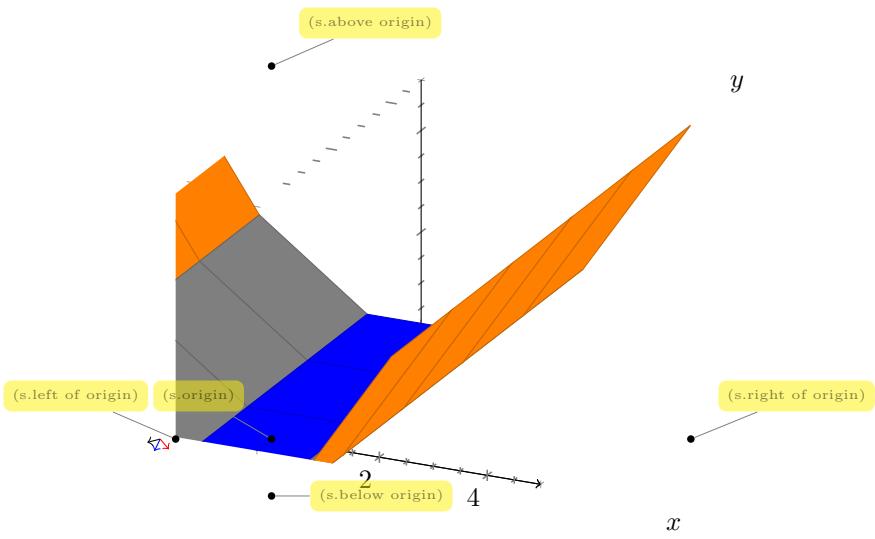

18.1.7 Using non-standard unit vectors

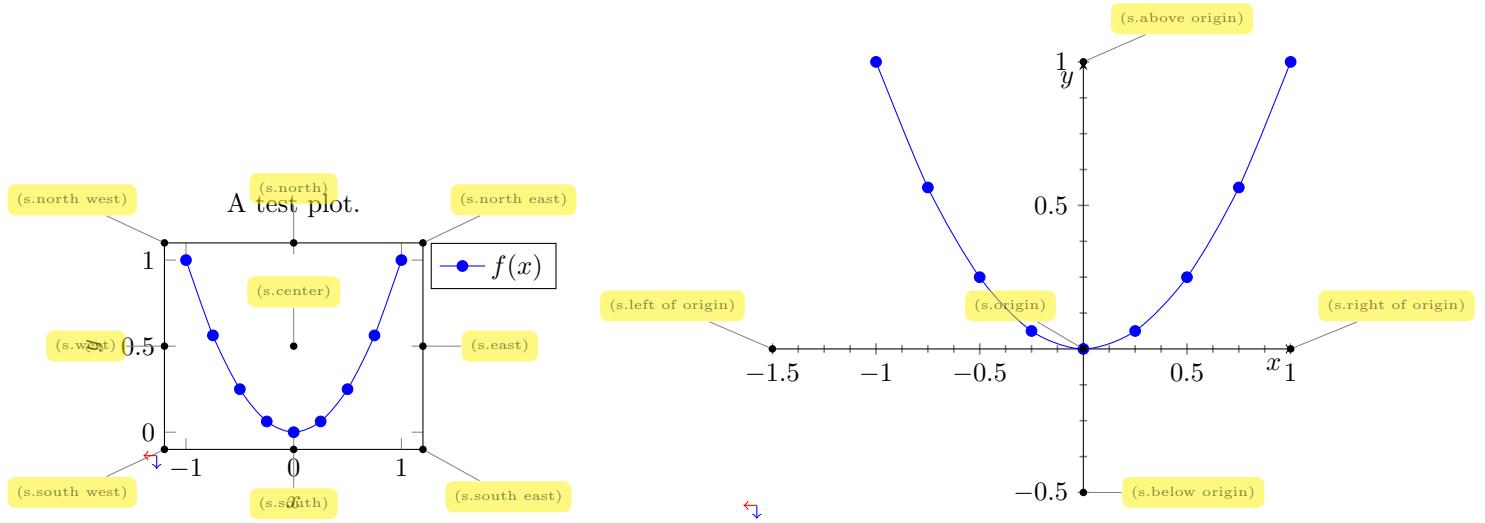

18.1.8 3D

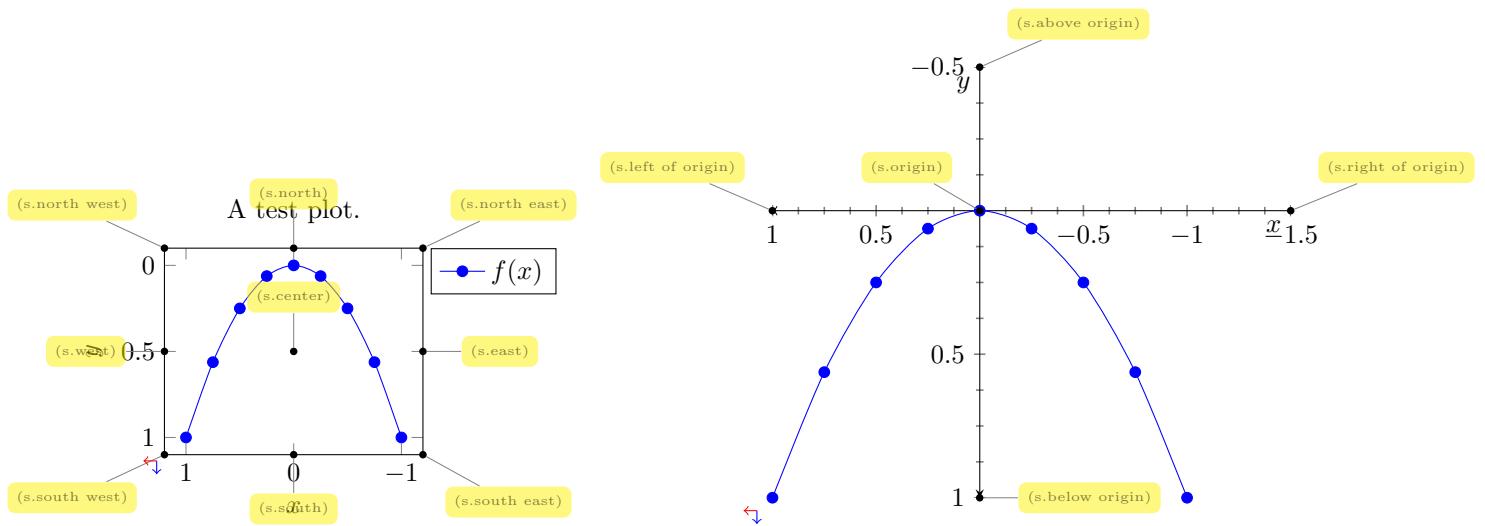

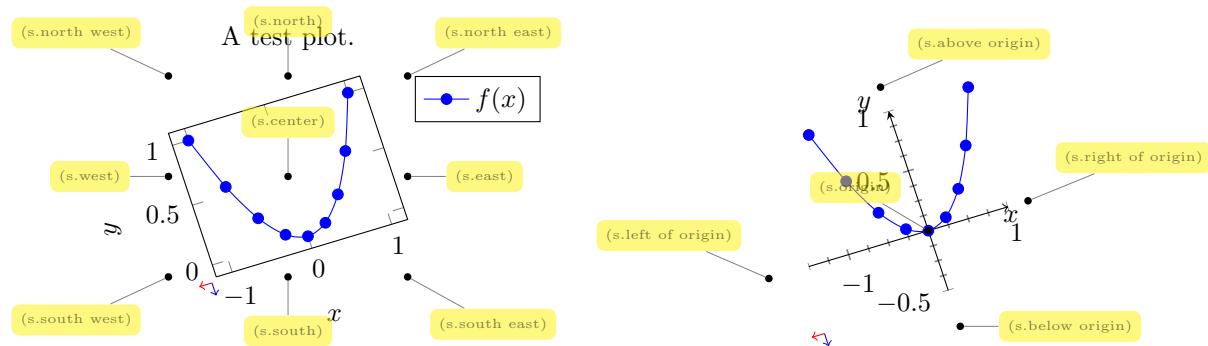

18.1.9 Using anchors before axis is finished

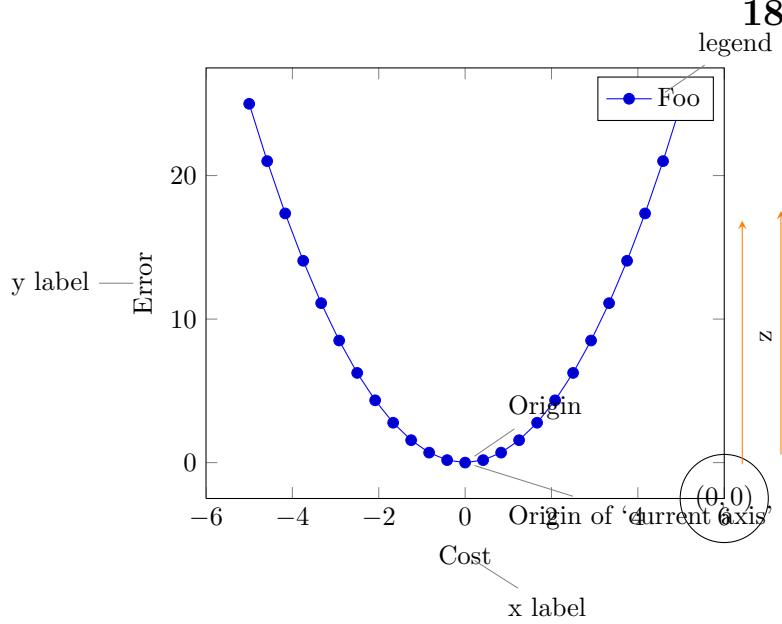

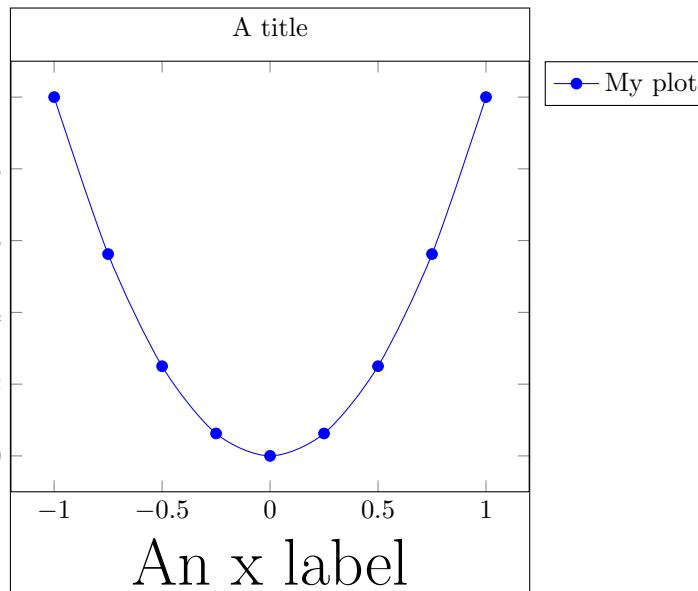

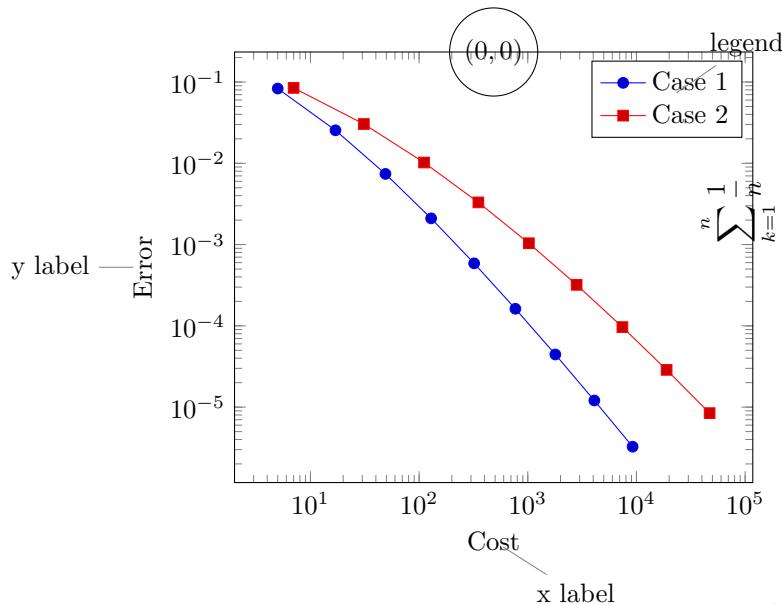

Reversed axes

non-unit vectors

18.1.10 Accessing sub-nodes

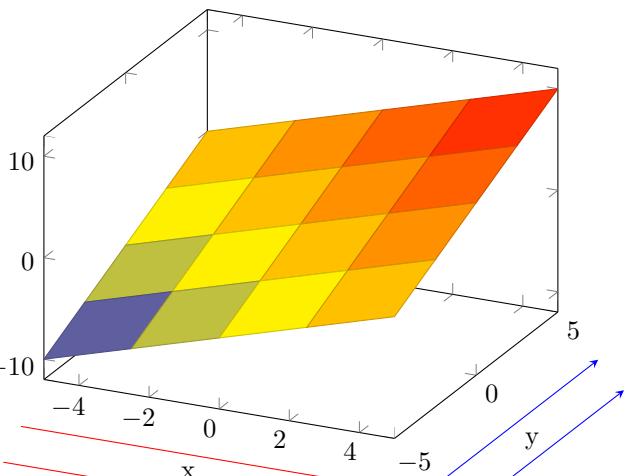

18.1.11 Funny bounding boxes

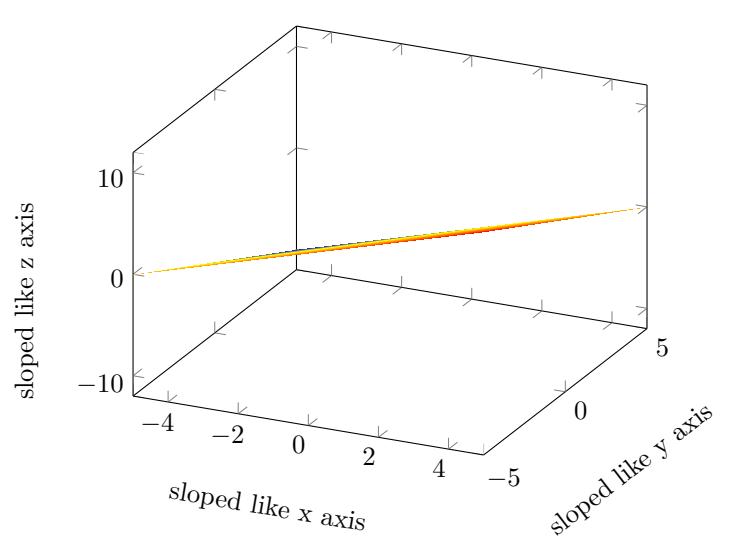

(my plot.below south west) rectangle (my plot.above north east)

The following figure is centered:

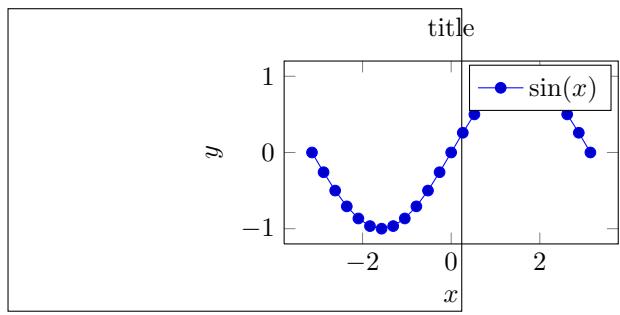

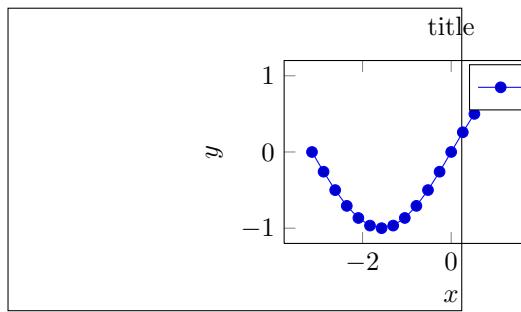

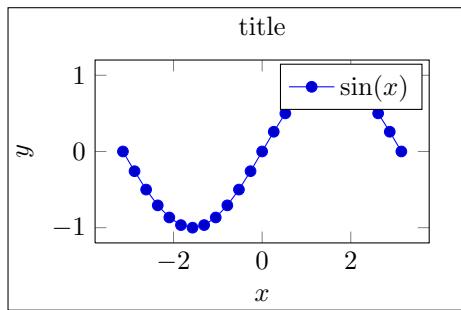

18.2 ticklabel cs

18.3 sloped like XXX axis

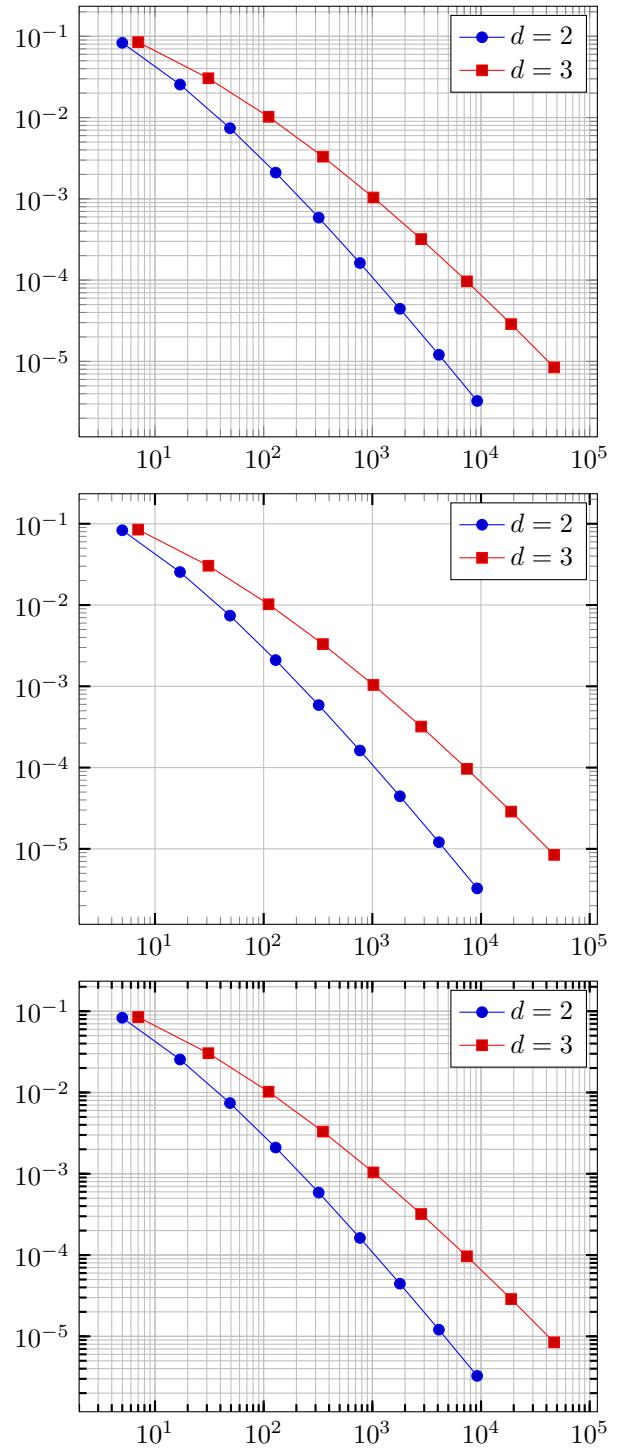

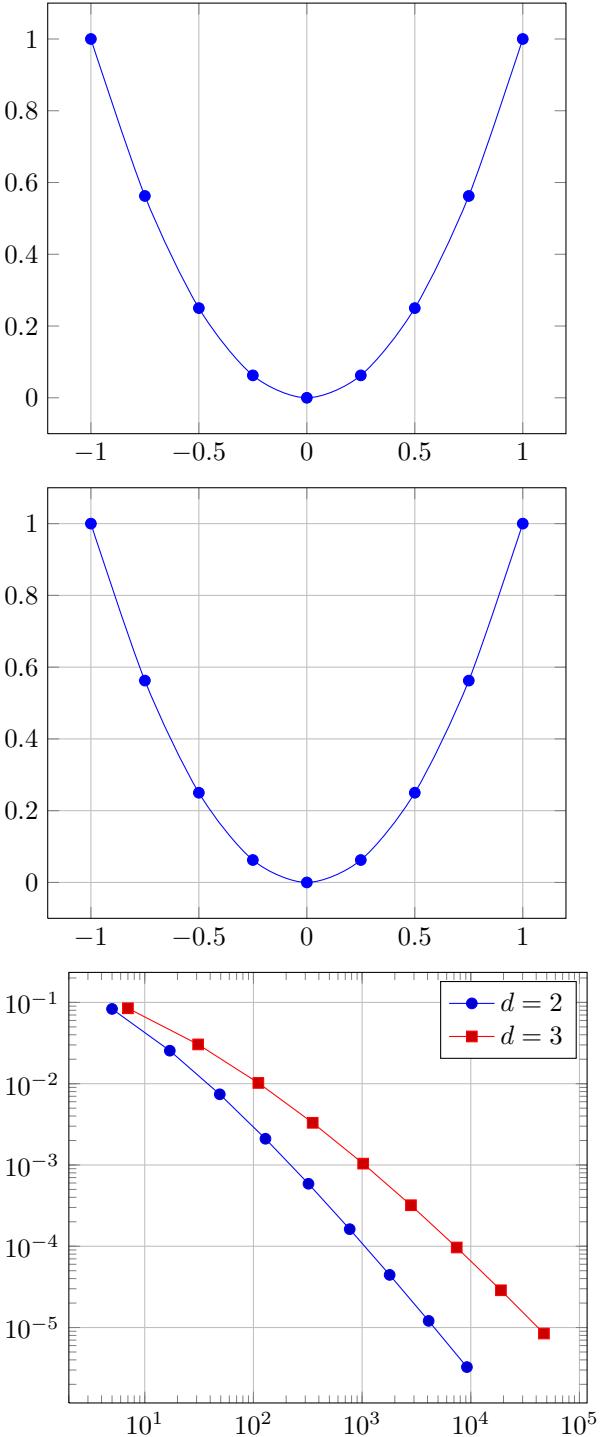

18.4 xyshift in axis and contained nodes

Chapter 19

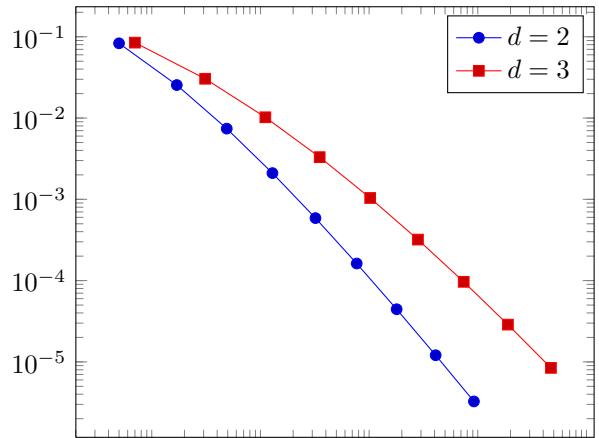

pgfplotstest.gridtick.tex

19.1 Grid lines test

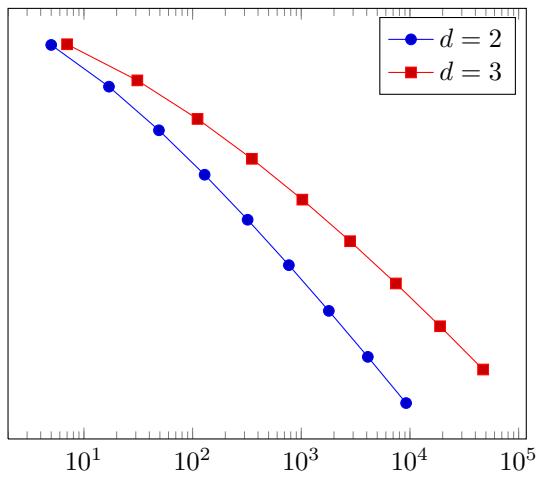

19.2 Tick lines test

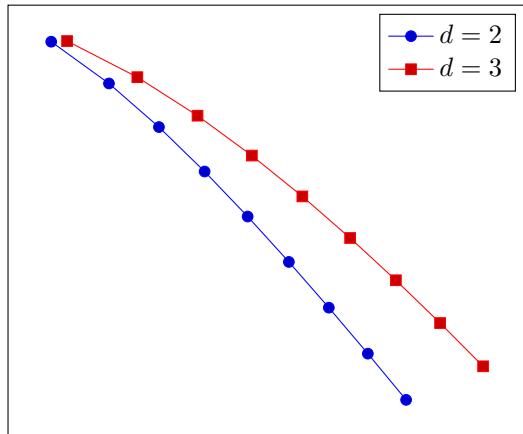

19.2.1 `xmajorticks=false,xminorticks=true`

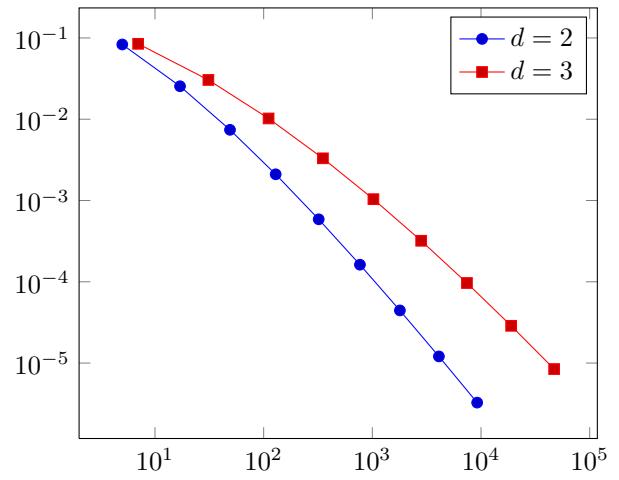

19.2.2 `ymajorticks=false,yminorticks=false`

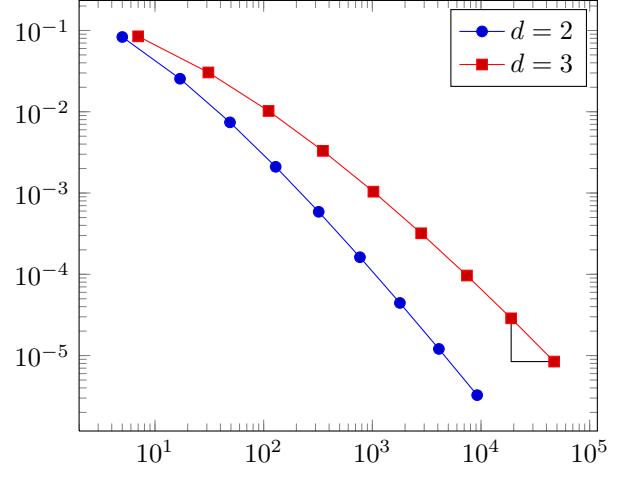

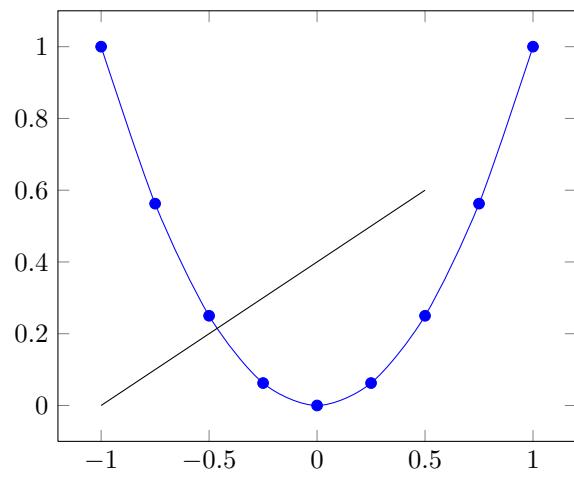

19.2.3 `ticks=none`

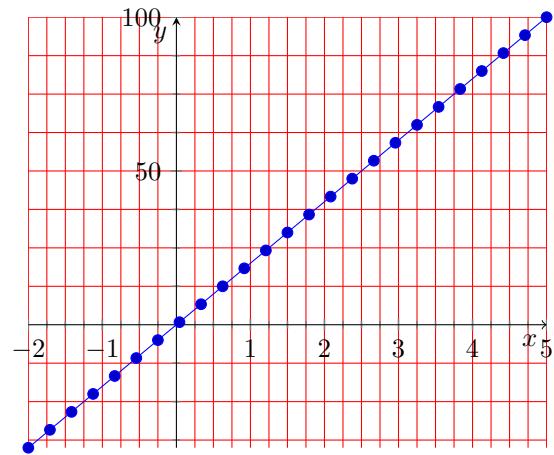

19.2.4 `ticks=major`

19.3 TikZ-coordinate system “axis”

19.4 Grid styles and axis line styles

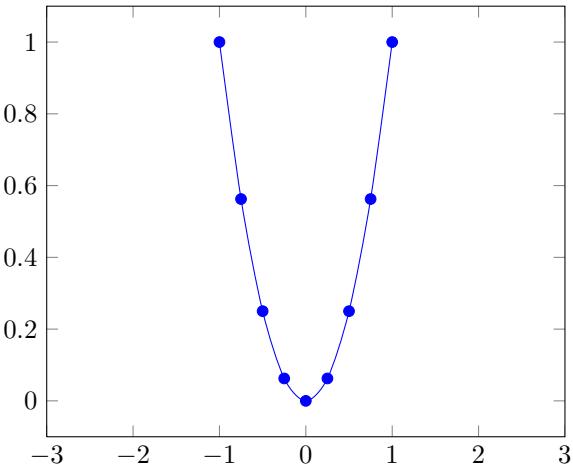

Chapter 20

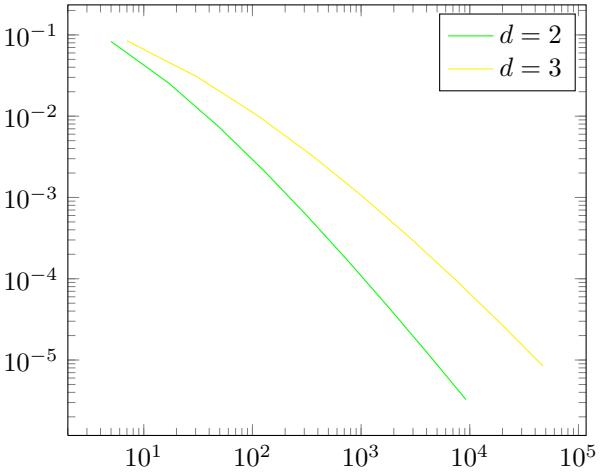

pgfplotstest.styles.tex

20.1 Style–tests

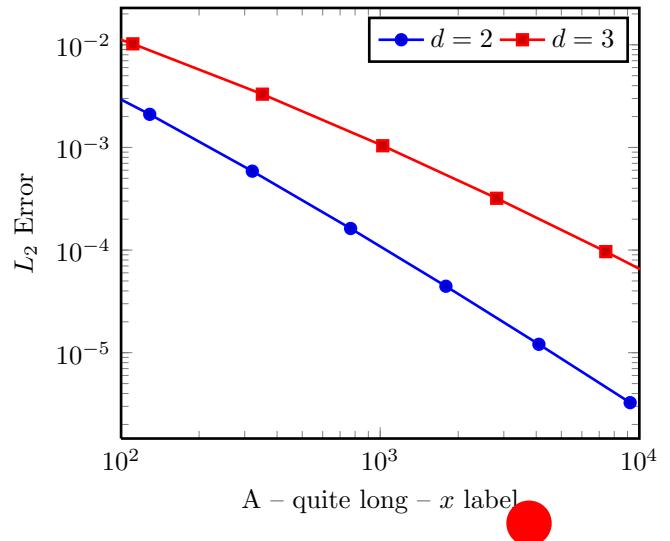

20.1.1 Limits in ‘every axis’; ‘cycle list’ option and ‘cycle list name’ option

20.1.2 testing ‘every loglog axis’ style

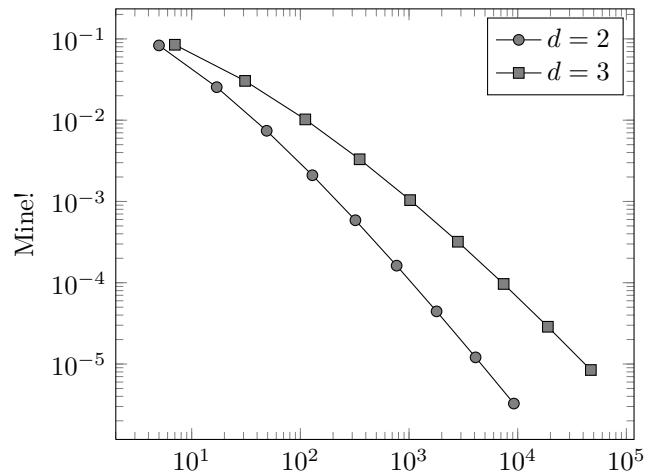

20.1.3 Using several ‘every ...’ styles

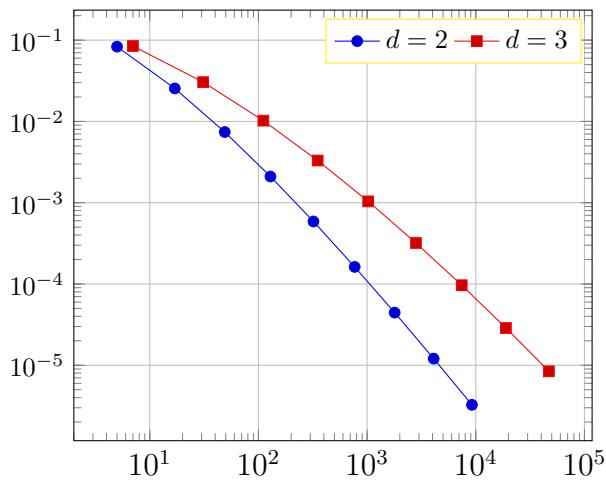

20.1.4 Using the ‘style=’ option

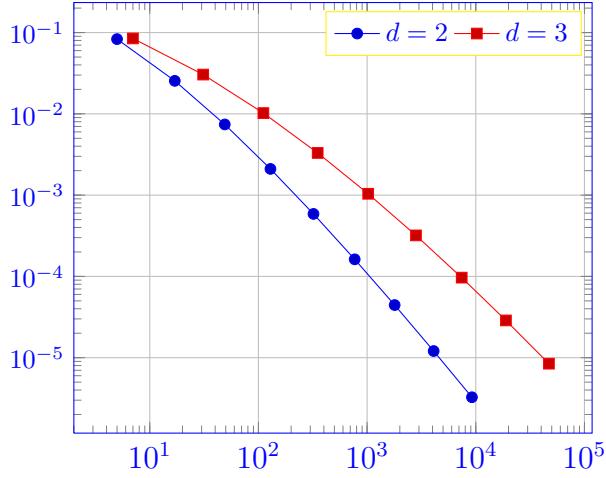

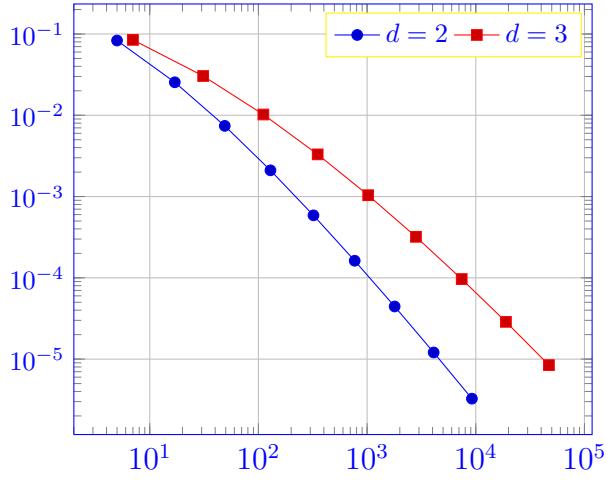

My personal title

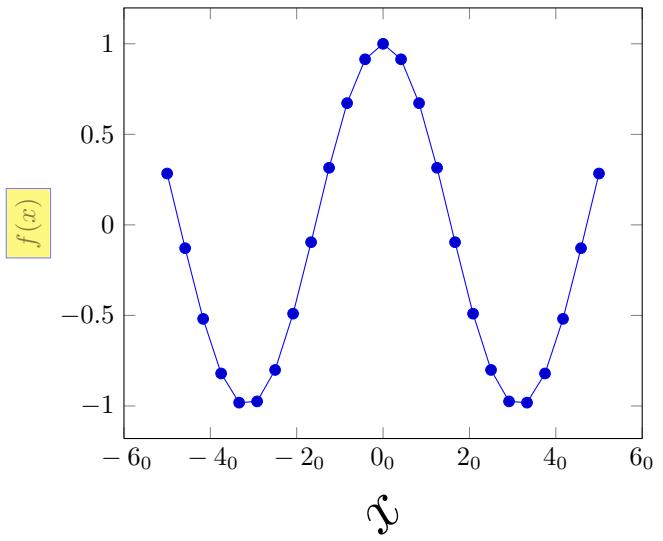

20.1.5 legend style, grid style, x label style etc. options

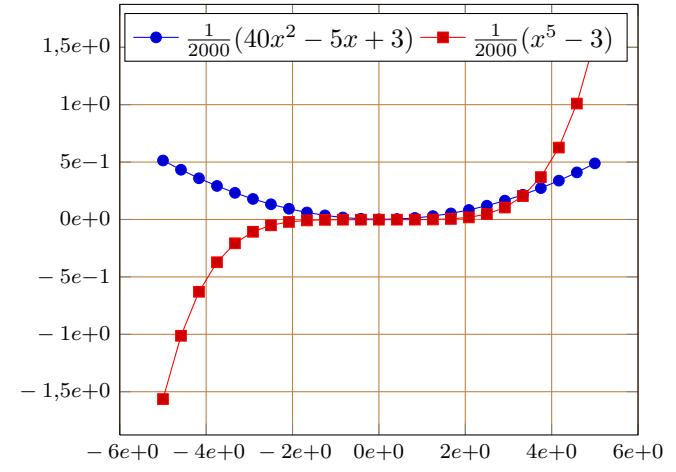

20.1.6 Providing TikZ-options to either tikzpicture or axis

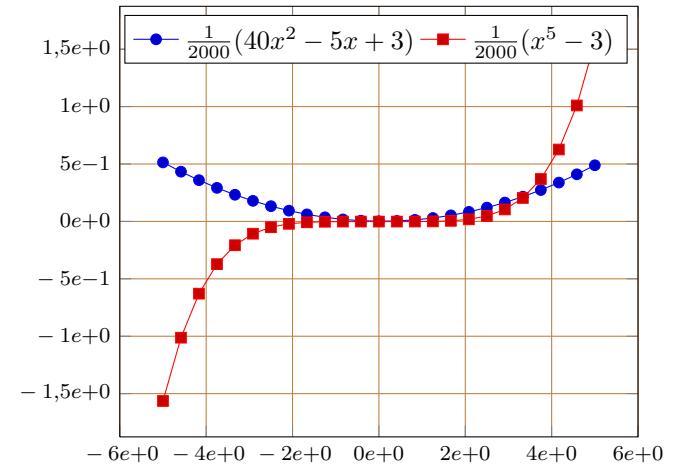

20.1.7 xlabel style and ylabel style

20.1.8 Collecting many options together

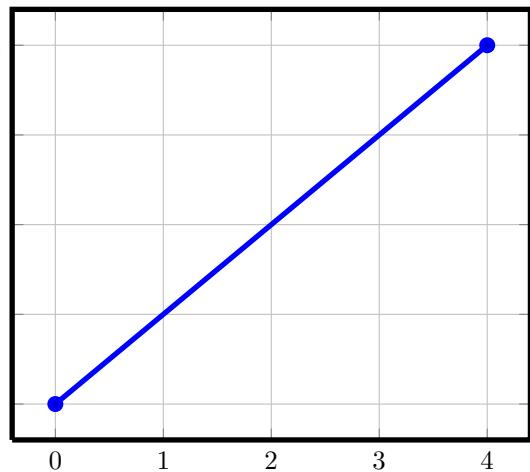

Putting the same options into a style...

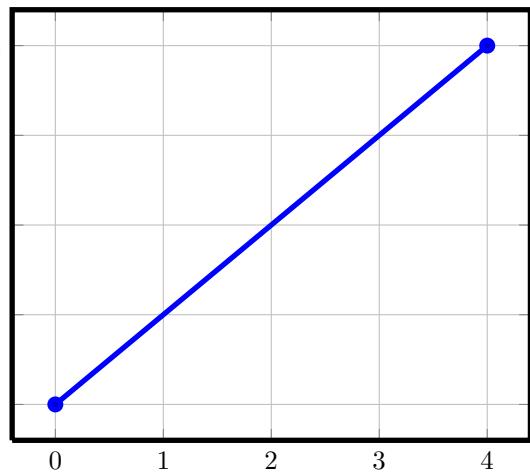

20.1.9 Line width

2pt global

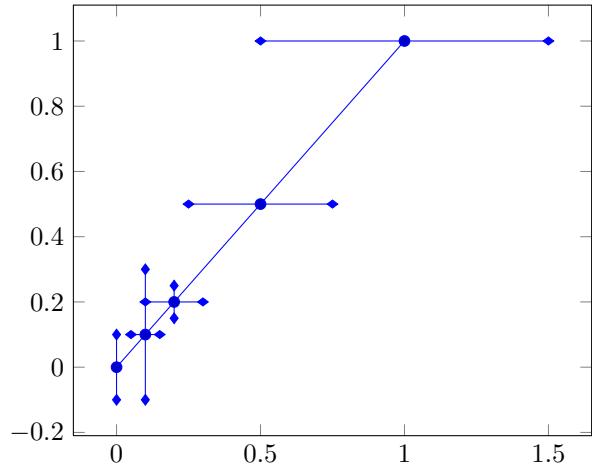

2pt in every axis

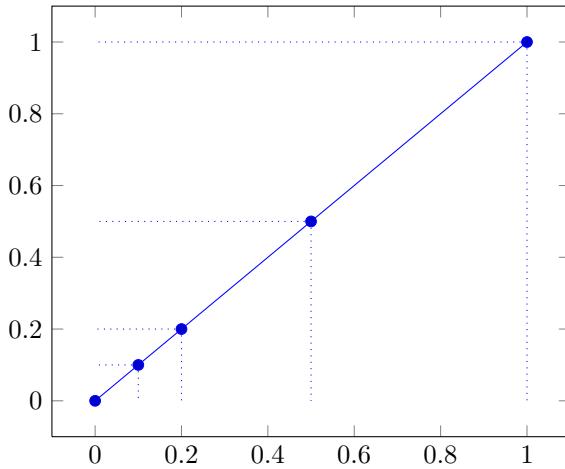

Chapter 21

pgfplotstest.errorbars.tex

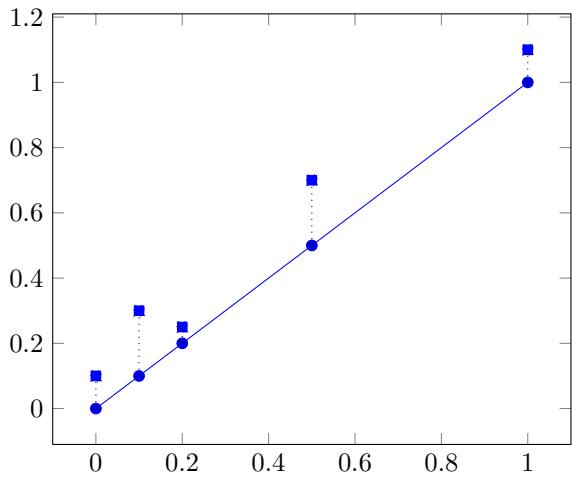

21.1 Errorbars

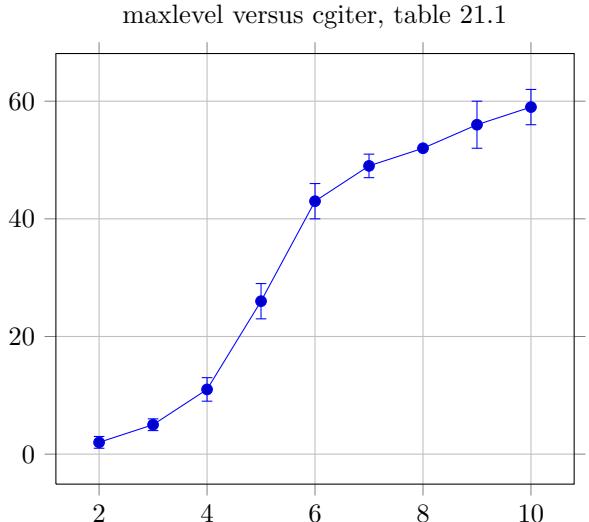

using 100% minus

changing styles

with plot table

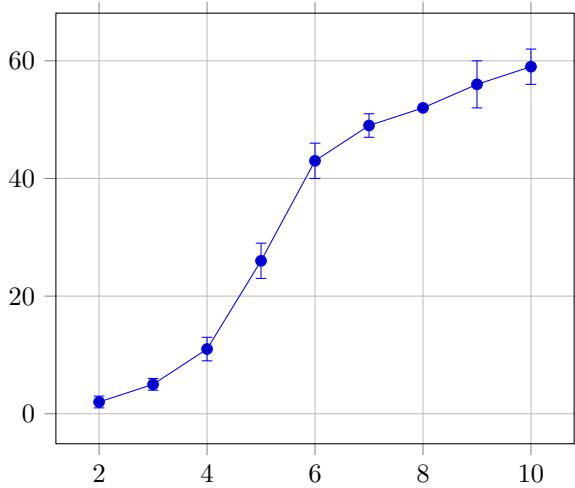

maxlevel versus cgiter, table 21.1
