

NAME

musixflx – process mx1 files (the second pass of 3-pass MusiXTeX typesetting)

SYNOPSIS

[*texlua*] **musixflx.lua** *jobname*[*.mx1* | *.tex*] [*debugmode*]

where *debugmode* can be

- d output debugging information to the screen
- m output line numbers to the screen
- f output debugging information to *jobname.mx1* (not *mx1*)
- s output computed lines to the screen

To allow for ease of use with a batch file, **musixflx.lua** can be fed with either *jobname.mx1*, *jobname.tex*, or just *jobname*, any of which open *jobname.mx1* and create *jobname.mx2*.
