

NAME

mpto – extract labels in MetaPost pictures for typesetting

SYNOPSIS

mpto [-tex|-troff] *mpfile*

DESCRIPTION

This manual page is not meant to be exhaustive. The complete documentation for this version of T_EX can be found in the info file or manual *Web2C: A TeX implementation*.

Strip *btex..etex* and *verbatimtex...etex* parts from MetaPost input file *mpfile*, converting to either T_EX or Troff (T_EX by default). The generated code is dumped on standard output.

mpto is typically called by **makempx**, not from the command line.

OPTIONS

mpto accepts the following options:

--help Print help message and exit.

-tex Assume input file contains T_EX commands.

-troff Assume input file contains Troff commands.

--version
Print version information and exit.

SEE ALSO
