

NAME

dmp – translate Troff output to low-level MetaPost input

SYNOPSIS

dmp [*option*] *ditrofffile* [*mpxfile*]

DESCRIPTION

This manual page is not meant to be exhaustive. The complete documentation for this version of T_EX can be found in the info file or manual *Web2C: A TeX implementation*.

The **dmp** program generates MetaPost source code from the *ditrofffile*. The generated code is written in *mpxfile* if it is specified, and to standard output otherwise.

dmp is typically called from scripts like **makempx**, not from the command line.

OPTIONS

dmp accepts the following options:

--help Print help message and exit.

--version

Print version information and exit.

SEE ALSO

mpost(1), **makempx**(1).
