KPSEREADLINK(1) KPSEREADLINK(1)

### **NAME**

kpsereadlink – print contents of symbolic link

# **SYNOPSIS**

kpsereadlink file

# **DESCRIPTION**

If *file* is a symbolic link, print its contents (what it links to), and exit successfully. Exit with a failure otherwise.

On systems that do not support symbolic links, **kpsereadlink** will always fail.

# **OPTIONS**

kpsereadlink accepts the following options:

--help Print help message and exit.

--version

Print version information and exit.
