

**NAME**

`kpsereadlink` – print contents of symbolic link

**SYNOPSIS**

**kpsereadlink** *file*

**DESCRIPTION**

If *file* is a symbolic link, print its contents (what it links to), and exit successfully. Exit with a failure otherwise.

On systems that do not support symbolic links, **kpsereadlink** will always fail.

**OPTIONS**

**kpsereadlink** accepts the following additional options:

**--help** Print help message and exit.

**--version**

Print version information and exit.
