

This is a file to test your **AeB** installation.

To test the **AeB** installation, press this button:

Upon pressing the button, if you have installed the `aeb.js` file correctly, a congratulatory message appears in the console window; if the installation is not correct, a message informs you so.

On failure, did you close **Acrobat** before opening this file? (The JS files are only read once when the **Acrobat** application is opened.) When all else fails, try rereading the installation instructions again (`install_jsfiles.pdf`), found in the **doc** folder, but more carefully this time.

Still failing? Do you have **Acrobat DC**? Perhaps your **Acrobat** needs to be configured. Try reading `acrobat-in-workflow.pdf`, found in the **doc** folder.
