

The application will insert the largest possible stamp, while preserving the aspect ratio. The stamp is centered in the bounding box.

The following stamps are shipped with Acrobat in recent years.

Standard.pdf

Name (value of name key)	UI name	Stamp appearance
Approved	Approved	
AsIs	As Is	
Confidential	Confidential	
Departmental	Departmental	
Draft	Draft	
Experimental	Experimental	
Expired	Expired	
Final	Final	
ForComment	For Comment	
ForPublicRelease	For Public Release	
NotApproved	Not Approved	
NotForPublicRelease	Not For Public Release	
Sold	Sold	
TopSecret	Top Secret	

StandardBusiness.pdf

Name (value of <code>name</code> key)	UI name	Stamp appearance
<code>SBAppeared</code>	Approved	
<code>SBCompleted</code>	Completed	
<code>SBConfidential</code>	Confidential	
<code>SBDraft</code>	Draft	
<code>SBFinal</code>	Final	
<code>SBForComment</code>	For Comment	
<code>SBForPublicRelease</code>	For Public Release	
<code>SBInformationOnly</code>	Information Only	
<code>SBNotApproved</code>	Not Approved	
<code>SBNotForPublicRelease</code>	Not For Public Release	
<code>SBPreliminaryResults</code>	Preliminary Results	
<code>SBVoid</code>	Void	

SignHere.pdf

Name (value of name key)	UI name	Stamp appearance
SRejected	Rejected	
SHAccepted	Accepted	
SHInitialHere	Initial Here	
SHSignHere	Sign Here	
SHWitness	Witness	

Dynamic.pdf

Name (value of <code>name</code> key)	UI name	Stamp appearance
<code>#DApproved</code>	Approved	
<code>#DConfidential</code>	Confidential	
<code>#DReceived</code>	Received	
<code>#DReviewed</code>	Reviewed	
<code>#DRevised</code>	Revised	

Each stamp in the above table has a name that begins with the `#` character. When using `annot_pro`, use `\#` instead of `#`, like so, `name=\#DApproved`.

The following three sets were at one time shipped with Acrobat, you may not have some of these.

Pointers.pdf

Name (value of <code>name</code> key)	UI name	Stamp appearance
PointersBogus	Bogus
