

NAME

musixflx – process mxl files (the second pass of 3-pass M_usiX_TeX typesetting)

SYNOPSIS

musixflx *jobname*[*.mxl* | *.tex*] [*debugmode*]

where *debugmode* can be

- d for debug information to the screen
- m for line numbers to the screen
- f for debug information to a log file *jobname.mxl* (not *.mxl*)
- s to get the computed lines immediately on the screen

To allow for ease of use with a batch file, **musixflx** can be fed with either *jobname.mxl*, *jobname.tex*, or just *jobname*, any of which open *jobname.mxl*.
