

NAME

`dvitomp` – convert a TeX DVI file to a MetaPost MPXFILE

SYNOPSIS

dvitomp [*options*] *dvifile* [.dvi] [*mpxfile* [.mpx]]

DESCRIPTION

dvitomp translates the given *dvifile* to a MetaPost MPXFILE. The default *mpxfile* is the base-name of *dvifile* extended with ".mpx".

OPTIONS

-help write usage summary and exit.

-version
 output version information and exit.
